(FEB. 1) UPI - The Bulgarian government resigned today, and the Communist Party declared it is embarking on a new course of reform.

Prime Minister Georgi Atanassov handed in his government's resignation.

Atanassov had sided with the reformists in November to remove hard-line leader Todor Zhivkov. But Atanassov had been associated with repressive policies of the Zhivkov regime, including forced assimilation of ethnic Turks.

His resignation came hours after the Bulgarian Communist Party said it was breaking with its Stalinist past to work for economic and political reform.

The moves are an apparent effort to spruce up the communists' tarnished image before democratic elections set for this spring.

The state news agency B-T-A said the resignation was prompted by the need to- quote- ''form a Cabinet on a broad national basis.''

Bulgaria joins Poland and Hungary as East Bloc countries where the communists have undergone radical transformation to keep from being completely swept away by pro-democracy tides.

Officials say riot police in Yugoslavia killed three more ethnic Albanians in armed clashes today, making a total of 22 dead in nine days of anti-Serbian demonstrations.

Tanks and armored personnel carriers roared through the streets of towns in the southern province of Kosovo. Air force jets streaked overhead.

But officials say the display of power is to impress Albanian demonstrators, while riots are being handled by the police.

Ethnic Albanians have been demonstrating in favor of more autonomy from Serbia, a state in multi-ethnic Yugoslavia. Albanians make up the vast majority in Kosovo.

Serbs hailed the passing tanks with applause and V-for-victory signs. They say they feel much safer. Some 600 Serbian women and children were evacuated from one town.

In one village, witnesses said ethnic Albanian women fired from rooftops on riot police who used tear gas to disperse some 500 protesters. One demonstrator was killed in the incident.

#90032u4682 02/01/1990 ~United Press International
(FEB. 1) UPI - Secretary of State Baker says he's delaying his trip to Moscow next week by one day. While Baker is NOT elaborating, the delay is fueling speculation that he's close to putting together a three-way meeting on the Middle East. A spokeswoman says ''NO meeting is scheduled '' but she did NOT rule out an encounter between Baker and the foreign ministers of Egypt and Israel.

Attorney General Thornburgh is going along with calls from Democrats on the House Judiciary Committee that he seek the appointment of a special prosecutor to investigate Samuel Pierce. The probe would focus on alleged wrongdoing by Pierce and other HUD officials while Pierce headed the

Department of Housing and Urban Development under former President Reagan. A federal court would be in charge of appointing a special prosecutor.

The man who presided over one of the most volatile periods in the history of the New York Stock Exchange is leaving his job. John Phelan today announced he's resigning at the end of the year as chairman and chief executive of the exchange. Phelan also scotched rumors that he'll replace Treasury Secretary Brady by saying he's NOT taking a government post at this time. For the past six years, Phelan has guided the exchange through record growth, scandals and the biggest market drop in history.

Attorneys for reputed mob crime boss John Gotti have put a twist in their defense. They produced a prosecution document from an unrelated Manhattan case suggesting a union rival- and NOT Gotti- ordered the wounding of Carpenters Union official John O'Connor. But prosecutors say the document has nothing to do with Gotti's case. Prosecutors today rested their conspiracy and assault case against Gotti in New York.

#90032u4712 02/01/1990 ~United Press International

(FEB. 1) UPI - Czechoslovakia's secret police turned in their weapons today, with the last of their units officially dissolved. The move comes three days after officials warned that former police agents were possibly plotting to overthrow the non-communist government. Czech officials say the files and offices of the hated secret police will be sealed, effective tomorrow.

Another sign of change in the Soviet Union. The city of Moscow today joined the World Association of the Major Metropolises, becoming the first Eastern Bloc city to become a member of the organization made up of the world's 37 largest cities. The group meets periodically to exchange information and to discuss ways to solve common problems- such as pollution and transportation.

Government health officials say a 40-year high in the number of syphilis cases may be a sign that the ''safe-sex'' revolution isn't so safe. The number of cases of syphilis reached an estimated 44-thousand last year, a 56-percent increase from 1986. The federal Centers for Disease Control says homosexual men are apparently using safer sexual habits. But the agency says teen-agers and drug users are ignoring warnings against unprotected sex.

LAS VEGAS (FEB. 2) BUSINESS WIRE - National Heritage Industries (NASDAQ: NHER) Friday announced that it has exercised its option to repurchase

250,000 shares of its common stock from Madison Venture Capital Partners of New York city at 5 cents per share.

This option to repurchase was part of an agreement in which Madison Venture Capital was to help obtain a firm commitment for a public offering of $3 million to $5 million convertible debentures or convertible preferred stock. The firm commitment was to be secured by Dec. 31, 1989, and was contingent upon terms and conditions satisfactory to National Heritage Industries Inc.

The company had intended that the proceeds of the offering would be used for land purchases and construction financing on several National Heritage projects. Conventional financing has now been obtained for the projects in question, and all are in various stages of development and construction.

AKRON, OH (FEB. 2) BUSINESS WIRE - Resource America Inc. (NASDAQ:REXI) (the ''Company'') announced revenues and net income for the quarter ended Dec. 31, 1989, as follows:

	Quarter Ended Dec. 31, 1989	1988
Revenues	$3,063,363	$1,313,457
Income from operations	$ 869,279	$ 26,240
Gain on sale of property	7,240	15,407
Provision for income taxes	220,000	--
Net income	656,519	41,647
Stockholders' equity	$23,164,499	$21,186,056
Average shares	7,011,000	5,932,000
Net income per share	9 cents	1 cent

The Company stated that substantially improved revenues and net income for the first quarter of fiscal 1990 over the corresponding fiscal 1989 period were primarily a result of the completion of its 1989 Pipeline Income Program on Dec. 18, 1989.

The Company further stated that on Dec. 28, 1989, it completed a private drilling program that will drill 26 development gas wells in eastern Ohio prior to March 31, 1990. Revenue and drilling expenses related to this program will be recorded during the Company's second quarter.

#90033b0013 02/02/1990 ~Business Wire
APPLETON, WI (FEB. 2) BUSINESS WIRE - It was announced by Valley's President and Chief Executive Officer Peter M. Platten III, that the purchase of the First National Bank, Chippewa Falls was completed on Jan. 31, 1990.

With the addition of $118 million-asset First National Bank and the concurrently announced purchase of the $21 million-asset Peoples State Bank of Three Lakes, Valley has total assets of $3.3 billion and more than 100 banking offices.

Platten stated, ''We are enthused about expanding Valley's presence in western Wisconsin. The added presence in this fast developing market will provide benefits from additional economies inherent with a larger asset base.

''Valley also serves this market with two locations in Menomonie. This acquisition fits with Valley's philosophy of expanding our existing markets to meet our goals relative to growth and profitability potential.''

Valley Bancorporation is the third largest bank holding company headquartered in Wisconsin. Valley, with assets of $3.3 billion, currently serves Wisconsin through more than 100 banking offices with additional financial service companies engaged in leasing, insurance, data processing, software development and sales, trust service, brokerage, and credit card servicing.

The company's common stock is traded on the National Market System under the NASDAQ symbol VYBN.

#90033b0034 02/02/1990 ~Business Wire
SOUTH SAN FRANCISCO, CA (FEB. 2) BUSINESS WIRE - Genentech Inc. (NYSE: GNE) and Roche Holding Ltd. Friday agreed to a pioneering agreement in which Roche will invest approximately $492 million in capital into Genentech and purchase half of its stock for $36 per share.

The $36 price is a 65 percent premium above the closing stock price

yesterday. After the transaction, there will be approximately 112 million voting shares of Genentech stock outstanding, of which Roche will own 60 percent.

So as to maintain its unique science-driven culture for the benefit of all stockholders, Genentech will continue as an independent, publicly traded company. Under the agreement, Roche will have two members on the Genentech board of directors, which will be expanded from 11 to 13 members. The transaction, which will be structured as a merger, will be submitted to Genentech stockholders for approval at a meeting planned for April.

"Genentech will have the resources and the independence to fully deliver the dream of biotechnology," said Robert A. Swanson, founder of Genentech. "I believe that by the turn of the century essentially every new drug will be touched in its development by biotechnology."

"Long-term commitment to medical research is often at odds with today's short-term investment focus. We now have the ability to build Genentech's revenues and profits by taking advantage of our abundant product pipeline " Swanson said.

Under the agreement, which the Genentech board of directors approved today, Genentech stockholders will receive $36 per share in cash for half their shares. The other half of Genentech's outstanding shares will be converted into new Genentech redeemable common stock, which will be substantially identical to the existing Genentech common stock, except that it will be redeemable at the option of Roche.

Roche will have the right to exercise its option, providing it does so for all of Genentech's outstanding shares, at $38 per share prior to Dec. 31, 1990 and at $39 per share from Jan. 1, 1991 to March 31, 1991.

Thereafter, the redemption price becomes $40 per share and increases by $1.25 per share every quarter to $60 per share on April 1, 1995. The redemption right expires on June 30, 1995. Genentech expects that it will incur a one-time charge of approximately $150 million in merger related expenses at the time of consummation of the merger.

Independent of the redemption right, Roche has the right to purchase, in the open stock market, up to a maximum of an additional 15 percent of Genentech stock, beyond the initial 60 percent holding.

#90033b0047 02/02/1990 ~Business Wire
IRVINE, Calif.--(BUSINESS WIRE)--American Savings Bank Friday reported $214.2 million in earnings for 1989.

The final results are subject to completion of an audit by the company's auditor, KPMG Peat Marwick.

Retained earnings increased by $139.8 million. No dividends have been distributed to the investor group that acquired American Savings.

American Savings has substantially streamlined its operations by consolidating about 20 office locations statewide into three major centers to operate more productively and efficiently. American Savings Plaza in Stockton consolidated 10 former facilities under one roof, and now houses operations for the bank. Stockton continues to serve as its headquarters location.

Irvine Plaza serves as American Savings' administrative center into which nine separate Southern California facilities now are being consolidated. Technical support operations remain in Fullerton. Many duplicate operations were consolidated into the new centers.

The bank currently meets all of the new capital requirements -- without the benefit of regulatory forebearances -- including the, ''fully phased-in'' capital standards which will go into effect after 1992. Tangible and core capital are both 3.01 percent. Required tangible capital for the industry is now 1.5 percent, while the core capital requirement is 3 percent.

The bank's risk-based capital is 11.2 percent, higher than both the 6.4 percent required today and the 8 percent that will be required after 1992.

American Savings Bank was created on Dec. 28, 1988, following the acquisition by the Robert M. Bass Group of all branches and certain assets of American Savings and Loan Association. American Savings Bank, with headquarters in Stockton, has 177 retail savings branches throughout the state of California.

NOVATO, CA (FEB. 2) BUSINESS WIRE - Harding Associates Inc. (NASDAQ/NMS:HRDG) has expanded its board to 11 directors from the nine previously authorized, and elected Eric G. Lappala to fill one of the

vacant seats.

A search will be conducted to fill the other seat with a fourth outside director.

Elected to serve until the annual meeting of shareholders this fall, Lappala is senior vice president of technical services. He has more than 20 years experience ad provides consulting services to industrial and non-regulatory government clients. He also serves as a client sponsor for selected major corporate clients and is headquartered in the company's Princeton, N.J. office.

Lappala received a bachelor of science degree in watershed management from Colorado State University in Fort Collins, Colo., in 1968, and an M.S. in civil engineering from the University of Nebraska in 1975. Prior to joining Harding in 1983, he spent 13 years as a hydrologist with the U.S. Geological Survey, water resources division.

Harding Associates Inc., through its wholly owned subsidiaries Harding Lawson Associates and Harding Construction Services, provides a broad range of engineering, environmental and construction services related to hazardous and solid waste management and the remediation of contaminated sites. The company has 15 offices located in California, Alaska, Arizona, Colorado, Hawaii, Nevada, New Jersey, Texas and Washington.

DALLAS (FEB. 2) BUSINESS WIRE - Atmos Energy Corp. (NYSE:ATO) announced Friday that Western Kentucky Gas Co., one of its operating units, is publishing a notice of proposed changes in gas rates in newspapers of general circulation in its Kentucky service area.

The notice is being published in accordance with the rules and regulations of the Kentucky Public Service Commission (KPSC).

The company intends to file its application with the KPSC on Feb. 13, 1990. The KPSC may suspend the rates for up to five months to permit a full investigation. By Kentucky statute, the KPSC must act on the filing within ten (10) months of the filing date.

The proposed rates are expected to generate approximately $8.9 million per year in additional revenues. They will result in an overall increase of approximately 8 percent for Western Kentucky Gas Co.

Atmos Energy Corp. provides natural gas service to more than one-half million customers in three states through its operating companies: Energas Co., Trans Louisiana Gas Co. and Western Kentucky Gas Co.

GLENDALE, CA (FEB. 2) BUSINESS WIRE - Spear Financial Services Inc. (NASDAQ:SFNS) Friday announced that it expects to report a loss when the results of its 1989 audit are available.

Typically, the company does not separately report fourth-quarter earnings but waits until its outside auditors have completed their work.

Speaking on behalf of the company, Charles M. Spear, chairman, said: ''It appears that we will have a pre-tax loss of about $450,000 for the year. This is a substantial improvement over 1988, when our pre-tax loss was $1,516,130, and the fourth quarter should be much better than the same period last year. Nevertheless we are disappointed with these results in light of a revenue increase which should exceed 75 percent.

''We expect that the company's securities operations, TCW Inc., and Spear Securities Inc., will have improved results when compared to 1988, and that James Mitchell & Co. will have results which approximate those of 1988,'' Spear concluded.

ENGLEWOOD, CO (FEB. 2) BUSINESS WIRE - U S WEST Inc. (NYSE:USW) Friday announced that Pierson S. (Sandy) Grieve, chairman and chief executive officer of Ecolab Inc., St. Paul, Minn., has been elected to the U S WEST

board of directors, effective April 2.

Ecolab is a leading worldwide developer and marketer of premium cleaning, sanitizing and maintenance products and services for the hospitality, institutional and residential markets.

The company's ChemLawn subsidiary offers residential lawn care, tree and shrub maintenance and pest control. Ecolab employs 13,000 people and has manufacturing facilities in the United States and 25 foreign countries.

Grieve, 62, assumed his current post in 1983. He is a graduate of Northwestern University.

''Sandy Grieve brings a wealth of experience to our board,'' said Jack A. MacAllister, chairman and chief executive officer of U S WEST. ''We're pleased and fortunate to have a business and community leader of his stature join us. We look forward to his participation in our company.''

Grieve is active in Twin Cities business and community activities. He serves on the Advisory Council of the J.L. Kellogg Graduate School of Management at Northwestern University and on the Board of Overseers of the Curtis L. Carlson School of Management at the University of Minnesota. He is chairman of the Guthrie Theater of Minneapolis and of the Minnesota Business Partnership.

Grieve is a director of Diversified Energies Inc.; St. Paul Companies Inc.; Meredith Corp.; and Norwest Corp.

Grieve's election brings the number of U S WEST directors to 14. U S WEST owns U S WEST Communications and other companies involved in communications, data solutions, marketing services and financial services.

MOUNTAIN VIEW, CA (FEB. 2) BUSINESS WIRE - Software Publishing Corp. Friday announced the formation of a corporate marketing organization, in a strategic effort to heighten awareness between the company and its business productivity software products.

Kevin Conway, formerly vice president of North American sales, assumes corporate marketing responsibilities with the newly created position of vice president, corporate marketing and North American sales. Conway, who will oversee an organization of over 140 people, reports directly to Fred

M. Gibbons, president and chief executive officer of Software Publishing Corp.

Conway joined Software Publishing in 1987 after spending 17 years in various management positions with IBM. Barbara Blumenthal, previously director of corporate communications, was named director of corporate marketing.

''Our customer-based research, indicates that vendor name recognition is becoming increasingly important,'' Gibbons said. ''The creation of a corporate marketing organization provides a vehicle for communicating to our customers the synergy between our products, and the corporate-wide services available.''

The corporate marketing organization is chartered with driving corporate-wide promotions, programs and services, including co-marketing agreements, vertical marketing activities, market research and marketing communications.

Software Publishing Corp., one of the original personal computer software companies, is a leading international supplier of business productivity software for the IBM personal computer and compatibles.

The company develops and markets software in four product families: entry-level products through the PFS:First Series; products for the business professional through the Professional Series; graphics and specialty products through the Havard Series; and full-featured word processing software through the OfficeWriter Series.

SAN FRANCISCO (FEB. 2) BUSINESS WIRE - Seawadon L. Houston, 47, has been named an executive vice president of Wells Fargo Bank.

Houston manages the consumer checking division, which houses more than 2 million checking accounts for the bank's retail group.

A 25-year employee of Wells Fargo, Houston has had a wide range of assignments with the bank, beginning his career as an operations officer. In 1970 he was named branch manager of the Third and Revere office in San Francisco. He was promoted to vice president in the investment division in 1974. In 1976, he became loan supervisor, and in 1978 became regional manager of the Peninsula region.

He was named senior vice president and division manager of the Pacific Bay division in 1983 before establishing and managing the consumer checking division in 1988.

Houston received his bachelor's degree in business from Golden Gate University in 1972. He is also a graduate of Stanford University's Sloan Program and the Pacific Coast School of Banking in Seattle.

He is a member of the board of directors for the San Mateo county Economic Development Association, the San Mateo Council of the Boy Scouts of America and the Mills-Peninsula Hospital Foundation. He is also a member of the Bay Area Urban Bankers Association.

Houston resides in Millbrae.

#90033b0114 02/02/1990 ~Business Wire

TOLEDO, OH (FEB. 2) BUSINESS WIRE - Owens-Illinois Inc. reported increased sales and improved operating profit for the 1989 fourth quarter and for the full year.

Net sales for the quarter ended Dec. 31 were $922.4 million compared with $851.9 million in 1988. Sales for the full year were $3.605 billion in 1989 and $3.572 billion in 1988.

The fourth-quarter sales benefited from the acquisition of the remaining 50 percent interest in United Glass Ltd., the company's affiliate in the United Kingdom, while for the full year this increase was largely offset by the effects of divestitures in the first and second quarters.

For the 1989 fourth quarter, operating profit, before interest, taxes and equity earnings, was up 72 percent, to $91.7 million, from $53.3 million in the comparable 1988 period. For the full year, operating profit increased 12.5 percent, to $446.3 million, compared with $396.6 million in 1988.

The improved operating profit in the quarter and the full year resulted in part from continued emphasis on manufacturing performance improvements, including further cost savings from the integration of the operations of Brockway Inc., which was acquired in February 1988. In addition, the fourth-quarter results benefited from improved margins and the United Glass acquisition.

Primarily because of the effects of incremental interest cost incurred in

connection with the acquisitions of the predecessor company and Brockway, the company recorded a loss for the fourth quarter and the year.

For the quarter, the company had a net loss of $31.6 million, compared with a net loss of $49.3 million in the fourth quarter of 1988. For the year, the company had a loss before extraordinary items of $67.6 million, compared with a loss of $59.1 million in 1988. The improved operating profit for the year was offset by higher interest rates and higher income tax provisions.

The net loss for 1989 was $108.1 million, which includes an after-tax extraordinary charge of $40.5 million associated with the refinancing of $2.4 billion of bank debt, completed during the second quarter.

SUNNYVALE, CA (FEB. 2) BUSINESS WIRE - Han Bruggeling, president of Boole & Babbage Inc. (NASDAQ:BOOL) Friday announced that Boole & Babbage has completed its acquisition of Avant-Garde Computing, a company specializing in network management systems.

''This merger furthers our strategy of offering products that integrate and automate the monitoring and management of host and network systems, consistent with our MainView systems management architecture,'' stated Bruggeling. ''During the past year Boole & Babbage has made investments that have positioned it to be able to support the information systems infrastructure of the '90s.

Our network-related investments were made in recognition of the fact that performance measurement and automation products will not satisfy customer needs into the 1990s if they stop with host solutions only,'' Bruggeling continued.

''By combining the expertise of Boole & Babbage in host system management, we are now the only independent company offering end-to-end monitoring and control of the multi-vendor enterprise information system.''

Bill Ahlstrom, formerly senior vice president, international, for Avant-Garde, will become senior vice president, Corporate Marketing for Boole & Babbage and president of Avant-Garde, responsible for managing the integration of Avant-Garde and Boole & Babbage operations.

Boole knows host operations as few others do. Avant-Garde knows networks as few others do. Together, we have a truly unique perspective on

monitoring, managing and automating complex information systems.

Our products provide exceptional capabilities for end-to-end monitoring and management --from end user to application. And that's what our customers are asking for,'' he added.

Avant-Garde will continue its operations in Mt. Laurel, N.J.

Boole & Babbage is a leading developer and worldwide distributor of software products for information systems management and automation.

The company markets its products in the United States through its domestic sales organization, Empact Software, and Mission Computer Services, and internationally through The European Software Co. and distributors in Australia, Japan, the Pacific Rim and Latin America.

LONGMONT, CO (FEB. 2) BUSINESS WIRE - MiniScribe Corp. Friday announced that it has been awarded a contract to supply its models 8051A disk drives to Epson on a worldwide basis.

In addition to the Epson contract, the company also announced agreements to supply model 8051A drives to Acer, Amstrad, AST, Tandy, Tulip, Wyse and more than 50 other customers worldwide.

The 8051A has been in production for over two years and features 41MB of formatted storage and an integrated AT controller in a 3-1/2-inch form factor.

According to product manager Brian Smith: ''The 8051A success is due to the performance, design stability and demonstrated reliability of the product, as well as its two-year warranty and 150,000 hour MTBF. I anticipate that the value of these agreements will exceed $200M in 1990.''

PHOENIX (FEB. 2) BUSINESS WIRE - Robert Stallings, chief executive officer for Western Savings and Loan Association F.A., Friday announced he will leave Western effective Feb. 9, 1990 to concentrate his efforts on an investor group seeking to purchase the association.

''I feel it's the appropriate move to make at this time,'' said Stallings. ''It gives me a better opportunity to put together a successful proposal for Western Savings, plus avoids any potential conflict of interest. I view it as a positive step toward the ultimate resolution of the company.''

Western Savings was formally offered for sale by the Resolution Trust Corp. on Jan. 11, 1990. Interested parties have approximately four weeks from that date to submit a letter of intent to RTC and become qualified as bidders for the association. A bidders' conference will then be held, with a subsequent due diligence period for all prospective purchasers. The deadline for final bids is expected by early in the second quarter.

James Reis, executive director of financial planning, will also leave Western as of Feb. 9, 1990 to assist Stallings in preparing the offer for Western Savings. Gary Miller, Western's president, will remain with the association and continue to head its management team.

Western Savings, a Phoenix-based federal mutual savings association, has 62 locations and manages $5.6 billion in assets.

ORANGE, CA (FEB. 2) BUSINESS WIRE - Westcorp Inc. (ASE:WES), the Irvine, Calif. diversified financial services company, whose principle subsidiary is Western Financial Savings Bank, Friday announced earnings for the quarter ending Dec. 31, 1989 of $2.3 million, or 14 cents per share.

While net interest income reached record levels for the period, the cost of adjusting the book value of its high yield bond portfolio reduced net income below the $3.2 million, or 19 cents per share, earned during the like period of 1988.

In keeping with the accounting rules determined by last year's Financial Institutions Reform Recovery and Enforcement Act (FIRREA), Westcorp reduced the value of its high yield bond portfolio by $8.1 million for the year which decreased net income $4.8 million, or 29 cents per share.

The result was annual net income of $9.3 million, or 56 cents per share. Absent the requirement to adjust the value of these assets, income before the cumulative change in accounting for income taxes would have been 14 percent greater than 1988.

Since the end of 1988 the company has also reduced the size of its

previously mentioned bond portfolio from nearly $100 million to $56 million, reducing it to less than 2 percent of assets.

In a related announcement Western Financial Savings Bank stated that at year-end 1989 core and tangible capital was 137 percent of the new regulatory capital requirements passed by Congress last year. In addition the bank's risk based capital equaled 139 percent of the requirement at Dec. 31, 1989.

Western Financial Savings Bank operates 21 retail branches, 10 real estate lending offices, 23 consumer finance outlets and five automobile finance centers throughout California.

DENVER (FEB. 2) BUSINESS WIRE - Quinoco Petroleum Inc. has completed production testing on the A.L. Boudreaux No. 1 Well in Scott Field, Lafayette Parish, La.

Initial test results indicated productive potential of 15.1 MMCFPD and 400 BCPD on a 18/64-inch choke, with a flowing tubing pressure of 9,080 psi from perforations in a portion of the Bol Mex 3 Formation.

Quinoco Petroleum Inc. operates the well on behalf of its affiliated limited partnerships Energy Development Partners Ltd. (AMEX:EDP), Quinoco Consolidated Partners L.P., and May Limited Partnerships 1983-1, 1983-2 and 1983-3, which collectively participated in the drilling and completion of the well with a 43.1752 percent working interest.

It is anticipated that the well will be unitized upon application to the commissioner of conservation of the state of Louisiana, and that after such unitization the interest of Quinoco and its affiliates will be adjusted.

Other industry partners include Union Exploration Partners Ltd., a limited partnership managed by Union Oil Co. of California; American Exploration Co.; Sandefer Oil Co.; Triton Oil & Gas Corp.; and Arlington Exploration Co.

LOS ANGELES (FEB. 2) BUSINESS WIRE - Advertising revenue at the Los

Angeles Business Journal increased 86 percent between 1988 and 1989 and, continuing the trend, has doubled during the first months of 1990, compared to last January, President and Publisher Tom Link announced last week.

''We're very pleased with the results which reflect, in part, the dynamic Los Angeles market,'' Link said.

The newspaper, which publishes 52 weekly issues annually as well as numerous special publications, last year observed its 10th year of operation. It is owned by CBJ Associates Inc., which also owns the San Diego Business Journal and the Orange County Business Journal, based in Newport Beach.

The average total page count of the Los Angeles Business Journal in 1989 moved from about 40 pages at the beginning of the year to nearly 80 pages late last year. The 1990 Book of Lists, published in late December, produced the largest amount of advertising revenue of any of its predecessors in Los Angeles Business Journal history, Link said.

At the San Diego Business Journal advertising revenue also exceeded 1989 projections and the Orange County Business Journal, acquired by CBJ Associates last year, reported a strong showing, Link added.

As part of its growth strategy for the 1990s the Los Angeles Business Journal will embark on a new mass marketing campaign designed to boost is paid subscription, Link added.

COLUMBUS, OH (FEB. 3) BUSINESS EDITORS - BANC ONE CORP. (NYSE:ONE) Friday announced that the Resolution Trust Co. (RTC) has accepted its bid of $45 million to assume the liabilities and purchase some of the assets of the Bright Banc Savings Association, Dallas.

Effective Monday, Feb. 5, BANK ONE, TEXAS N.A., will operate the 48 banking offices of Bright Bank as BANK ONE, TEXAS, offices. These offices are concentrated in the Dallas/Fort Worth area.

John B. McCoy, chairman and chief executive officer of BANC ONE CORP., said: ''This is a great opportunity to begin the execution of the BANK ONE, TEXAS, retail strategy. This acquisition will allow us to expand our retail distribution system immediately, which is a primary objective.''

BANC ONE CORP.'s ''clean bank'' bid involves the assumption of

approximately $2.7 billion of deposit liabilities. The loan portfolio BANC ONE CORP. will acquire consists of approximately $900 million of one-to-four family residential mortgages and $145 million of installment loans.

BANK ONE, TEXAS, which recently joined BANC ONE CORP., has 59 banking offices located in major markets throughout Texas with assets of approximately $11 billion.

In addition, BANC ONE CORP. had assets of $26.6 billion and common equity of $2.25 billion at year end 1989. BANC ONE CORP. now operates banking organizations in Indiana, Kentucky, Michigan, Ohio, Texas and Wisconsin.

VENTURA, CA (FEB. 2) BUSINESS WIRE - Benton Oil & Gas Co. (OTC:BNTN) announced that it is calling for redemption of its outstanding warrants.

The redemption date has been set as March 5, 1990. ''As previously announced, we are seeing a lot of excellent opportunities such as the Pershing waterflood and the Gulf of Mexico property interests that we have acquired during the last year. These are producing oil and gas properties which offer immediate production revenues and, as important to us, additional exploration and development potential.

''As the oil and gas industry continues to improve, however, more companies will join the hunt for good properties. We doubt that these kinds of attractive deals will continue to be available much longer,'' said Alex Benton, president and chief executive officer. ''In order to take advantage of these opportunities, the company has been considering several financing options.

''We recently filed with the Securities and Exchange Commission a post-effective amendment to our prospectus for the calling of our warrants. We also continue to evaluate private placements of debt or equity, on either a corporate or project basis.''

Benton issued 805,000 warrants to the public as part of its initial public offering in March 1989. Each warrant (traded OTC under the symbol BNTNW) entitles the holder to purchase one share of Benton's common stock for $7.50 or to receive 50 cents if the holder elects not to exercise the warrant. For the period Dec. 1, 1989, through Jan. 31, 1990, Benton's common stock traded in the range of $9-$10.25 and its warrants traded in the range of $2.25-$3.

If all these warrants are exercised, Benton will receive approximately $6 million. Proceeds from the warrant call or any other financing transaction would be used primarily for the acquisition and development of producing properties and drilling prospects and for the reduction of Benton's outstanding indebtedness.

Benton Oil & Gas Co., based in Ventura, is an independent exploration and development company with operations in California, Colorado, Oklahoma, Texas and Louisiana. Benton's common stock (BNTN) and warrants (BNTNW) are traded OTC.

SAN JOSE, CA (FEB. 2) BUSINESS WIRE - Circadian Inc. (NASDAQ:CKDN), a leading supplier of non-invasive diagnostic medical products for the physician's office market, reported a loss for the second fiscal quarter ended Dec. 31, 1989 of $167,000 on sales of $4,232,000.

The loss was a 47 percent reduction over the loss recorded in the second quarter of the last fiscal year, while sales increased by 2.5 percent.

Dr. Peter Chang, president, chief executive officer and chief financial officer, commented that the actions taken over these past few months are paying off in increased gross profit margin, and a lower breakeven point. As a result, the loss has been reduced by 47 percent, even with virtually flat sales.

Circadian's products include ambulatory heart monitoring, stress testing, vascular screening, ultrasound imaging, and other non-invasive diagnostic systems. Its corporate headquarters are in San Jose, Calif.

#90033b0622 02/02/1990 ~Business Wire

ENGLEWOOD, COL (FEB. 2) BUSINESS WIRE - Nu-West Industries Inc. (NASDAQ:FERT) announced that its subsidiary, Nu-South Industries Inc. has filed a voluntary petition for protection from its creditors under Chapter 7 of the U.S. Bankruptcy Code with the Bankruptcy Court for the Southern District of Mississippi in Biloxi.

The principal asset of Nu-South is a phosphate fertilizer production facility in Pascagoula, Miss. A Chapter 7 proceeding provides for the liquidition of the corporation and its assets in an attempt to satisfy the claims of creditors.

Nu-South has been attempting to find a buyer for its operations for several months. The Pascagoula plant has experienced severe cash flow difficulties since summer, and ceased production operations in early December.

As a result of the continuing financial drain and the inability to obtain acceptable offers, Nu-South has concluded that a bankruptcy filing is the best course available at this time.

''We are very disappointed that a bankruptcy filing by Nu-South was necessary. We have pursued many alternatives in an attempt to maintain employment and satisfy creditors over the past several months, but were unsuccessful in arranging a sale of the facility.

''Nu-South was able to reduce outstanding trade credit balances by approximately two-thirds from the level outstanding last summer, but that is little comfort to its creditors and employees,'' said Mack A. Barber, executive vice president of Nu-South.

Craig D. Harlen, president and chief executive officer of Nu-West said, ''The bankruptcy of Nu-South will not have a material adverse effect on the ongoing operations or finances of Nu-West.

''We can now focus our attention on strenghening our core business around the successful phosphate fertilizer operation in Conda, Id. and develop improvements and diversifications in by-product streams designed to enhance its earning power.''

Nu-West is engaged in the manufacture and sale of phosphate fertilizer products.

SAN ANTONIO, TX (FEB. 2) BUSINESS WIRE - DocuCon Inc. (NASDAQ: DOCU) a San Antonio based document conversion service company, announced that it has started work on a contract with a value of $400,000 to convert aperture cards to digital images for use on the U.S. Army's DSREDS engineering drawing management system located at the U.S. Army Information System Command in St. Louis.

It is estimated that there is a combined volume of 50 million aperture cards within the Army and the Air Force, which both use the DSREDS format.

The contract was awarded to DocuCon by VSE Corp., an Alexandria, Va., based company that provides a wide variety of engineering services to the Department of Defense.

''To my knowledge, this project represents the first time that conversion of drawings for a DSREDS system has been accomplished off site, and is a continuation of document conversion services that we have been providing to the DOD since 1987,'' said Allan Hobgood, vice president, marketing for DocuCon.

DocuCon is a leader in converting paper documents to optical disk storage. Specializing in high-volume conversion, DocuCon's market includes government and commercial and legal firms.

ROCHESTER, NY (FEB. 2) BUSINESS WIRE - Eastman Kodak Company's worldwide capital expenditures for 1989 totaled $2.1 billion, Kodak chairman and chief executive officer Colby H. Chandler announced Friday.

Approximately $1.6 billion of the total was spent for projects in the United States, and about $900 million was spent in Rochester, N.Y., the company's headquarters city and principal manufacturing site.

In 1988, Kodak's capital expenditures totaled $1.914 billion worldwide, about $1.450 billion in the United States, and some $890 million in Rochester.

The company's 1990 capital plan calls for approximately the same level of spending as in 1989 with a similar pattern of distribution. Chandler noted that capital proposals will be reviewed in light of overall business conditions as projects are presented for approval. Spending Breakdown

Approximately $900 million was spent on projects in Kodak's imaging segment in 1989, including increased finishing capacity for 35mm films, construction of a facility to manufacture cellulose triacetate film base and continued support for invariant quality initiatives. A number of environment-improvement programs went forward in Rochester to install state-of-the-art chemical storage tanks and to further reduce chemical emissions.

In its information systems segment, Kodak spent about $450 million in 1989 for a range of projects, including the production of copiers for lease to customers. Among other projects, the company improved production and increased capacity for optical disk products, centralized finishing activities for business imaging systems, and added tooling and equipment for new copy products in Rochester and Stuttgart, Germany.

At Eastman Chemical Company, 1989 expenditures of approximately $500 million were made for projects such as those to expand facilities for production of chemicals from coal and to add filter tow capacity in

Kingsport, Tenn.; to increase polypropylene and neopentyl glycol capacity and to continue construction of a waste-water treatment facility in Longview, Tex.; to erect new finishing reactors for manufacture of bottle polymer in Columbia, S.C.; and to complete a bottle polymer manufacturing plant in Toronto, Canada.

In Kodak's health segment, 1989 expenditures of approximately $250 million accounted for projects such as a new x-ray film finishing facility in Windsor, Colo., and pre-construction activity for Sterling Drug's planned research and development facility in Upper Providence Township, Penn. 1990 Capital Projects

Many of Kodak's 1989 capital projects will extend into 1990.

PHOENIX (FEB. 2) BUSINESS WIRE - America West Airlines (NASDAQ:AWAL, PSE:AWA) is awarding free tickets to FlightFund members, in addition to normal mileage accrual, between Feb. 2 and April 11.

This new offer to America West's frequent flyers is available to current program members and all travelers joining FlightFund prior to Feb. 20.

Mark Coleman, senior vice president of sales and development for the airline said, ''This is a great offer for both business and leisure travelers. We have experienced a dramatic membership increase in FlightFund, since we announced new service to Hawaii, and we anticipate this offer will further stimulate that growth.''

FlightFund members will receive one free round trip ticket if they fly three round trips, or six one-way segments, before April 11. The award ticket includes a free stopover in either of the carrier's hubs at Phoenix or Las Vegas. This free ticket is good for travel in the continental United States and western Canada.

FlightFund members will receive two round trip tickets if they fly seven round trips, or 14 one-way segments, before April 11. One of these two free award tickets can be redeemed for travel to Hawaii.

FlightFund members can receive a maximum of two free tickets. These tickets are transferable and redemption of travel must be exercised between Sept. 4 and Dec. 14. Holiday blackout periods apply.

America West, which began operations on Aug. 1, 1983, has recently been

recognized by the Department of Transportation as a major carrier, based on the airline's annual revenues.

America West flies coast-to-coast and to Hawaii with Boeing 747s, 757s, 737s and de Havilland Dash 8s aircraft. With the addition of Boston on March 15, the carrier will serve 59 destinations in the United States and western Canada. America West is also vying for Tokyo route authority and has received the DOT Public Counsel recommendation.

WILMINGTON, CA (FEB. 2) BUSINESS WIRE - Vector Aeromotive Corp. (NASDAQ:VCAR) Friday announced the effectiveness of an S-1 registration statement involving the proposed sale of 66 million common shares with the Securities and Exchange Commission.

The proposed maximum offering would amount to $10.8 million according to company officials, if all warrants offered were exercised.

Securities offered by Vector would involve 60 million common shares underlying 60 million warrants, exercisable until May 1, at a price of 15 cents each.

In addition, the registration includes 6 million underwriter's warrants to purchase 6 million common shares at an exercise price of 13 cents per share and the 6 million common shares underlying the underwriter's warrants.

Vectors common shares outstanding amount to $171.42 million.

Vector Aeromotive is the only American company producing automobiles for the supercar market, which includes Ferrari, Lamborghini and Porsche. The first production model rolled off the line in January and was formally displayed at the Los Angeles Auto Show.

The offering is made only by the Prospectus and is subject to state ''blue sky'' laws which may provide conditions to, or prohibit, the exercise of warrants in various state jurisdictions.

MOUNTAIN VIEW, CA (FEB. 2) BUSINESS WIRE - IntelliCorp Inc. (NASDAQ:INAI) a leader in knowledge systems development and delivery software, Friday announced an agreement to acquire MegaKnowledge Inc. of Cambridge, Mass.

Established in 1988, MegaKnowledge is the developer and marketer of KAPPA, an object-oriented, C-based application development tool, currently supported in the MS-Windows, PC-DOS environment.

The intent of the acquisition is to allow IntelliCorp to investigate the use of MegaKnowledge technology for possible inclusion in future MS-DOS products and internal projects.

The agreement is valued at approximately $2.5 million in cash and stock, a portion of which will be paid at closing and a portion distributed over a three to four-year period. The principal shareholders of MegaKnowledge will become employees of IntelliCorp.

The acquisition is subject to various conditions prior to closing; which is scheduled for April.

IntelliCorp is a leader in developing, marketing and supporting knowledge-based software development tools and services. The company has licensed more than 4,000 copies of its software products for applications in the manufacturing, automotive, telecommunications, aerospace, financial and energy industries.

In addition to its Mountain View headquarters, the company has sales and support offices in key U.S. cities as well as Munich, West Germany; Hampshire, United Kingdom; and Tokyo.

CLEVELAND (FEB. 2) BUSINESS WIRE - Eaton Corp. Friday announced that 1989 net income was $225 million, or $6.00 per share, and sales were $3.7 billion.

In 1988 net income was $212 million, or $5.69 per share, and sales were $3.5 billion. From continuing operations, income was $210 million in 1989 compared with $228 million in 1988.

For the fourth quarter of 1989, net income was $54 million, or $1.44 per

share, compared to net income of $51 million, or $1.37 in the fourth quarter of 1988. Sales in the fourth quarter of 1989 amounted to $880 million compared with sales of $891 million in the fourth quarter of 1988. Income from continuing operations was $45 million in the fourth quarter compared with $50 million in the final quarter of 1988.

With the sale of Pacific Sierra Research to a company formed by employees of that unit, Eaton reduced further its presence in the defense electronics industry. The remaining defense electronics businesses are AIL and the Electronic Instrumentation Division, which will be divested when their fair value can be realized.

In October 1989 Eaton acquired AWE Alfons Weiss, GmbH, a West German manufacturer of appliance controls, and in December, the company acquired Microflex Inc. NC, a developer of software products for transportation and related industries.

During the fourth quarter, Eaton completed the open-market repurchases undertaken in connection with the company's decision to sell shares to an ESOP and use the proceeds to purchase a similar number of shares in the open market.

As of the end of the year, Eaton had 36,912,000 shares outstanding, compared with 37,083,000 a year earlier.

With 43,000 employees in 22 countries, Eaton Corp. is a manufacturer of highly engineered products serving automotive, industrial, commercial and defense markets. Principal products include truck transmissions and axles, engine components, electrical equipment and controls.

SAN FRANCISCO, CA (FEB. 2) BUSINESS WIRE - American Biodyne Inc. and Blue Cross & Blue Shield of Illinois Friday announced an agreement under which Biodyne will be a provider of managed mental health and chemical dependency services to approximately 200,000 Blue Cross small group subscribers.

This Extended Mental Health Benefit program gives subscribers free access to a wide variety of services at no additional cost to the patient or the group.

In addition to traditional mental health and substance abuse treatment, the program also provides stress management, smoking cessation, weight

management, marital and family counseling and crisis intervention assistance. The services will be provided at 11 locations in the Chicago metropolitan area.

American Biodyne Inc., headquartered in South San Francisco, was founded in 1985 to provide comprehensive managed mental health and substance abuse treatment programs for insurance companies, employers and other providers of mental health benefits.

Biodyne is currently contracted to provide services to almost 2 million beneficiaries in Arizona, Colorado, Florida, Hawaii, Illinois, Indiana, Michigan, Ohio and Texas.

Blue Cross and Blue Shield of Illinois, founded in 1936, is the largest insurer in the state of Illinois, providing health benefits to over 2-1/2 million beneficiaries throughout the state.

RICHMOND, VA (FEB. 2) BUSINESS WIRE - The acquisition of Gainesville Insurance Agency Inc. of Gainesville, Fla. by Hilb, Rogal and Hamilton Co. (NASDAQ: HRHC) was announced by Robert H. Hilb, president of Hilb, Rogal and Hamilton Co.

Hilb stated: "This acquisition which will merge operations with our present Gainesville subsidiary, Cannon-Treweek Agency Inc., represents a winning situation for our employees, clients, and shareholders.

"Our new employees have received value for the business they have built and will now be working in an environment we believe will provide even greater opportunity for them. Our clients will be receiving improved services from the combined agencies. And, all shareholders will benefit from the ownership of a profitable book of business, which will improve its profitability as certain economies are realized."

Hilb, Rogal and Hamilton Co. provides insurance agency services to a wide variety of clients through its network of wholly owned subsidiaries which operate 35 insurance agencies located in in 14 states and the District of Columbia. The company is traded in the NASDAQ National Market System, symbol HRHC.

RICHARDSON, TX (FEB. 2) BUSINESS WIRE - CONVEX Computer Corp. announced Friday that The Mount Sinai Medical Center, New York, has installed a C220 supercomputer for use in computational molecular biology and molecular biophysics.

The CONVEX system was purchased for the Computation Core of Mount Sinai's Institute of Human Genomic Studies supported by the United States Department of Energy.

By studing certain changes in the structure of proteins and nucleic acids (DNA molecules) in different situations, scientists are able to understand impairments in the human genetic molecules, analyze allergic reactions, and determine fundamental causes of certain diseases. Drugs and vaccines can then be designed and tested to combat these problems.

The Mount Sinai Medical Center is an internationally recognized facility for patient care, research, and teaching. It includes the 1,112-bed Mount Sinai Hospital, founded in 1852, and the Mount Sinai School of Medicine of the City University of New York, charted in 1963.

CONVEX Computer Corp., a leading supplier of supercomputers worldwide, was founded in 1982 to design, manufacture, market and service high-performance systems. The company markets its products primarily to scientific, engineering and technical users throughout the world for a wide variety of applications in such areas as geophysical research, computational chemistry, computer-aided engineering, image processing, aerospace simulations and molecular biology.

CONVEX, which is listed on the NYSE with the symbol CNX, has sold more than 600 systems in 33 countries. The installed base now represents more than a quarter of a billion dollars of cumulative revenues from more than 370 customers worldwide. The systems are sold and serviced through direct sales and an extensive distribution network.

#90033b0659 02/02/1990 ~Business Wire

MELVILLE, N.Y. (FEB. 2) BUSINESS WIRE - Vicon Industries, Inc. (ASE:''VII''), a leading manufacturer of closed-circuit video systems (CCVS), Friday reported a net loss for the first quarter ended December 31 1989.

The Company said that the loss was due to lower than anticipated sales.

Revenues for the first quarter increased to $11.3 million, 12 percent higher than the $10.0 million in the same period last fiscal year. Vicon reported a net loss of $212,000 ($.08 per share) versus a net loss of $259,000 ($.10 per share) for the prior year's quarter.

Donald N. Horn, Chairman of the Board and President, said: ''While revenues rose compared to 1988 results, they were below plan in the video products group, certain international markets and the new Professional Products Division. Sales of the video products (cameras, monitors and VCRs) were adversely affected by a slowing U.S. economy, which reduced the volume of large system sales.

''In addition, certain competitors aggressively sold video products inventory during the period in anticipation of new product offerings. These competitors offered lower unit sales prices and captured some of the Company's market share. Vicon is also actively promoting sales of its older cameras to accelerate the transition to its new 'feature-rich' proprietary VC2200 camera line.''

Mr. Horn noted: ''Foreign revenues, which have been a source of significant growth in past years, continue to fall behind fiscal 1987 and 1988 sales levels. However, the establishment of our new headquarters in the U.K. last fall and the appointment of a new managing director is having a positive effect in reaffirming our European presence.''

Vicon's Professional Products Division, established in fiscal 1989, has generated great interest among customers in the broadcast industry and CCTV-related fields. ''Unfortunately, product development and production delays inhibited shipments,'' Mr. Horn said. ''Dealer interest is strong in new products targeted at teleconferencing and high-precision CCTV users. We anticipate sales in fiscal 1990 to be in excess of $2.0 million.''

Vicon Industries, Inc. designs, manufactures, assembles and markets a broad line of products and systems for video surveillance. These products are used for security, safety and control applications by a wide variety of end users.

CAMBRIDGE, MA (FEB. 2) BUSINESS WIRE - Bolt Beranek and Newman Inc. (BBN) Friday said its BBN Systems and Technologies Corp. subsidiary has signed a contract with Wegmann & Co. GmbH of Kassel, Federal Republic of Germany, to provide advanced simulation technology, products, and services to the West German government for tank tactics training.

The program is called the Combat Training Simulator for the Training of Armor Personnel (or AGPT, based on the program's German-language initials) and is focused on the German Leopard 2 tank. Wegmann, an important West German industrial and defense firm and maker of the Leopard 2 turret systems, was designated as AGPT's prime contractor by the West German government at the end of last year.

Under BBN's subcontract, and a prior professional services agreement with Wegmann, BBN is undertaking in excess of $20 million of engineering adaptation and field prototype activities to be completed by March, 1991.

In addition, there is an option for a follow-up production phase, which is substantial in comparison to the development phase, for BBN to provide the software and electronics hardware for the AGPT production systems.

The AGPT program is BBN's first contract in the expanding international market for tactical team trainers. BBN has previously developed and

deployed advanced simulation and real-time computer image generation technology for tactical team training for the U.S. military.

BBN is responsible for pioneering the electronics and simulation software for the SIMNET system developed for the U.S. Defense Advanced Research Projects Agency and the U.S. Army. SIMNET currently incorporates more than 200 low-cost ground vehicle and aircraft simulators in a distributed simulation network, and protocols developed by BBN for SIMNET have been used to allow interoperability among simulators and visual systems from multiple vendors for separate applications.

Headquartered in Cambridge, Mass., Bolt Beranek and Newman is a diversified high technology corporation. Through its subsidiaries, BBN develops, manufactures, sells, and supports products including private wide-area communication networks, data analysis software, and time-critical computers; and provides advanced research, development, and systems building services in the computer, communications, information, and physical sciences. For its fiscal year ended June 30, 1989, BBN had sales of $292 million.

MATTITUCK, NY (FEB. 2) BUSINESS WIRE - North Fork Bancorporation Inc. Friday announced that it plans to apply for listing on the New York Stock Exchange.

North Fork's common shares are expected to commence trading on the Exchange by mid-to-late February under the symbol NFB. The stock currently trades on the NASDAQ National Market System under the symbol NFBC.

In making the announcement, John Adam Kanas, president and chief executive officer, said, ''We are pleased that North Fork will be trading on the world's premier exchange, home to most major bank holding companies. This represents a very positive and logical step in our development as a publicly held company.''

According to Kanas, listing will give investors access to a more liquid and more efficient market, and will provide the company with greater visibility through broader shareholder ownership.

North Fork Bancorporation Inc. is the holding company for North Fork Bank and Trust Co. and Southold Savings Bank. The company and its subsidiaries provide commercial and retail banking services through a network of 33 offices on Long Island.

BALTIMORE (FEB. 2) BUSINESS WIRE - Alex. Brown Inc. Friday reported revenues for 1989 of $290.6 million, a 19 percent increase from revenues of $243.9 million in 1988.

Net earnings were $10.7 million and earnings per share were 65 cents, representing increases of over 41 percent compared to the $7.5 million, or 46 cents per share earned during 1988.

For the fourth quarter ended Dec. 31, 1989, revenues increased to $80.2 million, a 36 percent increase as compared to the same period of the prior year. Net earnings and earnings per share increased nearly sixfold, to $6.4 million and 39 cents, respectively.

Alex. Brown's balance sheet remains strong and well capitalized. At the end of 1989 capital funds surpassed the $200 million mark and liquidity remains excellent.

Book value per share at the end of the year was $11.15. During 1989, the company repurchased over 300,000 shares of Alex. Brown common stock. This program is expected to continue in 1990 under an existing authorization to repurchase up to approximately 200,000 additional shares, primarily to fund employee incentive programs.

Alex. Brown's board of directors declared a cash dividend for the quarter of $0.055 per share, payable on Feb. 28, 1990 to stockholders of record on Feb. 19, 1990.

Alex. Brown Inc. is a holding company whose primary subsidiary is Alex. Brown & Sons Inc., the oldest investment banking firm in the United States. Alex. Brown is traded in the NASDAQ National Market System, symbol ''ABSB.''

ATLANTA (FEB. 2) BUSINESS WIRE - The board of directors of Vulcan Materials Co. (NYSE:VMC) at a regular meeting held Friday declared a quarterly dividend of 30 cents per share on its common stock payable March 9, 1990, to shareholders of record Feb. 23, 1990.

The new quarterly dividend represents a 7 percent (2 cents per share) increase over quarterly dividends paid in 1989.

Vulcan's board also authorized the purchase by the company of an additional 935,817 shares of the company's outstanding common stock, continuing the purchase of shares commenced in 1985. With this additional authorization the company is now authorized to purchase a total of 2 million shares.

From September 1985 through January 1990, the company purchased 7,394,869 shares under earlier authorizations.

Vulcan is a producer of industrial materials and commodities with significant positions in two industries. It is the nation's foremost producer of construction aggregates and a leading chemicals manufacturer, producing a diversified line of chlorinated solvents and other industrial chemicals.

MAITLAND, FL (FEB. 2) BUSINESS WIRE - Phon Link, a Maitland, Florida-based portable telephone company, has been secured by HERTZ Corp. to provide a phone rental service for its cellular rental customers from Miami to Boston.

In addition to the recently opened Fort Lauderdale and West Palm Beach offices, future Phon Link sites--totaling 18 rental locations in 11 cities--include Miami, Washington, Atlanta, New York, Boston and Philadelphia.

According to Phon Link President, Michael Clarke, the primary market for

his service is the business traveler. ''It's a fact that time is money--especially to corporate travelers on tight schedules,'' said Clarke. ''And our system provides the busy executive with a convenient way to make every minute count, whether in or out of the car!''

While most other rental cellular phones are permanently installed in cars, the versatile Phon Link system is fully portable and so lightweight that it can be easily carried anywhere in a pocket or briefcase.

The Phon Link portable phone, representing the best in cellular technology on the market today, has been coupled with a highly efficient computerized system for renting, returning, and billing.

''We have successfully achieved our goal of combining hassle-free procedures with a fine user-friendly product in order to save HERTZ/Phon Link customers time and energy, and assure customer satisfaction,'' said Clarke. ''Additionally, our phone system is more convenient and, for most users, less expensive than the competition's.''

RICHMOND, VA (FEB. 2) BUSINESS WIRE - Top officers from the United Paperworkers International Union (UPIU) and James River Corp. (NYSE: JR) met on Jan. 30 and 31 to establish the first National Joint Committee to explore ways in which both can work together to increase the effectiveness of the company in meeting the needs of employees, customers, shareholders and the community.

The joint 10 person committee will consist of five members each from the UPIU and James River Corp. Representatives of the company and the union will co-chair the committee which will examine possible avenues of cooperation between the parties based on agreed upon principles discussed in the two-day meeting.

UPIU President Wayne E. Glenn stated that: ''Our union desires to insure that James River employees are provided with equitable wages and working conditions. We realize to accomplish this end, we have to work with the company to insure that they are successful and profitable. We believe this effort extends and complements the fine working relationship we've shared with James River for more than two decades.''

James River President Robert C. Williams said: ''We are equally pleased with the potential of the new cooperative program with the UPIU. Considering the principles committed to and the insightful enthusiasm of the union, we believe that the probability of advancing our competitiveness has improved significantly.''

WOBURN, MA (FEB. 2) BUSINESS WIRE - MedChem Products Inc. (AMEX: MCH) announced Friday that a preliminary injunction issued against its hyaluronic acid-based products, principally AMVISC and AMVISC Plus, has become effective.

Sweden-based Pharmacia Inc., MedChem's principal competitor in the ophthalmic market for these products, had brought suit against the company charging it with infringement of a U.S. patent licensed to Pharmacia.

Under the terms of the preliminary injunction, MedChem will be prohibited from further manufacture or sale of its AMVISC products in the United

States. The company, however, will be permitted to continue to market its AMVISC Plus product, but under strict quantity and use limitations, which will result in revenues of less than $1 million.

MedChem expects to petition the court for broader distribution of the product. In addition, MedChem will be required to pay 35 percent of its net revenues from sales of AMVISC Plus into an escrow account to protect the plaintiffs' interest regarding the infringement claim. Should Pharmacia ultimately prevail in the dispute, payments made into the escrow account will be offset against any damage award.

As previously noted, MedChem will be allowed to continue experimentation that is underway or planned with respect to other products. However, the commercialization of such products will require notification to and further approval by the court and will subject to security requirements.

As a result of the preliminary injunction order, Medchem's manufacturing requirements will be significantly reduced, necessitating the lay-off of 17 employees, approximately 25 percent of its workforce.

MedChem Products Inc. develops, manufactures, and markets biomedical products for use in ophthalmic and surgical markets. These products, derived from naturally occurring biomaterials, help surgeons to perform delicate operations more safely and effectively.

LISLE, IL/MENLO PARK, CA (FEB. 2) BUSINESS WIRE - Molex Inc., a leading worldwide electronic connector manufacturer, and Bata Phase Inc., a custom connector manufacturer, Friday jointly announced Molex's purchase of a minority interest in Beta Phase.

The purchase agreement includes the right for Molex to become an alternative source for Beta Phase high performance electronic connectors.

According to Tom Lee, Molex director of new ventures, the terms of the Molex investment also include the purchase of $1,075,000 in preferred stock which is convertible into common stock at 30 cents per share.

If certain financial performance targets are met, Molex will make a royalty advance of $1 million in July, 1990 for a worldwide co-exclusive license to BetaFlex technology and warrants to purchase 3 million shares of common stock at 30 cents per share. In addition, a member of Molex's management team will join Beta Phase's board of directors.

Beta Phase manufacturers and distributors a proprietary product line, BetaFlex connectors, using flexible circuitry and shape memory alloy technology. The Beta Phase connectors provide improved miniaturization and higher performance in high density and high speed transmission applications. These products find application in new supercomputers, computers, new military electronic systems, and advance CAD/CAM workstations.

''We are very pleased with Molex's interest in our young company,'' said Gary Petersmeyer, CEO of Beta Phase, ''and we believe their connector experience and reputation will leverage our connector technology and eventually provide us with global distribution.''

Beta Phase is a publicly held company traded on the Pacific Stock Exchange (BTA.P). Founded in 1984, the company operates a manufacturing, development and headquarters facility in Menlo Park. Its products are sold direct and thorugh a nationwide network of manufacturers' representatives.

Molex is a Fortune 500 company that designs and manufactures a broad line of electronic connectors, flat cable, switches, and associated application tooling.

Based in Lisle, the company's worldwide operations include 46 plants in 20 countries. Sales for the fiscal year ended June 30, 1989 were $572 million.

#90033b0706 02/02/1990 ~Business Wire

CHICAGO (FEB. 2) BUSINESS WIRE - Wells-Gardner Electronics Corp., which for many years was the leading supplier of private label television, Friday announced the signing of an intitial three year, multi-million dollar television assembly contract.

With production starting immediately, the beginning year's sales contribution should approximate $10 million.

This will represent an increase of about 30 percent over 1989's total estimated sales of $35 million.

Wells-Gardner will produce the units for Majestic Industries. Majestic is a newly-formed, Savage, Maryland-based company managed by a team of former RCA personnel and distributors with extensive consumer electronics

experience.

''The signing of this contract is significant,'' stated Frank J. Myers, president of Wells-Gardner, ''in that it is an important step towards reducing the company's dependence on the cyclical, coin-operated video game industry. Also, this program will absorb approximately 50 percent of our currently unused production capacity, thus providing a noticeable benefit for the company's profitability.''

Myers further said that, ''This business will provide added stability as Wells-Gardner reviews and plans its product line portfolio for the 1990s.''

In a related move, Myers also announced that the company plans to discontinue the marketing of switching power supplies and tough screen panel lines. These products, sold as components, have contributed only minimally to corporate reveneus. For the past two years, power supplies and touch panels have together contributed less than three percent of total sales each year. The planned sale of assets related to these product lines should be completed by mid-year.

Myers indicated his belief that focusing Wells-Gardner's resources on a narrower range of products which are more consistent with the company's traditional strengths should result in measurable improvement in the comapny's operating results.

Wells-Gardner Electronics Corp. designs and manufactures electronic products which are marketed both domestically and internationally. Its major products are color video monitors and data display monitors.

SAN JOSE, CA (FEB. 2) BUSINESS WIRE - Reply Corp. Friday announced that Stephen R. McKenzie was named senior vice president, sales and marketing for Reply's new line of high-performance Micro Channel compatible desktop systems. In this position McKenzie will be responsible for the launching of Reply Corp.'s entire line of 16-and-32-bit Micro Channel systems.

"We are delighted that Steve McKenzie has joined Reply's team," said Steve Petracca, Reply president and CEO. "His broad experience in the industry and in particular, his ability to obtain market share and increase profitability for emerging companies is exactly what is required as Reply brings to market its line of advanced Micro Channel compatible systems."

"Reply systems design is elegant and its features are impressive," commented McKenzie. "In other words, Reply systems were designed with the buyers best interest in mind. Its advanced features let users customize, expand and upgrade their systems easily and, most importantly, preserve their initial investment."

Reply systems feature the Reply 5x5 design, five full-sized MCA expansion slots and five disk drive bays which provide the user the capability to attach a broad range of high-end peripherals for multi-tasking, multi-processing, and networking.

In addition, the Micro Channel is enhanced by placing system RAM on the main board - up to eight Mbytes. A full-feature EMS 4.0 Memory Mapper is also built into the system board logic so programs using extended memory can break the 640K DOS limitations.

Other integrated features on the systems board include: two serial ports, two parallel ports, a pointing device port, floppy drive controller and 16-bit super VGA.

The Reply's family of processor platforms are based a 16-bit and 32-bit TurboProcessor modules. Each module contains both microprocessor and math coprocessor sockets and associated logic. These

processor options provide a path to increased processing power.

A user can expand and upgrade the system quickly and inexpensively - preserving their original investment. For example, a Reply 20 MHz286 or 16 MHz386SX can be upgraded to a 20Mhz386 in minutes just by changing the processor module. Reply and TurboProcessor are trademarks of Reply Corp.; Micro Channel is a trademark of International Business Machines Corp.

CAMBRIDGE, MA (FEB. 2) BUSINESS WIRE - Lotus Development Corp. and the Association of Small Business Development Centers (ASBDC) today announced a national program of financial management seminars for small business owners and managers.

The seminars will be offered in 28 states and will begin this month. This program represents the national roll-out of a successful pilot seminar series conducted in 10 states last year.

The seminars address small business financial analysis and planning, using Lotus 1-2-3 spreadsheet software as a teaching platform. Topics will include interpretation of balance sheets, income statements, sources and uses of cash statements, and cash flow projections. In addition, an introduction to personal computer hardware and spreadsheet software will be included.

''Lotus recognizes the importance of financial management to the success of small businesses,'' said Sue Madden, Lotus' small business marketing manager. ''We are delighted to be working with the local SBDC centers who provide counseling and training to the nation's small businesses.''

''Our objective is to teach participants basic financial management concepts and to introduce them to the tools that will allow them to evaluate their financial position on an ongoing basis and anticipate the impact of important decisions.''

''The pilot that we conducted last year was immensely successful,'' said Bob Bernier, president of the Association of Small Business Development Centers. ''Attendees rated the course very highly and indicated that they were eager to apply the skills learned in the course to their businesses. This partnership between Lotus and the ASBDC offers a program that really meets the needs of small business.''

The ASBDC is a coalition of 49 state and regional small business development centers with a nationwide network of nearly 700 offices. Each

participating center will receive a monetary grant, instructor training, promotional and teaching materials, and Lotus software.

The centers provide training and guidance to small businesses and entrepreneurs.

The seminars will be offered in Alaska, Connecticut, Florida, Iowa, Idaho, Kentucky, Louisiana, Massachusetts, Maine, Michigan, Mississippi, Missouri N. Carolina, N. Dakota, Nebraska, New Mexico, Nevada, Pennsylvania, Puerto Rico, Rhode Island, S. Carolina, Tennessee, Texas, Utah, Virginia, Washington, Wisconsin, and West Virginia.

Companies interested in participating should contact the coordinator at their local Small Business Development Center (SBDC). For the name and number of the state coordinator in the above states, please call the Lotus Customer Service operator at 1-800-343-5414.

Founded in 1982, Lotus is the leading provider of applications software for the personal computer and information services delivered on compact disk.

COLUMBUS, OH (FEB. 2) BUSINESS WIRE - The Ohio Soybean Association board of trustees recently elected officers to guide the organization through 1990.

Re-elected as president for the Ohio Soybean Association was Dave Younkman West Liberty. Younkman's farming operation includes soybeans, corn, corn nuts and popcorn. Also included is a farrow to finish hog operation. Younkman completed his first year as president of the Ohio Soybean Association during 1989. Prior to that he served during 1987 and 1988 as vice-president for program activities. Younkman and his wife, Jane, have two grown sons, Derek and John.

Other officers elected were: Ned Price, Edon, as vice president, membership; Charlie Neff, London, vice-president, programs; Le Roy Stotz, Milan, secretary and Pat Corcoran, Chillicothe, treasurer. In addition, Gene Walston of Pemberville was re-elected as one of three individuals representing Ohio on the American Soybean Association board of directors. He was re-elected to a three year term.

At the annual meeting held during the Ohio Corn-Soybean Conference, Ohio Soybean Association members elected three new trustees to the board:

From District No. 9 composed of Delaware, Marion, Morrow and Union Counties, Paul Price was elected. Price and his wife, Phyllis, farm near Delaware on a 1200 acre operation that includes corn, soybeans, wheat and hay. Price has been a top membership signer for the Ohio Soybean Association for several years.

From District No. 13 which includes Adams, Brown, Butler, Clermont, Clinton, Fayette, Hamilton, Highland and Warren Counties, Jeff Thompson was elected. Thompson and his wife, Louann, farm 470 acres of corn, soybeans and alfalfa in Fayette County near Washington Court House. He has participated in a number of Ohio Soybean Association activities including serving as past county leader.

Representing the grain handler trade, Dave Remley, merchandising manager for Keynes Brothers, Atlanta, was elected. Remley has 20 years experience in the grain industry, primarily in grain merchandising.

#90033b0715 02/02/1990 ~Business Wire

WASHINGTON (FEB. 2) BUSINESS WIRE - The Department of Justice announced that it has reached a $50,000 settlement with five related finance companies and two individuals over charges that they illegally discriminated against divorced and elderly applicants for short-term, high-interest loans.

''The Department of Justice will not allow this nation's elderly and divorced citizens to be deprived of their rights to fair treatment under the law,'' said Stuart M. Gerson, assistant attorney general in charge of the Civil Division. Gerson also praised the Federal Trade Commission (FTC) for their investigatory work in developing the case.

The companies charged in a complaint filed Thursday in federal court in Atlanta were: City Finance Corp., Atlanta; Walton Loan Co., Atlanta; Banner Finance of Houston Inc., Houston; Banner Finance of Dallas Inc., Dallas; and Banner Finance Co. Inc., San Antonio, Texas. The individuals charged were Richard T. Dalton, president and the majority shareholder of the companies, and Charles W. Graham, treasurer and director of all of the companies.

An undercover investigation conducted for the FTC revealed that elderly applicants relying on pensions or social security and divorced female applicants relying on alimony or child support were often denied credit. At the same time, the investigation found that married, middle-aged male applicants were not summarily rejected or discouraged from applying for loans.

The settlement agreement prohibits the defendants from illegal discrimination in evaluating whether applicants are deserving of credit, requires them to make a detailed reporting of their lending practices to the FTC for the next six months, and to pay $50,000 in civil penalties. The consent decree was approved by the court Thursday.

The case was developed by the FTC and handled by Justice's Office of Consumer Litigation in conjunction with the U.S. Attorney's Office for the Northern District of Georgia.

MURRAY HILL, NJ (FEB. 2) BUSINESS WIRE - The BOC Group - the international gases and health care company, Friday announced the purchase of the Curacao-based companies, N.V. Curacaosche Zuurstoffabriek (Cuzufa) and N.V. Verus from N.V. W.A. Hoek Loos Deelnimgen B.V.

Cuzufa is the leading industrial and medical gas supplier in Curacao, owning and operating oxygen, nitrogen, argon, acetylene, hydrogen and other gas facilities. In addition to their gases business, Cuzufa handles resale equipment for the health care business and metal-working industry. The island of Curacao has one of the Caribbean's major industrial economies with substantial refinery and drydock facilities.

The acquisition of Cuzufa is a natural expansion of BOC's Latin American operations with companies located in Venezuela (GIV), Colombia (Cryogas) and Aruba (AIG). These businesses are totally integrated gas and equipment companies holding leading positions in the industrial and medical markets of their respective countries.

GIV, Cryogas, and AIG form the Latin American Division of Airco Gases, which is BOC's United States gases business, and they will provide the technological and market support to Cuzufa enabling it to maintain the highest level of service and reliability possible.

Airco, headquartered in Murray Hill, New Jersey, is a leader in industrial gas production and technology and has an expanding network of air separation (oxygen, nitrogen and argon), carbon dioxide, helium and hydrogen facilities.

The BOC Group is based in Windlesham, England and is an international corporation with operations in more than 50 countries worldwide. Its principal businesses are industrial gases, health care products and services, and high vacuum technology. BOC's business and trade names include Airco, Anaquest, Edwards High Vacuum, Glasrock Home Health Care, Ohmeda, Transhield and Viggo-Spectramed.

WALTHAM, MA (FEB. 2) BUSINESS WIRE - Meditrust announced Friday the sale of 3,000,000 shares of beneficial interest at a price of $19.625 per share through an underwriting syndicate managed by Smith Barney, Harris Upham & Co. Inc., Donaldson, Lufkin & Jenrette Securities Corp., Drexel Burnham

Lambert Inc., and Dean Witter Reynolds Inc.

The company will use the proceeds for investments in additional health care facilities and to repay short-term borrowings.

Jonathan S. Sherwin, president of Meditrust, stated that, ''this represents our fourth successful equity offering and positions Meditrust to continue into the 1990s to provide financing to the health care industry while maintaining an appropriate debt to equity ratio.''

Meditrust, with headquarters in Waltham, is the nation's largest health care real estate investment trust, holding investments with 13 different operators of 96 health care facilities in 23 states totaling approximately $675 million of investments. The company specializes in the sub-acute sector of the health care industry, including investments in rehabilitation hospitals, long-term care facilities, alcohol and substance abuse treatment centers, psychiatric hospitals, and retirement living communities.

A.M.A. Advisory Corp., a Delaware corporation, is engaged as the adviser to Meditrust.

#90033b0743 02/02/1990 ~Business Wire

ANCHORAGE, AK (FEB. 2) BUSINESS WIRE - A major technological innovation in electronic navigation systems is being announced by Offshore Systems Ltd., Vancouver-based developer and manufacturer of electronic chart navigation systems.

The new system will provide oil tankers and other vessels with a high degree of sophistication by automatically showing the ship's position and course with respect to the shoreline, bottom coutours, buoys and markers according to Helmut Lanziner, president of Offshore.

''The new Precise Integrated Navigation System will automatically collect data from navigational equipment already on board most vessels, and integrate that information with with data from radar reflectors placed on shore to create a color electronic navigation chart to determine the ship's location to within one to two meters,'' added Lanziner.

''The PINS System's provides two warning signals when an obstacle to a vessel to closer than a pre-set limit. The first warning is a visible color change on the electronic chart, and the second is an audible warning that sounds if no action is taken in response to the initial visible color

signal,'' he continued.

One of the features of the PINS System is its ability to provide navigational guidance for crews to use in steering clear of obstacles no matter where they are located -- on the shoreline bottom contours and other chart features in nearby channels.

In addition, the PINS System is capable of transmitting Vessel Traffic Services data to other shore facilities. It also has ''black box'' or data logging capabilities for use in later analysis of information relating to the ship's voyage.

Lanziner said that although the PINS technology is new, it has already been proved on a wide range of vessels including several Canadian Coast guard ships, ferries and freighters operating in confined waters that have historically been difficult to navigate.

''To avoid future navagitional accidents such as the oil industry has experienced this past year,'' added Lanziner, ''the international Maritime Organization and other regulatory bodies must agree to standards that recognize the need for ships to operate on electronic charts such as the PINS system,'' noted Lanziner.

CINCINNATI (FEB. 2) BUSINESS WIRE - G. William Miller, chairman and chief executive officer of Federated Stores Inc. (FSI), Friday announced the appointment of Allen I. Questrom as chairman and chief executive officer of Federated Department Stores, Inc. and Allied Stores Corp.

Questrom, who will assume his new position effective immediately, joins James M. Zimmerman, president and chief operating officer of Federated and Allied, in forming the top management team of the $7.5 billion FSI department store group.

''The appointment of Allen Questrom to work in tandem with Jim Zimmerman establishes a premier retail partnership, the calibre of which is unmatched anywhere in the industry,'' Miller stated, adding that finding ''exactly the right person to complete the top management team at Federated and Allied'' had been his foremost objective since assuming the position of FSI chairman on Jan. 16. At that time, it also was announced

that John W. Burden III would be resigning as chairman and chief executive officer of Federated and Allied, effective Jan. 31.

Miller noted that Messrs. Questrom and Zimmerman previously had served together as chairman and president of the Atlanta-based Rich's division from 1980 to 1984. The Questrom-Zimmerman partnership at Rich's produced a performance turnaround that took Rich's from being a low sales and profit performer in 1980, to being the most profitable division of Federated by 1984. Rich's earnings more than tripled during the period.

Questrom, 49, has served as president and chief executive officer of the Dallas-based Nieman-Marcus department store group since September 1988. Previously, he was a vice chairman of Federated, a position he held from January 1988 until his resignation upon Federated's acquisition by Campeau Corp. in May of that year.

In September 1984, Questrom was named chairman and chief executive officer of Bullock's, Federated's Los Angeles-based department store division. To those responsibilities he added the title of executive vice president of Federated in March 1987.

Questrom joined Federated in 1965 as an executive trainee with Abraham & Straus (A&S), where he rose to the position of merchandise manager. In 1973, he joined Bullock's as vice president and general merchandise manager, becoming executive vice president of the division in 1976. He was named president of Rich's in 1978, and chairman in 1980.

HAMMONTON, NJ (FEB. 2) BUSINESS WIRE - Empire Financial Corp. (EMPR), the parent company of Empire Savings Bank, SLA and subsidiary, Friday reported a second quarter net loss of $103,836, or 9 cents per share for the three months ended Dec. 31, 1989, as compared to net income of $332,665, or 30 cents per share, for the three months ended Dec. 31, 1988.

Net income for the six months ended Dec. 31, 1989 totaled $3,432, or 0 cents per share.

Non-performing assets increased to 4.10 percent of total assets at Dec. 31 1989 as compared to .59 percent at Dec. 31, 1988. As a result of the sale of some of the non-performing assets, Empire recorded a loss on the sale of real estate totaling $152,000.

Net interest income for the quarter ended Dec. 31, 1989 totaled $1.3

million, decreasing 23.5 percent from $1.7 million for the comparable quarter in 1988. Net loans receivable amounted to $199.7 million at Dec. 31, 1989 as compared to $199.6 million at Dec. 31, 1988. Total assets increased 1.3 percent over the Dec. 31, 1988 total reaching $240.2 million at Dec. 31, 1989.

Total deposits at Dec. 31, 1989 amounted to $201.1 million as compared to $201.6 million at Dec. 31, 1988.

Stockholders' equity grew to $9.5 million at Dec. 31, 1989, a 7.4 percent increase from Dec. 31, 1988, and book value per share was $8.47 at Dec. 31 1989 compared to $7.90 at Dec. 31, 1988.

Headquartered in Hammonton, N.J., Empire Financial Corp. is a unitary savings and loan holding company which owns and operates Empire Savings Bank, SLA and its subsidiary. Empire Savings Bank, SLA, a New Jersey chartered thrift, member SAIF and equal opportunity lender, operates full service banking centers in Southern New Jersey. The bank plans to open its sixth banking center in Vineland, N.J. this spring.

(NASDAQ: TTOI) announced Friday that the company had incurred a loss for the nine months ended Dec. 31, 1989 of ($114,000), or (1 cent) per share compared with net income of $168,000, or 2 cents per share for the comparable period ended Dec. 31, 1988.

The company incurred a net loss for the quarter ended Dec. 31, 1989 of ($449,000), or (6 cents) per share compared with net income of $61,000, or

1 cent per share for the comparable period a year earlier.

Revenues for the nine months ended Dec. 31, 1989 were $6,134,000 as compared with revenues of $5,906,000 for the nine months ended Dec. 31, 1988. Revenues for the quarter ended Dec. 31, 1989 were $1,474,000 as compared with revenues of $2,231,000 for the comparable period last year.

In announcing these results, Lucien stated that the third quarter loss was the first the company has reported since 1983 and attributed it to a downturn in revenues in the quarter. The company's sales have been severely affected by the government's change in the TEMPEST policies and cuts in the overall defense systems budget. In addition, the company recognized a one time charge of $348,000 for a writedown of inventory which further contributed to the loss.

TEMPEST Technologies Inc., a publicly held company headquartered in Herndon, designs and manufactures modifications for computer and peripheral equipment to comply with military standards and TEMPEST specifications established by the U.S. Government. Its shares are traded on the NASDAQ under the symbol TTOI.

NEW YORK (FEB. 2) BUSINESS WIRE - Temporary Time Capital Corp. (OTC), a New York City based corporation providing temporary and permanent placement employment services, released Friday its amended quarterly report for the period ended Sept. 30, 1989.

For the first half, fiscal 1990, ending Sept. 30, 1989 the company hereby reports revised revenues of $4,460,609, a revised net loss of $282,597 and a revised net loss per share of 13 cents.

Simultaneously, the company filed a revised quarterly report for the three months ended June 30, 1989, the results of which are reflected in the above first half figures.

Previously, on Nov. 22, 1989, the company reported revenues for the first six months, fiscal 1990 ending Sept. 30, of $4,546,394, a net loss of $12,510 and a net loss per share of 1 cent.

Upon further review of the previously issued financial statements, management determined the statements which were filed with its quarterly filing to the Security and Exchange Commission (SEC) contained certain inaccuracies and could not be relied upon.

In management's opinion, the newly filed financial statements correct earlier inaccuracies and reflect, among other items, a reserve of $150,000 for prepaid commissions.

PORTLAND, ME (FEB. 2) BUSINESS WIRE - The One Bancorp, (NASDAQ: TONE) a $2.3-billion-asset, FDIC-insured Maine bank holding company, Friday released unaudited figures showing a net loss of $48,392,000, or $5.91 per fully diluted share of common stock, for the fourth quarter ended Dec. 31, 1989.

Results compare with a net loss of $9,125,000, or $1.12 per share, in the 1988 fourth quarter.

For the full year, The One Bancorp reported a net loss of $122,848,000, or $15.03 per fully diluted share, vs. net earnings of $533,000 or 7 cents per share in 1988.

Vincent E. Furey, Jr., president and chief executive officer, said, ''In our comprehensive capital recovery plan, accepted by banking regulators and announced on Jan. 11th, we contemplated continuing losses. As part of our plan, The One Bancorp injected $20 million of new capital into its Maine Savings Bank subsidiary on Jan. 11, 1990. It is also committed to inject additional capital upon sale of the company's non-Maine banking subsidiaries.''

The One Bancorp reported last month that its Maine Savings Bank subsidiary had consented to the entry of a cease and desist order issued by the Federal Deposit Insurance Corp. and approved by The Maine Bureau of Banking, and that the company itself had entered into an agreement with the Federal Reserve Bank of Boston and the Maine Bureau of Banking covering its capital condition and operations.

Results reported today reflect losses from continued declines in New England real estate values. Fourth quarter charges included a loan-loss provision of $39.6 million and a $12 million write-off of goodwill related to the future sale of certain subsidiaries as provided in The One Bancorp's capital recovery plan.

The One's nonperforming assets rose from $195 million at Sept. 30 to $257 million at year end. Reserves for loan losses were increased to $72 million from $59 million over the same period. Both figures reflect net

loan chargeoffs of $27 million.

Net interest income was $11 million and $57 million for the fourth quarter and full year of 1989, compared with $18 and $65 million for the respective 1988 periods.

Stockholders' equity declined to $27 million or $3.28 per common share at year end, from $77 million or $9.35 per share at Sept. 30.

The One Bancorp is a Maine-based bank holding company formed by 130-year-old Maine Savings Bank in connection with the bank's conversion to stock form in June of 1984. In addition to Maine Savings, it has banking subsidiaries in Connecticut and Massachusetts.

#90033b0785 02/02/1990 ~Business Wire

WAKEFIELD, MA (FEB. 2) BUSINESS WIRE - Xyvision Inc. (NASDAQ:XYVI) Friday announced a net loss for the third quarter of fiscal 1990 of $3,745,000, or 62 cents per share, compared to net income of $1,436,000, or 26 cents per share, which included an extraordinary item of $1,083,000, or 20 cents per share, for the same period a year ago.

Revenues decreased 33 percent to $7,670,000 for the third quarter of fiscal 1990 from $11,529,000 in last year's third fiscal quarter.

For the nine months ended Dec. 31, 1989, Xyvision reported a net loss of $17,550,000, or $3.02 per share, compared to net income of $2,047,000, or 36 cents per share, which included an extraordinary item of $1,083,000, or 19 cents per share, for the first nine months of the prior fiscal year.

Revenues for the first nine months of fiscal 1990 decreased 34 percent to $22,108,000, from $33,359,000 for the first nine months of last fiscal year.

Xyvision Inc. develops and manufactures professional systems for commercial and corporate publishing as well as design-through-production applications. Xyvision systems are used to design and produce a wide range of materials, including books, journals, magazines, catalogs, financial and legal reports, software documentation, aerospace documentation and product packaging. Xyvision systems are sold in the United States, Canada, United Kingdom, Europe, Asia and Australia.

FRANKFURT, West Germany (FEB. 2) - West German group Leybold, the world's leading vacuum packaging concern, said Friday it had sold its gas analysis equipment division to U.S. group Rosemount Inc.

Leybold did not give the value of the deal to sell the division to Rosemount's West German subsidiary Rosemount GmbH.

The sector being sold had a turnover in 1988-89 of 30 million Deutsche marks (18.7 million dollars) and employs 160 people.

The Rosemount group has 9,000 employees worldwide and an annual turnover of some 1.8 billion Deutsche marks (1.05 billion dollars).

Leybold has been involved in a restructuring plan for more than a year which enabled it to cut its losses from 21.8 million Deutsche marks in 1987-88 to 10 million in 1988-89.

It had a consolidated turnover of 1.07 billion Deutsche marks in 1988-89, or 10 per cent of the world market.

#90033d0700 02/02/1990 ~French/German News Agency

JOHANNESBURG (FEB. 2) - President Frederik de Klerk's announcement of Nelson Mandela's pending release and the unbanning of the ANC brought swift condemnation from the far right on Friday.

The far-right official opposition Conservative Party (CP) branded the upcoming release and lifting of a ban on the African National Congress as "shocking" and "most revolutionary".

The CP challenged Mr. de Klerk's National Party (NP) government immediately to hold a general election to "give white voters the chance to pronounce on the NP's drastic announcements" and "reject these very dangerous steps."

But the news produced an invitation for 71-year-old Mr. Mandela to visit Britain to meet Prime Minister Margaret Thatcher.

U.S. President George Bush said on Thursday that the ANC leader would be welcome to visit him in Washington upon his release.

British officials said Mr. de Klerk has also been invited for an "early meeting," officials said Friday.

A statement from Mrs. Thatcher's office said that Britain would also stop discouraging artists, scientists and academics from going to South Africa or meeting with South Africans, and the government would "consider further positive steps as soon as Mr. Mandela is released."

In Lusaka, ANC officials at the organisation's headquarters in exile declined to comment immediately on the news, saying they were studying the full text of the speech.

#90033d0930 02/02/1990 ~French/German News Agency

TOKYO (FEB. 2) - Japan, already concerned with its deteriorating image in the United States, is deeply troubled over what it sees as France's hardening anti-Japanese stand on economic issues.

A critical statement by French President Francois Mitterrand, splashed on the front page of several Japanese newspapers Friday, heightened fears that Paris could spearhead an anti-Japanese shift in Europe.

Mr. Mitterrand said during a reception in Paris Wednesday for French ambassadors posted to Africa that the United States and Japan had served up "vast plans" for aid to the Third World but failed to pay out when the time came.

"If the United States or Japan made an effort comparable to our own, the problem would be solved," Mr. Mitterrand said.

Japanese Foreign Ministry spokesman Taizo Watanabe called the statement "contrary to the facts," stressing that Japan was the world's second-largest aid donor after the United States.

"We have to respond sincerely as we enter into a stage of intensifying communication made of unpleasant remarks to our ears," Mr. Watanabe said.

French minister for European affairs, Edith Cresson, irritated the Japanese government in January when she accused Japan of wanting to conquer the world.

In addition to the rhetoric, Japanese Foreign Ministry officials say they are concerned and perplexed by France's hardening stand on international trade and investment.

The change of the situation in Paris, where U.S. trade theories seem to be gaining ground, have made France the key point of resistance to Japanese business interests in Europe, the officials said.

"Japan is worried to see members of the French government who are considered pro-Japanese, notably Industry Minister Roger Fauroux, losing influence or even changing their attitude to support the hardliners," said an official at Japan's Ministry for International Trade and Industry (MITI).

TOKYO (FEB. 2) - Japan's current account surplus fell 28.5 percent in 1989 from the previous year to 56.98 billion dollars, the Finance Min Friday.

The trade surplus narrowed 18.8 per cent to 77.13 billion dollars.

Exports rose 3.8 percent to 269.63 billion dollars, while imports climbed 16.8 percent to 192.50 billion dollars.

Japan's current account surplus fell sharply in December 1989, declining 59.1 percent from a year earlier to 3.82 billion dollars.

The December trade surplus plunged 42.9 percent from a year before to 6.30 billion dollars.

December exports fell 6.5 percent to 23.99 billion dollars in the third monthly year-on-year decline, while imports rose 20.8 percent to 17.69 billion dollars largely due to increases in crude oil prices, the ministry said.

The 1989 invisible trade balance, which gauges transactions related to tourism, shipping, insurance and commodity services, hit a record deficit of 15.93 billion dollars, widening from the previous year's 11.26 billion dollars.

Officials partly ascribed the increase to a record deficit in tourism, amounting to 19.33 billion dollars. A total of 9.64 million Japanese went abroad, up 14.5 percent from a year before.

The transfer account, also part of the current account, was 4.23 billion dollars in the red, up from 4.12 billion dollars in 1988.

#90033d1580 02/02/1990 ~French/German News Agency

LONDON (FEB. 2) - South African gold mining companies moved sharply higher on the London stock market Friday after news of the reform package outlined by President F. W. de Clerk in South Africa.

Mr. de Klerk's reforms, which included the lifting of a 30-year ban on the African National Congress and a pledge to release Nelson Mandela, had South Africa's three biggest gold houses, Driefontein, Freegold and Vaal Reefs moving ahead.

In early afternoon trading Driefontein was up from 973 pence to 1,063, Freegold moved from 979 pence to 1,069 and Vaal Reefs climbed from 74 pounds to 79.

"The market had been anticipating the news, but the reforms were more wide-ranging than we expected," one mining analyst said.

VIENNA (FEB. 2) - Eastern European countries have a long way to go to pull out of their unprecedented economic crisis, and face falling standards of living and the prospect of high unemployment.

"The Eastern European countries cannot count on rapid economic growth or a noticeable improvement in living conditions in 1990," the West German economic institute IFO of Munich said in its latest study.

"Reforms towards a market economy undertaken in these countries will in the first instance lead to increased social problems and higher unemployment, which will provoke public resistance.

"These countries will have to show courage and determination to overcome their problems, and they will not be able to do so without western aid," the institute said.

The performance of Eastern European economies last year, marked by political upheavals which ended 40 years of one-party communist rule in several countries, was hardly encouraging.

Hungary's industrial production fell 3.1 percent, while that of Poland was down two percent.

East Germany saw only two percent economic growth and the situation is expected to be worse this year.

Both the Soviet Union and Bulgaria have said that they failed to achieve

state plan targets last year, particularly for consumer goods.

Bulgaria saw a 0.4 percent fall in state revenue last year, the standard of living is fallling and there are no prospects of improvement in 1990.

Romania, whose economy was crippled by dictator Nicolae Ceausescu's determination to wipe out the country's foreign debt, now owes no money, but its people have been short of food and heat for years.

The new government has said the situation is disastrous, but assessing it has proved difficult because, it says, the dictator ousted in December had systematically falsified economic data.

#90033d2200 02/02/1990 ~French/German News Agency
TOKYO (FEB. 2) - Prime Minister Toshiki Kaifu defended his controversial tax policy against four opposition leaders in the first open debate for 30 years by Japan's political parties Friday, two weeks before a general election.

"It is four against one," he quipped while the others called for abolition of a consumption tax which was railroaded into law by his Liberal Democratic Party (LDP) last year, triggering a voters' revolt in an Upper House election in July.

But commentators saw no clear-cut winner emerge in the nationally-televised three-hour debate at the National Press Club, which set the tone for the February 18 poll.

Mr. Kaifu, whose conservative party could lose its majority in the Lower House for the first time since its founding in 1955, reaffirmed his party's plan for modifying the consumption tax, a pledge dismissed by critics.

He also failed to score any major points when he tried to use the collapse of orthodox communism in Eastern Europe to discredit the socialist-led opposition.

"To consolidate the system of democracy, we have to change the LDP's one-party rule," said Takako Doi, chairwoman of the Japan Socialist Party, in reply to the LDP arguement that the election would be a choice between democracy and socialism.

But when it came to the protection of farmers, who make up a powerful lobby, there was rare agreement. "We will keep ourselves self-sufficient with domestic rice," Mr. Kaifu said.

Only two weeks ago International Trade and Industry Minister Hikaru

Matsunaga angered farmers when he suggested Japan lift a total ban on rice imports to appease overseas criticism of Japan's restrictive trade practices.

The debate was attended by Mr. Kaifu, Ms. Doi, Koshiro Ishida of the Buddhist-backed centrist Komeito, Tetsuo Nagasue, the chairman of the Japan Communist Party, and Eiichi Nagasue, chairman of the Democratic Socialist Party.

BASEL, Switzerland (FEB. 2) - Leading Swiss chemical concern Ciba Geigy said Friday it had signed an agreement on setting up a joint venture in China to produce animal health products.

Shanghai Ciba Geigy Animal Health Limieted would represent an investment of 30 million Swiss francs (20 million dollars) and employ 200 people.

Ciba Geigy said it had signed an agreement with its three Chinese partners guaranteeing it a majority stake in the venture.

The Chinese enterprises involved are China General Corporation of Animal Husbandry and Commerce of Beijing, the Shanghai Institute of Animal Parasitology of the China Academy of Agricultural Sciences, and the Shanghai Wusi Farm.

Ciba Geigy is awaiting the go-ahead from the Chinese authorities for the project, which it is expecting by the end of March.

Construction work would begin early next year and the venture would go into operation in early 1993.

#90033d2610 02/02/1990 ~French/German News Agency

HAMBURG, WEST GERMANY, (FEB. 2) - The young West German who made headlines by landing a plane in Moscow's Red Square was freed Friday on bail of 100,000 marks (nearly 60,000 dollars) following assault and wounding charges, a court source said.

Twenty-two-year-old Matthias Rust was remanded in custody last November after twice stabbing in the stomach an 18-year-old student nurse who rejected his sexual advances.

The incident occured in the cloakroom of an old-age home where Mr. Rust, a conscientious objector to military service, was doing civil service.

A court spokesman said that bail had been demanded to prevent Mr. Rust from fleeing. After stabbing the nurse, he had originally fled before turning himself in.

He has also had to surrender his passport and identity card and must report twice weekly to police.

Mr. Rust landed a small Cessna plane on Red Square on May 28, 1987 in a dare-devil stunt "to advance the cause of peace."

Sentenced to four years in a Soviet work camp, he was released on August 3,

1988 after serving 432 days in a Moscow prison. The West German aviation authorities subsequently withdrew his pilot's license.

#90033d2680 02/02/1990 ~French/German News Agency

BONN (FEB. 2) - West Germany is interested in extending its political and economic cooperation with Brazil, Chancellor Helmut Kohl told designated president Fernando Collor de Mello Friday.

Collor, who is due to take office next month after winning elections in December, outlined an economic program to brake Brazil's runaway inflation rate of between 70 and 100 percent.

Bonn government spokesman Dieter Vogel said Kohl assured Color that West Germany was prepared to help efforts to find a solution to the problem of Brazil's massive debts of 110 billion dollars.

Collor is on a 20-day tour of nine countries in America, Asia and Europe prior to taking up the office of presidency on March 15. The 40-year-old millionaire businessman won Brazil's first democratic presidential elections for 29 years on December 17.

#90033d2860 02/02/1990 ~French/German News Agency

GENEVA (FEB. 2) - British Airways said Friday it is seeking up to 150,000 Swiss francs (100,000 dollars) in compensation from three Filipino students charged with making a false bomb threat to delay their flight from Geneva airport, airline officials said Friday.

A geneva court Friday extend by three months the trio's pre-trial term in investigative detention. Julius Dario, Jesus Maria Romero Salas and Richard Punzala have been held since the bomb hoax on Sunday.

The three face up to three years in prison if convicted of telephoning a

bomb threat against a British Airways flight to London. The students were booked on the flight but were delayed on the way to the airport and would otherwise have missed the plane.

Police said the trio were arrested after insisting at the check-in counter that the plane was still on the ground. A check-in hostess had told them the plane had left the gate.

Twenty-nine of 105 passengers refused to re-board the flight after security agents evacuated and searched the plane. The canton Geneva is also considering pressing for damages because the bomb hoax caused extra work for the airport.

#90033d2930 02/02/1990 ~French/German News Agency

ANKARA (FEB. 2) - Nine Kurds, including five women, and three Turkish soldiers were killed in a nightlong gunbattle near Nazimiye village in Tunceli province, the Turkish news agency Anatoly reported Friday.

Citing provincial officials, the news agency said that the group of Kurdish "separatists" was spotted late Thursday by a Turkish patrol in the mountainous region of eastern Turkey.

The deaths occurred in the ensuing clash, Anatoly said, adding that one Kurdish separatist was wounded and arms and ammunition were seized from the group.

Informed sources in Istanbul said meanwhile that 126 Kurdish refugees from Iraq living in a resettlement camp at Diyarbakir in southeast Turkey had eaten poisoned bread served at dinner Thursday.

Six of the refugees were in hospital in serious condition Friday, according to the chief doctor at the state hospital in Diyarbakir.

The sources said that according to two residents of the camp, which holds an estimated 13,000 Kurdish refugees, the bread was "poisoned by Iraqi agents."

Anatoly said the head of security in Diyarbakir had opened an investigation into the poisoning. It said samples of the bread had been sent to a health ministry laboratory in Ankara and results of the tests would be known Sunday.

The authorities also stressed that the bread distributed in the camp comes from the same town baker who supplies Diyarbakir.

Dozens of Kurds from Iraq were poisoned in two other temporary camps, in

Mardin and Mus, in September 1989.

Kurds in the Diyarbakir camp have been demanding political refugee status since their massive exodus into Turkey in August 1988. The government in Ankara has refused to grant their demand.

#90033d3030 02/02/1990 ~French/German News Agency

BRUSSELS (FEB. 2) - Car maker Ford will halt production of its Sierra sedan in Genk, northern Belgium, on Monday because of difficulties in supplies resulting from a strike at Ford UK, management announced Friday.

Some 11,700 workers will be temporarily laid off. The decision follows a wave of strikes in recent weeks that has disrupted production at Ford's British plants, which supply the assembly lines in Belgium.

Britain's Dagenham and Halewood factories are failing to keep Genk supplied with enough engines and gearboxes to maintain production.

Last Monday Ford stopped assembling Transit vans in Belgium, temporarily laying off 3,000 workers.

Ford-Genk normally produces 1,700 vehicles a day, including 1,350 Sierra cars and 350 Transit vans.

#90033d3140 02/02/1990 ~French/German News Agency

LONDON (FEB. 2) - Loss-making charter airline British Islands Airways

(BIA), hit by a slump in demand for foreign package tours, has been placed in receivership, Lloyds Bank and auditors Touche Ross said Friday.

BIA's board decided to call in the receiver to wind up the company, which employs about 400 people and has eight aircraft, after a desperate struggle to stay in business.

Two months ago BIA won emergency aid of 20 million pounds (33 million dollars) from a consortium of banks.

The airline, which flew charter flights for tour operators and regular services to Malta and Sicily, came into the public eye when it flew Prime Minister Margaret Thatcher around Britain during her last two general election campaigns.

BIA, which was bought by its management in 1982, differed from competitors such as Air Europe and Britannia Airways in that it was independent of the big travel groups, which made it more vulnerable to declining demand in the travel business, analysts said.

BIA posted losses of 4.9 million pounds (7.8 million dollars) in the first half of fiscal 1989, after losing 2.9 million pounds in fiscal 1988.

BUDAPEST (FEB. 2) - Officials from Hungary and the Soviet Union ended a first round of talks here Friday on the complete pull-out of Soviet troops from Hungary.

An official communique said the two sides had reached agreement that Soviet troops would be pulled out under a planned bilateral accord that should be signed as soon possible. It said the talks would resume later.

Hungary wants a pull-out of all remaining Soviet troops before the end of this year, but at the latest in the course of 1991.

The Soviet Union last year withdrew a first batch of 10,000 soldiers from Hungary, reducing to 50,000 the number of Soviet troops still deployed

there.

WINDHOEK (FEB. 2) - The flag that will flutter in an independent Namibia was unveiled in the Constituent Assembly here Friday, the South African Press Association reported.

The news agency said the flag features diagonal stripes of the blue, red and green colours of SWAPO, the majority party in the Assembly, broken by two thin white bands and has a yellow sun on the blue in the top left hand corner.

Namibia, which has been ruled by South Africa since 1915, will become a sovereign state on March 21 under a United Nations-supervised independence plan.

The South West Africa People's Organization (SWAPO) won 57 per cent of the vote in United Nations-supervised pre-independence elections in November last year, giving it 41 seats in the assembly.

The 72 members of the assembly are currently fine-tuning a draft constitution for the future independent Namibia.

#90033d4510 02/02/1990 ~French/German News Agency

SRINAGAR, INDIA (FEB. 2) - The Kashmir administration said the situation was "by and large" peaceful in the state as police reported that four people were killed and eight injured in new violence in the Kashmir Valley on Friday.

One person was killed here and the other three in the town of Sopore.

A continuing curfew confined residents indoors on Friday, the Moslem sabbath, amid fears of widespread violence, witnesses said.

"The situation is by and large was peaceful," a statement released by the administration here said Friday evening.

A heavy police presence and the curfew, imposed in the morning, prevented Moslems from going out to pray in Srinagar, summer capital of the northern border state wracked by widespread Moslem unrest.

Army trucks mounted with light machine guns cruised the streets in a show of force minutes after the curfew was reimposed after a six-hour break.

Moslem militants took advantage of the curfew relaxation to gun down a Hindu shopkeeper, Satish Tikoo, in the downtown Chote Bazar area, police said.

Governor Jagmohan condemned the murder and announced compensation of 100,000 rupees (6,060 U.S. dollars) for relatives of Mr. Tikoo, who had apparently been targeted on suspicion of spying for police against the militants.

Elsewhere in Srinagar, Moslem militants exchanged gunfire with paramilitary troops and two unidentified civilians were injured in the crossfire.

Two men were caught by police after they hurled a petrol bomb at a police

truck, the government statement said.

Authorities halved the curfew break to six hours Friday in a pre-emptive move to prevent Moslems from gathering in large congregations, which in recent weeks have turned into violent anti-Indian demonstrations.

In the town of Sopore, police opened fire to break up stone-pelting crowds, leaving three dead and six injured, police reported.

Meanwhile, Moslem militant posters appeared in Srinagar Friday, some calling for an intensified "freedom struggle," witnesses said.

One offered a 500,000 rupee (29,000 dollar) reward for killing Mr. Jagmohan.

Kashmir police and federal paramilitary troops maintained a high profile in the city's sensitive quarters, witnesses said. All vehicles were checked during the curfew relaxation.

No shop opened for business despite the six-hour curfew break.

Earlier, officials said the situation was tense but calm here and elsewhere in the Moslem-majority Kashmir valley where more than 100 people have died so far this year by unofficial count in Moslem unrest.

Moslem militants seeking to secede from the Indian union stepped up their armed struggle last year. The militancy is now widely believed to have assumed the dimensions of a mass movement.

India has accused Pakistan, which claims Kashmir, of backing the Moslem militants. Islamabad has denied the charge, but has expressed support to the Moslem rebels in Jammu and Kashmir state.

In Jammu, the state's winter capital, 10 lawmakers belonging to the regional National Conference party demanded Friday that paramilitary troops be withdrawn from Kashmir.

The lawmakers said in a joint statement that the imposition of curfew and press censorship in Jammu and Kashmir was a blow to democracy, the Press Trust of India reported.

Meanwhile, Kashmir authorities Friday revoked expulsion orders served on two Indian journalists working with international news agencies.

Correspondents Anil Penna of Agence France-Presse and Dilip Ganguly of Associated Press, who were ordered late Thursday to leave the state forthwith, were told by a senior government official Friday that they could stay on.

No reason was specified for the revocation of the expulsion orders.

The two correspondents were charged Thursday with being a threat to public safety and confined to their hotel rooms and told that they would be sent back to New Delhi Friday.

They are the last two journalists representing foreign media in disturbed Kashmir after a number of foreign correspondents were ordered out of the border state last week.

Earlier Friday, an external affairs ministry spokesman said he would try to "get things organized" to decide the fate of the two Indian journalists.

-30- 4497

#90033d4540 02/02/1990 ~French/German News Agency

PRISTINA, YUGOSLAVIA (FEB. 2) - Yugoslav head of state Janez Drnovsek appealed here Friday for calm and warned that continued violence in Kosovo would "inevitably lead to the destabilization" of the country.

Mr. Drnovsek made the remarks to reporters on his arrival in Pristina, the capital of the embattled southern province, where he was to hold talks with Albanian nationalist leaders.

In a direct reference to a list of alleged human rights violations presented to him Thursday by Albanian nationalists, he said Belgrade "attached more and more importance to questions of human rights."

Mr. Drnovsek said he deplored the clashes between police and demonstrators in Kosovo which according to official figures have left 20 ethnic Albanians dead and dozens of others on both sides injured since the most recent outburst of violence broke out on January 23.

Mr. Drnovsek joined three other federal government officials already in Pristina.

His visit comes a day after Prime Minister Ante Markovic offered to open talks with Albanian opposition leaders in Kosovo provided they first promised not to question the country's territorial integrity.

Albanian sources said they would accept that demand. But they also expressed skepticism over the government's sincerity in offering to negotiate and denounced the presence of Yugoslav military forces in the province.

The Albanians, who constitute a nine-to-one majority over ethnic Serbs in the province, say they are oppressed and have been protesting at the

Serbian republic's unilateral decision last year to exercise more direct control over Kosovo and another semi-autonomous province, Vojvodina.

Deputy Prime Minister Aleksandar Mitrovic announced earlier Friday that the government had formed a special crisis cell, chaired by Mr. Markovic, to deal with the violence in Kosovo.

Mr. Mitrovic has blamed the violence on an "attempt by separatist forces to dismember Yugoslavia, to overturn the system and to detach Kosovo from Serbia and Yugoslavia."

Although Kosovo was generally calm Friday, many businesses remained on strike and Yugoslav army tank and soldiers remained on guard at strategic points throughout the province.

There was one reported demonstration of around 300 people as Mr. Drnovsek began meeting with local officials here and there was still no word on the results of his talks.

Deputy Defense Minister Admiral Stane Brovet said recently that Yugoslav armed forces "will defend the integrity of Yugoslavia including by force."

Reforms being undertaken by the authorities in Belgrade, including the introduction of a multi-party political system, "will allow everyone to express his interests legally," Mr. Drnovsek said.

But he added that the violence here and in other parts of Kosovo was a "brake on the positive process under way."

Albanian sources said they had some hope that Mr. Drnovsek's visit could help break the deadlock here but also lashed out at the "intransigence" of the local Serb-dominated communist party.

The presence of Yugoslav army units in Kosovo "will make opening a dialogue even more difficult," according to Yussuf Buxhovi, a leading Albanian activist.

#90033d4790 02/02/1990 ~French/German News Agency

BUCHAREST (FEB. 2) - The National Salvation Front (NSF) which has governed Romania since the overthrow of Nicolae Ceausescu in December will be "dissolved" Saturday, NSF Vice-President Cazimir Ionescu said here Friday.

"The Front meets tomorrow for the last time and it will be dissolved," Mr. Ionescu said in an interview with Agence France-Presse. "The decree of December 30, 1989 which gave the Front its legal status will be abolished

Saturday."

His remarks came a day after the NSF, accused of trying to monopolize political power in the country, agreed to form a new provisional Council of National Unity (CNU) with 29 opposition parties to lay the groundwork for free elections May 20.

Mr. Ionescu said the NSF planned to declare itself a political party and to contest the elections.

Reliable sources said Saturday's final meeting of the NSF in its present form would focus on selection of 90 representatives the Front has been allowed to select to sit on the CNU.

Mr. Ionescu said he believed that NSF President Ion Iliescu would be selected to remain at the head of the new provisional government which would manage the country's current affairs up to the elections.

Mr. Ionescu has shown that he is "popular" with the Romanian people and that retaining him as head of state would help the country "avoid phenomena of instability," Mr. Ionescu said.

But he added: "I don't know if I will be vice-president tomorrow."

The new 180-member CNU, comprising three representatives each from the NSF and the 29 opposition parties as well as 90 other leaders of the December revolution chosen by the NSF, will exercise "the control on the government" in the run-up to the elections, he said.

Mr. Ionescu said the possibility of a shakeup in the current government had not been studied during Thursday's round table talks between the NSF and the opposition parties.

He noted that some of the current government ministers were not NSF members and urged that proposals from various parties on the composition of the new government "should be made by consensus and should not lead to destabilization of the country."

Mr. Ionescu said it was the NSF's desire to stand in the elections that led to the decision to share power with the opposition parties. Those parties had accused the NSF of disguising its intentions by refusing to declare itself a political party.

Although it was agreed Thursday that the CNU would have 180 members, Mr. Ionescu did not rule out the possibility that it could be expanded to include representation from minority groups in the country.

But if it were enlarged, the number of seats allotted to the NSF would also

be raised to preserve the 50-50 balance of power and to "reflect the preponderant role played by members of the Front in the revolution," he added.

#90033d4840 02/02/1990 ~French/German News Agency

BEIJING (FEB. 2) - Prominent dissidents Fang Lizhi and Liu Binyan were accused Friday of "heinously attacking" the spirit of Lei Feng, touted as China's model soldier during the Cultural Revolution and now back in vogue.

The latest of numerous attacks on the two dissidents was made by General Yang Baibing, younger brother of Chinese President Yang Shangkun, in a letter to the country's young people published in the daily China Youth News.

He wrote that Mr. Fang and Mr. Liu, "two eminent advocates of bourgeois liberalization" -- as China refers to Western-style democracy -- "have heinously attacked and dehumanized the spirit of Lei Feng, asserting that the concept of Lei Feng is old and out-of-date."

Gen. Yang, named last November as general secretary of the Communist Party's powerful Central Military Commission, urged Chinese youth to take inspiration from Lei Feng, a "valuable principle in the past, the present and who will remain so in the future."

He cited the threat of "hostile forces abroad that wish to overthrow the Chinese Communist Party leadership."

The legend of Lei Feng, a model soldier always serving the people, was popularized across China by Mao Zedong during the 1966-76 Cultural Revolution. The Chinese were regularly urged to look to him as an example of selflessness, loyalty and patriotism.

Mr. Fang, an astrophysicist, took refuge in the U.S. Embassy in Beijing after the Chinese authorities crushed the democracy movement in June and charged him with "counter-revolutionary crimes."

Mr. Liu, an author and journalist, has also been branded as a traitor. He has lived in the United States since 1988.

Both men were expelled from the Communist Party in January 1987 following a wave of student-led demonstrations for democracy.

RIYADH (FEB. 2) - Saudi Arabia has threatened to repatriate its diplomats

from Thailand unless the authorities there find the killers of four Saudis murdered in Bangkok since January 1989, a foreign ministry spokesman said.

His remarks came one day after gunmen shot dead two Saudi diplomats and a Saudi embassy telex operator in two separate incidents in Bangkok. Another Saudi diplomat was killed there in January 1989.

"Given the repeated attacks against Saudi diplomats in Bangkok ... if the assassins are not arrested and the motives of the crimes are not identified, it would be useless to maintain Saudi civil servants without protection in Thailand," the spokesman said.

He said the Thai ambassador in Riyadh was informed of the Saudi position and asked to transmit it to his government.

Abdallah Abdel Rahman al-Bakri, Fahd Abdallah al-Bahli and Ahmad Abdallah Sayf were gunned down Thursday in a residential sector of Bangkok.

According to the Saudi newspaper Asharq al-Awsat, citing police and witnesses, the assailant who shot Mr. Bakri was an Asian.

Thai newspapers, meanwhile, speculated that the killings were linked to the lucrative business of matching Thai workers with jobs in Saudi Arabia.

Witnesses cited in Thai dailies said three gunmen were involved in the killings, while a police official said two of the killers were "light-skinned foreigners."

The circumstances surrounding the murder of Saleh el-Malik in January 1989 have not yet been identified.

Over 60,000 Thai workers travel to Saudi Arabia every year to work, mostly in construction, according to the Thai Labour Department.

BEIRUT (FEB. 2) - The Progessive Socialist Party (PSP) of Druze leader Walid Jumblatt began Friday to withdraw heavy weapons and ammunition from west Beirut as part of efforts to implement a Syrian-backed security plan.

Interior Minister Elias Khazen told reporters meanwhile that a plan to deploy regular army troops in Syrian controlled west Beirut would be implemented within 10 days.

The security plan was brokered last month in Damascus between President Elias Hrawi and his Syrian counterpart Hafez al-Assad in a bid to help Mr. Hrawi extend his authority over Lebanon, which is contested by Christian

military leader Michel Aoun.

Two armoured PSP vehicles and a dozen military cars loaded with ammunition and mounted with cannons and rocket launchers converged on a stadium in west Beirut before heading for the Druze-controlled Shouf mountains southeast of Beirut.

Thirty PSP militiamen in green fatigues led the convoys out of west Beirut.

The PSP said in a statement it had emptied all its ammunition depots in Beirut and removed from the Lebanese capital heavy and medium size weapons as well as military vehicles to facilitate implementation of the plan.

It added that PSP fighters would evacuate positions along Beirut's demarcation line after the deployment there of the "national army" under the command of General Emile Lahoud of the Hrawi administration.

The pro-Syrian militiamen and other Moslem fighters are deployed on the western side of the demarcation line facing Christian militiamen in the Lebanese Forces and units of the 15,000 army troops led by Gen. Aoun.

A high ranking Syrian military delegation led by the commander of the 35,000 Syrian troops deployed in Lebanon, General Saeed Bayraqdar, this week met with Lebanese officials in west Beirut to examine ways of implementing the plan.

Well-informed sources said the Syrian officials also met the heads of Moslem militias, including the pro-Iranian Hezbollah, and urged them to disarm and order their fighters to remove their uniforms and don civilian clothes.

Hezbollah, which has fortified positions in Beirut's southern suburbs, has so far failed to take a position on the plan while the secular Shiite Amal militia and other pro-Syrian factions have expressed their support for it.

EAST BERLIN (FEB. 2) - Former East German state and party leader Erich Honecker, 77, who was released from hospital last week after a cancer operation, is too ill to undergo police questioning, his attorney Wolfgang Vogel said Friday.

The East German news agency Adn quoted Vogel as saying the medical verdict came from Professor Peter Althaus, who performed the operation on Honecker at East Berlin's Charite clinic.

The former East German leader is under investigation for various crimes

including high treason, and has been given refuge at a private home north of Berlin by the Protestant church.

Vogel said two detectives made an unannounced appeareance at Honecker's residence Friday. According to Vogel, Prof. Althaus believes that any further police questioning could endanger his patient's life.

ACCRA (FEB 2) - Ghana's head of state, Gerry Rawlings, told a scientific conference in Accra Friday that African scientists and technologists are not doing enough to solve the continent's problems.

In a scathing attack Rawlings told the 400 scientists, technologists and researchers who attended the five-day conference that they were partly to blame for the continent's problems.

He said many African scientists were ''guilty of illogical reasoning and therefore often fail to arrive at the right decisions in the interests of Africa.''

Rawlings cited a declaration by a scientific meeting in Zaire two years ago on the acquired immune deficiency syndrome (Aids) saying it posed no threat to the continent. He described the proclamation as ''ridiculous.''

In a declaration, the scientists called for accelerated training in science and technology at all levels of education.

They urged member states of the Organization of African Unity (Oau) to see national science and technology plans within the framework of national development plans.

WASHINGTON (FEB. 2) - Salvadoran President Alfredo Cristiani Friday rejected any preconditions in peace talks with leftist guerrillas, at the outset of a four-day visit to the United States.

Speaking at the National Press Club, Mr. Cristiani said he would not purge his country's armed forces nor give U.N. Secretary General Javier Perez de Cuellar a blank check in mediating efforts between San Salvador and the Farabundo Marti National Liberation Front (FMLN).

The FMLN recently accepted Mr. Cristiani's offer to resolve the 10-year civil war in El Salvador through negotiations with Mr. Perez de Cuellar acting as mediator.

A rebel spokesman told Agence France-Presse in New York that a secret meeting started Thursday between FMLN representatives and Alvaro de Soto, Mr. Perez de Cuellar's personal advisor on Central American affairs.

Mr. Cristiani said the armed forces were carrying out "programs to professionalize their elements" in order to put an end to human rights violations.

Sitting next to his defense minister, General Humberto Larios, Mr. Cristiani said it was unfair to judge the armed forces of El Salvador "for the activity of a few of its elements."

He was referring to charges brought against an army colonel and seven other soldiers suspected of the murder of six Jesuit priests, an employee of theirs and her daughter last November in San Salvador's Central American University.

"We could sit down here and try to judge the five so-called 'comandantes' of the FMLN and you'll find more atrocities coming from them than probably any other Salvadoran citizen," Mr. Cristiani said.

He insisted that he had not rejected a mediating role for Mr. Perez de Cuellar.

That role was set out in U.N. Security Council Resolution 637, he said.

The resulution expressed support for a Central American peace plan signed by Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua in August of 1987, and asked Mr. Perez de Cuellar to use his "good offices" to promote the initiative throughout the region.

Secretary of State James Baker telephoned Mr. Perez de Cuellar Friday to express the United States' "strong support" for U.N. efforts to restart negotiations in El Salvador, spokeswoman Margaret Tutwiler said.

Miss Tutwiler expressed the hope that the FMLN and the Salvadoran Government would "pledge not to walk away from the negotiating table no matter what the excuse or provocation."

The Secretary General's role, said Mr. Cristiani, should be that of leading the FMLN to the negotiating table, from which it withdrew last November after an initial round of talks in Mexico the month before.

The second step in the process, he added, should deal with consolidating the democratic process in El Salvador, to which all sectors of its society must contribute.

Lastly, the FMLN should be incorporated to the democratic process, said Mr. Cristiani.

The FMLN recently demanded that U.S. assistance to El Salvador be stopped because it did nothing but strengthen the army, and suggested that the issue might also be included in the peace talks as a possible bargaining chip for a cease-fire.

Mr. Cristiani said that any change in the pattern of U.S. aid for El Salvador would have a negative impact on negotiations because it would encourage extremists and upset the military.

While Mr. Cristiani was holding his press conference, close to 100 people formed two rival groups on the street shouting slogans for and against Mr. Cristiani's government and the FMLN.

Mr. Cristiani's visit coincides with a debate in Congress over U.S. aid to El Salvador, currently at 1.5 million dollars a day. Two proposals have been proposed linking any future aid to an improvement in human rights.

Mr. Cristiani, who met on Wednesday with several leaders of Congress, acknowledged that those conditions might be approved.

#90033d8890 02/02/1990 ~French/German News Agency

TOKYO (FEB. 2) - Japan's unemployment rate continued to fall last year to an average 2.3 percent of the working-age population, down from 2.5 per cent in 1988 and the lowest level since 1981.

The low level of unemployment increased concern that the shortage of workers would hit labor costs and cause inflation.

In 1989, there were an average of 125 openings for every 100 job seekers, according to a report published Friday by the Labour Ministry.

Sharply lower than what economists call the structural level of unemployment, 3.1 percent, which represents full employment in a healthy economy, the Japanese tally is the lowest of the seven major industrial economies.

The trend became even stronger towards the end of the year and extended throughout Japan. In December, there were 1.22 million unemployed Japanese or 2.1 percent of the population, the lowest level since 1981, according to the Management and Coordination Agency.

According to economists at the Sumitomo Bank, Japan is in the middle of an economic boom but suffers increasingly from an ageing population. Within

three years Japan will be short of 1.7 million workers, they say.

Low unemployment has become a major concern for officials in Tokyo, worried about the effect on wage claims, production capacity, consumer prices and illegal immigration.

Inflation is already showing signs of rising rapidly, hitting 2.3 percent in 1989 compared with 0.7 percent in 1988.

Last year, there were more jobs for married women, who have traditionally been confined to the home, for senior citizens and for part-time workers.

Economists say more labour immigration is now unavoidable and that the shortage of workers is likely to worsen in the coming months.

The Tokyo Chamber of Commerce and Industry last month proposed a plan to allow unskilled workers from abroad into Japan for a maximum of two years under agreements with a certain number of countries.

#90033d9750 02/02/1990 ~French/German News Agency
Singapore (FEB. 2) - Business volume on the Singapore International Monetary Exchange (Simex) rose to 455,973 contracts in January, 42 percent above the 322,173 contracts for same month last year, officials said

Simex President Ang Swee Tian said the increase augured well for the rest of the year as the market usually gets a slow start in January.

Ang said the listing of the crude oil contract and the revised gold contract would probably take place this year with the likely addition of another interest rate contract - the Deutsche Mark interest rate.

Simex was recently named ''Exchange of the Year'' by the London-base International Financing Review (Ifr).

Referring to fears that the Tokyo International Financial Futures Exchange, which opened last year, would pose a threat to Singapore, Ifr said last year's record volume of 6.27 million contracts ''confounded the pessimists.''

PARIS (FEB. 2) - The French external trade deficit fell slightly in December to 2.21 billion francs (388.4 million dollars), according to official seasonally adjusted figures published Friday.

This took the deficit for 1989 to 45.73 billion francs (8.02 billion dollars) against a deficit of 32.73 billion francs (5.74 billion dollars) in 1988.

In November the trade balance recovered markedly to a deficit of 2.382 billion francs (417.9 million dollars).

Imports in December eased slightly to 98.52 billion francs against 101.70 billion in November. Exports eased to 96.30 billion francs against 99.31 billion francs in November. The ratio of import coverage rose to 97.75 per cent from 96.60 percent.

Trade in industrial goods, including military equipment, showed a slighty increased seasonally adjusted deficit of 1.82 billion francs compared with a November deficit of 1.58 billion francs.

The surplus on trade in military goods fell slightly - after an improvement in November - to 3.18 billion francs against 3.83 billion.

France benefited from the sale of 11 Airbus aircraft, representing export value of 2.96 billion francs compared with eight aircraft and 2.49 billion francs in November.

The deficit in trade with the other 11 members of the European Economic Community (EEC) was 3.37 billion francs after 5.26 billion francs in November.

But the deficit on trade with West Germany was higher at 4.68 billion francs compared with 4.43 billion.

The deficit with Japan improved to 1.75 billion francs against 2.2 billion.

The balance with the United States improved for the second successive month to a deficit of 1.11 billion francs from a deficit of 2.80 billion in November.

#90033d9840 02/02/1990 ~French/German News Agency

BEIJING (FEB. 2) - Spirit production fell by 1.4 million tons in China in 1989, it was reported Friday, despite a late-year effort by the authorities to invigorate liquor sales.

Some 3.6 million tons of liquor was produced, using 3.3 million tons less grain than in 1988, as 10,000 distilleries suspended production and went out of business, the official Economic Information newspaper said.

The Ministry of Light Industry linked the drop in production to austerity

measures announced in 1988 which included a steep hike in liquor prices and restrictions on official banqueting, the report said.

Faced with huge inventories of unsold liquor, the government in September eased its policy and let prices fall by an average of 21 percent, causing sales of white liquors to double in just a month, observers recalled.

One of the most famous brands, Maotai, made from white sorghum in southwest China and a fixture at many banquets, had earlier been reported on the brink of extinction due to the sales slump.

Spirit production had hit a record five million tons in 1988, using 12.5 million tons of grain, much of it imported, Economic Information said.

#90033d9910 02/02/1990 ~French/German News Agency

Bonn (FEB. 2) - West German industrial production ended 1989 showing strong growth rates in almost every sector, the Economics Ministry said here Friday.

The ministry said the overall level of output by industry in December was 2.5 percent above November's level, and during the two-month November-December period industrial production was 1.5 percent above the preceding September-October time frame.

In December, manufacturing output was three percent higher than in November, while electricity and gas utilities output was up by two percent and mining one percent higher.

Only the building industry showed a drop, of three percent, from the extraordinarily strong November performance, Bonn said.

Comparing the November-December period to the same two months of 1988, the ministry said overall industrial output was 5.4 percent higher at the end of 1989.

The highest growth rates were construction (7.8 percent) and investment goods (7.3 percent), while mining was down by 2.8 percent compared to November-December 1988.

TOKYO (FEB. 2) KYODO - KOBE STEEL LTD. SAID IT HAD COMPLETED RECONSTRUCTION OF AN IRON PRODUCTION PLANT IN VENEZUELA OWNED BY A

SUBSIDIARY OF CORPORACION VENEZOLANA DE GUYABA (CVG), AND STARTED ITS OPERATION.

KOBE STEEL GOT THE RECONSTRUCTION WORK FROM THE CVG SUBSIDIARY, MINERALES ORDAZ CA (MINORCA), IN DECEMBER 1987 TO PRODUCE HOT BRIQUETTED IRON, AN ENHANCED FORM OF DIRECT REDUCED IRON.

THE WORK WAS COMPLETED IN DECEMBER 1989 AS SCHEDULED, AND KOBE STEEL STARTED PRODUCTION IN JANUARY, COMPANY OFFICIALS SAID.

UNDER THE CONTRACT, KOBE STEEL LEASES THE MINORCA PLANT FOR THE NEXT NINE YEARS TO PRODUCE 800,000 TONS OF IRON ANNUALLY AND MARKET THE OUTPUT IN THE UNITED STATES AND EUROPE.

TOTAL INVESTMENTS FOR THE PROJECT CAME TO 15 BILLION YEN WITH KOBE STEEL AND OTHER JAPANESE PARTNERS PROVIDING 35 PERCENT AND THE INTERNATIONAL FINANCE CORP., AFFILIATED WITH THE WORLD BANK, AND 11 JAPANESE BANKS PROVIDING THE REMAINDER, THE OFFICIALS SAID.

UNDER THE AGREEMENT, THE COMPANY AND ITS JAPANESE PARTNERS CAN GET BACK THAT MONEY THROUGH PROFITS GENERATED FROM, THE OPERATION OF THE FACTORY DURING THE FIVE-YEAR PERIOD, THEY SAID.

THE MERIT FOR MINORCA IS THAT IT COULD REACTIVATE THE PLANT WITHOUT RAISING FUNDS AND WILL LEARN OPERATIONAL KNOW-HOW BEFORE THE PLANT IS RETURNED TO IT.

#90033p0001 02/02/1990 ~PR Newswire

DALLAS, TX (FEB. 2) PR NEWSWIRE - An agreement has been signed between Western Sizzlin Inc. and Aleph Co. Ltd. of Sapporo, Japan, for the development of 150 Western Sizzlin family steak restaurants in Japan during the next 15 years.

Under the agreement, Aleph will be the master licensee, with the right to develop and supervise other franchisees. Aleph will develop the initial two restaurants in Tokyo during 1990.

The announcement was made jointly in Tokyo by Frank Carney, Western Sizzlin chairman and co-founder of Pizza Hut Inc., and Akio Shoji, president of Aleph. Founded in 1968, Aleph has annual sales of 8.3 billion yen or approximately $60 million U.S. for its three restaurant concepts.

Carney noted that the expansion into Japan represented the second major international agreement signed in recent months. "Western Sizzlin is among the first American family steak restaurants with locations in Japan

" Carney said. "Combined with the 150 unit development agreement announced for Canada, this represents a significant overall expansion for the chain. It really opens up Southeast Asia and the Pacific Rim nations for us," he said.

"We're taking great care in developing the menu," Carney said. "Many items will be the same. But we will conduct a significant amount of taste testing to assure that the flavor of our products meet with consumer approval."

He said that the meat used at Japan-based Western Sizzlin restaurants would be imported from the United States, because there seems to be a preference for American corn-fed beef among Japanese consumers.

Aleph has developed food commissaries in Tokyo, Sapporo and several locations in Japan, which will serve as processing centers for Western Sizzlin sauces, food bar items and possibly meat cutting. Carney said there would be cost benefits from the association with Aleph, because Aleph will be providing some products to franchisees.

Aleph currently operates 50 Bikkuri Donkey restaurants, specializing in hamburger steak; three upscale dinner houses known by the name Half Dime; and a Don Ta Varta restaurant featuring salad bars.

Western Sizzlin currently has more than 500 family steak restaurants in the United States, with annual sales of $465 million.

SAN DIEGO (FEB. 2) PR NEWSWIRE - Xscribe Corp. (NASDAQ: XSCR) elected Ira H. Sharp to its board of directors at its regularly scheduled meeting.

Sharp assumed ownership of Alderson Reporting Co. Inc. in Washington, the oldest court reporting firm in that city in 1977. Shortly after taking over the company, Sharp's firm was the first firm to use Computer Aided Transcription technology. Alderson Reporting Co. Inc. provides deposition court reporting and litigation support services nationwide. The firm is also the official court reporter for the U.S. Supreme Court, congressional committees, and the Federal Trade Commission.

Sharp has served as a seminar leader for many organizations involved in litigation support programs and software resources and has been awarded industry honors for his efforts in promoting automated litigation support, particularly DISCOVERY ZX, a software product of Data Dynamics, a division

of Xscribe.

From 1968 until 1977, Sharp was a member and partner in the law firm of Armstrong, Teasdale, Kramer and Vaughan in St. Louis. While in St. Louis he served as chairman of the board of the Providence House, a Department of Justice federally funded resident and education program for high school juveniles.

Sharp received his BA degree from Washington University in St. Louis and his LLB degree from Columbia University Law School in New York. He is a member of the ABA's Judicial Administration Committee Division on Court Automation. He is an associate member of the National Shorthand Reporters Association.

Xscribe designs and markets a wide variety of high-technology software products for legal professionals, including CAT systems for court reporters, computer integrated courtrooms, real-time captioning systems for the deaf and hard of hearing, and microcomputer-based systems for litigation support.

LANSING, MI (FEB. 2) PR NEWSWIRE - Oldsmobile Division of General Motors Corporation (NYSE: GM) has announced it will continue its current dealer incentive program through May 2, 1990. The program continues to provide Oldsmobile dealers cash back on most car lines, plus a direct consumer incentive on Cutlass Supremes of $1,500 and $1,000 on 1989 and 1990 models respectively.

In lieu of the rebates on the Cutlass Supreme models, consumers may take advantage of a special 6.9-percent GMAC finance rate for contracts up to 48 months.

"Oldsmobile dealers and customers alike are finding this program to be a successful one, so we're going to continue it largely unchanged into the spring," said David E. Lahti, general sales and service manager. "Dealers are telling us they're finding this program to be a successful tool in tailoring incentives to their individual markets and circumstances, and the customers are responding," he added.

#90033p0019 02/02/1990 ~PR Newswire

DOWNERS GROVE, IL (FEB. 2) PR NEWSWIRE - James C. Smith, president and chief executive officer of HealthCare COMPARE Corp. (NASDAQ: HCCC) announced results today for the quarter ended Dec. 31, 1989.

Revenues for the quarter ended Dec. 31, 1989 were $7,936,000, as compared to $8,149,000 reported for the comparable quarter of 1988. Earnings for the quarter were $527,000 or nine cents per share, compared to $616,000 or 11 cents per share for the comparable period of 1988.

Smith noted that he was pleased with the results since they exceeded the company's original expectations. As previously announced, the company anticipated that the fourth calendar quarter of 1989 and first calendar quarter of 1990 would be adversely impacted by increased operating costs associated with increased lease commitments for its corporate headquarters as well as increased costs relating to its subsidiary's move to a larger facility in Sacramento, Calif.

The quarter ended Dec. 31, 1989 is the first period for which the company has disclosed results necessitated by its adoption of a new fiscal year. As previously announced, the company changed its fiscal year from Aug. 31 to Dec. 31, a date which more closely corresponds with the company's normal business cycle. The year beginning Jan. 1, 1990 will be the first full year to be reported under the new fiscal year format.

Additionally, Smith indicated that the company has been informed by Wisconsin Physician Service (WPS) that WPS' recently awarded contract to provide services to the Department of Defense has been temporarily suspended as the result of a protest filed by the unsuccessful bidder in the procurement. Therefore, the company's work on the managed care component of this contract is suspended pending a review of the contract award by the General Services Administration board of contract appeals. A decision by the administrative judge is required to be made no later than March 19, 1990. WPS has expressed to COMPARE its confidence that the board of contract appeals will sustain the award and that work will be resumed following the March 19 decision. Smith indicated that if the procurement is upheld, the delay in implementing the contract would result in a delay in COMPARE realizing revenue for its services.

HealthCare COMPARE Corp. is one of the nation's leading independent managed care/cost management companies. The company provides data analysis, extensive utilization management and provider negotiation services (PPO development and management). Its services are provided to indemnity health care payers as well as alternative delivery systems. The company manages costs and utilization without compromising the quality of care available to health care plan participants.

WORCESTER, MA (FEB. 2) PR NEWSWIRE - Cambridge Bioscience Corp. (NASDAQ: CBCX) today announced a series of new and expanded assignments among its key management staff.

Donald G. Reed - senior vice president, treasurer, and director- External Affairs. Reed has been vice president, finance, chief financial officer and treasurer of the company since April 1988. Previously, he had been chairman and chief executive officer of The Reed Group of Florida Inc., a private investment banking firm, and has recently held positions as managing director with Thomson McKinnon Securities Inc.; executive vice president Duff & Phelps Inc.; and senior vice president and member of the managment and audit committees of Booz, Allen & Hamilton Inc.

Frederick V. Casselman - vice president of Legal and Regulatory Affairs. Casselman had been vice president, general counsel and secretary since Oct. 1988. In the previous years, Casselman was affiliated with the Boston law firm Bromberg, Sunstein & Casselman, where he concentrated in corporate finance, technology transfer and labor relations.

Dante J. Marciani, Ph.D - vice president of Research & Development. Marciani has been vice president of Research for the company since 1983. Prior to that, Marciani was Divisional Laboratory Director of Research, Bethesda Research Laboratories Inc., where he directed research in immunochemistry and separation sciences. Previously, he had been a scientist at the National Cancer Institute, NIH, in Bethesda, Md.

John C. Kudzma - vice president-Finance and chief financial officer.

Kudzma joined the company as controller in August 1989. Most recently, he was chief financial officer, vice president, finance & administration and treasurer of the corporation at Computer Telephone Corp. in Wellesley Hills, Mass. Prior to that, he served as chief financial officer of Hygeia Sciences Inc., a biotech company. Previously, he had spent 15 years at New England Nuclear Corp., a medical supplies company, in various controllership and treasury functions. Before that, he served as manager of Budgets and Planning for Raytheon Corp. in Bedford, Mass.

Susan R. Arntsen - vice president of Human Resources. Arntsen has been with the company since Jan. 1989 as director, Human Resources. Arntsen came to the company from Cambridge Research Laboratories, a biotech division of Johnson & Johnson, where she was Human Resources Manager.

Gary E. Long - vice president of Operations. Long joined the company in April 1989 as group director of Operations. Prior to that, he was general manager of the Biological Corp. of America (BCA) blood bank business at Organon Teknika. He has also held positions as vice president, Operations and General Manager with Cooper Biomedical and as director of Manufacturing with Ortho Diagnostics.

Cambridge BioScience Corp. is a biotechnology company utilizing the latest advanced in genetic engineering and monoclonal antibody technology to develop products for the detection and prevention of human and animal infectious diseases.

CLEVELAND (FEB. 2) PR NEWSWIRE - Ford Motor Company (NYSE: F) today announced a $250,000 contribution to help restore the widely acclaimed Fountain of Eternal Life monument in downtown Cleveland. Ford Chairman Donald E. Petersen said the company would lead a $1.5 million fund-raising campaign on behalf of the City of Cleveland.

The monument - a heroic figure of life reaching heavenward from the flames of war - was created 26 years ago by master sculptor Marshall Fredericks of Michigan as a memorial to Cleveland veterans of World War II and Korea. It was dismantled and stored recently because of construction of the Society Center, a hotel and underground parking structure.

Ford is leading the fund-raising campaign with the assistance of Mayor Michael White. "We are undertaking this effort because of our long-standing relationship with both the City of Cleveland and Marshall

Fredericks himself," Petersen explained.

"Over the years, the monument has deteriorated and is in need of restoration. We now have an excellent opportunity to restore this beautiful work of art and reassemble it on the completely renovated grounds of Mall A."

Petersen asked the major corporations of the city to join the effort by pledging funds to preserve one of Cleveland's more notable landmarks.

"Ford believes that a sound cultural environment and a dynamic downtown will help attract new industry, create jobs and recruit executives in Cleveland," Petersen said. "We consider Cleveland vital to Ford's success and are proud to be a part of the community."

Ford is the Cleveland area's largest private-sector employer with about 17,000 employees at five plants. The company has provided promotional assistance in United Way campaigns; sponsored the popular SuccessNet programs; contributed to the Cleveland Tomorrow Partnership Fund, and participated in many other community projects.

ROCHESTER, NY (FEB. 2) PR NEWSWIRE - A mid-volume engineering copier that offers numerous features designed to significantly enhance workflow, including an "intelligent" roll-media cutter option that can automatically cut and dispense copy media matched to the size of the original, was announced today by the Engineering Systems Division (ESD) of Xerox Corporation (NYSE: XRX).

The Xerox 2520 Engineering Copier is a plain-paper copier that makes multiple size-for-size copies through E-size at a rate of 12 feet per minute. The 2520 also has a partial-copy feature that allows users to selectively copy areas of a document.

The copier is priced at $7,495, equipped with stand. The 2520 makes copies from a variety of originals, including diazo blueline prints, sepias, CAD (computer-aided design) plots, cut-and-tape composites and rigid originals up to 1/8-inch thick. Copies can be made on unsensitized bond paper, vellum or polyester drafting film.

The 2520 accepts originals to 36 inches wide by any manageable length when producing single copies and sets, and originals up to 36 inches wide by 54 inches long when using its automatic document handler.

The 2520's partial-copy feature offers the option of making copies smaller than the original, a capability that is particularly useful when working with large roll drawings.

Workflow-enhancing features include an "intelligent" roll-media cutter option, which enables the copier's "autocut" feature. In this mode, the copier measures the size of an original and transmits information to the cutter, which then automatically cuts and dispenses copy media sheets of the required size and number.

Other 2520 features include a lead margin setting, which adjusts image registration on the copy to allow for a binding edge, and a document background control that selects the proper contrast level for originals with light or dark backgrounds. Independent of the background control is the copy-contrast selector, variable over five steps, which allows users to lighten or darken copy-image density.

National order taking for the 2520 begins later this month through the Xerox Engineering and Graphics Products direct sales force and a nationwide network of authorized Xerox dealers. Delivery is scheduled to begin in March.

JERICHO, NY (FEB. 2) PR NEWSWIRE - Getty Petroleum Corp. (NYSE: GTY) today announced that Milton Safenowitz, co-founder, executive vice president and director of the company, has retired after 35 years in the petroleum business, effective at the end of the company's fiscal year, Jan. 31, 1990, in order to devote more time to his family and personal endeavors.

Safenowitz, age 62, will continue to serve on the board of directors and provide consulting services to the company. He has advised the company that he intends to retain his Getty stock.

"Milton Safenowitz has been a major factor in the company's growth and success," said Leo Liebowitz, president and chief executive officer.

"In his continuing relationship, Safenowitz will participate in special assignments for the company and as such, Getty will continue to benefit from Safenowitz's years of experience," Liebowtiz concluded.

Getty Petroleum Corp., one of the nation's largest independent markets of gasoline and petroleum products, markets in a 13-state area, Maine through

Virginia. The company is also a major marketer of heating oil and is a wholesale distributor of a variety of petroleum products through its East coast petroleum and distribution network.

MIAMI (FEB. 2) PR NEWSWIRE - Cordis Corporation (NASDAQ-NMS: CORD) today reported improved sales and earnings for its fiscal second quarter ended Dec. 31, 1989.

Sales for the period were $37.9 million, up 10 percent from the prior year's corresponding quarter. Angiography sales, which currently account for 90 percent of Cordis revenues, advanced 13 percent while neuroscience product sales declined 8 percent.

The company reported both income from continuing operations and net income of $1.7 million, or 12 cents a share. For continuing operations, this represented a 91 percent gain over the $866,000, or 7 cents a share, reported in the corresponding prior period. In the year-earlier second quarter, Cordis net income totaled $205,000, or 2 cents a share, including a loss from discontinued operations of $661,000, or 5 cents a share.

Miami-based Cordis Corporation manufactures and markets a variety of medical devices and systems for the angiographic and neuroscience markets. Shares of the company's stock are traded on the NASDAQ National Market under the symbol CORD.

MORRIS TOWNSHIP, NJ (FEB. 2) PR NEWSWIRE - A panel of technical experts organized by the U.S. Environmental Protection Agency has certified a solvent developed by Allied-Signal Inc. (NYSE: ALD) as the first effective alternative to ozone-depleting chlorofluorocarbons (CFCs) for cleaning computer components.

The 230-member industry-government test group, created to evaluate chemical alternatives to CFCs, reported that Allied-Signal's Genesolv 2010 solvent is capable of cleaning computer circuit boards as well or better than CFC-113, a cleaning solvent widely used in the computer industry.

Genesolv 2010 is the first cleaning solution to be certified by the panel as an effective substitute for CFC-113. The panel has scheduled 10 other solvents for testing.

The test group recommended that the U.S. Department of Defense revise its military specifications to allow Genesolv 2010 to replace CFC-113 for use in cleaning printed circuit boards once the EPA approves the product for commercialization.

Genesolv 2010, for which Allied-Signal has sought patents, is a blend of

hydrochlorofluorocarbons, or HCFCs, alcohol and stabilizers. HCFCs are new chemicals that have far less ozone depleting potential than chlorofluorocarbons. They are currently undergoing extensive toxicity testing for health and environmental safety.

Allied-Signal has committed $250 million to development of a full line of products to replace CFCs, which have been implicated in the depletion of the earth's ozone layer and are internationally regulated.

"We are extremely pleased that our new solvent is the first replacement that has been found to meet or exceed the cleaning requirements of the military specifications," said Joel Rodgers, vice president and general manager of Allied-Signal's Genesolv/Baron Blakeslee unit. "Right now, the military specifications limit the ability of the electronics industry to utilize lower ozone-depleting products." Rodgers added that the U.S. Military is a major consumer of products cleaned with CFC-113 based solvents, and its standards have become the world standard.

Allied-Signal is an advanced technology company with businesses in aerospace, automotive products, and engineered materials.

#90033p0038 02/02/1990 ~PR Newswire

GRAND RAPIDS, MI (FEB. 2) PR NEWSWIRE - Foremost Corporation of America (FCOA) (OTC: FCOA) today announced improved fourth-quarter earnings before a special reserve charge. Without the previously announced special charge quarterly results were $.45 per share compared to $.41 per share for 1988. Catastrophes, including the California earthquake and a late-year ice storm had an impact on fourth-quarter earnings.

Despite natural disasters, the company ended the year with several improvements in performance. Fourth-quarter mobile home insurance written premium was up 6 percent from 1988, and up 1 percent for the year.

Other fourth-quarter accomplishments included signing a multi-year contract with the American Association of Retired Persons (AARP) granting Foremost the exclusive endorsement to provide a Mobile Home Insurance program for AARP members.

FCOA ended 1989 with net earnings, before special charges and tax adjustments, of $1.89 per share. That compares with $2.80 per share in 1988. Special charges of $2.19 per share in fourth quarter, 1989, and $.81 per share in third quarter, 1988 reduced both year's results. The special charges strengthened reserves from losses anticipated for a

private credit insurance program withdrawn from the market in 1985.

The combined loss and expense ratio for the property and casualty group was 99 percent for the fourth quarter, with 6.4 points directly due to catastrophes. In 1988, the fourth-quarter ratio was 101.3 percent, 2.7 points caused by catastrophe losses. For the year 1989, the combined ratio was 103.7 percent, with 9.9 points of catastrophe loss. The combined ratio for 1988 was 97 percent, including only 2.7 points of catastrophe losses.

Other fourth-quarter results included:

- Recreational vehicle written premium up 2 percent for the quarter. Fourth-quarter results are an accurate reflection of RV premium performance in that quarter of the year. The year's 15-percent increase reflects the effect of second-quarter changes in renewal billing methods.

- Improved underwriting performance in commercial products.

- Improved life insurance company results, a fourth-quarter combined ratio of 100 percent compared with 106.3 percent for the fourth quarter of 1988. The life company had a combined ratio of 100.3 percent for 1989, compared with 106.1 percent the previous year.

- A decrease in the statutory expense ratio resulting from expense controls. In the fourth quarter, the statutory expense ratio was 3.6 points less than in fourth quarter, 1988. For the year, it was 1.4 points lower than in 1988.

- A planned drop in written premium for commercial products, through restricted products, distribution and tighter underwriting. Other product sale restrictions were placed on auto business, and most recently, Collateral Protection Insurance (CPI), which is part of a competitive market, where pricing and compensation levels make it difficult to write CPI at acceptable profit levels.

- After-tax investment income from continuing operations increased 24 percent in the fourth quarter, over 1988. The increase came primarily from earnings on two large security holdings. These securities declared dividends in the fourth quarter, and earnings occurred on the declared date. For the year, after-tax investment income was 6 percent ahead of 1988.

FCOA today announced a regular quarterly dividend of $.27 per share of common stock, payable on March 15, 1990, to shareholders of record on Feb. 15, 1990.

Foremost Corporation of America is a holding company which, through its

subsidiaries, provides property and casualty insurance to people who buy, sell or finance manufactured homes and recreational vehicles.

MT. KISCO, NY (FEB. 2) PR NEWSWIRE - Carl C. Icahn, chairman of the board of Trans World Airlines, Inc. (NYSE: TWA) today announced the promotion of J. William Hoar to the position of executive vice president operations and chief operating officer. Hoar was also elected to fill the vacancy on the TWA board of directors created by the retirement of Edward Crane.

Hoar has also been added to TWA's office of the chairman which consists of chairman Icahn, vice chairman Alfred Kingsley, and executive vice president Jerry Nichols. In commenting on Hoar's promotions, Icahn stated "Bill brings a tremendous dedication and energy level to TWA, as well as a willingness to make hard decisions, the sort of traits that I believe will be necessary at TWA in the coming year. In my four years at TWA I have worked extremely closely with Bill and have always found him to be an important member of TWA's management team."

Hoar has been at TWA for over twenty-one years and has held positions in flight operations, marketing, inflight services and industrial relations. Most recently he has been senior vice president- employee relations responsible for labor negotiations and contracts with all of TWA's unions, in addition to handling special projects at TWA. He and his wife, Jane, live in Kent, Conn. and have three sons.

EDEN PRAIRIE, MN (FEB. 2) PR NEWSWIRE - GE Capital announced today completion of the acquisition of the U.S. portion of McCullagh Leasing from Bank of New England.

Completion of the acquisition of the Canadian operations of McCullagh is expected by Feb. 9.

McCullagh's U.S. operations, based in Roseville, Mich., will operate as a separate division of GE Capital Fleet Services. Headquartered in Eden Prairie, GE Capital Fleet Services is the vehicle fleet management subsidiary of GE Capital. Employing over 1,000 people in the Minneapolis/St. Paul area, it is the largest fleet-management company in North America. Including the McCullagh acquisition, GE Capital Fleet Services manages over 450,000 vehicles in the United States and Canada.

McCullagh Leasing, in its 41st year of operation, will continue to be headquartered in Roseville.

"McCullagh provides us with excellent business capabilities to provide custom service on a nationwide basis," said Jim Rogers, president of GE Capital Fleet Services.

"Utilizing our unique network of full-service regional offices, we have a real competitive advantage over other national fleet-management companies," added Jim Culotta, president of McCullagh Leasing, under whose direction McCullagh will continue.

HOUSTON (FEB. 2) PR NEWSWIRE - The GNI Group, Inc. (NASDAQ: GNUC) reported that financial results for the quarter ended Dec. 31, 1989 were in the range set forth in the company's Dec. 19, 1989 announcement which indicated that second quarter revenues and earnings would not be as high as previously expected. For the second quarter GNI reported revenues of $2,574,340 which resulted in net income of $1,761 and flat earnings per share. Revenues for the comparable period the previous year were $3,309,923 which resulted in net income of $264,798 and $.06 per share.

For the six months ended Dec. 31, 1989, GNI had net income of $273,497 or $.06 per share on revenues of $5,741,732 compared to a net loss of $196,849 or a loss of $.04 per share on revenues of $5,302,201 for the six months in 1988.

Carl V Rush, Jr., GNI president and CEO, said, "After achieving strong growth in sales and earnings in the first quarter of fiscal 1990, these second quarter results are indeed disappointing. We believe, however, that based upon current business conditions earnings' targets for the second half of the year are achievable.

"GNI is undergoing a major program of business diversification and

enhancement of services. The construction and modification of facilities in support of this diversification affected our day-to-day operations to some extent in the second quarter. These modifications, which were concluded by the quarter's end, will have a long-term positive effect on the company's competitiveness and ability to grow into a major regional provider of environmental services," Rush concluded.

The company also announced that construction of its new chemical processing and waste reclamation plant at GNI's Deer Park, Texas site is proceeding on schedule.

The GNI Group, Inc. is an environmental services company headquartered in Houston. The company has three interactive subsidiaries which benefit from a shared base of large and small industrial customers. Resource Transportation Services operates as a for-hire motor carrier of hazardous and non-hazardous wastes in 48 states. Disposal Systems specializes in the environmentally secure treatment and disposal of hazardous wastes for customers across the country. Chemical Resource Processing, upon beginning full operation of its new distallation facility in July 1990, will provide waste minimization, treatment, reclamation and toll processing services.

NEW YORK (FEB. 2) PR NEWSWIRE - Following an all-night bargaining session that went past the midnight contract deadline, the negotiating committee of the Writers Guild of America, East agreed to a final proposal made early this morning by Capital Cities/ABC for a new three- year contract covering ABC network and local television and radio newswriters (some of whom also serve as producers), editors, desk assistants, researchers, production assistants, promotion writers and graphic artists. Employees covered are at ABC network TV and radio in New York and Washington, and at WABC-TV in New York.

The agreement, which provides for wage increases and other benefits, is

subject to the approval of the membership at meetings to be held in New York and Washington on Monday evening at 7 p.m.

A bitter seven-week strike by the Guild against ABC in 1987 had led to the three-year contract that ended yesterday. If the agreement for the new pact to be recommended by the negotiating committee is approved by the Guild Council and the membership, the new contract will be retroactive to Mona Mangan, executive director of the Writers Guild of America, East, who was chief negotiator in the talks, said, "We believe that the agreement provides for a fair and equitable contract for our members. We are especially pleased that we were able to fight off major attempts by ABC to dilute the jurisdiction of the Guild."

The agreement provides for an immediate wage increase of 5 percent for all covered employees and another wage increase of 5 percent on Aug. 1, 1991, with substantial additional increases for graphic artists. For news staffers in network and local TV and radio, there will be restoration of fees which otherwise would have expired. The Guild was able to turn back attempts by ABC to make significant jurisdictional incursions at "Good Morning America" and at "News One" (a television news service for affiliates). The agreement also provides for new fees for newswriters in network radio who assume additional technical duties and additional vacation time for Guild members who have been with ABC-TV or radio for more than 15 years, as well as other contractual improvements.

Negotiations between the Writers Guild and CBS for a new contract for Guild news staff employees at CBS network and local TV and radio will begin on Tuesday, Feb. 6. The present contract will expire on March 1, 1990.

LAS VEGAS, NEV (FEB. 2) PR NEWSWIRE - Showboat, Inc. (NYSE: SBO) announced today a number of executive changes.

The company's board of directors has elected Frank A. Modica, chairman of the board of Atlantic City Showboat. He remains as executive vice president and chief operating officer of Showboat Inc., the parent company president and chief executive officer of Ocean Showboat, Inc., the holding company of Atlantic City Showboat, and president and chief executive officer of Showboat Operating Company in Las Vegas. He is a member of the board of directors of Showboat, Inc.

John Kell Houssels, III, was elected president and chief executive officer of Atlantic City Showboat, Inc. Earlier, Houssels was senior vice

president and general manager of SBO's Atlantic City facility. Houssels, who is also a member of the board of directors of Showboat, Inc., joined the firm in 1985, having worked previously as president of Executive Information Systems, a consulting firm, prior to which he was associated with the public accounting firm of Arthur Andersen & Co. A Certified Public Accountant, he attained a Bachelor of Science degree from Yale University in 1971, and a MBA from the University of Southern California in 1979.

Howard A. Dreitzer has been named senior vice president of casino operations of Atlantic City Showboat (A). He comes from the Trump Plaza Hotel and Casino where he held a similar position. Earlier, he was vice president casino manager of that facility. Prior to joining the Trump organization, Dreitzer was associated with the Golden Nugget Hotel Casino in both Atlantic City and Las Vegas.

Showboat, Inc. through its subsidiaries operates hotel-casino resorts in Las Vegas and Atlantic City featuring casino gambling, bowling and other sports attractions and special events.

TUSTIN, CA (FEB. 2) PR NEWSWIRE - Petrominerals Corp. (NASDAQ: PTRO) announced today that its board of directors has authorized the purchase of up to 100,000 shares of Petrominerals common stock, from time to time, in open market transactions, at a net price of not more than $1.00 per share. The corporation will purchase its stock in blocks of 10,000 shares. The purchase of stock was approved due to the company's belief that its stock is undervalued in the marketplace.

As part of the total number of shares to be purchased, the company will offer to redeem up to 25,000 shares directly from its shareholders of record as of Jan. 31, 1990, who hold odd lots of stock of less than 100 shares.

The board has authorized management to cancel and retire those shares of the company's common stock which it has purchased in prior transactions, as well as the additional 100,000 shares it intends to purchase. This action will effectively reduce the number of shares issued and outstanding on the company's records, with no charge in the number of authorized shares.

Petrominerals Corp. explores, produces and markets crude oil and natural gas in California and Louisiana. Lunn Production Service, a division of Petrominerals, services and maintains oil and gas wells for a number of

major oil companies.

AUSTIN, TX (FEB. 2) PR NEWSWIRE - Electrosource, Inc. (NASDAQ: ELSI), today announced that it has received stockholder subscriptions totaling more than $1 million for the purchase of common stock in connection with its stockholder rights offering.

This stockholder subscription level exceeds the minimum amount required to allow the company to sell stock in this offering. The stockholder rights offering became effective Jan. 2, 1990, and terminated at 5 p.m. (Austin, Texas time), Feb. 1, 1990. The company said it would release the details of the number of shares subscribed and oversubscribed following completion by the subscription agent of processing of the subscriptions.

Electrosource, Inc., is a publicly traded company headquartered in Austin, Texas. The company's principal business is developing the use of coextruded wire in electrodes for lead-acid batteries.

CLEVELAND (FEB. 2) PR NEWSWIRE - Charter One Financial, Inc. (NASDAQ/NMS: COFI), holding company for The First Federal Savings Bank, today reported

record results for calendar year 1989, highlighted by:

-- Net income of $16.9 million, compared to $14.7 million in the prior year, an increase of 15 percent.

-- Book value of $24.64 per share, versus $20.33, an increase of 21 percent.

-- Net interest income for the year of a record $52.7 million, up 7 percent.

-- A 12.7 percent increase in return on average assets, from .71 percent to .80 percent.

Charles John Koch, President and Chief Executive Officer, said, "The results are particularly gratifying because they were largely driven by a 10 percent increase in our core earnings despite a hostile interest rate environment."

Koch added, "For the fourth quarter, core earnings also improved compared to the prior year. However, because the company had sales of equity securities during the 1988 quarter, net income was $4.0 million for the current quarter versus $5.1 million in the prior year quarter.

At year end, Charter One's balance sheet remained particularly strong, with net worth to total assets at 8.0 percent. Regulatory capital of The First Federal Savings Bank, Charter One's subsidiary, was a strong 7.9 percent of total assets or 183 percent of the new capital requirements dictated by the government in 1989.

Koch added, "The quality of the bank's loan portfolio continues to be excellent, with non-performing assets standing at approximately .80 percent of total assets, substantially better than the most recently available ratios of 1.89 percent for all publicly-traded thrifts and 1.24 percent for Midwest thrifts."

Charter One currently holds 451,360 shares of Federal Home Loan Mortgage Corporation ("Freddie Mac") stock at an average book value of $16.86 with a market value as of February 1, 1990 of $61.75. Koch said, "Despite the recent volatility in the price of this stock and gains taken by Charter One in the first nine months of 1989, the unrealized gains of the portfolio remain essentially unchanged from December 31, 1988."

Charter One, with year-end assets of over $2.1 billion, is the holding company for The First Federal Savings Bank, operating 55 offices in Ohio, covering the greater Cleveland, Akron, Youngstown, Portsmouth and Toledo markets. In Toledo, the bank operates under the name People's Savings.

Notes to Operating Highlights

(a) Restated to reflect the merger of First Federal Savings of Akron and Western Reserve Savings Bank, which took effect August 10, 1989. (b) Includes after-tax gains on the sale of Federal Home Loan Mortgage Corporation preferred stock of approximately $2.3 million for the three months ended December 31, 1988; and $4.4 million and $3.0 million for the twelve months ended December 31, 1989 and 1988, respectively. Also includes nonrecurring expenses of $845,000 for the twelve months ended December 31, 1989 associated with mergers. (c) Includes benefits of tax loss carryforwards of $1,070,000 for the twelve months ended December 31, 1988. The tax loss carryforwards were fully utilized by June 30, 1988. (d) Earnings per share in 1988 are based on Charter One earnings only. While 1988 net income is restated to reflect the merger-conversions with two mutual associations that were accounted for as poolings-of-interest, the prior year's weighted average common shares are not restated to consider the shares issued in August 1989 to effect the mergers.

HOUSTON (FEB. 2) PR NEWSWIRE - General Homes Corporation (NYSE: GHO) announced today that it has extended to 5 p.m., EST, on Thursday, Feb. 15, 1990 its offers to exchange its new Series B convertible preferred stock for any and all of its outstanding 12-3/4 percent subordinated notes due 1988 and its 15-1/2 percent subordinated notes due 1995.

The exchange offers had previously been scheduled to expire at 5 p.m., EST on Thursday, Feb. 1, 1990.

Consummation of the exchange offers is conditioned upon, among other things, the tender of at least 90 percent of each series of notes. General Homes understands that approximately 62 percent of the principal amount of the notes had been tendered as of 6 p.m. CST, Feb. 1, 1990.

Under the company's revised senior secured credit agreement, the company had until Jan. 19, 1990 to consummate the exchange offers. The company will ask the lenders under such agreement for an extension of such deadline until Feb. 16, 1990 to facilitate closing the exchange offers if the offers are successful.

MIAMI (FEB. 2) PR NEWSWIRE - Cordis Corporation (NASDAQ-NMS: CORD) today reported improved sales and earnings for its fiscal second quarter ended Dec. 31, 1989.

Sales for the period were $37.9 million, up 10 percent from the prior year's corresponding quarter. Angiography sales, which currently account for 90 percent of Cordis revenues, advanced 13 percent while neuroscience product sales declined 8 percent.

The company reported both income from continuing operations and net income of $1.7 million, or 12 cents a share. For continuing operations, this represented a 91 percent gain over the $866,000, or 7 cents a share, reported in the corresponding prior period. In the year-earlier second quarter, Cordis net income totaled $205,000, or 2 cents a share, including a loss from discontinued operations of $661,000, or 5 cents a share.

Miami-based Cordis Corporation manufactures and markets a variety of medical devices and systems for the angiographic and neuroscience markets. Shares of the company's stock are traded on the NASDAQ National Market under the symbol CORD.

SAN FRANCISCO (FEB. 1) PR NEWSWIRE - The U.S. Environmental Protection Agency has reached an agreement with Dolphin Inc. settling an administrative enforcement action that charged the company with failure to submit toxic release inventory reports under the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA) for its facility located at 740 South 59th Avenue, Phoenix. The facility manufactures metal castings and Ping brand golf clubs.

The facility was cited by EPA for failure to submit reports estimating its releases of chromium, nickel, and copper. Failure to submit annual toxic release inventory reports is a violation of Section 313 of EPCRA, which is also known as Title III of the Superfund Amendments and Reauthorization Act.

In addition to submitting the required reports, the agreement requires the company to pay a $35,000 penalty and to undertake certain outreach activities to alert other manufacturers to the requirements of the relatively new law. These activities include publishing an article about the toxic release reporting requirements in a statewide industrial trade journal and speaking at an industry seminar to alert other companies to the consequences of non-compliance with the right-to- know law.

Failure to submit annual toxic release inventory reports is a violation of federal law. The law requires a company with more than 10 full-time employees that manufactures, processes, or uses certain toxic chemicals, over a specified amount, to submit annual reports to EPA and the state. These reports provide estimates of the amounts of each toxic chemical released by the facility to the environment. The next TRI reports, covering the l989 calendar year, are due July 1, l990.

All of the information contained in the Toxic Release Inventory reports is available to the public in the form of a computerized database, accessible "on-line" to home computers, via the National Library of Medicine's TOXNET system. Microfiche versions of the database are available at federal depositories and selected county libraries. In addition, copies of the reports submitted by facilities located in Arizona can be obtained by calling the Arizona Division of Emergency Services at 602-231-6326.

For more information about the Toxic Release Inventory database, call EPA's toll-free Community Right-to-Know Hotline at 800-535-0202, or write to the Toxic Release Inventory Program, U.S. EPA Region IX, 215 Fremont

Street, Mail Code (A-4-3), San Francisco, CA 94105.

SAN FRANCISCO (FEB. 1) PR NEWSWIRE - Chevron Corp. (NYSE: CHV) today issued the following statement in response to the U.S. District Court ruling that granted Chevron's motion to compel Pennzoil (NYSE: PZL) to produce certain documents:

"We are pleased that Judge Henderson has forcefully confirmed Chevron's view that it is entitled to full and complete discovery about Pennzoil's true intent in acquiring $2.1 billion of Chevron's stock and that the proof of that intent may be found in Pennzoil's documents.

"We are confident that Pennzoil's internal records about its tax strategy and evaluation of other investment targets will help define that intent."

Chevron filed suit on Dec. 7, 1989, accusing Pennzoil of violating federal laws with respect to Pennzoil's purchase of 8.8 percent of Chevron stock. Chevron contends that Pennzoil has made false and misleading statements about its intentions in the stock purchase.

Chevron's suit alleges that Pennzoil is not a passive investor and that Pennzoil intends to force restructuring of the company to the disadvantage of Chevron and its other stockholders.

LIVINGSTON, NJ (FEB. 1) PR NEWSWIRE - Paul J. Burke has been named to the newly created position of executive vice president and chief credit officer of the Howard Savings Bank, (NASDAQ/NMS: HWRD) Leo J. Rogers, Jr., bank president, announced today.

This new position will cover overall credit administration, according to Rogers, including management of the loan approval process, the internal loan and credit quality review function and the bank's loan workout units.

"Mr. Burke is a seasoned credit officer with extensive experience in middle market, corporate and real estate transactions," Rogers said. "His expertise will be very valuable to the Howard in overseeing our loan and

credit administration policies and activities."

Burke joined the Howard in April 1989 as a vice president in the Howard's corporate banking division. Prior to that, he was a senior loan officer at Chemical Bank in New York, where he was involved in problem loan workouts and restructurings in international and middle markets. He joined Chemical Bank in 1967 as a business development officer and served in various lending and credit administration capacities during his 20-year career there.

As manager of international finance at Allied Chemical Company in New York from 1965 to 1967, Burke worked on structuring financing packages for foreign projects. From 1962 to 1965, he was international credit manager at Allied responsible for the extension of credit and collection of overdue accounts.

He began his career in 1956 as assistant credit manager for the New York Sales Office of Monsanto Chemical Company, handling approval of credit lines and following of overdue accounts.

A 1955 graduate of Fordham University, Burke received an MBA degree from Columbia University in 1962.

HARRISBURG, PA (FEB. 2) PR NEWSWIRE - Attorney General Ernie Preate Jr. today said Chrysler Corp. has mailed $500 checks to about 1,700 Pennsylvania owners of Chrysler vehicles that were test-driven with their odometers disconnected.

Preate said an estimated 27,000 consumers nationwide will receive $13.5

million in the refund checks under a federal court settlement of litigation brought in 1988 against Chrysler by a number of attorneys general.

The lawsuit charged that Chrysler executives and employees were allowed to drive some new cars with the odometers disconnected as part of the corporation's "overnight evaluation program."

"Consumers who bought those cars were deceived as to the vehicles' true mileage and will receive compensation," Preate said.

He said the refunds are being made to consumers who owned one of the affected vehicles as of July 31, 1987. The vehicles were identified through Chrysler records.

Preate said all consumers who are to receive refunds were previously notified.

The settlement in U.S. District Court in St. Louis established a $16.3 million restitution fund. Additional restitution to consumers may be made after the guaranteed minimum payments of $500 are distributed and fees and expenses are deducted.

Also participating in settlement negotiations were attorneys for consumers in several class action lawsuits against Chrysler. In the course of the case, Preate said, the attorneys involved reviewed more than 300,000 documents provided by Chrysler.

Missouri Attorney General William L. Webster served as lead negotiator in the settlement.

#90033p0089 02/02/1990 ~PR Newswire

MINNEAPOLIS (FEB. 2) PR NEWSWIRE - Nord Photo Engineering, Inc., a subsidiary of Photo Control Corporation, announced a revolutionary electronic system for making certain school photographs. The chairman and CEO of Photo Control, Leslie A. Willig, said that the system, which has been kept "under wraps" during its development and patent work stage will be first shown at the Photo Marketing Association's (PMA) annual trade show in February.

Using a blend of advanced technology in computer imaging and a conventional color negative, the system makes high quality school service prints quickly and economically. School service prints refer to student

photos that are used by schools for a variety of purposes, such as I.D. cards, rolodex cards, year books, and personnel records.

Larry A. Anderson, president of Nord, explained the basic system as being the latest in the state-of-the-art technology for electronic imaging printing. In the era of electronic imaging, many firms are talking about supplying products to customers, but Nord is actually ready to do so. "After field testing the new system this past year in a lab in Northern California, we are taking a proven, operating and fully developed system to PMA, with product availability for the 1990 school season," explained Anderson.

Nord ESP, (Electronic Systems Products) is the first generation of new technologies that Nord will supply to the photographic trade during the '90s. This system allows school labs a reduction in film handling (reducing the chance for film damage) as well as an increase in production with reduced labor, all the basic things that school labs are asking for.

Alex Shoob, owner of Shoob Photography in Modesto, Calif., whose lab served as a test site during 1989, reported a 26-1/2 percent increase in business, while labor costs increased only 1.03 percent. He said, "We would not have been able to handle the increase in business, if it were not for the new Nord ESP. It simply made the work flow go more smoothly and provided us the extra edge to do the increased volume on time."

The PMA trade show will be held at the Las Vegas Hilton Convention Center, Feb. 22 to 25.

#90033p0091 02/02/1990 ~PR Newswire

CHICAGO (FEB. 2) PR NEWSWIRE - USG Corp. (NYSE: USG) today reported 1989 sales of $2.19 billion and net earnings of $28 million, or $0.51 per share.

For 1988, sales were $2.25 billion and net earnings were $125 million, or $2.38 per share. The 1989 net earnings are not comparable to 1988 due to the restructuring changes USG has undergone and the large amount of debt it incurred in its mid-1988 recapitalization.

With the restructuring, operating profit is probably the most realistic basis for year-to-year performance comparisons, said Robert J. Day, USG chairman. Operating profit in 1989 was $304 million, up slightly over 1988's operating profit of $302 million. Selling and administrative expenses were reduced for the second consecutive year and were 4.7 percent lower than in 1988.

The corporation's 1989 net earnings reflected interest expense of $297 million. Net earnings also included nonrecurring pre-tax gains totaling $33 million from the sale of assets and an insurance settlement.

Sales were 2.5 percent lower due primarily to the absence of second- half 1989 sales for United States Gypsum Co.'s construction metal business which was sold in June, and a 4 percent drop in domestic gypsum board prices.

For the three months ended Dec. 31, 1989, USG Corp. posted net sales of $523 million, down 3.1 percent from $540 million for the same period last year. This decline reflects the absence of fourth quarter 1989 results for the construction metal business. Net earnings of $7 million are not comparable with net earnings of $43 million for the 1988 period since the latter reflects a gain on the divestiture of discontinued operations. Despite the lower level of sales, operating profit of $76 million was unchanged from the earlier period due to reduced overhead.

USG is a Fortune 500 Corporation with operating subsidiaries that are leading manufacturers and distributors of building materials such as gypsum wallboard and related products, home improvement products and ceiling, wall and floor systems. Its subsidiaries include United States Gypsum Company, USG Interiors, Inc., DAP Inc., L&W Supply Corporation, and CGC Inc.

MIAMI, FL (FEB. 2) PR NEWSWIRE - Ilia Lekach, the major shareholder of Parlux Fragrances, Inc. (NASDAQ: PARL), today commented on the management entrenchment action taken by the board of Parlux late on Jan. 31, 1990. This action was taken after Lekach had called a special meeting of

shareholders. The action by the board attempted to change the by-laws of Parlux to prevent the meeting called by Lekach and to eliminate the rights of shareholders to act by consent to corporate action.

Lekach stated, "This action by the management, which was supported by only one member of the board that is not involved in the management of Parlux, is a desperate attempt by management to entrench themselves. It is obvious that management does not believe that they have the support of the shareholders, otherwise they would have been delighted to give the shareholders an opportunity to give management a vote of confidence."

Lekach also stated that this action by the board did not change his previously announced plans to hold a special meeting of the shareholders since he had been advised by counsel that the entrenchment actions by management would be ineffective to prevent the special meeting or the soliciting of consents.

#90033p0100 02/02/1990 ~PR Newswire

DIBOLL, TX (FEB. 2) PR NEWSWIRE - Temple-Inland Inc. (NYSE: TIN) today reported that earnings per share for 1989 were a record $7.50, up 5 percent from $7.15 per share in 1988. Net income for the year was $207.4 million on revenues of $2.1 billion.

Earnings from operations were $353.2 million in 1989 compared with $324.2 million the previous year.

For the fourth quarter, net income was $44.4 million, or $1.61 per share, down from $47.5 million, or $1.71 per share in the fourth quarter of 1988.

Commenting on the results for the quarter, Clifford J. Grum, president and chief executive officer, said, "The decline in earnings was attributable to the extreme cold weather in December which hampered production at our southern papermills, and cost the company at least 15 cents per share in

earnings.

"In addition, during the quarter, the major modification program at the Rome mill resulted in a one-month outage as the largest paper machine was rebuilt.

"The earnings improvement for the year resulted from a record performance by our pulp and paperboard group and the return to profitability of our financial services group. Although down from its record year in 1988, our container and containerboard group still had its second-best year in history. And, our building products group's earnings were about equal to 1988," Grum concluded.

The company's container and containerboard segment earned $208.4 million in 1989, down from $221.3 million in 1988. Although box shipments and containerboard production were up in 1989, the inability to increase selling prices while costs were increasing caused erosion in earnings.

Temple-Inland's pulp and paperboard group earned a record $114.9 million, up from $82.7 million in 1988. Demand for the company's bleached paperboard was strong throughout the year and selling prices improved over 1988. Production for the year declined slightly due to scheduled downtime for improvements and weather-related lost time in December.

The company's building products group earned $23.7 million in 1989, down slightly from $24.6 million in 1988. Increased demand for industrial particleboard and treated lumber helped offset sluggishness in new home construction.

Some improvement in Temple-Inland Financial Services mortgage loan business and restructuring of the life insurance operations helped the financial services group earn $6.9 million in 1989, compared with a loss of $5.6 million in 1988.

Grum said, "It's too early to forecast operating results for 1990, but demand for our products has remained very satisfactory to date. We anticipate continued recovery in our financial services group as real estate markets continue to improve."

BLUE BELL, PA (FEB. 2) PR NEWSWIRE - Sabena Belgian World Airlines has recently doubled the processing capacity of its Unisys (NYSE: UIS) USAS Cargo System software application by acquiring a pair of Unisys 2200/400 mainframe systems and peripherals valued at $3 million.

The cargo system will run on a 2200/434 mainframe, with a 2200/424 mainframe used for backup and system testing and development.

"The air cargo marketplace is booming in Europe, and we expect a steady increase in volume for years to come," said Alain Bertrand, Sabena's cargo vice president. "Just as new aircraft will give us increased cargo capacity, these new Unisys computers will give us vital management information processing power and the capacity to control the growth that we expect to continue in our cargo operations."

The USAS Cargo System is an application for real-time air freight management. It provides carriers with automated controls over cargo space reservation and shipment booking, shipment data capture, and cargo terminal operations.

The 2200/400 mainframe family, first shipped to Unisys customers in March 1989, has demonstrated reliability of design and operation. In field qualifications of the system, Unisys engineers have been able to install the powerful mainframe in an average of four hours, an unusually short installation time for high-performance mainframe systems. In addition, the 2200 family is compatible with software and peripheral devices used on itspredecessor, the Unisys 1100 mainframe family, thus protecting customer investments in 1100 mainframes, peripherals and application software.

With 30 years of experience serving the airline and travel industry, Unisys is a leading supplier of advanced automation systems, software and services to this market. More than 140 airlines in the world depend on Unisys products. One third of the world's air cargo is processed by Unisys mainframe systems today.

Unisys is a $10 billion manufacturer of commercial information systems, defense systems and related services. It has more than 80,000 employees and 60,000 customers in more than 100 countries.

NEW YORK (FEB. 2) PR NEWSWIRE - Rotan Mosle Inc., as manager of the underwriting syndicate, announced today the initial public offering of 1 million shares of Henley International, Inc. common stock at $8 per share. The company has granted the underwriters an option to purchase up to an additional 150,000 shares to cover over-allotments.

The company will use the net proceeds from the offering for repayment of indebtedness, expansion of research and development activities, possible future acquisitions and general corporate purposes.

Henley International, Inc., headquartered in Sugar Land, Texas, develops,

manufactures and distributes a diversified range of physical therapy, home pain management and disposable hospital products. The company sells a complete line of state-of-the-art physical therapy treatment devices. It is one of the few companies in the nation capable of equipping entire physical therapy clinics, and one of the leading manufacturers and distributors of products for home pain management. The company also sells disposable medical procedure kits and surgical specialty products for hospital use.

DENVER (FEB. 2) PR NEWSWIRE - Royal Gold Inc. (NASDAQ: RGLD) today announced that it has completed its first phase of testing of the feasibility of mining lead, zinc, gold and silver deposits in the Bluebird chute of the Camp Bird Vein.

Since late October 1989, Royal Gold has completed 2,069 feet of diamond drilling, and approximately 3,600 tons of development rock was milled for recovery of base and precious metals. This preliminary work indicates potential for economic mineralization in a portion of the vein which measures 350 feet on strike, 450 feet on dip and 4 feet wide.

Royal has concluded that the complex ores in the Bluebird chute offer an attractive exploration target, but that they are not yet sufficiently defined to permit development for sustained commercial operation. More exploration work is required. Royal will suspend testing activities for the time being, and will concentrate its efforts at Camp Bird on finding a partner or completing a financing that will allow it to resume exploration efforts on the Bluebird chute, and on gold targets on the Camp Bird Vein that were not tested by former operators.

Exploration development in a 3 Level drift and a sub-level 20 feet above the 3 Level shows a well-mineralized but highly variable footwall structure with widths varying from 3 to 12 feet.

Products recovered and shipped to smelters from milling the 3,600 tons of development rock has yielded approximately 330 ounces of gold, 6,026 ounces of silver, 56,220 pounds of lead, 24,840 pounds of copper and 97,620 pounds of zinc. The average grade of the development rock is lower than would be expected in full scale mining because of dilution encountered in development headings. Mill recoveries exceeded 90 percent for all of the metals involved.

Royal Gold is a Denver-based, publicly held corporation. Royal Gold has a

controlling interest in two mines in California, is developing another mine in California, is the sole lessee of a Colorado mine, and has three exploration properties: two located in Nevada and one in Arizona.

The company also owns a 23 percent stake in States Exploration Ltd., which is listed on the Toronto Stock Exchange under the symbol SAX. Royal Gold is traded on the NASDAQ National Market System under the symbol RGLD.

#90033p0105 02/02/1990 ~PR Newswire

NASHUA, NH (FEB. 2) PR NEWSWIRE - NFS Financial Corp. (NASDAQ: NFSF) reports net income for 1989 of $1,904,000, or 67 cents per share, compared with $2,943,000, or 97 cents per share, for 1988.

Net income for the fourth quarter of 1989 was $454,000, or 16 cents per share, compared with $895,000, or 30 cents per share, for the fourth quarter of 1988.

The company said net interest income for 1989 was $13,040,000 compared with $12,164,000 for 1988 but that the slowdown in the area real estate market affected the level of nonperforming assets which caused NFS to substantially increase it provision for possible losses during the year.

Nonperforming assets at NFS were $13,498,000, or 2.64 percent of assets at the end of 1989 compared with $2,997,000, or .57 percent of assets at the end of 1988.

NFS provided $1,475,000 for possible losses during 1989 compared with $572,000 during 1988.

The company said its capital ratio, or stockholders' equity to total assets, of 10.5 percent at Dec. 31, 1989, was well in excess of all regulatory capital requirements.

James H. Adams, NFS CEO, said the company's business plan in 1989 was affected by the generally softer real estate market. "Despite the fact that we maintained a level of profitability in 1989 of about 65 percent of the previous year and increased our quarterly dividend, it was necessary to re-direct funds and people to deal with the nonperforming assets," he said.

At Dec. 31, 1989, book value per share at NFS was $19.50, total assets were $511 million, and total loans were $383 million.

#90033p0107 02/02/1990 ~PR Newswire

BOULDER, CO (FEB. 2) PR NEWSWIRE - Cell Technology, Inc. (NASDAQ: CELL), the Colorado-based biotechnology firm specializing in the development of biologic response modifier (BRM) technology, today announced the initiation of a major refocusing of its company-wide efforts.

The company announced a strategic plan which will include an effort to identify and acquire other pharmaceutical or life-science companies or technologies.

Companies with near term revenue and cash flow possibilities which have or are developing technologies for use in the treatment of life-threatening diseases and are synergistic to the company's BRM technology will be emphasized.

Because of this major refocusing, the company will reallocate a significant portion of its working capital toward accomplishing the new goals.

Effective immediately, the company intends to reduce its monthly expenditure level by approximately 45 percent. Continuing expenditures will be focused on completing the clinical evaluation of ImuVert(R) in advanced Phase II dose optimization human clinical trials in adult brain cancer patients.

Research efforts involving other applications of its BRM Technology will be de-emphasized. Because of this major refocusing and reallocation of corporate assets, the company's total employment has been reduced by 32 employees, effective today.

Based on the new reduced level of expenditures under the new strategy, present assets should support the continuing clinical and commercial evaluations of ImuVert as well as completing major technology and/or corporate acquisitions.

The company also announced today the completion of a series of comprehensive in-vitro biological assay investigations by an independent California-based company into the effectiveness of ImuVert to treat certain other cancers.

The results of the assays with respect to breast cancer, non-Hodgkins lymphoma, chronic lymphocytic leukemia, non-small lung and renal cancer suggest a basis for initiating clinical trials as to the therapeutic effectiveness and safety of ImuVert in treating those cancers.

As part of the new strategy, the company is evaluating undertaking clinical trials in these major cancers, while clinical evaluations of ImuVert in adult brain cancer are completed.

MIAMI (FEB. 2) PR NEWSWIRE - The shareholders of Metal Resources Corporation have approved changing the name of the company to Orexana Corporation, it was announced yesterday by Duvan Arboleda, the company's chairman. The change includes a new symbol, (NASDAQ: XXAU), effective immediately. Use of the old symbol MRSC has been discontinued.

The change of the company's name was voted on by the stockholders at a special meeting hold on Jan. 31, 1990. The board of directors of Metal Resources Corporation had previously approved the name change.

The board of directors has elected a new member, Mark Stefan. Stefan, 41, lives in Miami and is the owner of Stefan Development Corporation, a real estate development company. He also is president of First Mortgage Corporation and Redlands M Corporation.

Last year, the company acquired substantially all of the assets of Orexana Inc., a refiner of precious metals located in the metropolitan Miami area.

"By changing the name of the company to Orexana Corporation, we will more clearly identify our business in the entire industry," said Arboleda. "In addition to our current areas of operation, we are continuing to expand our precious metals business in Bolivia and Peru and into Ecuador. With these activities and previous acquisitions, we anticipate that earnings for the fiscal year ending March 31, 1990 will be greater than those of the previous year, barring any unforseen developments."

Orexana Corporation is primarily engaged in the wholesale purchase and sale of gold and other precious metals to major wholesalers and dealers in North and South America. The company also proposes to develop certain mining properties in Bolivia.

Orexana Corporation has offices in La Paz, Bolivia; Lima, Peru; Miami and Hialeah, Florida.

BRAINTREE, MA (FEB. 2) PR NEWSWIRE - The Braintree Savings Bank (NASDAQ: BTSB) announced today net income for the year 1989 of $901,000, a 32.2 percent decrease from 1988 results of $1,328,000.

1989 earnings per share were 58 cents on 1,562,224 average common shares and equivalents outstanding compared to 85 cents in 1988 on 1,570,832 average common shares and equivalents outstanding.

1989 results include securities/loan sale losses of $152,000 vs. gains of $92,000 in 1988. Net income for the quarters ending Dec. 31, 1989 and 1988 were $49,000 and $151,000, respectively. Earnings per share were 3 cents and 9 cents for the comparative periods.

In spite of an increase in nonperforming loans, the bank maintained a net interest margin for 1989 of 3.87 percent compared to 3.91 percent for 1988.

The provision for possible loan losses was $1,080,000 in 1989 vs. $225,000 in 1988 bringing the reserve for possible loan losses to $1,287,000, or 1.02 percent of gross loans at Dec. 31, 1989, compared to the reserve for possible loan losses of $717,000, or .55 percent of gross loans at Dec. 31 1988.

The loan loss provision for the fourth quarter of 1989 and 1988 was $603,000 and $180,000, respectively. Loan charge-offs, net of recoveries, were $510,000 in 1989 vs. $142,000 in 1988.

According to Winthrop Sargent, IV, chairman, president and CEO, "The continued softening of the local real estate market and the New England economy has resulted in a substantial increase in the bank's level of nonperforming assets and loan charge-offs. While we are addressing the current loan problems with great diligence, there are no signs of a near term improvement and, thus, it will be necessary to maintain the loan loss reserve at a prudent level until such time as stability in the real estate market beomes apparent."

Nonperforming assests were as follows:

Nonperforming Assets (in thousands)	12/31/89	12/31/88
Nonaccrual loans:		
Commercial business and commercial real estate	$ 4,759	$ 178
Other	3	0

#90033p0127 02/02/1990 ~PR Newswire

NEW YORK (FEB. 2) PR NEWSWIRE - The Metropolitan Transportation Authority and Pfizer Inc. today officially unveiled security improvements to the Brooklyn Flushing Avenue station that were funded by the pharmaceutical company through the MTA's "Adopt-a-Station" program.

MTA Board Member Ronay Menschel, Transit Authority Police Chief Vincent Del Castillo and Pfizer officials attended the 11 a.m. unveiling ceremony at the station, which is located less than a block from the company's 17-acre Williamsburg plant.

"Pfizer's five-year commitment to this project benefits both the company's employees and members of the community and other customers who use the station," Menschel said.

"Fighting crime and ensuring a safe environment is a task that cannot be accomplished by a police department alone," Chief Del Castillo said. "Pfizer's involvement in the Adopt-a-Station program is the model of the

relationship that must exist between a law enforcement agency and the community if we are to ensure a safe and secure environment. We salute Pfizer for their concern and effort."

Pfizer adopted the station in 1984 and has since made security improvements, installing closed circuit television cameras and two emergency intercoms monitored around the clock by the company's security force. When the security system alerts Pfizer security personnel to trouble in the station, they contact transit police.

The latest additions include a refurbished Brooklyn-bound platform, new turnstiles, stainless steel railings, and security gates to replace wooden slam gates.

"Our commitment to this subway station is ongoing," said Tom Kline, Pfizer's Brooklyn plant manager. "We've contributed more than $100,000 in equipment, supplies, labor and professional time to this project. But you can't put a price tag on the value of the improved security to our employees and the community residents who use the station."

The Adopt-a-Station program, which is sponsored by the MTA and the New York City Transit Authority, encourages private companies to make station improvements that benefit their employees and communities.

DENVER (FEB. 2) PR NEWSWIRE - The board of directors of Total Petroleum (North America) Ltd. (AMEX: TPN) declared a quarterly dividend of $0.72 per share (Can.) on the company's outstanding $2.88 convertible preferred shares and $0.20 per share (U.S.) on the company's outstanding common shares today.

Both dividends are payable on March 20, 1990, to shareholders of record Feb. 23.

Total Petroleum (North America) Ltd. is a petroleum company with refining and marketing operations in the central United States and exploration and production in Canada. Its shares are listed on the American, Toronto, Montreal and Pacific stock exchanges. TOTAL Compagnie Francaise des Petroles owns approximately 51 percent of the voting shares of Total Petroleum (North America) Ltd.

WASHINGTON (FEB. 2) PR NEWSWIRE - United Press International will expand dramatically UPI news photos available to U.S. newspapers by investing more than $5.5 million in state-of-the-art computerization and satellite transmission capabilities, according to UPI Vice Chairman Joseph K. Taussig.

This investment will fund installation, with no surcharge and at the discretion of UPI clients, of either an electronic picture desk or a new printer, Taussig said.

UPI photo services are individually addressable and can be delivered selectively in keeping with subscribers' topic or regional interests.

The new system transmits both black-and-white and color photographs. Introduction of the service means that editors can use picture-desk hardware that can receive and store up to 400 photos from several sources, simultaneously -- with further system expansion possible.

"The picture desk affords editors immediate savings by reducing expenditures on consumable materials," Taussig said. "The availability of this equipment at no extra cost means higher productivity for any photos department, without regard to the newspaper's current state of technology " he added.

"UPI will of course supply its photo feeds to any electronic picture desk a client might have," and subscribers with their own electronic desks may qualify for a discount, he explained.

"Our initiative means that newspapers are a giant step closer to realizing the high-definition digital photo transmission and publishing link that the industry has sought for years," he said.

UPI plans to announce this month its choices of electronic picture-editing desks, printers and other equipment that will support faster delivery of a "vastly increased volume of news photography, consisting of a full national, regional and international photo report," Taussig said.

UPI has begun replacing its previous analog photo printers with equipment that will later be upgraded to digital reception.

UPI, founded in 1907, has 180 bureaus and is represented in 90 nations. UPI is owned by Infotechnology, Inc. (NASDAQ: ITCH), an information and communications company.

#90033p0144 02/02/1990 ~PR Newswire

NEW YORK (FEB. 2) PR NEWSWIRE - In an exclusive report, Aviation Week & Space Technology technical editor Stanley W. Kandebo discloses that Allison Gas Turbines and the Soviet Union have negotiated an unprecedented agreement that will place Allison's engines in a twin- turbine version of the Soviet Ka 126 helicopter, designated the Ka 226.

Under the terms of the agreement, which is approved by the U.S. government Allison will sell the Soviets 420 engines for the Ka 226, a utility and agricultural helicopter now in development. The aircraft will be aimed at the international export market. The Soviets plan to obtain Federal Aviation Administration certification for the helicopter. A prototype of the aircraft is expected to be flying before the end of this year. Production aircraft engines may be delivered to the Soviet Union in 1991.

According to Aviation Week & Space Technology, the agreement reached this week may be the first of many between the U.S.S.R. and Western aviation propulsion manufacturers. The next Soviet purchase of Western engines may come later this month when representatives from the Soviet air carrier Aeroflot select engines for their recently ordered Airbus A310 aircraft. The candidate U.S. engines would come from Pratt & Whitney or General Electric. An Aeroflot group is scheduled to visit both companies shortly to undertake negotiations.

Aviation Week & Space Technology, published weekly by McGraw-Hill, is the leading journal for the worldwide aviation, aerospace and defense industries. The magazine's upcoming issue, to be published on Feb. 5, also spotlights these key developments:

- Aircraft Leases Offered to Central and Eastern Europe: In a related story, London Bureau Chief Carole Shifrin reports that GPA Group, the large aircraft leasing firm based in Shannon, Ireland, has allocated $2 billion worth of new technology aircraft for lease to Central and Eastern European airlines in the 1990s. GPA just signed a new contract for the lease of three Boeing 737-300 aircraft to Malev, the Hungarian national airline. The aircraft are to be delivered in 1991. GPA officials said they regarded airline development as a critical element in the building of a new Europe.

- Pratt & Whitney to Test New Engines: Kandebo also reports in the Feb. 5 issue that Pratt & Whitney and its partners will begin tests in late 1991 of a new, 50,000 pound thrust class technology demonstrator engine. The new engine concept, designated the advanced duct propeller (ADP), could lead to development of a new family of fuel efficient closed-rotor, ultrahigh bypass ratio powerplants based on existing engine cores.

Aviation Week & Space Technology's upcoming issue also provides extensive coverage of the latest federal budget. A special package of reports examines the fiscal year 1991 budget requests for U.S. defense, space and civil aviation programs.

McGraw-Hill's Aerospace and Defense Group markets a comprehensive network of publications, electronic and video services for the multibillion-dollar aviation/aerospace/defense market.

CHICAGO (FEB. 2) PR NEWSWIRE - The board of directors of GATX Corp. (NYSE: GMT) today announced an increase in the quarterly dividend to 55 cents per common share, an increase of 10 percent over the previous quarterly dividend, and also approved a two-for-one split of GATX's common stock to shareholders of record May 10, 1990, subject to approval at the company's annual shareholders meeting on April 27, of an increase in the number of authorized shares of the company's common stock.

James J. Glasser, chairman, president and chief executive officer of GATX, stated, "The 10 percent increase in our common dividend is the fourth increase since 1986. In this four year period, we have increased our dividend more than 80 percent, reflecting our confidence in the future of GATX. Moreover, the actions of our board today highlight the outstanding price performance of GATX's stock, and we strongly believe that the two-for-one split will make our stock more attractive to a greater number of potential shareholders. The combination of increasing our dividend and splitting GATX's common stock demonstrates our commitment to maximize total return to shareholders."

The 55 cent per common share dividend declared today is payable March 31,

1990, to shareholders of record March 9, 1990. The board also declared a quarterly dividend of 62-1/2 cents per share on the $2.50 preferred stock payable March 1, 1990, to shareholders of record Feb. 15, 1990.

GATX provides asset based services to industry by providing railcar leasing, maintenance and management; capital goods leasing, real estate financing and financial services; bulk liquid storage terminals and pipelines; warehousing services and Great Lakes shipping.

ATLANTA (FEB. 2) PR NEWSWIRE - Georgia-Pacific Corp. (NYSE: GP) yesterday responded by letter to a request from House Speaker John L. Martin and Senate President Charles P. Pray to detail its future intentions in the state of Maine should the company acquire Great Northern Nekoosa Corp. (NYSE: GNN).

February 1, 1990

The Honorable John L. Martin,
Speaker of the House of Representatives
Augusta, Maine 04330

The Honorable Charles P. Pray
President of the Senate
Augusta, ME 04330

Dear John and Charlie:

Thank you for your openness in helping us resolve issues which are of concern to the citizens of the state of Maine about our merger with Great Northern Nekoosa. Both of you have expressed to me from the outset your concerns about the employment base for the communities in your region. You have asked that I be more specific in the area of jobs for Maine and this letter is an attempt to respond to that request.

I think it might be helpful if I provided you some background prior to addressing our current plans. As you know, we decided to pursue this merger based on our conviction that we could create a stronger, better company. We believe that in order to compete in the global environment which we face today, United States companies must grow and strive for a low-cost position.

The synergism generated by the combination of these two companies will create a company that can compete more effectively on a world basis and provide considerable opportunities for our employees and economic growth

for the communities in which we operate.

As we evaluated Great Northern Nekoosa, we saw their Maine properties not only as one of that company's potential strengths but also as one of its biggest problems. On the positive side, we saw:

- -- trained, skilled employees with a strong work ethic and a history of supporting their company
- -- a strong fiber resource base supported by more than 2.1 million acres of fee lands
- -- an excellent energy source supported by a large hydro-electric system On the problem side, we saw:
- -- a forest resource that had not been properly managed. The spruce and fir were overcut, while the pine and hardwood stands were underutilized and subject to disease and very slow growth
- -- a pulp and paper mill system, and the Millinocket mill in particular, that had been under-funded over time and allowed to become noncompetitive as funds had been diverted to other parts of the country
- -- a work force that had experienced layoffs, was faced with more layoffs and was losing confidence in its management

Georgia-Pacific can make certain commitments to you. We make these commitments based on the belief that the skills we brought to other acquisitions will work also in Maine and that the increased product line opportunities available through our marketing organizations and the strength of the combined companies will generate viable investments.

I cannot thank both of you enough for the time and effort you have spent discussing this merger with us. I look forward to discussing this commitment with you and to your guidance as to how we should proceed.

CONTACT: Rich Good, 404-521-4720, or Cindy Brown, 404-521-4721, both of Georgia-Pacific Corp.

#90033p0164 02/02/1990 ~PR Newswire

BRANCHVILLE, NJ (FEB. 2) PR NEWSWIRE - Selective Insurance reported net income of $10,274,000, or $.82 per share for the quarter ended Dec. 31, 1989, compared with $10,565,000, or $.78 per share for the same period in 1988.

In addition, the company reported $1.1 billion in total assets as of Dec. 31, 1989, and $516.1 million in total revenues for the year. These are two significant achievements in the company's 64-year history.

Selective Insurance reported net income in 1989 of $40,566,000, or $3.05 primary earnings per share, compared with $41,511,000, or $3.07 per share in 1988. The 12 months of 1989 includes realized capital gains net of tax of $2,046,000, or $.15 compared with $1,023,000, or $.08.

Net premiums written increased 5 percent during the year and net premiums earned increased 6 percent.

Selective Insurance had an underwriting loss for the year ended Dec. 31, 1989 of $14,736,000 versus $4,818,000 for 1988. The underwriting loss for the quarter was $2,966,000, compared with $2,318,000 for the same period a year earlier. The increase in the underwriting loss in 1989 reflects a loss from Hurricane Hugo, net of reinsurance, of $3,464,000 and higher losses in the workers' compensation line.

Net investment income was $59,831,000, an increase of 13 percent during 1989. Stockholders' equity increased 8 percent to $230,434,000 or $18.36 per share compared with $213,686,000 or $15.72 per share in 1988. This increase occurred despite the September 1989 common stock repurchase of 1,278,000 shares for $23,324,000.

The board of directors of Selective Insurance Group, Inc. (NASDAQ: SIGI) declared a common stock dividend of $.244 per share payable March 1, 1990 to stockholders of record Feb. 15, 1990.

SELECTIVE INSURANCE GROUP, INC.

Quarter Ended Dec. 31:	1989	1988
Revenues(A)	$129,673,000	$126,966,000

ATLANTA (FEB. 2) PR NEWSWIRE - In seperate meetings held today, shareholders of The Citizens and Southern Corp. (NYSE: CTZ) and Sovran Financial Corp. (NYSE: SOV) voted to approve the proposed combination of their two companies under a new holding company, Avantor Financial Corp.

The transaction, which is expected to be completed in the second quarter of 1990, will make Avantor the nation's 14th largest bank holding company. It will have total assets of approximately $48.7 billion and 1,000 banking offices in eight states ranging from Florida to Maryland, including Washington, D.C.

Approximately 90 percent of C&S shares voted, or 45,510,255 shares, were voted in favor of the merger. Shareholders voting for or against the merger represented 80 percent of the total C&S shares outstanding. The C&S shareholders meeting was held at The Westin Peachtree Plaza in Atlanta.

Approximately 95 percent of the Sovran shares voted, or 44,421,145 shares, were voted in favor of the merger. Shareholders voting for or against the merger represented 78 percent of the total Sovran shares outstanding. The Sovran shareholders meeting was held at the Sovran Conference Center in Norfolk, Va.

"We are delighted by the expression of support from our shareholders," said C&S Chairman and Chief Executive Officer Bennett A. Brown and Sovran Chairman Albert B. Gornto Jr. in a joint statement. "The combined company will be a more effective competitor with superior asset quality, strong market share and significant growth opportunities in the 1990s."

Avantor management will be centered in a four-person office of the chairman, operating from dual headquarters in Atlanta and Norfolk, Va. Brown will be chairman and chief executive officer and will continue as chairman of C&S. Gornto will be chairman of Avantor's executive committee and will continue as chairman and chief executive officer of Sovran.

Dennis C. Bottorff will become president and chief operating officer of Avantor, and he will continue as president and chief operating officer of Sovran. Bottorff will succeed Brown as Avantor's chief executive officer in the future. Hugh M. Chapman, president and chief operating officer of C&S, will become vice chairman of Avantor and chief executive officer of C&S. When Bottorff succeeds Brown as Avantor's chief executive officer, Chapman will become chairman of the Avantor board.

The boards of directors of both companies have already approved the merger. The transaction must still be approved by the appropriate federal

and state regulatory authorities.

When the transaction is completed, each of Sovran's 59.8 million shares of common stock outstanding will convert into 1.23 shares of common stock of the new company, and each of C&S' 62 million outstanding common shares will convert into 1 share of common stock Avantor. The parties plan to list the common stock of the new company for trading on the New York Stock Exchange.

The transaction is structured as a tax-free exchange of stock for stockholders of C&S and Sovran, and is to be accounted for as a pooling of interests. Under the agreement, both The Citizens and Southern Corp. and Sovran Financial Corp. will continue as operating bank holding company subsidiaries of Avantor.

CONTACT: Scott Scredon of C&S, 404-581-5555 or Mary Beth Dale of Sovran, 804-441-4247; INVESTORS CONTACT: James A. Kirkpatrick of Sovran, 804-441-4705 or Sherry Winn Hubler of C&S, 404-581-2601

PALO ALTO, CA (FEB. 2) PR NEWSWIRE - In response to inquiries, Collagen Corp. (NASDAQ: CGEN) today reported that it is unaware of any reason for the increased stock activity in recent days.

"Our first fiscal six months have been excellent," said Howard Palefsky, Collagen's president and chief executive officer. "In addition to reporting record growth in sales and income, we recently received a report from the U.S. Food and Drug Administration (FDA) Center for Devices and Radiation Health's Office of Science and Technology reaffirming our position that Collagen's products are safe and effective."

New Product Development Progress

As announced at the recent Hambrecht & Quist Life Sciences Conference in January, results from ongoing clinical studies of the company's Contigen(TM) Bard Collagen implant for urinary incontinence and Collagraft(TM) Bone Graft Substitute are strong. This spring, the company expects to complete the data submission for the Contigen Premarket Approval Application (PMAA) and initiate the filing procedures for Collagraft.

As part of a joint agreement to develop and market TGFb2-based products for dermatological diseases, Collagen and Bristol-Myers Squibb Co. (NYSE: BMY) plan to begin clinical studies within the next few weeks on a 30-patient group at the University of Michigan.

Collagen Corp. is a scientific and commercial leader in applying the science of cell biology to healing human tissue.

#90033p0186 02/02/1990 ~PR Newswire

LAFAYETTE, CA (FEB. 2) PR NEWSWIRE - Bedford Broadcasting Co., part of the Lafayette-based Bedford Group of Companies, today announced it has purchased radio stations KSSK-AM and KSSK-FM in Honolulu from Heftel

Broadcasting Co. of Hawaii.

The purchase is subject to approval of the license transfer by the Federal Communications Commission. Terms of the agreement were not disclosed.

The combined AM and FM stations are Honolulu's number one combination, with the largest share of the city's metropolitan audience for age groups 12-plus, 18-plus, 25-54, and 35-64, according to the latest market report for Sept. 21-Dec. 13, 1989, released by the Arbitron Co. in Honolulu.

KSSK-AM/FM's "Perry and Price Show" is also Honolulu's strongest morning program according to the Arbitron ratings.

The popular show features personalities Michael W. Perry and Larry Price and airs in the 5-10 a.m. morning drive period commanding a 26.7 percent share of the 25-54 age group and 24.1 percent of the 12-plus group. From midnight to 10 a.m., the simulcast features a variety of adult contemporary music programming, news reports and traffic conditions.

Peter B. Bedford, president of Bedford Broadcasting Co., said his company wanted to acquire a Honolulu radio station known for outstanding quality and respected for its fair and comprehensive news reporting. The KSSK stations are particularly known for reporting on traffic conditions in metropolitan Honolulu.

He said KSSK-AM and KSSK-FM met all of the criteria, calling them "the unquestioned leaders in these areas in Honolulu." Bedford also said that no management or programming changes were contemplated.

KSSK-AM began broadcasting in 1929, and is the oldest station operating in Hawaii. In 1965, the station was purchased by Heftel Broadcasting Co. KSSK-FM began broadcasting in 1976 and was acquired by Heftel in 1979.

Cecil Heftel, a former five-term U.S. Congressman representing the state of Hawaii, is president of Heftel Broadcasting Co. which owns radio stations KTNQ and KLVE-FM in Los Angeles.

This acquisition is Beford's first entry into the broadcasting business. Other Bedford media ventures include Community News Network Inc., a chain of four newspapers in Southern California, and Bedford Arts, Publishers, a fine arts books publisher in San Francisco.

The Bedford Group of Companies is one of the leading real estate development and management organizations in the Western United States. Bedford develops land throughout California, Hawaii and other western states. Its portfolio contains more than 11 million square feet of buildings managed by the company and over 20,000 acres of land.

LEBEC, CA (FEB. 2) PR NEWSWIRE - Tejon Ranch Company (AMEX: TRC) announced today that it has asked that possible sites on its lands be included among a large number of other sites, statewide, which are being considered for a new University of California campus location.

The possibility of establishing one or more new campuses during the decade of the 1990's is under study by the U.C. Board of Regents.

Jack Hunt, Tejon president, stated that the company has received absolutely no indication from U.C. as to the likelihood of its lands being selected. Hunt further stated that the possibility of the selection of a Tejon U.C. site is extremely speculative and that the reason for this announcement at this time is the recent price movement in Tejon's stock.

Local interests have also formed task forces to seek consideration of campus sites in Kern County and the northern part of Los Angeles County. Tejon will be cooperating with these groups. Any commitment of Tejon lands for a new U.C. Campus would be subject to the requirements of the U.C. Regents and the acceptability of those requirements to Tejon.

Tejon Ranch Company owns 270,000 acres of land approximately 60 miles north of Los Angeles and 15 miles southeast of Bakersfield. Its divisions engage in a variety of agricultural and land management activities,

including cattle production, farming, oil and minerals, and commercial land use.

MCLEAN, VA. (FEB. 2) PR NEWSWIRE - GRC International (NYSE: GRH) announced today that for the second quarter of fiscal year 1990 it was reporting income of $256,000 from continuing operations, a loss of $3.5 million from discontinued operations, and an extraordinary loss of $1,228,300 for a consolidated net loss of $4,472,300.

On a per-share basis, these results correspond to income of $.03 from continuing operations, a loss of $.39 from discontinued operations, a loss of $.13 from an extraordinary item, for a consolidated net loss of $.49. Revenues from continuing operations were $29,046,000.

The loss from discontinued operations is a provision of $3.5 million for a purchase price adjustment relating to the sale of the company's biomedical business, additional expenses of sale, and certain costs relating to the cessation of biomedical operations at its former McLean facility. The provision for discontinued operations is not necessarily definitive but represents the company's best estimate at this time and is consistent with recent SEC filings of the purchaser. The extraordinary loss is a non-cash write-off of the issuance and discount costs associated with the early extinguishment of $12 million of the company's 14.3 percent debenture issue. The company has already purchased approximately $1.3 million of debentures in the open market since Nov. 8, 1989, and plans to purchase an additional $10.7 million in the near future. The company also announced that during the second quarter its backlog of defense contracts increased to a level about 45 percent over last year.

Chairman, President and Chief Executive Officer Robert E. Wengler said, "We are progressing through the major restructuring actions previously announced. Continuing operations became profitable as proceeds from the sale of the biomedical business enable us to begin reducing net interest expense. We are doing well competing for new business and our contract backlog continues to grow."

HOUSTON (FEB. 2) PR NEWSWIRE - Seagull Energy Corp. (NYSE: SGO) today

announced that the Internal Revenue Service (IRS) has filed a notice of appeal of a United States Tax Court ruling issued in June 1989 in favor of Seagull's Houston Oil & Minerals Corp. (HO&M) subsidiary in a long-standing tax dispute.

The dispute involves whether HO&M's creation of Houston Oil Trust in 1981 resulted in recapture of previously deducted intangible drilling costs. The IRS appeal will be heard by the U.S.Fifth Circuit Court of Appeals.

"The IRS decision to appeal was expected," noted Seagull Chairman Barry J. Galt. "As we anticipated, the matter seems destined to remain in litigation for some time, maybe as long as two years."

When Seagull completed its acquisition of the assets of the trust at the end of 1989, the company offered unitholders an option of accepting a $2.05 per unit all-cash payment or a smaller $1.45 per unit cash payment coupled with $1.00 per unit principal amount of 8 percent contingent tax litigation notes tied directly to this tax dispute. Unitholders are currently in the process of electing their payment option. Those wanting to hold the new notes will have until Feb. 16, 1990, to elect that option. The notes, along with accumulated interest, will be payable when and if HO&M ultimately prevails in the continuing litigation.

HARRISBURG, PA (FEB. 2) PR NEWSWIRE - Gannett Fleming, a Harrisburg-based engineering firm with clients throughout Pennsylvania, has been presented the Grand Conceptor Award for Engineering Excellence from the Consulting Engineers Council of Pennsylvania, a spokesman for the firm said today.

The company received the award, the highest given by the council, for its design of Pennsylvania Gas and Water Co.'s new Nesbitt Water Treatment Plant near Wilkes-Barre, Pa. Gannett Fleming's entry was one of 14 judged by the council. The entries covered projects that were completed in 1988 and 1989.

The award, the fourth presented to Gannett Fleming since 1979, was given to Walter K. Morris, executive vice president of Gannett Fleming, at special ceremonies in Hershey, Pa., on Feb. 1.

The $12 million Nesbitt plant, the largest direct water filtration plant in Pennsylvania, has a capacity of 12 million gallons a day and serves approximately 84,000 people in 17 communities in Luzerne and Lackawanna counties.

The use of direct filtration, which eliminates the need for sedimentation basins before filtration, saved an estimated $2.4 million in construction costs, according to Gannett Fleming.

The Nesbitt plant's state-of-the-art controls and equipment have effectively eliminated water quality problems and, Gannett Fleming said, has enhanced public health considerably. Operating results, it said, show that the plant successfully removes giardia cysts and other microorganisms as well as improving water clarity.

The firm said the plant is the forerunner of the modern type of water treatment facility that is required at more than 200 other systems in Pennsylvania in the next six years.

The Nesbitt project will be entered in the national 1990 Engineering Excellence Awards competition, sponsored by the American Consulting Engineers Council.

DALLAS (FEB. 2) PR NEWSWIRE - Atmos Energy Corp. (NYSE: ATO) announced today that Western Kentucky Gas Co., one of its operating units, is publishing a notice of proposed changes in gas rates in newspapers of general circulation in its Kentucky service area. The notice is being published in accordance with the rules and regulations of the Kentucky Public Service Commission (KPSC).

The company intends to file its application with the KPSC on Feb. 13, 1990. The KPSC may suspend the rates for up to five months to permit a full investigation. By Kentucky statute, the KPSC must act on the filing within 10 months of the filing date.

The proposed rates are expected to generate approximately $8.9 million per year in additional revenues. They will result in an overall increase of approximately 8.0 percent for Western Kentucky Gas Co.

Atmos Energy Corp. provides natural gas service to more than one-half million customers in three states through its operating companies: Energas Co., Trans Louisiana Gas Co. and Western Kentucky Gas Co.

CONTACT: Mike Doll, 214-450-4050; or Jack Eversull, 214-788-3729 (investor/analyst contact), both of Atmos Energy Corp.

NANUET, NY (FEB. 2) PR NEWSWIRE - Executive TeleCard, Ltd. (NASDAQ: EXTL, PHLX: XTL) announced the signing of a contract today with Servizi Interbancari -- known as CARTA Si -- Italy's largest credit card company. The contract calls for CARTA Si's 1.5 million card holders to be added to ETI's International telephone dialling system.

CARTA Si was formed in 1985 by a consortium of over 500 Italian banks and now claims 35 percent of the credit card market in that country.

Mario Castelli, director general for CARTA Si said "there are only 4 million cards held by Italy's 57 million citizens and the battle to get new customers is just heating up.

"By adding the ability to charge international telephone calls to our cards, we will have an edge on our competitors and a very valuable service for our customers. This is our second major announcement this month. We have joined with Alitalia Airlines to offer a co-branded card aimed at their frequent flyers.

"Thus, the best of their services and the best of ours are joined."

Robert Roach, president of Executive TeleCard said, "the Italian Market is a very important addition to our growing family of users.

"With the upcoming World Cup matches and the very large investments Italy is making in its phone systems, we expect this to be good growth market for us. Also, CARTA Si - Mastercard has been selected as the official card for the championships and that will certainly be a bonus for ETI."

ETI was launched in 1989 when it completed development of a computerized calling system that facilitates credit card charging of calls and by-pass of the exorbitant hotel surcharges that are levied in so many places in Europe. The ETI System uses the network and facilitates of the local Postal, Telephone, and Telephone Authorities in each country and as such is not a competitor but a stimulator of telephone usage.

This is the fourth contract announced in four months by Executive TeleCard and now brings the total cards "under contract" to over 17 million. Other deals announced were JCB International Co. Ltd., Air Travel Card, First Card of Sweden AB, and now CARTA Si.

"Our company is just getting started", said Roach, "and we already have 18 serious contracts in various stages of negotiations. When we said we could get over 20 million card holders in the first year of our business plan, there were some who really didn't believe it. Now, even that number seems low. We also expect that one or more telephone companies will use our equipment to automate their own manual (operator assisted) card

systems in this year....And that's a whole new story."

The CARTA Si deal was facilitated by Regency Red SRL, a Marketing and Finance Company in Milan. Dr. Ignazio Posadino, Regency's CEO, said "the ETI product is very marketable here in Europe and the Far East. We expect we will be involved in closing more deals for ETI very shortly. Several potential customers in Italy, France and Spain have already expressed an interest in similar contracts."

CONTACT: Robert N. Schuck, vice president, 914-627-2060, or Robert A. Roach, CEO, in Nyon, Switzerland: 41-22-631235, both of Executive TeleCard.

#90033p0211 02/02/1990 ~PR Newswire

CHICAGO (FEB. 2) PR NEWSWIRE - New non-stop jet flights between John Wayne Airport in Orange County and San Francisco International Airport will begin March 2 when both United Airlines and its partner carrier, United Express, inaugurate service on the California route, the two airlines announced today.

The new service will initially consist of four daily round-trip flights, one by United and three by United Express.

A fourth round-trip is planned by United Express beginning April 1. United Airlines will utilize its new, quiet Boeing 737-300 aircraft seating eight passengers in first class and 120 in coach class on this route.

Stephen M. Wolf, chairman and president of United Airlines, said, "United's entry into the Orange County-San Francisco market represents an additional commitment of service by this airline to the important corridor between the Bay Area and the Los Angeles Basin.

"United announced last week that we will expand service and operate flights every half hour in both directions between San Francisco and Los Angeles International Airport beginning April 30, 1990. We also announced that United will operate three flights daily in both directions between Oakland and Burbank beginning May 1, 1990," Wolf said.

United presently operates two daily round-trip flights between John Wayne Airport and Chicago and operates 134 flights to 41 domestic and international destinations from San Francisco.

United Express, which is operated by WestAir and has comprehensive marketing agreements with United Airlines, said it will utilize its 90-passenger British Aerospace BAe-146 jet aircraft on the route. The BAe 146 has been described as the "good neighbor" jet because of its exceptionally quiet performance at takeoff and landing.

"This new United Express service is the first scheduled jet service our airline has operated from John Wayne Airport and comes at a time when other airlines have cut back flights in this important California market," said Timothy P. Flynn, chairman of WestAir. "By working with our partners at United Airlines we were able to secure authorization for the flights in Orange County and quickly respond to the needs of the traveling public."

Flynn said that fares for the new flights will be competitive with those offered by other airlines flying the route. He said that the flights will be scheduled at times that will allow convenient connections with United Airlines flights in San Francisco to a number of destinations in the Pacific Northwest and across the Pacific. Customers will also be able to connect to nonstop United Express flights to Eureka, Redding, Santa Rosa and Chico in California; Reno, Nev., and Redmond/Bend, Ore.

United Express service from Orange County currently consists of jet prop flights to Sacramento, Oakland, Stockton, Fresno and Los Angeles.

WestAir has been a marketing partner with United Airlines since 1984. The United Express marketing agreement with United Airlines allows WestAir to offer its customers many United benefits including Mileage Plus frequent flier credits on all flights, worldwide reservations, advance seat selection and boarding passes.

WestAir/United Express is a subsidiary of Fresno-based WestAir Holding, Inc. (AMEX: WAH), the largest regional airline company in the United States. WestAir Holding, Inc. operations currently consist of more than 780 daily flights to 50 cities in 12 states and Washington, D.C.

DIBOLL, TX (FEB. 2) PR NEWSWIRE - Directors of Temple-Inland Inc. (NYSE: TIN) today approved a 2-for-1 split of the company's common stock and increased the quarterly dividend 38 percent to $.20 per share on the post-split shares. The cash dividend will be paid and the new shares distributed on March 15, 1990, to shareholders of record March 1.

The cash dividend on Temple-Inland's common stock has been increased each year since the company became a public corporation in 1984.

Clifford J. Grum, Temple-Inland president and chief executive officer, said, "The substantial increase in the cash dividend reflects the confidence that our directors have in the future of the company along with their commitment to increase the total value for owners of Temple-Inland shares."

Based on the shares outstanding at year-end 1989, Temple-Inland would have 54.9 million shares outstanding after the split.

Temple-Inland shares are traded on the New York and Pacific stock exchanges under the ticker symbol TIN.

EVANSVILLE, IN (FEB. 2) PR NEWSWIRE - Southern Indiana Gas and Electric Company (NYSE: SIG) reported earnings per share of 26 cents for the three months ended Dec. 31, 1989, compared to 29 cents in 1988. Increases in both retail and wholesale electric sales were offset by the higher than normal level of expenditures related to scheduled maintenance projects during the quarter.

Earnings per share of $2.81 for the twelve months ended Dec. 31, 1989 represents a 5.1 percent decrease when compared to all-time record earnings of $2.96 earned in 1988. The decrease is attributed primarily to much cooler summer weather and increased plant maintenance expenditures, partially offset by an increased customer base and increased earnings on cash investm

NEW ORLEANS (FEB. 2) PR NEWSWIRE - Avondale Industries Inc. (NASDAQ: AVDL) today announced the layoff of approximately 120 employees out of a total employment base of about 8,000.

Today's action involves workers in Avondale's shipyard division and follows the work force reduction of 300 other employees which occurred in early January.

Both layoffs resulted directly from the previously announced award by the U.S. Navy of a shipbuilding contract to another shipyard.

The contract was for construction of two T-AO Oilers. Work on these ships would have involved more than 600 of Avondale's employees. Avondale had previously received awards for 16 of the T-AO Class ships and was the low bidder for the two ships covered by the most recent contract.

In awarding the two T-AO ships, the U.S. Navy indicated that the decision followed its goal of maintaining a certain level of domestic shipbuilding capacity.

Avondale Industries Inc. has a current backlog, including outstanding options, valued at approximately $2 billion. This backlog covers shipbuilding projects which will extend through 1995.

Avondale Industries Inc., headquartered in metro New Orleans, is one of the nation's leading marine fabricators. In addition to its shipbuilding operations, the company specializes in boat and LCAC construction and is a major repair contractor for commercial and Navy ships. It is also involved in the modular construction of plants and components for a variety of land-based industries.

DALLAS (FEB. 2) PR NEWSWIRE - Trinity Industries Inc. (NYSE: TRN) announced today that it has elected to redeem all of Trinity's outstanding Liquid Yield Option Notes due Nov. 23, 2001 (the "Notes").

The redemption of the notes is to occur on April 2, 1990. As of Jan. 31, 1990, there were $201,880,000 original principal face amount at maturity of the originally issued $316,250,000 original principal face amount at

maturity outstanding.

Prior to the close of business on April 2, 1990, holders of the notes have the option, at their discretion, of surrendering the notes for conversion into the common stock of Trinity. If not converted, the notes will be redeemed on April 2, 1990.

The redemption price for cash is the sum of (i) the notes' issue price, (ii) prepayment premium and (iii) accrued original issue discount through the redemption date.

At April 2, 1990, if redeemed by the holder, the total redemption price for cash of $372.33 for each $1,000 principal amount at maturity of the notes will be paid upon surrender of each note.

Assuming all notes are presented for redemption by the holders, the amount of cash to be paid by Trinity would be approximately $75.2 million and an extraordinary charge to the fiscal 1990 Consolidated Income Statement of Trinity would be incurred for prepayment premium and deferred debt expense estimated to be 14 cents per share based on fully diluted average number of common and common equivalent shares outstanding. No charge to the Consolidated Income Statement would be made if the Notes are converted.

The conversion rate for the conversion of the notes into shares of the common stock of Trinity is 14.20 shares for each $1,000 principal amount at maturity of notes (approximately $26.22 per share in relation to the redemption price). The right to convert the principal of the notes into common stock of Trinity will expire at the close of business on April 2, 1990.

Assuming all notes are presented for conversion by the holders, an additional 2,866,696 shares of common stock would be issued.

Trinity Industries, with headquarters in Dallas, manufactures and markets a wide variety of metal products, principally in six business segments: Railcars, Marine Products, Structural Products, Containers, Metal Components and Leasing.

DETROIT (FEB. 2) PR NEWSWIRE - Comerica Trust Company of Florida N.A. and First American Bank and Trust N.A. have signed an agreement whereby Comerica will acquire most of First American's Lake Worth-based $400 million trust department. This agreement has been approved by the Federal Deposit Insurance Corporation.

Comerica Trust Company of Florida N.A. President Arthur R. Bradley said that Comerica will offer an expanded range of trust services to customers who now have relationships with First American. He also noted that customers affected by the transaction will have the added advantage of dealing with one of the strongest, best-managed banking companies in the United States.

Comerica Trust Company of Florida N.A., which has over $1 billion under management, is a wholly owned subsidiary of Comerica Incorporated (OTC: CMCA), a $12 billion bank holding company headquartered in Detroit.

The corporation has targeted Florida as a key future growth market. It presently operates one of the largest trust companies in Florida with offices in Boca Raton, Naples, Sarasota and Clearwater. The bank has a commercial lending office in Tampa that provides financing to Florida auto dealerships.

PHILADELPHIA (FEB. 2) PR NEWSWIRE - Sun Refining and Marketing Co. will upgrade its naphthenic lubes plant at its Marcus Hook, Pa., facility, the company recently announced.

The multimillion dollar commitment will be phased in over three years. In a letter to customers announcing the capital investment project, David E. Knoll, president of Sun R&M, pointed out that "Sun's reputation as one of the best lube oil manufacturers and marketers in the industry can only be reinforced." Knoll further noted that the move was made to ensure an uninterrupted supply of quality lube products, which the company has become known for worldwide.

An ample supply of select Grade A crude oil, the identification of new crude fields and new logistical arrangements to ensure continuous supply were also mentioned.

"This upgrade of our facility, with a modernized state-of-the-art control room, underlines our commitment to the continuing supply of quality naphthenics to our customers," said David Rippy, vice president of Sun's Lube Division.

Rippy has named Pepe Capeles as the business manager for the project. Rippy said that "Capeles' broad background and experience in Lubes manufacturing and technology adds a great deal of strength to this

activity."

Sun has been a worldwide leader in the naphthenic lubes market for nearly 100 years and is an acknowledged industry leader in testing and producing safe, non-carcinogenic naphthenic oils.

Sun R&M has the second largest capacity in the United States for the manufacturing of lubricating oils and waxes and markets its oils to a wide variety of domestic and foreign customers.

Sun Refining and Marketing Company is a subsidiary of Sun Co. Inc. (NYSE: SUN).

#90033p0236 02/02/1990 ~PR Newswire

CHICAGO (FEB. 2) PR NEWSWIRE - Peoples Energy Corp. (NYSE: PGL) today reported net income of $38.6 million for the first quarter of fiscal 1990, the three months ended Dec. 31, 1989.

This compares with $41.4 million in the same period a year earlier. On a per-share basis, earnings were $1.18 in the most recent quarter against $1.27 in the comparable period last year, a decrease of 7 percent.

The year-ago results include the effect of a one-time accounting change that increased net income in last year's first quarter by $9.7 million or 30 cents a share.

The Chicago-based holding company for two natural gas utilities adopted the change in fiscal 1989 so that the accounting for monthly revenues would more closely match related costs.

Eugene A. Tracy, chairman and chief executive officer of Peoples Energy, said earnings for the current quarter were 22 percent higher than a year ago, excluding the effect of the accounting change. This increase resulted from greater gas deliveries, mostly due to temperatures that were 8 percent colder than those of a year ago. Higher operating expenses were an offsetting factor.

Tracy pointed out that January 1990 was the warmest January recorded at O'Hare Field since that site's weather station was established in 1958. The warm weather will have a negative impact on second-quarter and full-year earnings, he said. January usually marks the peak of the heating season for the company's two utilities, which provide gas to heat about 95 percent of the dwellings in Chicago and 56 north suburban communities.

For the running 12-month period ended Dec. 31, 1989, Peoples Energy had net income of $84.9 million, or $2.60 per share. This compares to $97.2 million, or $2.99 per share, for the 12 months ended Dec. 31, 1988.

If the accounting change referred to above had been made prior to calendar 1988, earnings for the period would have been $80.7 million or $2.48 per share.

The most recent 12-month numbers reflect increased gas deliveries and the recovery, from the State of Illinois, of costs incurred in prior years due to a state-imposed customer assistance program. Offsetting factors included higher operating expenses.

Operating revenues in the most recent three months rose 18 percent from the corresponding year-ago period to $407 million, due mainly to increased gas deliveries resulting from the colder weather and to an increase in gas costs.

#90033p0237 02/02/1990 ~PR Newswire

RALEIGH, NC (FEB. 2) PR NEWSWIRE - Golden Corral Realty Corporation (NASDAQ: GCRA) today announced net earnings of $1,296,232, or $.88 per share (based on 1,480,000 shares issued and outstanding), for the year ended December 31, 1989, based on audited figures. For 1988, the Company's net earnings were $1,349,346 or $.91 per share (based on 1,480,000 shares issued and outstanding).

According to Edward Clark, President of the Company, the $.03 per share decline in net earnings resulted primarily from a decline in restaurant sales at certain of the Company's restaurant properties. The Company owns 29 restaurant properties all of which are leased to Golden Corral Corporation and operated as Golden Corral steakhouse restaurants.

The Company is an equity real estate investment trust that was formed specifically for the purpose of leasing restaurant properties to Golden Corral Corporation. The Company receives a minimum base rent on the leased properties and percentage rent based on the restaurant's sales. Percentage rent for 1989 was $675,016 compared to $731,671 for 1988.

Gross income for 1989 was $1,784,013 compared to $1,822,406 for 1988. Rental, interest, and other income for 1989 was $1,736,097, $44,316, and $3,600, respectively, compared to $1,782,476, $34,230, and $5,700, respectively, for 1988.

As of December 31, 1989, the Company had total assets of $12,673,720 and stockholders' equity of $12,576,544.

DALLAS/FORT WORTH, TX (FEB. 2) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) began 1990 as it ended 1989 at Dallas/Fort Worth International Airport -- with a new boarding record.

During January, Delta established a new boarding record for the month of 503,958 passengers, 14.1 percent above the previous January record set in 1989.

"This marks the 13th consecutive month Delta has set new boarding records at DFW," said Henry Conley, Delta's district director - marketing. "We ended 1989 with an all-time annual record of 6,437,351 passengers, 20 percent over the previous year's boardings.

"In 1989 we also saw our market share at DFW jump from 24.3 to 27.1 percent," Conley added.

He attributed the growing market share to Delta's continued expansion of service at DFW and the popularity of Delta's Terminal 4E "Easy Street" facilities with both local travelers and passengers connecting at DFW from other cities.

#90033p0242 02/02/1990 ~PR Newswire

ATLANTA (FEB. 2) PR NEWSWIRE - The board of directors of Atlanta Gas Light Co. (NYSE: ATG) today declared a quarterly common stock dividend of 49 cents per share and dividends on its preferred stock as prescribed in each issue.

Payment will be made on March 1, to shareholders of record on Feb. 16. The dividend declared on the common stock is the same as that for the previous quarter and equates to $1.96 on an annualized basis. The company has paid a dividend every quarter since it again became a publicly held utility in 1947. The March dividend will be the 169 consecutive dividend paid.

The board also released unaudited results for the quarter ended Dec. 31, 1989, the first quarter of its 1990 fiscal year. These results showed

that operating revenues were $334,621,000, net income was $21,551,000 and earnings per share of common stock were $.98. Comparable results for the quarter ended Dec. 31, 1988 reflected operating revenues of $293,535,000, net income of $16,504,000 and earnings per share of common stock of $.76.

The 1989 increase in operating revenues was due primarily to increased volumes of gas sold as a result of weather which was 17 percent colder than the prior year and 5 percent colder than normal, and an increase in the volumes of gas transported for certain interruptible customers. A rate increase granted by the Georgia Public Service Commission effective Oct. 1, 1989 was also a contributing factor to the 1989 increase in operating revenues.

The increases in net income and earnings per share of common stock for 1989 were due primarily to (1) weather which was 17 percent colder than the prior year and 5 percent colder than normal, (2) increased volumes of gas transported for certain interruptible customers, and (3) a rate increase granted by the Georgia Public Service Commission effective Oct. 1 1989. The increases were partly offset by (1) increased operating expenses, (2) increased interest costs, and (3) a slight decrease in the amounts billed to customers for gas service resulting from the implementation of a weather normalization rider effective Oct. 1, 1989.

This new rider allows the company to decrease base rates for gas service when weather is colder than normal and increase base rates when weather is warmer than normal thus reducing the impact that unusual weather conditions have on customers' bills and earnings. The company continues to recover the cost of gas through its purchased gas adjustment rider.

Atlanta Gas Light Co. is the largest natural gas distribution company in the Southeast. The company, which also operates under the trade names Georgia Natural Gas Co. and Savannah Gas Co. serves more than 1 million residential, commercial and industrial customers in 224 Georgia communities including metro-Atlanta, Athens, Augusta, Brunswick, Macon, Rome and Savannah. Chattanooga Gas Co., a wholly owned subsidiary, serves more than 35,000 customers in Chattanooga and Cleveland, Tenn. and surrounding area.

CHICAGO (FEB. 2) PR NEWSWIRE - Johnson Products Co., Inc. (AMEX: JPC) announced that it has consummated the purchase of four brands from M&M Products Co., an Atlanta-based manufacturer of ethnic hair care products. Johnson had previously announced an agreement to purchase two brands from M&M. The previous agreement was renegotiated and consummated yesterday to include the two additional brands.

Under the terms of the agreement, Johnson Products has acquired all of the intellectual property and related inventory for the Sof-N-Free, Sta-Soft-Fro, Curly Perm and Moxie brands of products. Johnson paid approximately $1.5 million in cash and $3.5 million in short- and long-term notes. Johnson estimates net sales for these brands at approximately $12.5 million for 1989.

Johnson Products manufactures and markets hair care and cosmetic products, domestically and internationally, under such leading product brand names as Gentle-Treatment, Ultra Sheen and Classy Curl.

SEATTLE (FEB. 2) PR NEWSWIRE - The U.S. Department of Energy (DOE) and The Boeing Co. (NYSE: BA) today signed an agreement initiating a joint technology exchange program aimed at finding alternative chemicals and processes to help solve environmental problems such as ozone depletion, smog, and toxic emissions.

This precedent-setting agreement will coordinate research efforts between Boeing and the DOE's Idaho National Engineering Laboratory. Research will focus on eliminating solvents, chromates, chlorofluorocarbons, and other chemicals contributing to toxic air emissions and hazardous wastes. The results of these research and development efforts will be disseminated to other industries and government entities which can benefit from them.

"This country faces the difficult task of cleaning up the environment from past years of disposal practices that were believed to be adequate at the time, but have now been shown to be insufficient to protect the environment," said Secretary of Energy James D. Watkins.

"Also, we face the challenge of ensuring that future disposal practices are truly protective are truly protective of the environment. My goal, as outlined in my Environmental Restoration and Waste Management Five-Year Plan, is to resolve our waste problems through an aggressive, long-term strategy for cleanup activities and management of newly generated waste materials. This agreement recognizes the importance of sharing technology as a means of solving environmental issues."

DOE and Boeing agreed it would be beneficial to share knowledge and collaborate in research. Wallace E. Alder, vice president for Boeing Support Services, the division that oversees company-wide waste reduction research programs, noted, "This kind of joint industry-government effort will eliminate duplication of research and speed the development of workable solutions for everyone."

The urgency of environmental problems makes this a timely partnership, said Alder. "We have similar objectives and a common concern for global environmental problems and protecting human health. The Boeing-DOE research program underscores our commitment to reduce hazardous materials and emissions in the quickest technologically feasible manner."

"We have been working on waste reduction for many years," said Alder, "and are dedicating nearly $7 million during 1990 for chemical waste reduction research, much of it on projects like this." Boeing, he pointed out, has endorsed the Pacific Northwest regional goal of a 50 percent reduction in hazardous waste by 1990, recently adopted by the Pacific Northwest Hazardous Waste Council.

#90033p0257 02/02/1990 ~PR Newswire

NEW YORK (FEB. 2) PR NEWSWIRE - In its annual survey of the real

(inflation adjusted) profitability of 200 of the world's largest banks, IBCA Limited, the London and New York based international credit-rating agency, ranked Skandinaviska Enskilda Banken Group of Sweden as the world's most profitable for the third year in a row. Its return on equity, adjusted for inflation, was 33.18 percent

In second place was a United States bank, Banc One Corp. of Ohio. Among the world's 10 most profitable banks, four were from the United States. In addition to Banc One, J.P. Morgan ranked 7th; First Chicago, 8th; and Fleet/Norstar Financial, 10th.

According to IBCA, the primary reason for the re-emergence of the United States banks among the leaders in real profitability was the fact that the major American banks did not increase their reserves to cover exposure to LDC debt during 1988. Nevertheless, IBCA believes that their reserve levels are now adequate, with most major banks at 40 percent or over as a result of provisions made in 1987 and 1989. (The report includes an analysis of the major world banks' relative exposure to LDC debt, with comparisons between 1982 and 1988).

IBCA's report noted that the going was "relatively easy" for most banks in 1988, but that profit growth for 1989, even excluding LDC provisions, will be more modest in most countries, and that the outlook for 1990 "is not particularly good."

Some of the problems cited are the stabilization, and in some cases, rises in interest rates; the economic slowdowns in the U.S. and U.K.; and the end of the "bonanza" in the investment banking market, and the resulting overcapacity which is likely to result in further losses.

Japanese banks were hit badly in the latest profitability rankings, with Sumitomo Bank rated highest at 71st. If the Japanese banks' securities profits were excluded, their showing would have been even poorer.

In IBCA's view, the size and continuing prosperity of the Japanese banks means they now dwarf all their competition. This is due to the strength of their economy, their substantial securities profits, and their comparatively low cost of capital. Nevertheless, the Japanese banks' profits in 1988 suffered form an increasingly competitive market both in Japan and abroad where there was "too much capital chasing too little business."

LAPEER, MI (FEB. 2) PR NEWSWIRE - Durakon Industries, Inc. (NASDAQ-NMS: DRKN) announced today that the Stock Purchase Agreement with a subsidiary of Century Group Inc. to sell Jerr-Dan Corporation has been terminated. Jerr-Dan, a wholly owned subsidiary comprising the company's vehicle transportation and towing segment, will be retained as a continuing part of Durakon's operations.

"The market for Jerr-Dan products remains strong and we will mount an aggressive campaign this year to increase sales and support Jerr- Dan's growth," said David Laro, Durakon president.

He said that the sale of the subsidiary had been planned as a means of reducing the company's long-term debt. Jerr-Dan is headquartered in Greencastle, Pa., and also maintains locations in California, Georgia, Illinois, Missouri and Ohio.

Lapeer-based Durakon is the world's largest manufacturer and distributor of truckbed liners, bug and gravel deflectors and rollback car carriers, and anticipates an end-of-February earnings announcement. A publicly held company, it is traded on the NASDAQ National Market System.

BELLEVUE, WA (FEB. 2) PR NEWSWIRE - Beginning Feb. 1, a major price barrier to cellular phone use was removed with the establishment of U S WEST Cellular's Midwest Network, the company announced today. It is the company's first regional network to cover eight major cities in five states.

The Midwest Network eliminates the roaming charge cellular users previously paid when they used their phones outside their hometown systems.

"This is another step toward the creation of a seamless cellular system," said Brian Shay, Twin Cities branch manager. "You can pick up your portable cellular phone and fly to Bismarck, or drive to Fargo and use your mobile unit, and pay the same per-minute fee for local calls as if you were driving up I-35W."

For example, a Twin Cities U S WEST Cellular subscriber with Optimum Plan pricing, making a local call in Fargo, will see a rate reduction of 37 to 88 percent, depending on time of day and usage level.

"The Midwest Network is a significant breakthrough toward reducing the costs of cellular phone use. Since cellular was first introduced in this market five years ago, we've seen the costs of phones and service reduced

dramatically. The Midwest Network continues this trend of affordability and increased general consumer usage. Cellular is no longer a businessman's expensive toy," Shay said.

Cities linked by the U S WEST Cellular Midwest Network are: The Twin Cities, Duluth, Fargo, Grand Forks, Bismarck, Sioux Falls, Omaha and Des Moines.

U S WEST Cellular serves 134,800 customers in 28 western, midwestern and southwestern markets. U S WEST Cellular is a division of U S WEST NewVector Group Inc. (NASDAQ: USWNA), a majority-owned subsidiary of U S WEST Inc.

#90033p0261 02/02/1990 ~PR Newswire

SAN JOSE, CA (FEB. 2) PR NEWSWIRE - CXR Corporation (AMEX: CXR), today reported results for the second quarter and six months ended Dec. 31, 1989.

"The results were impacted by costs associated with the merger of CXR Corporation with Digilog, Inc., and subsequent related consolidation costs. The benefits from the streamlining of operations will begin to appear in the second half of this year," F. Jack Gorry, president and chief executive officer, said.

For the second quarter, the company had a net loss of $1,440,000 (after one-time merger and restructuring costs of $1,335,000), or 19 cents per share on sales of $7,862,000 versus net income of $624,000, or eight cents per share on sales of $10,141,000 for the same period last year.

This resulted in a net loss of $1,340,000 (after one-time merger and restructuring costs of $1,410,000) or 17 cents per share on sales of $17,317,000 for the first half of fiscal 1990, compared to net income of $1,158,000 or 16 cents per share on sales of $18,819,000 for the prior year's initial six months.

"It is believed that the $1,410,000 expenses during the first half of the year will substantially provide for the total merger and restructuring costs related to the Digilog acquisition. These costs include a one-time charge of $610,000 for legal and auditing costs associated with the merger with Digilog, Inc., and $800,000 costs associated with relocating portions of Digilog's manufacturing and administrative activities to San Jose from suburban Philadelphia, and combining the selling activity. The restructuring, designed to reduce overhead and improve margins, will be in place by the end of our fiscal year," Gorry added.

"Sales of three of the four CXR Corporation product lines increased substantially over the first half of the previous year and overall sales of the CXR Telcom and CXR SA subsidiaries increased by six percent over the comparable period. However, sales of data communications test equipment decreased by almost 30 percent from the corresponding period in 1989. This decline resulted from a softening of demand for protocol analyzers during this period. However, we believe new products which have been introduced during the last two months will help improve future sales " Gorry noted.

"The initial acceptance of our new product offerings and our steadily increasing penetration of international markets, supported by a strong financial foundation, make us optimistic about CXR's future," Gorry concluded.

CXR through its CXR Telcom, Digilog and CXR SA subsidiaries, is a worldwide supplier of systems, instruments and modems for the data and telecommunications markets.

#90033p0266 02/02/1990 ~PR Newswire

COLUMBUS, OHIO (FEB. 2) PR NEWSWIRE - Ford Motor Company (NYSE: F) will go public in southern Ohio with its all-new 1991 Ford Escort subcompact family car and the all-new Ford Explorer family 4X4 at the Columbus Auto Show, starting at 10 a.m. Saturday at Veterans Memorial Auditorium, 300 W. Broad St., Columbus. The show runs through next Sunday, Feb. 11. Daily hours are 4-10 p.m.

"The Escort and Explorer will allow Ford to continue its sales leadership into the 1990s," said Ronald M. Tillier, Ford Division's Cleveland District sales manager.

"When the all-new Escort -- the world's best-selling nameplate for the decade of the '80s -- goes on sale in April as a 1991 model, it will usher in a new era at Ford in terms of quality, manufacturing, and design."

The Escort, available in three body styles -- two-door hatchback, four-door hatchback, and four-door station wagon -- is part of a family of cars which will be sold in all major worldwide markets, including 500,000 per year in North America.

The $1.9 billion project is the largest association program any auto company has attempted, and represents a maturing of Ford's partnership with Mazda, which was responsible for Escort's engineering. The interior design, as well as Ford's traditional aerodynamic exterior design, were

wholly Ford's responsibility.

The Escort will be assembled at Ford's Wayne (Mich.) Integral Stamping and Assembly Plant, with additional production at the company's Hermosillo Plant in Mexico.

Commenting on Explorer -- recently named by 4-Wheeler Magazine as its 1990 4-Wheeler of the Year -- an all-new entry in the fast-growing sporty compact utility vehicle market segment, Tillier said:

"First-time truck buyers should like Explorer when it goes on sale in March. It combines truck toughness and versatility with many of the comfort and convenience features associated with our cars."

The lineup includes two- and four-door, two-wheel- and four-wheel- drive models. The four-door Explorer model should appeal to families who want the added versatility of a utility vehicle. The two-door model should suit the younger buyer who wants versatility along with unique, bolder styling cues, Tillier said.

The Explorer is powered by a 4.0-liter electronically fuel-injected (EFI) V-6 engine -- the largest ever in a Ford compact light truck. It generates 155 horsepower and is teamed with a standard five-speed manual overdrive or four-speed automatic overdrive transmission.

#90033p0271 02/02/1990 ~PR Newswire

BEVERLY HILLS, CA (FEB. 2) PR NEWSWIRE - Franco Nero, Bill Sadler and John Amos will co-star in Twentieth Century Fox's "Die Hard 2" starring Bruce Willis.

Currently shooting on location in Denver, under the direction of Renny Harlin, "Die Hard 2" is produced by Larry Gordon, Joel Silver and Charles Gordon from a screenplay by Doug Richardson and Steven E. de Souza. Lloyd Levin and Michael Levy serve as executive producers of the action thriller with Steve Perry as co-producer.

A major international airport becomes an arena for terror in this sequel to the 1988 blockbuster, as Detective John McClane (Bruce Willis) is drawn into a deadly game of cat-and-mouse with an elite special forces unit which has seized a bustling East Coast airport. Led by a maniacal former U.S. military officer, the group plans to intercept the extradition of a Latin American drug czar as he is bought into the United States for prosecution.

International screen star Franco Nero co-stars as General Ramon Esperanza, a former Latin American military officer under extradition to the United States for drug trafficking. Nero has appeared in more than 90 films, including John Huston's "The Bible," "Camelot," "Force Ten From Navarrone " "Pope Joan," "21 Hours in Munich" and "A Quiet Place in the Country."

Bill Sadler plays the role of Col. Stuart, leader of the renegade special forces unit that has seized the airport. Most recently seen in Denis Hopper's "Hotspot," Sadler has also been heralded for his award-winning performances in both the Los Angeles and Broadway productions of Neil Simon's "Biloxi Blues." Familiar to television audiences for his recurring roles in the ABC TV series "Roseanne" and "Dear John," Sadler has also starred in an episode of the HBO series "Tales From the Crypt."

John Amos co-stars as Capt. Grant, the man called in to head up the Army unit in an effort to regain control of the crippled airport, which has become an arena of terror. Emmy-nominated for the role of the adult Kunte Kinte in the multi-award winning ABC mini-series, "Roots," Amos is best known for his starring role in the television series "Good Times" and his role as Gordy, the weatherman on "The Mary Tyler Moore Show." Amos' recent film credits include "Coming to America" with Eddie Murphy, "Lock-Up" with Sylvester Stallone and "Split Second."

"Die Hard 2," a Gordon Company/Silver Pictures Production of a Renny Harlin Film, is set for release in the summer of 1990 by Twentieth Century Fox.

Twentieth Century Fox is primarily engaged in the financing, development, production, distribution and marketing of motion pictures throughout the world and is a unit of Fox Inc.

#90033p0272 02/02/1990 ~PR Newswire

MONTREAL (FEB. 2) PR NEWSWIRE - IAF BioChem International Inc. of Montreal announced today that it has signed a master licensing agreement with Glaxo Group Limited for the development and marketing worldwide of a nucleoside compound (BCH-189) for the treatment of AIDS. At the same time, BioChem and Glaxo Canada Inc. signed a $15 million Research Agreement that will be funded by Glaxo Canada Inc. at $3 million per annum for up to five years.

The agreements were signed at an international news conference in Montreal at the Ritz-Carlton Hotel. The Honorable Monique Landry, minister of external affairs and international Development, Senator Paul David, and

the Honorable Claude Ryan, minister of education, Higher Education and Science, were attending the conference. The master license agreement is effective as of Jan. 31, 1990.

Under the master license agreement, Glaxo Group, will have exclusive rights to BCH-189 worldwide outside of the U.S. and Canada. Glaxo Canada and BioChem will form a joint venture equally owned by BioChem and Glaxo Canada to commercialize the drug in Canada. In the United States, Glaxo Inc., will develop the drug and be the exclusive distributor for the Canadian joint venture.

In laboratory studies, BCH-189 has been shown to have activity against the human immunodeficiency virus (HIV), the causative agent of acquired immune deficiency syndrome (AIDS). The compound appears to be less toxic than AZT and shows activity against HIV strains resistant to AZT. It is currently in pre-clinical trials at the National Cancer Institute in the United States and Glaxo has undertaken to continue the pre-clinical development program which is expected to be completed by mid-1990. BCH-189 has yet to be tested in humans.

The $15 million Research Agreement has the broad objective of identifying nucleoside products with potential utility in the treatment of disease caused by viruses or related to cancer.

Nucleoside analogs mimic the building blocks of DNA and RNA. When they are introduced into viral-infected cells, they can interrupt the replication of viral genetic material and thus stop the infection. BioChem scientists have developed methods of modifying nucleosides to increase their antiviral activity. So far, BioChem compounds appear to have less of the dose-limiting toxicity commonly seen with AZT (the only approved drug for AIDS treatment). It also appears that the mechanism of action of BCH-189 may be different than AZT. while the company is concentrating on AIDS therapeutics for now, these analogs may be useful in the treatment of other retroviral diseases.

Glaxo Canada Inc. is a subsidiary of Glaxo Holdings p.l.c., an international group of companies which conducts research and develops, manufactures, and sells ethical pharmaceuticals. Glaxo companies employ 38,000 people and operate in more than 50 countries, with sales for 1988-89 of U.S. $4.0 billion.

BioChem is a Montreal-based pharmaceutical company dedicated to the research, development, manufacture and sale of high-quality products for the diagnosis, treatment and prevention of diseases involving the immune system.

CLARENDON HILLS, IL (FEB. 2) PR NEWSWIRE - MAF Bancorp, Inc. (NASDAQ-NMS: MAFB) announced today that Noa W. Horner has resigned as executive vice president and chief financial officer of the company and its wholly owned subsidiary, MidAmerica Federal Savings Bank, effective Feb. 28, 1990. Horner, who also resigned as a director of both companies, will remain as a consultant through June 30, 1990.

Horner, 43, cited a desire to pursue other business interests as the reason for his departure. He joined the bank in 1978 and was named executive vice president and treasurer in 1986. He has served as a director of the company since 1985. Horner holds bachelor of arts and master of business administration degrees from Northwestern University.

Allen H. Koranda, chairman and chief executive officer of MAF Bancorp, said, "Noa has been invaluable to Mid America over the past 12 years, and his business expertise and personal presence will be deeply missed. He has been instrumental in guiding the company through often difficult times in our industry during the last decade. We thank him for his immeasurable contributions to Mid America and wish him the best of luck in his new endeavors." Koranda indicated that a successor has not yet been named to replace Horner, although he expected the board of directors to do so at its regular February meeting.

Mid America Federal Savings Bank is a federally chartered stock savings bank with total assets of $1.6 billion. The company operates a network of 13 retail banking offices primarily in the western suburbs of Chicago.

MIAMI (FEB. 2) PR NEWSWIRE - Eastern Airlines said today that dividends on the company's $2.84 Depositary Preferred Shares (EAL PrD), representing interests in the company's 11.36 percent cumulative junior preferred stock will be paid in cash by Texas Air Corp. (AMEX: TEX) pursuant to Texas Air's guarantee of dividend payments at a rate of $.7100 payable on Feb. 28, 1990, to shareholders of record Feb. 12, 1990.

The company said it would not declare quarterly dividends on three other preferred stock issues, consistent with the proposed plan of reorganization presented to its creditors last week and provisions in certain secured debt instruments. The three issues are:

-- $2.72 Cumulative Preferred Stock (EAL PrE)
-- $3.24 Cumulative Preferred Stock (EAL PrF)
-- $3.12 Cumulative Junior Preferred Stock (EAL PrG)

In 1989 dividends on these three issues were paid in kind.

CHARLOTTE, NC (FEB. 2) PR NEWSWIRE - Duke Power Co. (NYSE: DUK) announced today plans to develop a 24-hour Customer Service Center.

When fully implemented in 1993, the Customer Service Center will be a 24-hour centralized customer response service that will provide full assistance to Duke Power customers calling from anywhere in the company's 20,000-square-mile service area.

The facility will be located on a 20-acre site in the Unviersity Research Park in northeast Mecklenburg County.

The 80,000-square-foot facility will be designed to house approximately 400 full- and part-time employees and state-of-the-art telephone and radio dispatch communications equipment. Construction of the center will begin by early fall.

Named as general manager of the center is Sharon Allred Decker. Decker will be responsible for the development and mangement of the entire new service organization. She has been manager of marketing program development in Duke's marketing and rates department in Charlotte since 1986.

Four additional members of the Customer Service Center management team have also been announced. Tony Almeida has been named manager -- customer services; Bill Foust has been named field liaison; Tim Holleman has been named manager -- service response; and Carl Busby has been named facilities planning manager.

Almeida will be responsible for developing the consumer services representative team from current after-hours operation to full 24-hour staffing and operation. He will lead the company's efforts to establish standards of service excellence in response to customer calls to the new center. Almeida has been manager of Duke Power's High Point district since 1988.

Foust will be responsible for developing the transition schedule and the implementation plan for transferring calls and personnel to the Customer Service Center. He will lead the process for creating a smooth personnel and resource move from current operations to the center while assuring continued excellent customer service. Foust has been manager of Duke's Anderson, S.C., district since 1988.

Holleman will be responsible for the development of the service response team to full staffing and operation. The service response function of the center ensures that after-hours emergency requests for serice are handled in a timely and safe manner. Holleman has been manager of Duke's Kannapolis district since 1984.

Busby will be responsible for representing the client team in the process of planning and constructing the facility and then will be responsible for operating and maintaining the new facilty once it is completed. Busby has been superintendent of administrative support in Duke's Charlotte Division since 1984.

#90033p0291 02/02/1990 ~PR Newswire

DENVER (FEB. 2) PR NEWSWIRE - Manville Corp. (NYSE: MVL) today released record earnings for 1989.

Net sales for 1989 were $2,191,937,000 compared to $2,062,184,000 in 1988. Net earnings were $196,825,000 for 1989, versus a $1.3 billion loss in 1988. During 1988, Manville reflected an extraordinary charge on its financial statements for the implementation of its plan of reorganization.

For the quarter ended Dec. 31, 1989, net sales were $569,238,000 compared to $522,127,000 in the fourth quarter of 1988. Net earnings for the quarter were $52,677,000, versus a loss of $1.3 billion for the same quarter of 1988.

Stephens attributed the strong 1989 earnings to the exceptional performance of the company's U.S. and Brazilian forest products businesses but cautioned about anticipated softening in these markets in the year ahead.

Increased expense levels resulted from support for the company's record capital spending, increased research and development costs, and the costs for accelerating development of management information systems.

Reduced interest income and increased interest expense related to Manville's emergence from Chapter 11 in 1988, along with restructuring activity continue to impact net earnings comparisons.

Income taxes as a percentage of continuing operations decreased for the year ended 1989, primarily attributable to the utilization of net operating loss carryovers in the U.S.

Stephens said that the company anticipates that discussions will continue with the Manville Personal Injury Settlement Trust, from time to time, regarding mutually acceptable methods for improving the Trust's financial flexibility and enhancing value for all shareholders.

Primary and fully diluted earnings per common share data are calculated based upon common shares outstanding, common stock equivalents, and the probable conversion of the Series A preferred stock.

Fully diluted net earnings per common share for 1989 were $1.39 per share versus a $10.83 loss per common share in 1988. The 1988 loss includes a $10.73 extraordinary loss per common share, related to the financial statement recognition of the emergence from Chapter 11, and an 89 cents per common share loss related to the adoption of the new accounting standard for income taxes.

Manville is an international manufacturing and natural resources company with two principal operating subsidiaries, Manville Sales Corp.,

headquartered in Denver, and Manville Forest Products, headquartered in West Monroe, La. The company's primary businesses include paper and wood products, packaging, fiber glass and industrial insulation products, roofing systems and filtration and minerals. Founded in 1858, Manville employs more than 18,000 people at more than 50 facilities and four mines worldwide. The corporation's world headquarters is in Denver. Manville and its subsidiaries have over $2 billion in assets as of Dec. 31, 1989.

VIENNA, VA. (FEB. 2) PR NEWSWIRE - GRC International (NYSE: GRH) announced today that the Air Force Systems Command, Space Systems Division has awarded the Space Defense System Processor Independent Verification and Validation (PIV&V) contract to the industry team of Sparta Inc.; General Research Corporation (a subsidiary of GRC International, Inc.), and Dynamic Research Corporation.

The PIV&V contractors will provide satellite on-board processor, algorithm and mission software design performance verification and validation for the Boost Surveillance and Tracking System (BSTS) satellites and other Space Systems division satellite programs. General Research Corporation anticipates a five-year cost-plus-award-fee subcontract with a face value in excess of $33 million.

The contract provides an option to increase the five-year level of effort to about $47 million and unpriced options to extend the performance an additional five years. The actual level of contract funding will be determined by annual DOD and program funding levels. The work will be performed principally in Southern California by GRC's West Division led by Don Marx.

HERNDON, VA (FEB. 2) PR NEWSWIRE - Newbridge Networks (NASDAQ-NMS: NNCXF) announced today that it has received an order from B.C. Hydro for the second phase of its $1 million (Can.) provincial network. Installation will begin this spring.

"We at B.C. Hydro have been very happy with our existing Newbridge equipment," commented Jim Cheong, control and communications engineer at

the utility. "We feel that the MainStreet products represents the latest in digital communications technology and they have proven to be very beneficial to us in the conduct of our business."

"The first phase of the B.C. Hydro network has been up and running for several months so we are excited about the installation of the next phase, which includes our new 3645 MainStreet," commented John Barker, general manager of the Newbridge Western Canada region.

The second phase of the network will augment the 10-node provincewide 3600 MainStreet network installed last year. A 3645 MainStreet High Capacity Multiplexer has been ordered for the Microwave Control Center located on Burnaby Mountain in the greater Vancouver area. This is the hub of the network and operates 24 hours a day. In addition, nine 3600 MainStreet Bandwidth Managers have been ordered for five offices, three substations and a service center located throughout the province.

The network is fully redundant and is managed by the 4602 MainStreet Network Manager.

Newbridge Networks is an international company which specializes in the design, manufacture and marketing of voice and data communications equipment for global networks. Offices and manufacturing facilities are located in Canada, the United States and the United Kingdom.

Newbridge Networks Corporation is a public company whose common shares are listed for trading on the Toronto Stock Exchange (NNC) in Canada and quoted for trading on the NASDAQ National Market System (NNCXF) in the United States.

NORTH HIGHLANDS, CA (FEB. 2) PR NEWSWIRE - Michigan General Corporation (MGC) announced today that it will not at this time make an offer to exchange convertible notes due March 31, 1994, and 11 percent senior secured notes for new securities as announced on Jan. 4, 1990.

As previously announced, MGC has solicited and continues to solicit offers to purchase certain lumberyards owned by Diamond Lumber, Inc., a wholly owned subsidiary located in Florida, Kansas, Colorado and the Pacific Northwest. MGC has separately announced today that an agreement has been reached to sell Diamond's five Colorado lumberyards and its yards in Lewiston, Idaho and Spokane, Wash. While concentrating their efforts on these properties, the companies have also engaged in discussions concerning the possible sale of Diamond lumberyards located in Diamond's New England and California regions, either individually or together. The companies intend to continue to explore these possibilities and will entertain other proposals regarding all or substantially all of the companies' assets.

While there can be no assurance that the companies will receive offers they consider adequate or appropriate for all or substantially all of the companies' assets for recommendation to debt and equity holders, management said it believes an exchange offer to be premature at this time.

Bernard Kritzer, chairman of the board of directors stated that management will continue its effort to maximize the value of the companies by maintaining trade supplier relationships and exercising controls over assets and expenses.

MGC is a holding company. Diamond is its sole operating subsidiary. Diamond's principal business is the sale of lumber and building materials. The convertible notes are joint, unsecured obligations of the company and Diamond. The senior notes, which are obligations of the company, are guaranteed by Diamond.

HERNDON, VA (FEB. 2) PR NEWSWIRE - Effective Feb. 1, 1990, Newbridge Networks (NASDAQ-NMS: NNCXF) has been added to the TSE 300 index, the main Toronto Stock Exchange index.

Inclusion in the index means that the company's stock will now become eligible for indexing programs by financial institutions.

Institutions using the indexing program approach to trading choose to buy each stock according to its weighting in the Toronto Stock Exchange 300 composite index to duplicate market performance through good times and bad.

The index is weighted according to the market value of the component companies. The price of the shares is multiplied by the number of shares available for trading, with control blocks removed from the calculation to improve the measurement process.

Newbridge Networks is an international company which specializes in the design, manufacture and marketing of voice and data communications equipment for global networks. Offices and manufacturing facilities are located in Canada, the United States and the United Kingdom.

Newbridge Networks Corporation is a public company whose common shares are listed for trading on the Toronto Stock Exchange (NNC) in Canada and quoted for trading on the NASDAQ National Market System (NNCXF) in the United States.

TUCSON, AZ (FEB. 2) PR NEWSWIRE - Donnelly Corporation (AMEX: DON) today hosted an open house at its new Advanced Technology Center at 4545 East Lowell Road. The center is adjacent to the Arizona Materials Laboratories of the University of Arizona and maintains close linkage with faculty and students at the university.

The Advanced Technology Center opened in early September of 1989 and will focus on developing technologies which make use of novel materials and processes, enabling Donnelly to meet the future needs of both new and existing markets. Donnelly Corporation already has strong technologies in four key areas: glass processing, plastic molding, thin film coatings, and electronics.

Donnelly is assembling a world-class group of scientists at Tucson in an environment which promotes creativity. It is expected that staffing will grow to approximately a dozen scientists, most at the Ph.D level. These individuals will be recruited from the best talent available worldwide.

Nail Lynam, manager of Applied Research at Donnelly Corporation, stated: "Our new Advanced Technology Center in Tucson represents a unique

opportunity for Donnelly. We will be able to channel our already well-developed research capabilities into new areas of research that promise technological advances in new products, processes and markets of a breakthrough nature.

"We look forward to building close links to the university community so that both faculty and students will have opportunity to contribute to applied research in their area of interest.

"Through this relationship and through Donnelly's support of research at the university, our research teams will have access to some of the best thinking available in the materials sciences, particularly for optical and electronic applications.

"We believe this to be an outstanding opportunity for Donnelly and are very grateful to the university, the City of Tucson, and the many local citizens which contributed their energies and talents to making this program a reality. We are looking forward to a long and prosperous future together."

Donnelly Corporation is an international, rapidly growing, technology-oriented company dedicated to serving customers around the world with high-quality fabricated, molded, and coated glass products for the transportation and electronics markets.

The company has been based in Holland, Mich. since 1905 and today operates from 12 separate facilities in western Michigan. In addition to its Advanced Technology Center in Tucson, Donnelly has a major manufacturing facility in Naas, Ireland, a marketing liaison office in Tokyo, and a manufacturing facility under construction in Mount Pleasant, Tenn. Donnelly is also recognized as a leader in the application of participative management practices.

STAMFORD, CT (FEB. 2) PR NEWSWIRE - Savin Corporation (NYSE: SVB) today announced that the new rate at which Series B, C and D cumulative convertible preferred stock may be converted will be 22.26 common shares for each share of preferred, effective March 31, 1990. The current conversion rate, set March 31, 1989, is 20 common shares.

This conversion rate adjustment, which is being made in accordance with the annual reset provision of the Series B, C and D preferred stocks, was calculated by dividing $7 by 80 percent of the average market price during January 1989 ($.393 per share) for Savin common stock: $7 divided by ($.393 x 80 percent) equals 22.26.

MIAMI, FL (FEB. 2) PR NEWSWIRE - Ilia Lekach, the major shareholder of Parlux Fragrances, Inc. (NASDAQ: PARL), today commented on the management entrenchment action taken by the board of Parlux late on Jan. 31, 1990.

This action was taken after Lekach had called a special meeting of shareholders.

The action by the board attempted to change the by-laws of Parlux to prevent the meeting called by Lekach and to eliminate the rights of shareholders to act by consent to corporate action.

Lekach stated, "This action by the management, which was supported by only one member of the board that is not involved in the management of Parlux, is a desperate attempt by management to entrench themselves. It is obvious that management does not believe that they have the support of the shareholders, otherwise they would have been delighted to give the shareholders an opportunity to give management a vote of confidence."

Lekach also stated that this action by the board did not change his previously announced plans to hold a special meeting of the shareholders since he had been advised by counsel that the entrenchment actions by management would be ineffective to prevent the special meeting or the soliciting of consents.

NORTH HIGHLANDS, CA (FEB. 2) PR NEWSWIRE - Michigan General Corporation announced the execution of an agreement for the sale of seven of MGC's Diamond Lumber, Inc. ("Diamond") lumberyards located in Colorado, Idaho, and Spokane, Wash.

The cash purchase price is approximately $11.0 million and the buyer is BMC West Corporation ("BMC") of Boise, Idaho. Proceeds from the sale will be used to reduce bank debt and will result in an increase in working capital availability.

Bernard Kritzer, chairman of the board and chief executive officer of MGC, stated that closing of the sale is presently scheduled for Feb. 26, 1990, following completion of applicable Bulk Sales waiting periods.

He also commented that all valid vendor claims for the locations being sold will be paid in full pursuant to the procedures of the applicable Bulk Sales laws.

BMC is a supplier of building materials to the professional contractor, repair and remodel, and do-it-yourself markets. BMC, which has more than twenty locations in six western states, with total 1989 revenues of $200

million is owned by members of BMC management and McCown De Leeuw & Co., a private venture banking firm.

McCown De Leeuw & Co. manages over $150 million of domestic and offshore capital and specializes in strategic acquisitions of public and private businesses in conjunction with management.

MGC is a holding company. Diamond is its sole operating subsidiary. Diamond's principal business is the sale of lumber and building materials.

HOUSTON (FEB. 2) PR NEWSWIRE - Houston Oil Trust (AMEX: HOT) has been advised that the Internal Revenue Service has filed a Notice of Appeal of a decision of the United States Tax Court in favor of Houston Oil & Minerals Corporation ("Houston Oil") in a federal income tax dispute ("Tax Litigation") under Section 1254 of the Internal Revenue Code. The dispute involved the recapture of intangible drilling costs arising from the creation of Houston Oil Trust ("Trust") in 1981.

In connection with the acquisition by Seagull Minerals Corp. ("Seagull") of the assets of the Trust on Jan. 2, 1990, each Unit holder of the Trust is entitled to elect to receive (A) $1.45 in cash per Unit (subject to reduction) plus $1.00 original principal amount of Notes per Unit, or (B) $2.05 in cash per Unit (subject to reduction). Unit holders who wish to elect the cash and note option must tender their Units by Feb. 16, 1990. Unit holders who do not tender their Units by Feb. 16, 1990, will be deemed to have elected the cash option. The Notes are payable in full only upon entry of a final, non-appealable judgment in favor of Houston Oil in the Tax Litigation which is now on appeal to the United States Fifth Circuit Court of Appeals.

HOUSTON (FEB. 2) PR NEWSWIRE - General Homes Corp. (NYSE: GHO) announced today that its special shareholders meeting scheduled to be held today to approve certain matters in connection with its proposed debt restructuring was adjourned to 10:00 a.m. Houston time on Feb. 16, 1990.

The company's offers to exchange newly issued equity securities for its publicly held subordinated notes expire on Feb. 15, 1990. The company understands that approximately 62 percent of the principal amount of each series of the notes had been tendered as of 6 p.m. Central Standard Time, Feb. 1, 1990.

Additionally, under the company's revised senior secured credit agreement, the company has a deadline for consummating the company's proposed exchange offers for its subordinated notes. The company has requested the lenders under such agreement for an extension of such deadline until Feb. 16, 1990. The lenders have not extended such deadline since Jan. 19, 1990.

#90033p0328 02/02/1990 ~PR Newswire

NEWTON, MA (FEB. 2) PR NEWSWIRE - University Bank, National Association (AMEX: UBN) today announced profitable results for the fourth quarter and breakeven results for the year ended Dec. 31, 1989. Net income for the year was $7,000 compared to $1,650,000 for 1988. There was net income of $204,000 in the fourth quarter compared to earnings of $49,000 for the same period in 1988. The net income per share for the year and fourth quarter of 1989 was zero and 3 cents compared to 29 cents and zero for the same period in 1988. Included in the fourth quarter 1988 earnings were gains before taxes of $953,000, from the sale of mortgage servicing rights. Gains on the sale of mortgage servicing rights for the year were $3,763,000 in 1989 and $4,375,000 in 1988. The 1988 earnings include the results of operations of NorthEastern Mortgage Company, Inc. since March 1 1988.

Total assets as of Dec. 31, 1989, were $411.7 million, an increase of 14 percent over the Dec. 31, 1988, balances. Total deposits and total loans

increased 14 percent and 7 percent, respectively, compared to 1988. Stockholders' equity was $21 million at Dec. 31, 1989, and was $24.3 million at Dec. 31, 1988. The decline in equity primarily results from an increase in unrealized losses on marketable equity securities of $1,928,000 (centered in the fourth quarter of 1989). In order to conserve capital and in light of the current economic climate, the board of directors has decided to suspend the quarterly dividend on its common stock.

University Bank, N.A. is a commercial bank founded in 1927. Headquartered in Newton, Mass., the bank operates from branch locations primarily in Middlesex County and specializes in real estate lending. In addition, the company operates mortgage banking offices from locations in Massachusetts, Connecticut, Rhode Island, New Jersey and New York.

#90033p0329 02/02/1990 ~PR Newswire

POUGHKEEPSIE, N.Y. (FEB. 2) PR NEWSWIRE - Poughkeepsie Savings Bank, FSB (NASDAQ: PKPS) today reported a net loss of $2.7 million, or $0.77 per share, for the fourth quarter of 1989, due primarily to a special $4.0 million addition to the loan loss reserves, the effect of which was partially offset by a $1.0 million reduction in income taxes from the realization of losses on loans for which a book provision was previously made. For the year-ago quarter, Poughkeepsie earned $682,000 or $0.20 per share. For the year ended Dec. 31, 1989, Poughkeepsie recorded a net loss of $18.9 million, or $5.38 per share, versus net income of $10.2 million, or $2.85 per share, in 1988.

The full-year results are attributable mainly to several previously announced charges. In addition to the loan loss provisions, which included $8.3 million after tax for the write-off of goodwill related to the bank's investment in its branches in North Carolina and South Carolina and a $1.0 million pretax adjustment of interest income on certain mortgage-backed securities related to prior periods, the $1.5 million previously disclosed adjustment to interest income on certain mortgage-backed securities was revised as a result of management's ongoing review of this matter. The bank also made special additions totaling $12.5 million to its loan loss reserve in 1989, including the $4.0 million added in the fourth quarter, reflecting management's continual review of non-performing assets and current conditions in the real estate market.

Provisions for loan losses were $5.1 million for the three months and $15.9 million for the year ended Dec. 31, 1989, bringing the bank's

reserve for loan losses to $10.2 million at Dec. 31, 1989. Loan loss reserves were charged with $4.8 million in the fourth quarter to reflect the net realizable value of real estate acquired in settlement of loans. These net amounts were reclassified to owned real estate and to investments in joint ventures. Provisions were $383,000 and $1.4 million for the fourth quarter and year, respectively, in 1988. Loans delinquent 90 days or more, non-accrual loans, loans in foreclosure and other real estate owned, net of reserves, amounted to $44.2 million at Dec. 31, 1989 versus $25.0 million at the same date in 1988 and $50.6 million at Sept. 30, 1989. Investments in joint ventures which are primarily the result of real estate acquired in settlement of loans were $14.6 million at Dec. 31, 1989 and $2.9 million at Dec. 31, 1988.

As previously announced, the bank, with the assistance of its outside auditors, Coopers & Lybrand, conducted a thorough review of its loan portfolio at year-end. Real estate experts from Coopers and Lybrand also participated in the review process. The special addition to loan loss reserves in the fourth quarter resulted from the loan portfolio review and the continued deterioration of the commercial real estate market, as well as the impact of general economic conditions. In 1990 the bank intends to increase its regular provision for loan losses to an annual rate of $3.0 million, up from a level of $1.8 million (before special additions) for 1989.

Poughkeepsie Savings Bank is a community banking institution whose principal market is the mid-Hudson Valley region of New York, where it operates 11 branch offices.

BOISE, ID (FEB. 2) PR NEWSWIRE - Idaho Power Co. (NYSE: IDA) today reported a net income in 1989 of $84.7 million, a sharp rebound from the $49.1 million recorded in 1988, a year when drought reduced production at the company's hydroelectric plants to the lowest in a decade.

Earnings per share showed a similar increase at $2.37, compared to $1.32 for 1988.

Company Chief Financial Officer Dewey Hammond said that while the utility's operating results were a dramatic turnaround from the drought-affected years of 1988 and 1987, the results could best be described overall "as a return to normal for an intrinsically sound company."

As an example, he said that the 1989 net income and earnings per share figures both were typical of the range the company experienced in the years immediately before the drought. "Taking all factors into account, 1989 demonstrates the fundamental soundness of the company, and in terms of responsiveness, how quickly our financial benchmarks can recover from two years of drought. They are back to normal and as strong as our shareowners have become accustomed to over the years," Hammond said. "That demonstrates the endurance and the resilience of the company."

Total operating revenues for 1989 were $496.2 million, an increase of $83.8 million. Hammond attributed the revenue increase to record retail energy sales produced in part by vigorous economic expansion in the company's service territory and an accelerating growth in customer numbers permanent rate relief received early last year in Idaho, and greater availability of energy to sell to other utilities as a result of improved hydroelectric generating conditions.

Total 1989 operating expenses were $365.2 million, an increase of $49.8 million. Well over half the increase in expenses came in the form of increased taxes, which slightly more than doubled for the year because of the company's higher level of taxable income.

Headed into the second month of 1990, Hammond acknowledged the company has some concerns about this year's mountain snowpack, the fuel supply for its hydroelectric operations. "At this time of year, 50 percent of the snowpack should be in place. The latest snow survey indicates that snow accumulation is substantially below normal. This naturally causes concern for our company and the state as a whole. Although it is still early, we hope the predictions for above normal precipitation in the last half of the winter can recover from the shortfall encountered to date," Hammond said. "In any case, even if we may not have as much low-cost hydro as we would like this year, it does appear that between our hydro and our coal-fired generating resources we should have no difficulty meeting customer energy demands during the year."

#90033p0337 02/02/1990 ~PR Newswire
HOUSTON (FEB. 2) PR NEWSWIRE - NL Industries, Inc. (NYSE: NL) a major producer of titanium dioxide pigments and other specialty chemicals, announced today that its 1989 income from continuing operations increased 27 percent to $170.3 million, or $2.58 per share, on net sales of $1,000.9 million, compared to $134.2 million, or $2.02 per share, on net sales of $1,007 million in 1988.

Operating income of the titanium dioxide pigments segment increased 15 percent in 1989 to $289.3 million, compared to $252.6 million in 1988 as a net result of 9 percent increase in average selling prices, a nominal decrease in sales volume, changes in currency exchange rates, higher raw material and manufacturing costs, and a $10 million first quarter 1988 write-down of a rock ilmenite slag joint venture in Norway.

Net income was $172.9 million, or $2.62 per share, in 1989, compared to $162.9 million, or $2.45 per share, in 1988. Extraordinary items in both years relate principally to the income tax benefits of utilization of net operating loss carryforwards. Discontinued operations in 1988 represent the operations of Baroid Corporation, NL's former petroleum services business, which was spun-off to the company's shareholders in December 1988.

Operating income in the fourth quarter of 1989 increased 14 percent to $70.5 million, compared to $61.7 million in 1988, as a 21 percent increase in the titanium dioxide pigments segment was partially offset by a decline in the specialty chemicals segment and increased chemicals group expense, net. Income from continuing operations for the 1989 fourth quarter declined 37 percent to $20.6 million, or $.31 per share, from $32.7 million, or $.49 per share, in the comparable 1988 period as increases in interest expense, general corporate expense, net, and income taxes more than offset the increase in operating income for the quarter. Net income for the quarter declined 57 percent to $20.4 million, or $.31 per share, from $47.1 million, or $.71 per share, in the comparable 1988 period as a result of the above factors and the discontinued operations in 1988.

NL's 1989 results are subject to final audit. NL Industries, Inc. is headquartered in Houston. NL's common stock is traded on the New York and Pacific Stock Exchanges under the symbol "NL."

HUNTSVILLE, AL (FEB. 2) PR NEWSWIRE - The Huntsville Division of McDonnell Douglas Space Systems Co. received a $49 million contract from

NASA Marshall Space Flight Center for the Aeroassist Flight Experiment (AFE) carrier development and spacecraft integration project.

The spacecraft will be fabricated and integrated in Huntsville with an Aerobrake provided by Johnson Space Center and a set of experiments provided by Langley Research Center, Ames Research Center and Johnson.

The spacecraft will be carried into orbit, deployed, retrieved, and returned by the Space Shuttle. The flight experiment scheduled for August 1994 will test whether atmospheric friction, rather than braking rockets, can be used to slow spacecraft from higher orbits into lower orbits.

A successful test flight will pave the way for development of a propellant-saving aerobraking device for use on geosynchronous returns as well as future moon and Mars missions.

SOMERSET, NJ (FEB. 2) PR NEWSWIRE - City Savings Bank, F.S.B. today announced that Resolution Trust Corporation (RTC) employee Brian McClelland has been named managing agent and chief executive officer for the institution.

City Savings, formerly City Federal Savings Bank, was placed in conservatorship on Dec. 8, 1989. McClelland previously served as the assistant managing agent (credit) for the institution.

McClelland, who joined the division of liquidation of the Federal Deposit Insurance Corporation in 1985, has held several senior management positions in his career. "Mr. McClelland brings considerable FDIC/RTC experience to the job. His appointment as chief executive officer and managing agent will provide the management needed to satisfy the operating objectives established for City Savings when control of the institution was assigned to the RTC," said William M. Dudley, RTC regional director for the Eastern region.

Jack P. Shinn, formerly chief executive officer and managing agent, is being reassigned to the regional office in Atlanta to assist in development of policies and procedures and in regional management of the institutions in conservatorship. Shinn was instrumental in the RTC's takeover of City Savings and has been very successful in stabilizing the institution, Dudley continued. "The shift in personnel is a response to our ever-changing needs and in no way affects the status of City Savings Bank, its staff or customers," Dudley further stated.

EVANSVILLE, IN (FEB. 2) PR NEWSWIRE - Southern Indiana Gas and Electric Company (NYSE: SIG) reported earnings per share of 26 cents for the three months ended Dec. 31, 1989, compared to 29 cents in 1988. Increases in both retail and wholesale electric sales were offset by the higher than normal level of expenditures related to scheduled maintenance projects during the quarter.

Earnings per share of $2.81 for the twelve months ended Dec. 31, 1989 represents a 5.1 percent decrease when compared to all-time record earnings of $2.96 earned in 1988. The decrease is attributed primarily to much cooler summer weather and increased plant maintenance expenditures, partially offset by an increased customer base and increased earnings on cash investments.

BUFFALO, NY (FEB. 2) PR NEWSWIRE - Empire of America Federal Savings Bank which federal regulators placed in the Resolution Trust Corp. conservatorship program on Jan. 24, 1990, announced that in the fourth quarter of 1989 it wrote down $657.8 million of goodwill, strengthened its loan loss reserves as a result of a $108.6 million provision and incurred restructuring charges of $52.1 million. The goodwill write-down results from new restrictive regulations and changing economic conditions which impair the bank's ability to achieve the objectives of, and expected benefits from, the 13 supervisory acquisitions it made between 1981 and 1986.

Excluding the write-down of goodwill, the bank posted a loss of $205.2 million for the fourth quarter of 1989 and $414.6 million for the year ended Dec. 31, 1989. Including the write-down of goodwill, losses for the fourth quarter of 1989 and the full year were $863.0 million ($58.45 per share) and $1.07 billion ($72.15 per share), respectively. Shareholders' equity fell to negative $916.5 million as of Dec. 31, 1989. Empire of America's loss in 1988 was $17.4 million ($1.27 per share) in the fourth quarter and $57.3 million ($4.24 per share) for the full year.

Kent Dixon, Empire of America's president and chief executive officer, emphasized that these results will have absolutely no effect on depositors whose accounts at the bank remain insured up to $100,000 per account title capacity. Dixon said, "All of Empire of America's offices will continue to operate normal banking hours providing the convenience and high quality of service which our customers have come to expect."

Ralph L. Deacon, managing agent for the Resolution Trust Corp., said, "The bank, under Mr. Dixon's leadership has been making many of the changes

that the government would have made had it stepped in sooner. We're here now to work with the management team that is in place because they had things going in the right direction and have done all the things we would have done." Deacon added, "The main reason we step in is to give the depositors more comfort because we are here. Our main goal is to conserve the assets, cut expenses and bring the sale of this institution to a final satisfactory resolution."

Empire of America is a federal savings bank with headquarters in Buffalo, N.Y.

#90033p0368 02/02/1990 ~PR Newswire

HYANNIS, MA (FEB. 2) PR NEWSWIRE - The Cape Cod Bank and Trust Company (NASDAQ: CCBT) reported that net income for the year ended Dec. 31, 1989, was $3.12 per share, compared to $3.87 per share reported for 1988.

This was a decline of 19 percent although the the earnings for the year were the fourth highest in the bank's history. The directors recently increased the quarterly dividend rate on the bank's common stock from 35 cents per share to 38 cents per share.

For the fourth quarter, Cape Cod Bank and Trust Company earned 27 cents per share after a $3,075,000 provision for loan losses. This provision was $2.8 million more than in the previous year's fourth quarter and had the effect of reducing fourth quarter earnings by 69 cents per share.

In addition, 1988 fourth quarter income of $1.05 per share included a gain on the restructuring of the bank's employee benefit plans which increased earnings in that quarter by 18 cents per share.

The bank provided $4,650,000 for loan losses in 1989 resulting in a reserve totaling $4.4 million at year end. Nonaccrual loans totaled $13.1 million and other loans past due 90 days or more totaled $16 million.

Total deposits of $488.3 million were 6 percent ahead of 1988 levels, and total loans of $337.8 million were 5 percent lower.

Cape Cod Bank and Trust Company is the only independent commercial bank with its headquarters on Cape Cod and operates 17 banking offices.

NORTH HIGHLANDS, CA (FEB. 2) PR NEWSWIRE - Michigan General Corporation ("MGC") announced the execution of an agreement for the sale of seven (7) of MGC's Diamond Lumber, Inc. ("Diamond") lumberyards located in Colorado, Idaho and Spokane, Wash. for a cash purchase price of approximately $11.0 million to BMC West Corporation ("BMC") of Boise, Idaho. Proceeds from the sale will be used to reduce bank debt and will result in an increase in working capital availability.

Bernard Kritzer, chairman of the board and chief executive officer of MGC, stated that closing of the sale is presently scheduled for Feb. 26, 1990,

following completion of applicable Bulk Sales waiting periods. He also commented that all valid vendor claims for the locations being sold will be paid in full pursuant to the procedures of the applicable Bulk Sales laws.

BMC is a supplier of building materials to the professional contractor, repair and remodel, and do-it-yourself markets. BMC, which has more than twenty locations in six western states, with total 1989 revenues of $200 million is owned by members of BMC management and McCown De Leeuw & Co., a private venture banking firm. McCown De Leeuw & Co. manages over $150 million of domestic and offshore capital and specializes in strategic acquisitions of public and private businesses in conjunction with management.

MGC is a holding company. Diamond is its sole operating subsidiary. Diamond's principal business is the sale of lumber and building materials.

RICHMOND, VA (FEB. 2) PR NEWSWIRE - CSX Corp. (NYSE: CSX) and Enron Corp. (NYSE: ENE) today announced they have entered into a definitive stock-purchase agreement which calls for Enron Gas Processing, a subsidiary of Enron Corp., to acquire the stock of CSX Energy Corp., a wholly owned subsidiary of CSX Corp.

Terms were not disclosed, but CSX said it expects to report a net gain on the sale. The purchase does not require the assumption of debt by Enron Corp.

Completion of the transaction is anticipated during the first quarter of 1990 and is subject to certain required governmental approvals, officials said.

CSX Energy, headquartered in Houston, produces and markets natural gas liquids from three company-operated plants, including a natural gas liquids extraction plant in Eunice, La.

Enron Corp., America's leading natural gas company with approximately $8.7 billion in assets, operates the nation's largest natural gas transmission system, markets natural gas, gas liquids, crude oil and refined products nationally and worldwide, owns 84 percent of Enron Oil & Gas Co., one of the country's largest independent non- integrated natural gas production companies, and also is one of the largest independent producers of electricity.

CSX Corp., headquartered in Richmond, is an international transportation company that offers a variety of rail, container- shipping, intermodal, trucking and barge services.

ST. LOUIS (FEB. 2) PR NEWSWIRE - Mark Twain Bancshares Inc. (NASDAQ: MTWN) announced today the acquisition of the production capacity of Alvery Bartlett Brokerage Co. of St. Louis and its affiliate, Stock Index Futures Co. Inc. by Mark Twain Brokerage Services Inc.

The acquisition now ranks Mark Twain Brokerage Services among the largest brokerage houses in the metropolitan St. Louis area.

The Alvery Bartlett Brokerage Co. is a St. Louis-based firm that trades a traditional mix of investment products including stocks, bonds and mutual funds. The company specializes in national institutional trades.

Stock Index Futures was formed in 1982 as the first retail commodity brokerage firm in the country to specialize in trading stock index futures.

As the reason for his optimism, Dubinsky cited easing of federal restrictions placed on banks by the Glass-Steagall Act, which previously prevented banks from participating in securities industries.

Alvery A. Bartlett Jr. is founder and chief executive officer of both companies. "Mark Twain is one of the most successful and committed bank brokerage operations in the country, and we share their committment to the industry. It makes sense for us to become aligned with this premier St. Louis institution," he said.

Mark Twain Brokerage Services, headquartered in Frontenac, Mo., has at least one registered broker at each banking location. The acquisition will increase Mark Twain's personnel by adding approximately 15 producing brokers and three staff persons to the Frontenac location. The closing date for the transfer of all customer accounts and personnel to Mark Twain is scheduled for Feb. 19.

Charles R. Aldridge, president of Alvery Bartlett Brokerage and Stock Index Futures will become vice president and branch manager of the Frontenac office.

Bartlett will remain at the Clayton office as chief executive officer of these companies and of affiliates which are not part of the Mark Twain acquisition, including Bartlett Fund Management Co., a company engaged in the development and distribution of a proprietary family of mutual funds.

Mark Twain's correspondent banks can sell all products offered through Mark Twain Brokerage Services including: stocks, mutual funds, options, foreign exchange, insurance, unit investment trusts, institutional trades, annuities, municipal and governement bonds.

Customers of Mark Twain and its correspondent banks will benefit from the acquisition of the capabilities of the two firms, because, according to Farmer, enhanced national institutional trading capabilities and stock and commodity futures trading opportunities now are available from Mark Twain.

Mark Twain stock is traded over the counter under NASDAQ symbol MTWN. Mark Twain Bancshares, a 26-year-old bank holding company, operates 32 locations; 23 throughout St. Louis, St. Louis County and St. Charles County, as well as four locations in Kansas City, Mo., and five in Belleville and Edwardsville, Ill. Mark Twain also operates 36 brokerage locations in five states. Related financial services include Mark Twain Brokerage Services; Mark Twain Mortgage Co.; Mark Twain Leasing Co.; Mark Twain Insurance Services; Mark Twain International; Mark Twain Bond Department, and Mark Twain Trust Division.

TALLAHASSEE, FL (FEB. 2) PR NEWSWIRE - State Comptroller Gerald Lewis today closed Commerce Bank of Tampa due to insolvency.

The Federal Deposit Insurance Corp. was appointed receiver of the institution by Lewis and will operate the bank until a buyer can be found.

No interruption of service is expected to occur as a result of today's action, and no depositors will lose any money.

"Depositors remain fully insured," Lewis said. "In fact, it will be business as usual at the bank."

Commerce Bank, which operates only one office, opened in November 1985. It became insolvent as a result of an alleged $2 million check kiting scheme last spring and excessive management turnover.

Since 1988, regulators began closely supervising the institution, requiring it to raise additional capital or find a buyer. It was unable to achieve either goal.

A recent review of the bank's books showed that the institution had about $21 million in assets and roughly $21.6 million in liabilities, regulators said.

NEW YORK (FEB. 2) PR NEWSWIRE - Exxon Corporation (NYSE: XON) today estimated that in 1989 additions to proved reserves of crude oil, natural gas and natural gas liquids replaced about 150 percent of production. Additions to liquids reserves equalled liquids production last year and natural gas reserves additions replaced about 240 percent of production.

These total additions resulted from acquisitions, new discoveries, improved recovery and revisions to previous estimates of and extensions to existing fields.

AUSTIN, TX (FEB. 2) PR NEWSWIRE - Southwestern Bell's agreement today with the Texas Public Utility Commission Staff and other parties "will give us the financial incentive to build a telecommunications network that should attract new business and jobs to Texas," said Bill Free, vice president-revenues and public affairs for Southwestern Bell in Texas.

He added: "There's no doubt we're taking on some additional risk with a settlement of this size -- and making network improvements of this magnitude in a four-year timeframe is really going to test our mettle as a company."

"But we feel this is a calculated investment that ties our future to the future of Texas," he said.

Free said that in signing this agreement, Southwestern Bell is "betting on continued growth in Texas -- and a resulting increase in demand for new services. Our employees' ability to continue tight cost-controls, combined with their customer-focused sales and service efforts, will be critical to making this incentive plan a success."

The PUC staff, the company and most of the intervening parties in the current Southwestern Bell case reached agreement today on terms of a four-year improved-regulation plan that will boost the Texas economy and

provide customer benefits worth $1.2 billion over four years, if approved.

"Because of the tremendous changes in our business over the past 20 years -- especially the emergence of competition into every part of our industry -- the investor accurately perceives the greater degree of risk in our business," Free said.

"That's why we need the opportunity to give our investors a return on their investment that compensates for the risk they are taking," Free said. "This agreement today is a big step in that direction."

Instead of the current authorized rate of return on investment of 12.03 percent, Southwestern Bell in Texas will be authorized to earn beyond this present ceiling -- up to 14.5 percent on investment -- as long as 50 percent of any earnings beyond 12.06 percent are returned to customers. Earnings above 14.5 percent return on investment would be returned to customers in full.

The pact also enables Southwestern Bell to request approval for rate changes for services other than basic local service, without a full rate case -- as long as the revenue impact is less than $20 million for an individual service category and is limited to 2.5 percent of total annual revenues. This will allow the company to be more flexible in the marketplace.

Included in the customer benefits are rate reductions that will reduce the average residential bill of Southwestern Bell customers by 15 percent in the fourth year of the plan.

Another key element of the settlement agreement is a four-year, $344 million accelerated investment in digital equipment to handle telephone service for 196 communities that today use older technology.

#90033p0414 02/02/1990 ~PR Newswire

DALLAS (FEB. 2) PR NEWSWIRE - American Petrofina, Inc. (AMEX: APIA) today reported net earnings for the year ended Dec. 31, 1989, of $119.1 million, compared to $132.9 million in 1988. Sales and other operating revenues for 1989 were a record $3 billion, up 15.2 percent from the prior year.

Commenting on full year results, Ron W. Haddock, president and chief executive officer, said, "The steep decline in chemicals margins, modestly lower fuels margins in the refining business, and an unscheduled reformer

downtime at our Port Arthur refinery were the primary factors causing the reduction in earnings. Substantially lower earnings in our chemicals business were partially offset by an increased contribution from our upstream operations, higher reported downstream earnings, and non-recurrent profit of $23 million from the adjustment to deferred taxes associated with FASB 96."

The company also reported net earnings for the fourth quarter of 1989 of $13.5 million, compared to $32.9 million in the like period last year. Commenting on fourth quarter results, Haddock said, "Lower earnings in the fourth quarter reflected unusual operational items, including unplanned maintenance and cold weather problems at the styrene facilities in Louisiana and at our Port Arthur Refinery.

"Lost income due to reduced operations was partially offset by higher crude and natural gas prices for the quarter and by increased refining margins in late December."

Reviewing operations for 1989, Haddock said, "Our upstream segment had a strong year, while downstream results, in spite of higher reported earnings, were somewhat disappointing. Chemicals segment sales were strong, but industry margins dropped dramatically as supplies exceeded demands.

"Upstream, we successfully integrated the former Tenneco Gulf Coast and Southwestern division activities into our base operations. Crude volumes increased 29 percent, and natural gas volumes nearly doubled.

#90033p0420 02/02/1990 ~PR Newswire

AUSTIN, TX (FEB. 12) PR NEWSWIRE - Prime Medical Services Inc. (NASDAQ: PMSI) today announced revised results for the quarter ended Sept. 30, 1989.

For the quarter ended Sept. 30, 1989, the company had changed the depreciable lives of the medical equipment used in its diagnostic centers and recorded a one-time non-cash charge to earnings of $1,352,000.

Subsequent to Sept. 30, 1989, the company decided to replace this medical equipment during the next two years and concluded that the more appropriate accounting treatment for this medical equipment would be to reduce its book value to reflect its trade-in or salvage value instead of the previously recorded change in depreciable lives.

As a result, the net loss for the quarter ended Sept. 30, 1989, of $2,857,227 or 34 cents per share, as previously reported, has been reduced

to a net loss of $1,408,516 or 17 cents per share. However, the company anticipates that as a result of the reduction in book value to trade-in or salvage value, the company will record a one-time non-cash charge to earnings of approximately $1,500,000 to $2 million during the quarter ended Dec. 31, 1989.

Cheryl D'Angelo, chief financial officer, stated that "Although the change in depreciable lives or the reduction of book value to trade-in or salvage value has almost the same impact on earnings to the company we believe the reduction of book value is the more appropriate treatment."

Prime Medical Services Inc. is engaged in providing non-medical management services to 48 cardiac rehabilitation clinics and seven imaging centers located in 13 states.

CHESTERFIELD, MO (FEB. 2) PR NEWSWIRE - Comprehensive Care Corporation (NYSE: CMP) announced today that it has entered into an agreement for the sale of its corporate headquarters facility in Irvine, Calif. The sale price is $9,000,000.

The closing of the sale is subject to the satisfaction of a contingency which permits the buyer to conduct an environmental investigation of the property.

The contingency has not yet been satisfied. The buyer has deposited $500,000 into escrow which becomes nonrefundable upon satisfaction of the environmental contingency. W. James Nicol, president and chief executive officer of the company, stated that he was pleased with the agreement, but he noted that while there was no financing contingency in the agreement, the ultimate consummation of the sale will also depend upon the buyer's ability to deposit the purchase price in escrow.

CLEARWATER, FL (FEB. 2) PR NEWSWIRE - Pioneer Savings Bank, F.S.B. (NASDAQ-NMS: PSBF) announced today that customer service will remain its highest priority as the institution's 34 branches begin operations tomorrow with a new top management team installed by the Resolution Trust Corporation (RTC).

"We will continue to maintain our regular hours, so our customers neet not be concerned that they will be inconvenienced by changes in our services. Deposits up to $100,000 will continue to be federally insured. Rates and terms on existing time deposits will continue unchanged," William A. Nevin Jr., Pioneer's new chief executive officer announced.

Mr. Nevin said Pioneer's management team would be supplemented by RTC specialists. There will be no interruption of service at Pioneer's banking locations in the Tampa Bay and Orlando areas. "Pioneer's valued customers can look forward to continuing to do business with the employees that they have come to know and trust," Mr. Nevin added.

Mr. Nevin, a veteran Florida banker, who formerly served as an executive with Southeast Banking Corporation and Barnett Bank of Manatee County, N.A., was designated by the RTC to oversee Pioneer's operations until an acquisition or other resolution can be arranged.

Pioneer has $2.1 billion in assets and $1.4 billion in deposits.

#90033p0440 02/02/1990 ~PR Newswire

HOUSTON (FEB. 2) PR NEWSWIRE - Baroid Corp. (NYSE: BRC), a worldwide supplier of drilling fluids, drilling services and oilfield equipment, announced that 1989 net income increased 48 percent to $17.0 million, or $.28 per share, on net sales of $488.9 million, compared to net income of

$11.5 million, or $.19 per share, on net sales of $492.1 million in 1988.

Net income for 1989 and 1988 included $1.8 million and $1.3 million, respectively, of extraordinary credits resulting from the utilization of net operating loss carryforwards. Net income for the fourth quarter of 1989 increased 70 percent to $8.0 million, or $.13 per share, on net sales of $131.0 million compared to net income of $4.7 million, or $.08 per share, on net sales of $131.9 million in 1988.

Baroid furnishes products, services and equipment worldwide to the drilling and production segments of the oil and gas industry, with a revenue base related predominantly to drilling activity levels. While domestic drilling in 1989 fell to the lowest average activity level since World War II and international drilling declined by 10 percent from 1988 levels, Baroid's operating income increased 39 percent to $25.5 million, compared to $18.4 million in 1988.

Net sales of the drilling fluids business for the fourth quarter of 1989 were $82.9 million compared to $75.6 million in 1988, and were $298.6 million for the year compared to $296.8 million in 1988. Operating income for the fourth quarter of 1989 was $5.5 million compared to $4.0 million in 1988, and was $20.0 million for the year compared to $20.1 million in 1988. Sales and operating income in 1989 were virtually indentical to those in 1988 in spite of a severly depressed market in North America. Lower sales volumes and margins in North America were offset by domestic cost reductions and increased sales and earnings of international operations.

Net sales of the drilling services and oilfield equipment businesses for the fourth quarter of 1989 were $48.1 million compared to $56.3 million in 1988, and were $190.3 million for the year compared to $195.3 million in 1988. Operating income for the fourth quarter of 1989 was $2.7 million compared to $1.9 million in 1988, and was $8.2 million for the year compared to $5.4 million in 1988.

The effects of variable compensation programs in all businesses also contributed to the overall increase in operating income for 1989. Reductions in foreign income taxes also contributed to the increase in 1989 earnings.

Baroid's 1989 results are subject to final audit. Baroid Corp. is headquartered in Houston. Its common stock is traded on the New York Stock Exchange under the symbol BRC.

WASHINGTON (FEB. 2) UPI - A $30,000 debt incurred by Jesse Jackson's presidential campaign was written off by a Los Angeles hotel owned by a major Jackson supporter, the Washington Post reported Friday.

The debt was not reported to the Federal Election Commission as required by election laws, the Post said.

The newspaper quoted former employees of the Hollywood Roosevelt Hotel as saying the hotel also sent an undertermined amount of additional debts incurred by the Jackson campaign to a housing company also owned by the hotel owner, A. Bruce Rozet, who specializes in government-subsidized housing for low-income tenants.

Federal election law requires public disclosure of any contributions, whether in the form of cash or goods and services, and of the disposition of all debts. The law also bars corporations from making contributions and limits the amount any individual may contribute to $1,000 per election.

The Post said no disclosure was made in Federal Election Commission reports.

Rozet became friends with Jackson in the 1970s because of their mutual interest in low-cost housing. He has been a major fund-raiser for Jackson's presidential campaigns.

Rozet's housing firm, Associated Financial Corp., based in Los Angeles, controls 45,000 government-subsidized housing units, many of which have been in severe disrepair. Since the campaign, Jackson has tried to help Rozet settle a dispute with a highly critical Department of Housing and Urban Development.

Jackson last spring brought Rozet along when he made a courtesy call to Housing Secretary Jack Kemp, appeared at a Rozet-sponsored rally at a Washington housing project and wrote twice to Kemp seeking a meeting with top HUD officials and Rozet individuals, the Post said.

Associated Financial Corp. and Rozet have since been termed ''slumlords'' by HUD Undersecretary Alfred DelliBovi. HUD on Thursday barred Associated Financial Corp. and its affiliates from receiving further federal contracts, the Post said.

A hotel employee sent to Jackson headquarters in Chicago late in 1988 to try to collect the $75,000 in outstanding campaign bills reported in a memo to his superiors that the director of the campaign's finance committee balked at paying, asserting that the expenses were ''a gift,'' the newspaper reported two former employees as saying.

The Jackson aide, Cirilo McSween, told the paper he could not remember

making such a comment.

The former hotel employee, financial consultant Vincent Montelone, confirmed for the Post that he personally drafted a letter from the hotel in 1988 freeing the Jackson campaign of responsibility for $30,000 in outstanding bills.

Rozet, who is half owner of Wilshire Investments Corp., operating general partner of the Hollywood Roosevelt, denied in an interview with the newspaper that Associated Financial Corp. was billed directly for Jackson campaign expenses incurred there.

He said he instructed his hotel manager to settle accounts with the campaign when a dispute arose over the bill, but he said he was not a party to other negotiations and knows nothing about the debts being written off.

LOS ANGELES (FEB. 2) UPI - Raymond Buckey could be retried on only five McMartin Pre-School molestation charges rather than on all 13 counts on which a jury deadlocked because not all the alleged victims are willing to testify.

District Attorney Ira Reiner said Thursday during taping of KNBC-TV's News Conference program that only two of the remaining five alleged molestation victims of the hundreds who at first came forth have made strong commitments to testify at the retrial.

Jurors acquitted Buckey of 40 other molestation counts following a nearly three-year, $13.3 million trial, the longest and costliest in U.S. history.

The jury also acquitted Buckey's mother, Peggy McMartin Buckey, 63, of 12 counts of molestation and deadlocked on a conspiracy count against her. That charge was dismissed by the judge, meaning she cannot be retried on any of the charges.

The district attorney said a third child will not testify, and prosecutors will dismiss three molestation counts relating to her. He said it is also doubtful that a fourth alleged victim will testify.

In an interview after the taping, Reiner said prosecutors do not intend to call the fifth alleged victim, a boy whose mother triggered the case in late 1983 when she accused Buckey of molesting her son.

If only two children testify, Buckey would be retried on five molestation counts, Reiner said. Buckey would also be retried on a single conspiracy count, Deputy District Attorney Lael Rubin said.

Charges relating to any of the other alleged victims who did not testify would be dismissed, Rubin said.

Both Reiner and Rubin cautioned that the situation involving which children will testify is still fluid and could change by the time of the retrial, which is to begin Mar. 9.

As a case in point, Rubin said she received a telephone call Thursday from the father of the boy whose mother triggered the case. Rubin said the father indicated the boy might testify after all. The youth, whose mother has since died, did not testify at the first trial.

Reiner's comments came one day after prosecutors said they had decided to retry Buckey, 31, on 12 counts of molestation and one count of conspiracy which jurors deadlocked on Jan. 18.

If convicted of the remaining 13 counts, Buckey could be sentenced to 32 years in prison. If convicted of only five counts of molestation and one count of conspiracy, he could be sentenced to a maximum 18 years behind bars. He has already spent five years in jail before posting $3 million bail. Since the first trial ended he has been free on his own recognizance.

Reiner, a Democratic candidate for state attorney general, denied Wednesday that public pressure or political considerations influenced his decision to retry Buckey.

But defense attorney Danny Davis told the Los Angeles Times Thursday that Reiner's decision to retry Buckey was political.

''It's an expedient use of the public's emotional confusion,'' Davis said. ''For politicians, a large vote for retrial would also mean a large emotional vote for the person who refiled the case.''

The charges stem from the alleged molestation of pupils at the now-closed Virginia McMartin Pre-School in suburban Manhattan Beach from 1978 until 1983.

The acquittals set off a firestorm of protest by the alleged victims, their parents and the public, who by overwhelming margins in informal media polls, said the verdicts were wrong.

When initially filed in March 1984, the case involved seven defendants and was the largest molestation case in U.S. history, with allegations that hundreds of children had been molested at the pre-school.

But scores of charges and five co-defendants, including Ray Buckey's elderly grandmother, Virginia McMartin, who founded the pre-school, and his sister, Peggy Ann Buckey, were later dismissed for insufficient evidence.

Buckey said after the announcement that he would be tried again that he was surprised at the decision but expected to be acquitted.

(FEB. 2) UPI - The Mayo Clinic in Rochester, Minnesota, has reached a settlement with the family of a doctor who committed suicide in 1985 while in the psychiatric ward of a hospital run by the clinic. A federal court jury last April awarded the family nearly one-Million dollars, and lawyers for the family say the clinic initially appealed the award. But the appeal was dropped last month.

The Soviet news agency Tass says rock carvings depicting scenes that date

back to 25 centuries before Christ have been found in a remote corner of Soviet Asia. Soviet archaeologists say the carvings apparently prove that Indo-European people once lived in the region. One archaeologist says the area where the carvings were found ''is a natural, mountain passage from Europe and Central Asia to Eastern Turkestan, China and India.''

#90033u0273 02/02/1990 ~United Press International

INGLEWOOD, CA (FEB. 2) UPI - Wayne Gretzky and the Kings have agreed on a 2-year contract extension that could keep the NHL's alltime leading scorer in a Los Angeles uniform through 1998, team owner Bruce McNall announced Thursday night.

The deal, which includes deferred payments, will be worth $29.4 million over 16 years, McNall said. Gretzky, 29, is now signed to play for eight more seasons after this one, instead of six.

''Sometimes you have to spend money to make it,'' McNall said at the Forum during the Kings' game with Chicago. ''He's providing an opportunity for us to literally triple our revenues. He's still in my opinion one of the most underpaid players in the league.''

The Kings were losing as much as $5 million a season before Gretzky came to Los Angeles from the Edmonton Oilers in an August 1988 trade. McNall said the team now stands to make a profit of $5 million this season.

''(McNall's) treated me very well, as he has all the players here,'' Gretzky said after the game. ''He's done a lot of things for me financially off the ice as well.

''All I can say is that when I was 3 or 4 years old skating in the backyard, somebody must have liked me. I feel very fortunate.''

Gretzky was playing undder an 8-year contract worth about $19.5 million. That included a payment of $1 million a year for eight years after he retired.

Gretzky, who will earn $1.72 million this season - plus another $1 million in deferred payments under the original deal - will get an extra $1 million deferred this year and for each of the next two years.

In the ninth and 10th years of the contract, Gretzky will receive $4 million a season, including deferred payments of $1 million a year.

Even if he is permanently injured, Gretzky would receive the nearly $30 million. McNall has taken out an insurance policy, for a premium of $500,000 a year, to cover such an occurence.

''It really wasn't renegotiated tonight,'' McNall said. ''It was something we've been working on a long time. I told him we would do something if we did well (financially) last year, and we did spectacularly. It's been even better this year.

''He said we didn't have to do anything. He said it was fine, that there was no real rush.''

In figures made public by the NHL Players Association this week, Gretzky was listed with a salary second only to Mario Lemieux of Pittsburgh, who will make $2 million this year.

''It's going to have very little effect,'' McNall said of the extension. ''What he was making before is pretty close to this figure. We just added two years to his contract. Otherwise, it's not a huge thing.''

Asked if he thinks Gretzky will still excel at age 37 when the contract expires, McNall replied: ''You never know. He'll play as long as he feels well. He told me he doesn't see why he can't play out the length of the contract. I think he will.''

Added Gretzky: ''That will probably pretty much be it.''

McNall said he offered to restructure Gretzky's contract because he didn't want to take unfair advantage of No. 99. ''I don't want to feel I'm doing it (making a profit) on somebody's back,'' he said.

The Kings already own by far the NHL's steepest payroll at $7.51 million - not including deferred payments - which averages to $300,000 per man on the current 25-man roster.

#90033u0281 02/02/1990 ~United Press International

WASHINGTON (FEB. 2) UPI - President Bush, vowing to ''invest in America's future,'' arranged to travel to two state universities Friday to tour a pair of research facilities, one with a big money problem.

The self-proclaimed ''education president'' was to visit North Carolina State University in Raleigh, and then go to the University of Tennessee in Knoxville, where an acclaimed science project is short of funds.

University of Tennessee President Lamar Alexander is now seeking private contributions and was expected to talk to Bush about possible federal assistance.

Bush's trip is a followup to his State of the Union Address Wednesday, in which he announced a new set of education goals, including making U.S. students No. 1 in math and science, and promised, ''We'll do what it takes to invest in America's future.''

The president's proposed fiscal 1991 budget, submitted to Congress Monday, calls for hefty increases in research and development, particularly space exploration.

But he recommended an increase of just 2 percent in federal spending in education, which would not even keep pace with inflation. He maintains the nation spends enough and now must ask and expect more from students, teachers and parents.

At N.C. State, Bush was to visit a semi-conductor laboratory and participate in a round-table discussion with research scientists.

At the University of Tennessee, Bush was to visit a multimillion-dollar environmental biotechnology institute and get a demonstration on how organisms in the pilot project eat dangerous pollutants like PCBs and oil.

University officials hope to use the research in hazardous waste clean-up and have appealed to the state for funding. But aides to Gov. Ned McWherter say the state does not have the money next year.

Alexander wants to use the institute as an umbrella department to lead university environmental research.

''The University of Tennessee has become one of the nation's major research institutions and the president's visit will give us a chance to show him how much progress we have made,'' Alexander said.

After his University of Tennessee tour, Bush was to address a group of educators from across the South before heading back to Washington, and then on to the presidential retreat at Camp David, Md., for the weekend.

The education goals announced by the president Wednesday were produced in conjunction with the National Governors' Association.

In addition to making U.S. students No. 1 in science and math by the year 2000, goals include: obtaining a high school graduation rate of at least 90 percent; having all children ''ready to learn'' when they start school, and making all schools drug free and all adults literate.

Administration and NGA officials said Thursday the objectives would serve as a basis for more specific goals to be issued by the governors at their Feb. 25-27 meeting.

NGA officials, however, have said the governors were ''struggling'' to come up with specific proposals and it remained unclear how far beyond the goals set forth by Bush they would be able to go.

Democrats in Congress and education leaders criticized the president for issuing goals for schools without providing what they say is the necessary money to reach them.

#90033u0302 02/02/1990 ~United Press International

(FEB. 2) UPI - What the Chicago Bulls did to Atlanta on Monday they got back in their face Thursday from the Houston Rockets.

The Rockets, led by Otis Thorpe's 30 points and 13 rebounds, sprinted out to a 41-21 lead after one quarter and coasted to 133-112 rout of the Bulls at Houston. Chicago, on the first leg of a six-game road trip, was coming off a 121-111 victory over the Hawks in which they led 35-15 after one.

Needless to say, it was an uncomfortable night for rookie Bulls Coach Phil Jackson, whose team suffered its worst loss of the season.

Akeem Olajuwon finished with 23 points, 10 rebounds and 7 blocked shots for the Rockets, while Eric ''Sleepy'' Floyd had 20 points and 7 assists.

Houston had won 10 straight at home before losing to the Mavericks on Saturday and were beaten again at Dallas Wednesday night.

''We really needed this game tonight,'' said Thorpe, who has scored 59 points in his last two games. ''We jumped right on them and stayed right there. I wanted to establish myself and to protect my territory.''

Chicago received the usual peformance from Michael Jordan, who led all scorers with 35 points. The only other Chicago starter in double figures was Scottie Pippen with 10.

The Rockets never allowed the Bulls closer than 12 after their first-quarter outburst. They led 77-55 at the half, grabbed their first 30-point lead with 5:44 left to play in the third quarter on a pair of Thorpe free throws, then led 110-80 entering the final period.

--- AROUND THE NBA ---

Elsewhere around the NBA Thursday night, New York knocked off Sacramento 96-89; Milwaukee breezed past Orlando 129-111; Phoenix handed Atlanta its third straight loss, 102-90; and Denver gave New Jersey its seventh loss in a row, 123-112.

Knicks 96, Kings 89

At New York, Patrick Ewing scored 12 of his 31 points in the final period and grabbed 9 rebounds. His basket with 6:46 to play put the Knicks ahead to stay at 83-82. Johnny Newman finished with 19 points, Charles Oakley l6 points and 16 rebounds and Mark Jackson 14 points for New York. Waymon Tisdale led Sacramento with 22 points.

Bucks 129, Magic 111

At Milwaukee, Alvin Robertson registered his second triple-double of the season with 16 points, 14 rebounds and 10 assists, and eight Bucks scored in double figures for their fifth straight home victory. Orlando, 4-19 on the road, was led by Michael Ansley's 24 points. Magic forward Sidney Green missed the game due to strep throat.

Suns 102, Hawks 90

At Phoenix, Dan Majerle came off the bench to score 10 of his 22 points in a 21-1 second-half run that gave the Suns their 10th straight home win. Tom Chambers paced the Suns with 32 points, while Kevin Johnson had 19 points and 16 assists. Moses Malone led Atlanta with 25 points and Dominique Wilkins added 21.

Nuggets 123, Nets 112

At Denver, Alex English scored 20 of his 26 points in the second half, while Lafayette Lever added 22 points, 13 assists and 9 rebounds for the Nuggets, who broke a two-game losing streak. Rookie Mookie Blaylock finished with 24 points and Dennis Hopson 23 for the Nets, who suffered their 11th consecutive road loss.

#90033u0346 02/02/1990 ~United Press International

(FEB. 2) UPI - Georgia Tech's Three Basketeers combined Thursday night to hand North Carolina its worse conference loss in 27 years.

Dennis Scott scored 37 points, Brian Oliver added a career-high 34 and freshman Kenny Anderson handed out 17 assists, and No. 15 Georgia Tech gave No. 18 North Carolina a 102-75 beating, the Tar Heels worst defeat in the Atlantic Coast Conference since 1963.

''That's probably as well as we can play,'' said Georgia Tech Coach Bobby Cremins, ''I really thought we played an outstanding game.''

In particular, Cremins singled out the play of Anderson, who has more than lived up to his preseason billing.

Anderson scored only six points but it was his ball handling and assists that carried the Yellow Jackets, who improved to 13-4 overall and 3-4 in the ACC.

The Tar Heels, who got off to a poor start this year and had fallen out of the national rankings, had won five straight.

Scott, averaging 28 points a game, went over the 30-point mark for the 10th time this year and extended his three-point streak to 68 games.

Cremins felt his team desperately needed a conference win after dropping three straight.

The Tar Heels, 15-7 and 5-2, managed to cut their deficit to 14 at 76-52 on a 3-pointer by Rick Fox, but could get no closer. Fox led the Tar Heels with 18 points and Hubert Davis added 15 off the bench.

Georgia Tech held its biggest lead of 28 points five times late in the second half.

--- AROUND THE NCAA ---

Elsewhere in the Top Twenty; No. 10 Nevada Las Vegas plastered Utah St. 124-90; No. 12 Louisville pummelled Virginia Tech 96-69; No. 17 UCLA was upset by Southern Cal 76-75 and No. 20 Minnesota held off Michigan State

79-74.

At Las Vegas, Nev., Stacey Augmon scored a career-high 34 points and the Runnin' Rebels also did some brawlin' after the game. Several players exchanged punches at the game's conclusion, although none was hurt. The Rebels, who had all five starters score in double figures, improved to 15-4 overall and 9-1 in the Big West Conference. Utah State, which fell to 11-10 and 5-5, was led by Kendall Youngblood's 16 points.

At Louisville, Jerome Harmon led five players in double figures to lead the Cardinals. The Cardinals, who improved to 16-3 overall and 6-1 in the Metro Conference, never trailed and forced the Hoakies into 23 turnovers. Louisville, which opened up a 31-point lead in the second half, used a 14-0 first-half run to put it away early. Virginia Tech, 9-12 and 1-5, was led by Dirk Williams who scored 32 points. Bimbo Coles, the Hoakies leading scorer, managed only two points playing with the flu.

At Los Angeles, Freshman Harold Miner scored 27 points, including the game-winning free throw with 30 seconds left, to lift the Trojans. The victory snapped the Trojans' seven-game losing streak to the Bruins dating to 1986. Ronnie Coleman added 19 points and 9 rebounds for USC, which improved to 7-10 overall and 2-8 in the Pacific-10. UCLA, which had won three straight, dropped to 14-4 and 8-2 in the league, one game behind first-place Oregon State.Freshman Tracy Murray and Trevor Wilson led the Bruins with 19 points apiece.

At East Lansing, Mich., Kevin Lynch blocked Kirk Manns' 3-point attempt and raced the length of the floor for a layup with 14 seconds to play and the Golden Gophers got a hard earned Big Ten victory. Walter Bond scored 15 points and Melvin Newbern 14 to lead six Gophers in double figures. Minnesota, which improved to 15-4 overall, moved into sole possession of second place in the Big Ten with a 6-3 mark. Michigan State, 16-5 and 5-3, was led by Manns' 21 points.

#90033u0356 02/02/1990 ~United Press International

SOFIA, Bulgaria (FEB. 2) UPI - The government's resignation came without an official explanation, but followed an emergency Communist Party congress where delegates voted to formally abandon its Stalinist past and charted a new path to ''humane socialism.''

Prime Minister Georgi Atanassov handed his government's resignation to the Parliament chairman late Thursday as delegates to the congress held a closed-door session to select new leaders.

No official reason for the move was given, but the official Bulgarian news agency BTA said it was prompted by ''the necessity to form a Cabinet on a

broad national basis.''

It was the first time a Bulgarian government had resigned since 1947, BTA said.

Rumors had circulated throughout the day that Atanassov would resign before the congress ended. Although he had sided with the reformists in the decision to remove hard-line leader Todor Zhivkov from power in November, Atanassov had been associated with some of the more repressive policies of the Zhivkov regime, including its policy of forced assimilation of the nation's ethnic Turkish minority.

The announcement came hours after the adoption by the congress of a new manifesto proclaiming the Bulgarian Communist Party's rebirth as a party of democratic socialism committed to radical economic and political reform.

The manifesto and new party bylaws were overwhelmingly approved in the third day of the emergency party congress, which was held in an apparent effort to spruce up the communists' tarnished image before democratic elections set for this spring.

Bulgaria joins Poland and Hungary as East Bloc countries where the communists have undergone radical transformation to keep from being completely swept away by pro-democracy tides.

''Today we are facing the task of de-Stalinizing the BCP and founding a new type of modern Marxist party capable of being the ideological and political leader ... for a society of democratic and humane socialism,'' the party said in its manifesto.

It said the congress signaled the beginning of the organization's transformation into a party of democratic socialism in Bulgaria.

The manifesto and new party statutes spelled out the party's commitment to democratic, multiparty elections, a new constitution, a new legal system based on rule of law and respect for human rights for all Bulgarians regardless of ethnic and religious differences.

Most of the main points had been endorsed in December by the party central committee, which also renounced the party's guaranteed monopoly on political power.

Unlike the Poles and Hungarians, the Bulgarian communists did not opt immediately to change the name of their party, deferring a vote on the issue until after the congress. Some of the names under consideration were the Party for Democratic Socialism in Bulgaria, the Communist Party for Democratic Socialism and the Bulgarian Socialist Party.

The nearly 2,800 delegates to the congress approved the manifesto with only 13 dissenting votes, and the new bylaws were adopted by a vote of 2,222 to 383 with 42 abstentions.

After the votes, the congress went into closed session to elect members of a new 131-member supreme party council, which replaces the old central committee.

The new council will, in turn, elect a chairman whose position corresponds to the post of party general secretary, now held by Peter Mladenov.

It was not clear whether Mladenov, who also is head of state, will seek the chairmanship. In a speech at the start of the congress Tuesday, Mladenov said the party leadership and state presidency should not necessarily be held by the same person.

Mladenov assumed the leadership in November following the ouster of hard-line leader Todor Zhivkov, whose 35 years as Communist Party chief were described in the manifesto as the embodiment of authoritarianism.

Zhivkov is now under arrest facing charges of corruption and abuse of office.

He succeeded another hard-liner, Viulko Chervenkov, known as the Stalin of Bulgaria.

NEW YORK (FEB. 2) UPI - Bodies of the men, women, and children who died in last week's crash of Avianca Flight 052 were flown back to Colombia early Friday, authorities said.

A second flight, carrying 78 of the victims' relatives, left Kennedy International Airport at 2:35 a.m., said Lt. Vincent Matura of the Port Authority Police.

The two flights left within minutes of each other, he said.

Matura did not know what time the cargo flight left, or how many bodies it carried.

Wrecking crews armed with hacksaws, meanwhile, began removing the wreckage of the jetliner from the wooded Long Island neighborhood where it crashed Jan. 25, killing 73 of the 158 people on board.

Preliminary indications are that the plane ran out of fuel after being delayed in the skies above New York.

Investigators are still trying to determine why the pilot never declared a fuel emergency when his fuel gauges were hovering near zero.

Had he done that, officials said, the Boeing 707 would have been cleared

for an immediate emergency landing.

#90033u0402 02/02/1990 ~United Press International
(FEB. 2) UPI - The announcement of a timetable for withdrawal of U-S troops from Panama apparently means Peru's President Alan Garcia will attend the Colombian drug summit. An aide to Garcia says the announcement Wednesday night by President Bush in his State of the Union speech has removed the main obstacle to Garcia's attendance at the Cartagena summit later this month. Garcia has been a severe critic of the U-S invasion of Panama last December.

President Bush got a message Thursday that included some stern words about global warming. The letter signed by 49 Nobel Prize winners and 700 other scientists urged Bush to take immediate action on the problem. They say it's the ''most serious environmental threat of the 21st century.'' The letter coincides with a major climate change conference to be held in Washington next week.

Treasury Secretary Brady took issue Thursday with Democrats who say President Bush's proposed cut in the capital gains tax will benefit only the rich. Brady told the Senate Budget Committee the benefits of the cut will be ''widely distributed throughout the population.'' He says 1987 tax data show that 41 percent of the capital gains reported by taxpayers came from people with incomes of less than 50-thousand dollars.

Police in Milford, Connecticut, say a middle-aged couple wanted in a five-state robbery spree were arrested Thursday following the botched holdup of a shoe store in a nearby town. The five-week crime spree began the day after Christmas, and the two were nicknamed ''Bonnie and Clyde'' after the famous Depression-era bandits Bonnie Parker and Clyde Barrow. Police say the modern-day Bonnie and Clyde ''were very co-operative.''

(FEB. 2) UPI - Thunderstorms drenched parts of Texas Thursday, and scattered showers sprinkled the Midwest, but it was a different story in South Florida. January was one of the area's driest on record, the worst month yet in the region's 16-month-old drought. Officials says the average rainfall last month in Florida's Dade, Broward and Palm Beach counties was just three-fourths of an inch. That's more than one-and-a-half inches below normal.

Hard times at the Voice of America. The U-S-government-funded agency announced plans Thursday to eliminate six foreign-language radio services

and lay off 57 employees because of a tightening budget. V-O-A currently broadcasts around the world in 43 languages, but Director Richard Carlson told employees that the Lao, Greek, Turkish, Swahili, Slovene and Uzbek services will close on April 1st. V-O-A has cut 200 employees and 200 hours of broadcasts since 1987 to deal with shrinking funds from Congress.

#90033u0426 02/02/1990 ~United Press International

WASHINGTON (FEB. 2) UPI - A day after President Bush got a thunderous ovation from Congress for warning lawmakers not to ''mess around with Social Security,'' two Republicans introduced bills to cut Social Security's payroll tax.

Sen. Robert Kasten, R-Wis., and Rep. Hank Brown, R-Colo., a candidate for Colorado's open Senate seat this year, announced proposals Thursday to roll back the Social Security tax increase that took effect Jan. 1 and make other changes affecting the retirement program.

The two GOP proposals were billed as alternatives to a plan proposed Dec. 29 by Sen. Daniel Moynihan, D-N.Y., to cut Social Security taxes by $55 billion and prevent the current practice of using the large, and growing, Social Security surplus to mask the true size of the federal deficit.

In his State of the Union address to a joint session of Congress Wednesday night, Bush won his biggest ovation of the evening - from Democrats and Republicans alike - when he urged lawmakers to leave the retirement program alone.

''Our budget fully funds today's benefits and it assures that future benefits will be funded as well,'' Bush said. ''And the last thing we need to do is mess around with Social Security.''

But Kasten said he was at odds with the administration over Social Security and had originally considered co-sponsoring Moynihan's proposal because he believes payroll taxes are too high.

Kasten said his plan would cut Social Security payroll taxes for average workers by up to $154 in 1990, another $172 in 1991 and an additional $193 in 1992, for a total tax cut of up to $519.

He told reporters at a news conference his plan would have the effect of rolling back the Social Security tax increase that took effect Jan. 1 - an increase from 6.06 percent to 6.2 percent.

That increase was among several payroll tax increases approved during the Social Security ''crisis'' of 1983 when Congress altered the retirement system's financing to ensure adequate funds when the post-war ''baby

boom'' generation starts retiring in 20 years.

Kasten said his proposal would cut the payroll tax rate back to 5.3 percent over three years.

''America's families deserve a break,'' he said. ''They deserve to see more of their own hard-earned money in each paycheck.''

And he predicted that ''it's almost certain'' that the Senate would attempt this year to scrap the Jan. 1 increase in payroll taxes.

''The easiest thing to do is repeal this year's tax increase,'' he said. ''I think that is very likely ... notwithstanding the administration's opposition.''

He said that in the year 2010, under his plan, Social Security would have in reserve twice as much money as needed to pay benefits the following year so there was no danger baby boomers would lose benefits.

Kasten's plan, like Brown's, would prevent the current practice of using the Social Security cash surplus to mask the size of the federal deficit.

But unlike Brown, Kasten would adjust the Gramm-Rudman balanced budget law's annual deficit reduction targets to reflect the higher real deficit. Kasten would set new targets that would balance the budget in fiscal year 1997 - four years later than under the current Gramm-Rudman law.

Brown, ranking Republican on the House Ways and Means Social Security Subcommittee, also proposed rolling back the payroll tax increase that took effect Jan. 1.

''The 1990 tax hike is not justified because we don't know what is needed to keep a system sound,'' Brown said.

He also proposed making the Social Security Administration an independent agency - it's now under the Department of Health and Human Services - and increasing from $9,360 to $15,000 a year the amount of outside income over-65 workers can earn without losing Social Security benefits.

Moynihan's proposal, bitterly opposed by Bush, would cut the payroll tax over two years to 5.1 percent.

#90033u0561 02/02/1990 ~United Press International

(FEB. 2) UPI - Around the world... around the clock... the latest news from U-P-I.

President Bush plans to make a trip today to follow up on his State of the Union address, in which he announced a new set of education goals. Bush will visit two universities today... touring their research facilities. He'll go to North Carolina State University in Raleigh, and then to the University of Tennessee in Knoxville .

Senate Foreign Relations Committee members are NOT looking kindly on a proposal made by President Bush. The administration wants to end the absolute control that Congress has over the foreign aid program. Secretary of State Baker says government needs to have more flexibility. But senators say they WON'T surrender control easily.

Two Republicans in Congress disagree with President Bush about the Social Security payroll tax. Senator Robert Kasten of Wisconsin and Representative Hank Brown of Colorado introduced bills yesterday to cut the Social Security tax. Bush wants lawmakers to leave the retirement program alone.

Congressman Gus Savage says a House Ethics Committee has found him innocent ofsexual misconduct charges. Savage says he did NOT even get a slap on the wrist. The Illinois Democrat says the investigation was spurred by racism in Congress and the mass media.

A report today says Jesse Jackson violated campaign disclosure laws. The report says a 30-thousand dollar debt incurred by Jackson's presidential campaign was written off by a Los Angeles hotel owned by a supporter of the civil rights leader. The report says Jackson failed to report the debt to the Federal Elections Commission.

#90033u0626 02/02/1990 ~United Press International

WASHINGTON (FEB. 2) UPI - The nation's unemployment rate for January was a steady 5.3 percent, unchanged for the past eight months, the Labor Department reported Friday.

The department's Bureau of Labor Statistics reported that 6.5 million Americans were unemployed last month.

Although the number of jobless showed little change, the number of layoffs rose slightly, to continue a trend started in the middle of last year. The number of unemployed in the manufacturing sector increases nearly a full percentage point to 5.9 percent, the department said.

Little change was posted in jobless rates for most individual worker groups last month. Among adult men, 4.7 percent were unemployed; adult women, 4.6 percent; teenagers, 14.5 percent.

The department said the unemployment rate among blacks was 11.3 percent; Hispanics, 7.1 percent; and whites, 4.5 percent. Unemployment among black teenagers totaled 26.7 percent.

Total civilian employment remained at 117.6 million in January, meaning that 62.9 percent of Americans held jobs.

The department said non-farm payroll employment increased by 275,000 last month to an annualized rate of 109.8 million.

The largest employment increases were in the construction and retail industries. Construction employment increased by 105,000 last month after slipping 50,000 during December. The department attributed the increase to the relatively mild weather in January, which followed unseasonably cold weather in December,

Job cutbacks continued in the manufacturing sector, falling by 110,000 last month. Much of the decrease was attributed to temporary plant shutdowns in the auto industry.

The auto plant shutdowns caused employment to dip in the related fabricated metal products, rubber and plastics industries, the department said.

Retail employment rose by 115,000 in January after slipping in December. General merchandise, food stores and restaurants each posted gains of 25,000.

Employment in the service industries increased by 105,000 with nearly half the gain in health services. Gains also were posted in the transportation and wholesale trade industries, the department said.

The average workweek for production and nonsupervisory workers increased 0.1 hour last month to 34.6 hours. In manufacturing, the average workweek and overtime remained unchanged at 40.7 hours and 3.6 hours, respectively.

Hourly earnings among production and nonsupervisory workers rose by 0.1 percent in January, while weekly earnings rose by 0.4 pecent, the department said.

#90033u0636 02/02/1990 ~United Press International

(FEB. 2) UPI - Montreal goaltender Patrick Roy, whose performance keyed Montreal's 4-2 victory over Boston Thursday, is not convinced the Bruins, despite leading the NHL in points, is the best team in the league.

''I never believed that Boston is better than us,'' said Roy, who stopped 31 shots in Boston to end the Bruins' seven-game unbeaten streak. ''I always believed that we have a better team. I respect them a lot and I know that have a good team, but I think we have better players.''

The Canadiens, who trailed 2-1 entering the third period, rallied for their first come-from-behind victory of the season, scoring three goals in the final 20 minutes.

Shayne Corson and Stephane Richer scored 56 seconds apart in the closing four minutes as Montreal ended a 17-game winless stretch (0-14-3) when trailing after two periods.

In their Nov. 16 game in Boston, the Bruins erased a two-goal deficit with three scores in the closing three minutes.

Montreal Coach Pat Burns recalled the earlier trip and felt Thursday night's victory was important for the team's morale.

The triumph moved fourth-place Montreal to within 7 points of first-place

Boston in the Adams Division. Boston has 67 points.

After Montreal had tied the game 2-2 on Russ Courtnall's goal 2:12 into the final period, Corson put the Canadiens ahead with 3:44 left. The winger moved ihto the Boston zone, shifted around Bourque and beat goalie Andy Moog with a short wrist shot for the game-winner.

--- AROUND THE NHL ---

Elsewhere in the NHL, Philadelphia edged Hartford 2-1, Calgary defeated Vancouver 4-3 in overtime and Chicago clipped Los Angeles 7-4.

Flyers 2, Whalers 1

At Philadelphia, Tim Kerr and Ilkka Sinisalo each scored second-period goals to lead Philadelphia to its first two-game winning streak in two months. The Flyers, who are 3-9-3 in their last 15 games, last won back-to-back contests last Nov. 30 and Dec. 1.

Flames 4, Canucks 3 (OT)

At Calgary, Alberta, Theoren Fleury scored with nine seconds left in overtime o lift Calgary. Fleury picked up the puck in the deep slot and snapped a 25-footer past goalie Steve Weeks. The triumph stretched the Flames' unbeaten streak to eight games and left Vancouver winless in its last six games overall and its last 12 at the Saddledome.

Blackhawks 7, Kings 4

At Inglewood, Calif., Duane Sutter and Dirk Graham scored 57 seconds apart to trigger a six-goal second period, lifting Chicago. During the game, Kings owner Bruce McNall announced that Wayne Gretzky had agreed to a 2-year contract extension that could keep the NHL's all-time leading scorer in Los Angeles through 1998. Gretzky had a goal and an assist, giving him 103 points this season.

(FEB. 2) UPI - Prices on the Tokyo Stock Exchange closed broadly higher in thin trading Friday boosted by program buying.

The key Nikkei Average of 225 selected issues, which gained a modest 17.47 points Thursday, soared 443.73 points to 37,650.15.

The Tokyo Stock Exchange Index of all listed major shares gained 8.31 points to 2,762.40.

An estimated 550 million shares changed hands, compared with 507 million shares Thursday.

Elsewhere in Asia, a late rally boosted stocks from sharply lower levels on the Hong Kong Stock Exchange following strong gains in Tokyo.

The Hang Seng Index slipped 1.69 points to 2,736.55 after being down more than 40 points earlier in the session.

The index briefly fell through the key 2,700-point support level to a low of 2,697.38 before recovering late in the day as investors tracked Tokyo's gains.

Stocks closed higher in hectic trading on the Singapore Stock Exchange as strong buying support from both local and overseas buyers pushed prices higher.

The Straits Times Industrial Index rose 20.30 points to 1549.13 while the All Singapore Index gained 5.33 points to 438.13.

Turnover was around 228.2 million shares.

In Australia, stocks closed lower in light trading on the Sydney Sharemarket.

The All Ordinaries Index slipped 2.5 points to 1668.4 in what analysts described as lean trading as only 73 million shares changed hands.

Declines edged out advances 166 to 160, while 276 issues were unchanged.

#90033u0675 02/02/1990 ~United Press International

LONDON (FEB. 2) UPI - Stock prices were narrowly higher in light trading at midday Friday on the London International stock exchange.

The Financial Times 100-stock index, which gained 8.5 points Thursday, was up 4.8 points to 2,350.6. The narrower top 30 industrial average was off 0.6 points at 1,865.4.

Volume was around 235 million shares, compared with 275 million shares traded during the same period Thursday.

Analysts said sentiment was enhanced by the sharp rise in Tokyo stock prices but noted that institutional investors were reluctant to go any higher.

Among the most widely traded stocks, British Aerospace PLC eased ten cents

to $9.02 on reports in the Guardian newspaper that the company may be forced to pay back $475 million related to its purchase of Rover Group from the British government in 1988.

Royal Bank of Scotland gained 17 cents to $3.44 on persistent takeover speculation and Pearson gained 21 cents to $12.20 amid speculation that Bond Corp. of Australia had arranged to sell its stake.

#90033u0677 02/02/1990 ~United Press International

(FEB. 2) UPI - West Germany's foreign minister comes to Washington to talk about re-unification... President Bush goes south to highlight education... charges that Jesse Jackson violated campaign disclosure laws... and Phil the groundhog makes headlines today. Those stories and more, next from U-P-I.

West German Foreign Minister Hans-Dietrich Genscher will be in Washington today to discuss the latest developments toward German re-unification.

Genscher agreed to the one-day visit during a phone conversation with Secretary of State Baker shortly after East German Prime Minister Modrow presented a plan for a united Germany.

Under Modrow's plan, East and West Germany would sign a treaty regulating their relations, then would form a confederation... and finally, a federation with the creation of a single parliament and new constitution. The capital of the new government would be in Berlin... and it would be NON-aligned.

Modrow made his unity call two days after returning from talks with Soviet President Gorbachev in Moscow. Modrow said... ''Germany shall again become a unified fatherland of all citizens of the German nation.''

In West Berlin, West German Chancellor Kohl welcomed Modrow's plan... but said re-unification talks must wait until after East German elections in March.

Kohl also says he canNOT accept Modrow's desire for a united Germany to be a neutral power. Officials in Bonn have said West Germany would remain firmly in the NATO alliance.

Modrow says he plans to discuss his proposal with Kohl during his visit to West Germany this month.

President Bush visits two southern universities and their research facilities today. Bush goes to North Carolina State University in Raleigh this morning... and this afternoon to the University of Tennessee in

Knoxville.

At N-C State, Bush will inspect a semi-conductor laboratory and participate in a round-table discussion with research scientists.

At Tennessee, he'll visit a multi-Million-dollar environmental biotechnology institute and get a demonstration on how organisms eat dangerous pollutants.

The Tennessee project is short of funds... and university president Lamar Alexander now is seeking private contributions. He's expected to talk to Bush about possible federal assistance. During his State of the Union Address, Bush called for hefty increases in research and development.

Bush also set new education goals, including making American students Number One in the world in math and science. However, his fiscal 1991 budget calls for only a two-percent increase in federal spending in education.

He maintains that the nation spends enough on its schools... and now must ask and expect more from students, teachers and parents.

-30- 2942

#90033u0688 02/02/1990 ~United Press International

(FEB. 2) UPI - The arguments on Capital Hill over President Bush's proposed budget have begun.

The Senate Budget Committee has started hearings on the budget. Treasury Secretary Brady and the chairman of Bush's Council of Economic Advisers, Michael Boskin, appeared before the committee yesterday.

Brady argued for the president's proposed reduction in the capital gains tax. Brady told the panel that the benefits of the tax cut would be ''widely distributed''- and NOT go just to the rich, as Democrats claim.

Committee Chairman James Sasser is one of those Democrats. Sasser said a cut in the capital gains tax rate does NOthing to alleviate the squeeze on working Americans. The senator from Tennessee said 80 percent of the benefits from such a cut will flow to the wealthiest one percent of the nation's citizens.

Boskin defended the economic assumptions of lower interest rates and high growth that underlie Bush's budget.

The economic adviser said the administration projection of a five and four-tenths percent interest rate on 90-day Treasury bills in fiscal 1991 depends on the adoption of all of Bush's major budget proposals... plus

the rejection of proposals that would drive up the deficit. The five-point-four percent projection is well below the interest rates predicted by leading private economic forecasters.

A published report today says a Los Angeles hotel owned by a major supporter of Jesse Jackson's presidential campaign has written off a 30-thousand-dollar debt.

The report quotes former employees of the Hollywood Roosevelt Hotel as saying the hotel sent an undertermined amount of additional debts incurred by the Jackson campaign to a housing company also owned by A. Bruce Rozet.

The debt was NOT reported as required by federal law.

Federal election law requires disclosure to the Federal Election Commission of any campaign contributions and the disposition of all debts... whether they are in the form of cash or goods and services.

Rozet specializes in government-subsidized housing for low-income tenants. His housing firm, Associated Financial Corporation... controls 45-thousand government-subsidized housing units. Many have been in severe disrepair.

Since the 1988 campaign, Jackson has tried to help Rozet settle a dispute with a highly critical Department of Housing and Urban Development.

#90033u0715 02/02/1990 ~United Press International

SOFIA, Bulgaria (FEB. 2) UPI - Liberal Politburo member Alexander Lilov was elected head of the Communist Party Friday in a move that capped a dramatic reshuffling of the party leadership and signaled victory for advocates of radical reform.

The leadership changes, coming hours after the resignation of Prime Minister Georgi Atanasov and his entire Cabinet, were part of an apparent effort to put a new face on a Communist Party sullied by four decades of authoritarian rule.

Lilov was elected to replace former party leader and state President Peter Mladenov during an all-night final session of an extraordinary Communist Party congress, which Thursday declared it was breaking with its Stalinist past and forging ahead with radical political and economic reforms.

The promotion of Lilov, a philosophy professor and liberal reformer, to president of the new Supreme Party Council appeared to put the party firmly in the hands of its progressive, reformist wing.

Mladenov and Atanasov were regarded as pro-reform, although they were tainted by links to former hard-line leader Todor Zhivkov, who was ousted and replaced by Mladenov in November.

Mladenov was expected to retain his post as president of the state council the nominal head of state.

''We're aware of the responsibility and burden we have on our shoulders,'' Lilov said in his first speech as Supreme Party Council president. ''The leadership of the party ... will do its best not to betray your confidence and trust.''

He pledged to lead the communists to victory in democratic elections promised for May - Bulgaria's first free elections in more than four decades.

Astanasov handed his government's resignation to National Assembly Chairman Stanko Todorov shortly before midnight as members of the congress met behind closed doors to elect new leaders.

No official explanation for the move was given, but the official BTA news agency said the motive adduced ''... is the necessity to form a Cabinet on a broad national basis.''

It was the first time a Bulgarian government had resigned since 1947, BTA said. The resignations must be accepted by the National Assembly, which meets Saturday.

The resignation of the government also was believed to increase pressure on Bulgaria's fledgling opposition to join the communists in a governing coalition until the elections are held.

Opposition leader Zhelyu Zhelev on Wednesday rejected Mladenov's invitation to take part in such a coalition, saying he would not allow his union of democratic forces to be co-opted or made to share the blame for economic and social crises created by the communists.

At Thursday's session of the congress, the party adopted a new manifesto and bylaws proclaiming its rebirth as a party of democratic socialism

committed to deep reforms.

Bulgaria now joins Poland and Hungary as East Bloc countries where the communists have been forced to undergo a radical transformation to keep from being completely swept away by pro-democracy tides.

''Today we are facing the task of de-Stalinizing the BCP and founding a new type of modern Marxist party capable of being the ideological and political leader ... for a society of democratic and humane socialism,'' the party said in its manifesto.

It said the congress signaled the beginning of the party's transformation into precisely such a new type of party of democratic socialism in Bulgaria.

The manifesto and the new party statutes spell out the party's commitment to democratic, multi-party elections, a new constitution, a new legal system based on rule of law and respect for human rights of all Bulgarians regardless of ethnic or political differences.

Most of the main points had been endorsed in December by the party's central committee, which also renounced the party's guaranteed monopoly on political power.

-30- 4102
#90033u0732 02/02/1990 ~United Press International
(FEB. 2) UPI - NASA says four U-S astronauts are going on a trip to the Soviet Union.

They have accepted an UNprecedented Soviet invitation to witness a manned space launch, tour cosmonaut training facilities and observe the Soviets' mission control.

Some experts believe that the American decision to visit Soviet space facilities later this month signals a new era of co-operation for space exploration.

John Pike, a space policy analyst with the American Federation of Scientists in Washington... ... says the Soviets are doing everything they can to encourage Soviet-American space co-operation for a trip to Mars or moon bases.

Chief astronaut Dan Brandenstein, who recently commanded a record-setting 11-day mission of the shuttle Columbia, will make the trip to the Soviet Union. He chose astronauts Paul Weitz, Ron Grabe and Jerry Ross to accompany him. They will arrive in the Soviet Union February 9th for the six-day visit.

A number of cosmonauts have visited NASA facilities. One cosmonaut witnessed a shuttle launch at the Kennedy Space Center last year.

Americans are waiting for the appearance of an almost immortal semi-tame rodent this morning.

Today is the day Punxsutawney Phil will let people know whether winter will end shortly... or whether six weeks are left.

Phil is a groundhog who has a legendary den at Gobbler's Knob, a hollow tree stump near the town of Punxsutawney, Pennsylvania.

According to the legend, if Phil sees his shadow, the nation is in for six more weeks of winter weather. But if he does NOT, Americans can expect an early spring.

It is the 103rd year for the annual ceremony. Believers contend Phil is NEVER wrong.

The King of the Weather Prophets holds his own against the National Weather Service, except perhaps with forecasters. The weather service predicts rain and temperatures in the upper 30's for Punxsutawney today. That... coupled with television lights and flashbulbs... could make Phil's job difficult.

William Null, Punxsutawney's chamber of commerce director, says the forecast is usually for more bad weather. He says in 103 years, there have been only eight occasions when Phil predicted an early spring.

-30- 2391

#90033u0733 02/02/1990 ~United Press International

PUNXSUTAWNEY, Pa. (FEB. 2) UPI - Punxsutawney Phil, the world's most famous groundhog, emerged from his burrow Friday and saw no shadow. According to legend, that means spring is near.

It was the 103rd time that Punxsutawney Phil emerged from his burrow in Jefferson County to predict the weather. If he'd seen his shadow, it would have meant six more weeks of winter, according to true believers.

About 1,500 cheering groundhog faithful braved a light drizzle, fog and temperatures in the 30s for the annual dawn procession to Gobbler's Knob, the groundhog's den in western Pennsylvania, to observe his prediction for the new season.

Jim Means, president of the Punxsutawney Groundhog Club, led the 14 members of the Inner Circle to Phil's lair, tapped his cane on the door of

a hollowed-out tree stump and called Phil forward. Groundhog handler Bud Dunkel retrieved the rodent for his place on the stage.

''His majesty, Punxsutawney Phil!'' Means said, giving his traditional introduction. As the cheers died down, at 7:27 a.m., Phil then ''whispered'' his secret prediction in groundhogese.

The King of the Weather Prophets holds his own against the National Weather Service, except perhaps with forecasters in the Pittsburgh office. The weather service predicted rain and temperatures in the upper 30s for Punxsutawney on Friday and that, coupled with the TV lights and flashbulbs could make Phil's job difficult this year.

''I'm a scientific person myself,'' said forecaster Richard Leonardon. ''Every groundhog I know has been burrowed in since about Nov. 20 and you probably won't see 'em again until around mid-to-late March.''

Two other weather-predicting groundhogs confirmed Phil's forecast. Mr. Charles G. Hogg of New York, known as Staten Island Chuck, climbed out of his den at the Staten Island Zoo at 7:07 a.m. Friday and saw no shadow. In Sun Prairie, Wis., Jimmy the Groundhog's shadow also was a no-show on the 42nd observance of Groundhog's Day there.

At the Groundhog Zoo in Punxsutawney, a town nestled in the valley of Mahoning Creek, there are actually three groundhogs - Phil, Philomena and Barney - kept for the purpose of keeping the town's claim to fame alive.

The legend of Groundhog Day is based on an old Scottish couplet: ''If Candlemas Day is bright and clear, there'll be Two Winters in the year.''

The Roman Legions passed the tradition to Pennsylvania's early German settlers, who concluded that if the sun made an appearance Feb. 2, Candlemas Day, then the intelligent groundhog would cast his shadow and return to his nest for six more weeks of bad weather.

A few citizens in Punxsutawney began the tradition in the early 1880s by tramping in the woods to honor - and hunt - the groundhog.

In 1886, the editor of the Punxsutawney Spirit, a weekly newspaper, named the group the Punxsutawney Groundhog Club. Their first official trip to Gobbler's Knob, Punxsutawney's Phils legendary den, was in 1887, when they put the first official forecast out to the public.

Until recently, Gobbler's Knob, a hollowed out tree stump on one of the highest elevations in the area, was a closely guarded secret. But persistent news media from as far away as Australia convinced the club to relax its rules.

Gobbler's Knob was opened to the public in July 1966.

An item in The Magic Forests News, a newspaper for visitors, says ''Don't hibernate, celebrate!''

Groundhog Day is Punxsutawney's day in the sun, and the annual celebration is a ray of sunshine for merchants.

''It's put us on the map, said a waitress at the historic Pantell Hotel. A lifelong resident, she values the pomp and circumstance of the event but has never made the trek up to Gobbler's Knob, about a mile away, at the crack of dawn.

''People really believe in this,'' she said. But we always have six more weeks of bad weather anyway.'' Punxsutawney's chamber of commerce director William Null, tells visitors that's because in 103 years, ''there have been only eight occasions when we have had an early spring.''

#90033u0746 02/02/1990 ~United Press International

TOKYO (FEB. 2) UPI - Jacques Calvet, president of France's Peugeot S.A., warned Friday at least one of six major European automakers will go bankrupt unless reciprocity in car trade between Japan and the European Community is maintained.

"In ten years, the capacity of Japanese automakers manufacturing cars in Europe will exceed 1.5 million units, forcing one full-range automobile maker or an equivalent to go bankrupt," Calvet told a news conference at the Japan National Press Club. He said globalization of the automobile industry will be hampered unless reciprocity and harmony are established.

Calvet said European automakers demand that the number of Japanese cars registered in Europe, including locally manufactured vehicles, be limited until European car exports to Japan grow to a reasonable level. He said the ceiling should be set at a ratio of one European car sold in Japan to two Japanese vehicles marketed in Europe.

Calvet, however, said a final decision depends on negotiations between Japan and the European Community Commission. He said foreign automakers

with their decision centers located outside Europe are not regarded as European makers even if local content of their car reaches 100 percent. He said an estimated 1.45 million Japanese vehicles were sold in Europe in 1989 while Japanese imports European cars totaled only 150,000 units.

Calvet, a former banker, said Peugeot S.A. aims to sell a total of 40,000 units, including 20,000 Citroen and 20,000 Peugeot model vehicles, in Japan this year. The company's sales in Japan totaled less than 4,600 units in 1989, he said.

Calvet said his company plans to introduce new models, including the Citroen XM and the Peugeot 605, in Japan in a bid to increase its sales. Peugeot has sales tie-ups with several Japanese automakers and dealers, including Mazda Motor Corp. and Suzuki Motor Co.

-30- 2096

#90033u0748 02/02/1990 ~United Press International

(FEB. 2) UPI - Gusty winds and thunderstorms hammered Texas and rain soaked the Midwest early Friday, but a Pennsyvania groundhog assured the nation that spring is just around the corner.

Scores of anxious weather watchers trekked to Punxsutawney, Pa., for the 103rd annual appearance of Punxsutawney Phil, the legendary weather-predicting groundhog of western Pennslyvania.

Phil emerged from his burrow at Gobbler's Knob Den and did not see his shadow. According to legend, that means spring is near. Had he seen it, it would have meant six more weeks of winter, according to true believers.

Phil's fans contend he is never wrong.

In southern New Jersey, showers hit some areas toward daybreak, while lows were in the mid 40s. Light rain also hit parts of West Virginia, Maryland and Delaware early Friday, but temperatures were a bit higher, reaching the low 50s in some areas.

In the south Texas town of Cotulla, as many as 100 structures suffered damage from the high winds Thursday and up to 50 people were driven from their homes, authorities said.

''We lost some roofs. We lost a lot of trees. And our garbage cans are probably (60 miles away) in Laredo. But there was no bodily harm that I'm aware of,'' Cotulla City Hall spokeswoman Glenda Janek said.

Thunderstorms moving through southeast Texas spawned several tornadoes in the Houston area late Thursday, damaging a trailer park and knocking out power to about 24,000 homes. No injuries were reported.

One twister tore the roof off a mobile home and damaged eight other homes in a trailer park, a police dispatcher said. ''The trailer tilted to the side and the wind kicked up,'' said Chuck Cunningham, who lives in the park. ''It almost tipped over.''

Air traffic at Houston's Intercontinental and Hobby airports was affected early Friday by heavy fog. Takeoffs were allowed at Intercontinental but not landings. Visibility was 1,200 feet at Intercontinental and 1,000 feet at Hobby, where all traffic was suspended.

Western Oklahoma received freezing rain Friday, while an upper-level storm system brought snow and rain to much of New Mexico.

Patches of rain, sleet and some light snow hit the Midwest Friday morning. Snow was reported in parts of Iowa, Illinois, Wisconsin and Michigan, while it was raining in most of Missouri and Indiana. Temperatures were in the mid to upper 30s throughout most of the area, while Paducah, Ky. reported an unusually warm 60 degrees.

A cold front moved across New England early Friday, bringing with it overcast skies and the threat of precipitation across the region.

Temperatures ranged from the low 50s in southeastern Massachusetts and Rhode Island to the low 40s in New Hampshire and Vermont to the upper 30s in northern Maine.

Low pressure pushed clouds over much of the South, ending the almost spring-like weather generated by a high-pressure system. Scattered light showers hit Mississippi and Georgia while dense fog enveloped Florida. Temperatures remained mild. Knoxville reported 48 degrees early in the morning while Atlanta was 58, Charleston, S.C. and Jacksonville, Fla. were at 60 and Miami was at 76.

Rain fell in Washington and Oregon Friday as a series of disturbances moved inland. A snow advisory was issued in Washington's Cascades and Olympics. Accumulations were expected to reach 8 inches. Rain was also forecast in northern Idaho, but mild conditions were expected in the south.

The arctic air mass that has dominated Montana's weather started weakening. Snow diminished to a few scattered flurries and winds also died down.

A snow advisory was issued for the southwest mountains of Colorado, where roadways were icy and snowpacked, and authorities warned of poor visibility

BRUSSELS, BELGIUM (FEB. 2) UPI - A trademark dispute between America's giant Hershey candy bar company and a Dutch firm named Herschi was settled Friday with no chocolate mess.

A tidy agreement was reached between the Pennsylvania firm and the Dutch company, Schiffers, formerly known as Herschi Holding B.V., which produces soft drinks and other beverages.

The "Hershey" and "Herschi" trademarks are "of independent origin," said competition regulators at the European Community Commission. Under the settlement, Schiffers assigns its Herschi trademark to Hershey for an undisclosed sum, and Hershey then licenses Schiffers the right to use the Herschi trademark for five years on certain products.

The Dutch company cannot introduce new products bearing the Herschi name, and agrees to stop using the name Herschi altogether at a later date. Schiffers was recently taken over by Hero Conserven Lenzburg, a Swiss-based jam and pasta manufacturer. The Commission, the executive agency of the 12-nation European Community, agreed to the settlement because it avoided any territorial partitioning.

"What we wouldn't accept is a situation where Hershey of America says we'll use our trademark in Germany, France, the United Kingdom, and Spain, and the Dutch firm can use 'Herschi' in other countries," a commission spokesman said. The EC is committed to a single market of goods and services by the end of 1992.

CHICAGO (FEB. 2) UPI - Chicago White Sox officials worked to get a visa for rookie infielder Carlos Martinez, who was released Thursday from a jail in Caracas, Venezuela, eight days after being accused of beating a security guard with a baseball bat.

''There are a lot of unknowns in the case and it's best to get him out of that climate,'' White Sox General Manager Larry Himes said. ''Carlos swears - and he has witnesses - that he did not use a bat, but he does admit there was a fight.''

Martinez, 24, surrendered to authorities following a Jan. 20 incident at University Stadium in Caracas. The native Venezuelan had gone home to play winter baseball during the offseason.

Police reports said the scuffle began when stadium security guard Homero Herrera refused to allow Martinez into a baseball game without buying an admission ticket. Reports said that Herrera originally had the bat during

the fight, but Martinez allegedly grabbed it out of his hand and hit him with it, breaking Herrera's elbow.

Venezuelan law requries people who have had complaints filed against them be jailed eight days.

Attorneys for Herrera have asked a charge of assault with intent to kill with a deadly weapon be filed against Martinez. The charges carries a penalty of up to 10 years in prison. A Caracas criminal court judge was expected to rule Friday on what the charges, if any, would be filed.

''It's my understanding the man (Herrera) wants to settle out of court,'' Himes said. ''The newspapers there (Caracas) are reporting we're down on him, that we're preparing to send him to the minors. I never said that. I'm very much for him.''

White Sox lawyer Jamie Torres flew to Caracas last week and said reports about the bat were incorrect. Torres said Martinez hit Herrera with his fist and he insisted the judge will not levy any charges.

''There is no way possible that he'll be kept in Venezuela,'' Torres said. ''I guarantee you that he'll be in the states in one or two weeks.

LOS ANGELES (FEB. 2) UPI - A flaming engine forced a Northwest Airlines DC-10 to return to Los Angeles International Airport shortly after takeoff early Friday where it landed safely, authorities said.

''It had to come back and land after it was reported that the aircraft appeared to have fire coming from the No. 1 (left) engine,'' Federal Aviation Regional duty officer Rich Tornquist said.

Flight 84, with 110 passengers and crew aboard, took off at 1:45 a.m. for Minneapolis. After the flames were spotted, the pilot shut down the engine dumped the plane's fuel into the ocean and landed safely at 2:19 a.m.

The passengers and crew used normal exits to get off the airplane, Tornquist said.

A passenger said she heard a loud noise shortly after takeoff.

''I hung onto the seat,'' the woman said, adding that passengers applauded the safe landing.

Northwest Airlines spokesman Kevin Whalen said the flames were probably due to unburned fuel igniting after a compressor in the engine stalled and

made a loud noise.

''There was no fire (inside) the engine,'' Whalen said. ''When the engine compressor goes through that kind of a hiccup, fuel is not burned and it will flame out.''

Whalen said mechanics ''found nothing wrong with the engine.''

MOSCOW (FEB. 2) UPI - The Leningrad Communist Party expelled former city boss Yuri Solovyev ''for lack of modesty'' and unethical behavior after an investigation of a foreign car deal he made, the official Tass news agency said Friday.

It said Solevyev, 64, who was humiliated at local elections in the city last spring, was expelled during a meeting Thursday of the committee of the greater Leningrad Communist Party to which Solovyev belonged.

The meeting heard a report from a special party commission set up to look at the car deal, made while Solovyev was regional party boss in Leningrad between 1985 and 1989, when the entire Leningrad party leadership were ousted by voters. It gave no details of the deal.

Tass said the meeting decided to pass the issue to next week's meeting of the plenum of the Central Committee in Moscow, implying that Solovyev will now automatically lose his position there too.

Solovyev, an old style Communist official not known for his sympathy with reform, was deeply unpopular in Leningrad. He lost last April's election in the city despite running unopposed. So many voters simply crossed his name off the ballot he could not get the required 50 percent majority.

#90033u0805 02/02/1990 ~United Press International

WASHINGTON (FEB. 2) UPI - Orders for airplanes, ships, and tanks sent factory production forging ahead by 1.9 percent in December for a second monthly increase after a decline in October, the government said Friday.

The $4.5 billion surge to $244.2 billion followed a 2.4 percent increase in November and a 0.1 percent drop in October, the Commerce Department said, and factory orders finished 1989 at $2.8 trillion, 6.4 percent ahead of 1988.

Manufacturers inventories declined by $1.3 billion or 0.4 percent to $371.5 billion, the first decrease since September and largest since a 0.4

decline in September 1986, the department said.

New orders for durable goods, products made to last three or more years, increased by $4.2 billion or 3.2 percent in December to $134.4 billion, with transportation equipment leading the way - up $4.1 billion or 11.2 percent to $40.9 billion.

"Large increases in aircraft and parts and shipbuilding and tanks more than offset a decline in motor vehicles and parts," according to the monthly report prepared by the department's Census Bureau. In other industries:

- Orders for electrical machinery increased $1.1 billion, or five percent, to $22.7 billion, offsetting a decline in non-electrical equipment of $1.1 billion or 4.7 percent to $21.6 billion.
- Primary metals were down $0.4 billion, or 3.8 percent, to $10.8 billion.
- December orders for non-durable goods were up by $300 million or 0.3 percent to $109.9, with petroleum products recording the largest increase.

Shipments of durable goods, meanwhile, were down $1.1 billion, or 0.9 percent, to $122.1 billion, while December's shipments of non-durable goods were flat at $109.7 billion, the department said. For the year, shipments totaled $2.8 trillion, a 6.5 percent increase over 1988 shipments.

#90033u0844 02/02/1990 ~United Press International

ANALYSIS BY ARNOLD SAWISLAK

WASHINGTON (FEB. 2) UPI - Tip O'Neill's most lasting contribution to the folklore of his occupation was the statement ''all politics is local,'' and nothing demonstrates the former speaker's axiom more clearly than the response to President Bush's budget message last week.

True, some members of Congress discussed the president's proposed education spending and some examined what he has in mind for Medicare. But no single item in the budget commanded as much focused attention as the list of military bases and facilities Secretary of Defense Dick Cheney proposed to close.

Chairman Les Aspin, D-Wis., of the House Armed Services Committee told reporters ''all hell has broken loose'' over the list. Aspin proposed creating another bipartisan commission, such as was used in 1988 to decide without the interference of Congress what military bases should be closed.

Military facilities are prized by most members of Congress, especially in

rural or economically depressed areas, because they provide stable employment bases for civilians in the area along with the steady infusion of cash from service payrolls. Further, the military usually provides its own utilities and policing and pays local school districts well to educate service children.

Members do not hesitate to take political credit for bringing bases to their districts and keeping them running. Conversely, they fear voters will blame them if the bases and the money they generate are removed. So a member of Congress about to lose a base can be a desperate and dangerous customer.

And there is another factor to deal with in the 1990 Cheney base closing list.

Aspin estimated that the bases and facilities to be closed are in four times as many Democratic districts as Republican, and Rep. Patricia Schroeder, D-Colo., said, ''It looks like Cheney met with Lee Atwater at the Republican National Committee and came up with a political list.''

Cheney noted that there are more Democrats than Republicans in the House (60 percent) but said, ''I don't have any motive other than trying to do the best job we can of squeezing the defense budget.''

All of which means the Cheney list is likely to cause a huge flap if the Pentagon chief insists it's a necessary part of his budget and tries to push it through.

There are a number of theories to explain why Cheney, a savvy former congressman and White House chief of staff, invited the storm that is breaking over the base closings.

One suggests that he is using the bases as a diversionary tactic to keep members' attention focused on the bases rather than some of his other budget proposals for multibillion-dollar weapons systems.

Another idea is that if Congress won't let him close the bases, which is likely, Cheney will have a ready-made scapegoat for failure to cut the defense budget as deeply as Pentagon critics would like.

#90033u0846 02/02/1990 ~United Press International

(FEB. 2) UPI - ''We believe God is at work in all of this,'' said Bishop Jack Tuell, president of the United Methodist Council of Bishops. ''We believe Bishop Felton May is called for this.

''This is the time. This is the hour and we are prepared to commit

ourselves entirely and completely,'' Tuell said.

Tuell made his comments - and the church's commitment - in a three-hour ceremony marking an unprecedented event in the life of the Methodist Church: The setting aside of one of the church's top spiritual leaders to lead a unique anti-drug effort.

The service affirming May's task took place at Asbury United Methodist Church in Washington, D.C., just a short walk from the Lincoln Memorial, but an even shorter walk from the drug-infested neighborhoods that have given the nation's capital a reputation for being among the worst cities for drug-related murder and violence.

May's assignment came last fall when he was designated for the anti-drug task as the bishops invoked a never-before-used provision of the denomination's Book of Discipline allowing them to free one of their members from regular responsibilities.

In an interview with United Methodist News Service, the denomination's official news agency, May said his task is to be a ''catalytic servant,'' working with churches ''to help them envision the future as they strengthen their ministries both internally, that is, within the congregation, and externally in the community.''

May said he brings no special expertise to the anti-drug task but he has had 30 years of experience in urban ministry.

He said he sees the church's role as supplementing that of the government.

''I think the church will be able to provide for the basis of a change in the behavior in an individual; helping and sustaining persons as they move from addictive behavior to a behavior that reflects their relationship to God and their responsibility for healthful relationships with people with whom they live,'' he said. ''I do not think that the government can provide that kind of direction and support.''

At the same time, he said the church must hold the government responsible ''for creating the environment that would grant health and personal fulfillment to all its citizens.

''The root causes that exacerbate the drug crisis must be addressed,'' he said. ''The root causes as I see them are: first, an undisciplined and compromising church; second, racism; and then we can get to things like unemployment, the poor, education and health.

''My recollection of war being declared,'' he said of Bush's anti-drug initiative, ''goes back to the second world war when the nation was mobilized and the national agenda was reprioritized to provide sufficient

resources to fight the war.

''In this current war on drugs, the nation has not been mobilized and the national agenda has not been reprioritized. It is business as usual,'' he said.

''There is a war of words and very little action.''

May also rejected calling the church effort a ''war on drugs.''

''What the Council of Bishops has said is that we are concerned about what appears to be a moral and spiritual deterioration of the moral fabric of our nation and that the drug and alcohol crisis is but one manifestation of that deterioration,'' he said.

''The church has always been in a toe-to-toe confrontation with evil,'' he added, but the ''weapons'' used in ''Christian battle'' are different from the weapons used in conventional or social warfare.

''I think the church must be reminded of the weapons that are at its disposal: truth, righteousness, salvation, faith and peace.''

#90033u0852 02/02/1990 ~United Press International

FORT LAUDERDALE, FL (FEB. 2) UPI - Parents have identified at least 14 preschoolers among thousands of child pornography photographs seized from the owner of a day-care center, police said Friday.

The owner of the Rainbow Learning Center, John W. Shaver, is charged with five counts of possessing child pornography. He is free on $5,000 bond.

Broward County officials revoked the the license of the center late Thursday, just before 140 parents began viewing some of the 7,000 photos confiscated from Shaver's home earlier this week.

At least 14 children were identified by parents whose children attended the center, said Sgt. David Geyer, and three others tentatively identified their children from among the photos.

''We have some parents that say, 'Yes, that looks like my child,''' Geyer said after a meeting at the Fort Lauderale Police Department Thursday night. ''Those parents are going to be scheduled to come back and view the pictures a little bit more carefully when their mental state is a little bit more stable.''

Broward County's Social Services Division shut down the center Thursday afternoon, saying that ''possession of any materials deemed to be obscene

or child pornography indicates a lack of good moral character.''

''The pictures were horrifying. I feel relieved but I feel upset for the other parents,'' said Maria Echevarria, whose daughter attended the school five years ago but was not identified Thursday night. ''I saw parents hysterical in there.''

''Something's got to be done,'' said Gail Souza, another parent whose child was not identified. ''He's been let loose for too long, that's for sure.''

About 60 more parents were expected to examine the photographs, police said, and the center owner could face more charges.

Only the childrens' faces were shown to parents, Geyer said. The children were photographed naked in activities such as finger-painting and playing in swimming pools, he said.

The photos do not depict children engaged in sexual activities and do not necessarily indicate that any of the children were abused, police said.

Shaver, 56, admitted to having the photos in his home but he said he did not consider the simple possession as pornography.

''The way I understand child pornograhy is to tell kids to take off their clothes and photograph them in the nude,'' Shaver said. ''I didn't do it. It's probably done ... but I'm not that way.''

''It didn't cause any harm to anyone,'' he said. ''A lot of people have secret vices.''

Shaver lost a day-care license in Hawaii in 1983, amid allegations he fondled children there. In 1984, he pleaded guilty to a misdemeanor charge of operating a Hawaii day-care center without a license.

Detectives have reopened investigations into two allegations of improper touching of children at Rainbow filed against Shaver in 1986 and 1989, Geyer said.

#90033u0866 02/02/1990 ~United Press International

WASHINGTON (FEB. 2) UPI - Federal prosecutors have found at least five people who have witnessed long-term drug use by Mayor Marion Barry and could testify at Barry's cocaine trial if he claims entrapment, it was reported Friday.

The Washington Post, quoting unnamed sources, said prosecutors intend to use the five witnesses if Barry is tried on a misdemeanor charge and claims he was entrapped or induced to use the drugs when arrested at a downtown hotel Jan. 18.

The FBI, using a former model and friend of the mayor as bait, lured Barry to the Vista International Hotel. Agents said they videotaped him smoking crack cocaine and charged him with a single misdemeanor count of cocaine possession.

Barry's attorney, R. Kenneth Mundy, said after viewing the FBI surveillance tapes this week: ''I think there's still entrapment.''

The witnesses would be used to show that if Barry was using drugs at the hotel, he was simply continuing a pattern of drug use developed over several years.

Authorities would not identify the new witnesss, but said they are not all from the Washington area, The Post reported.

Earlier this week, Barry's office issued a statement denouncing continued leaks in the federal investigation and predicted ''a parade of people - whether they are credible or not - coming out of the woodwork to 'make deals' with federal officials or 'tell their stories.'''

''People are calling constantly,'' a source told the newspaper. ''The bridge is breaking.''

Barry is undergoing substance abuse treatment at the Hanley-Hazelden Center at St. Mary's in West Palm Beach, Fla.

Barry could still face felony perjury charges based on his denials to a grand jury last year that he used drugs at a downtown Ramada Inn or in the Virgin Islands.

Former city employee Charles Lewis has already tesstified he used crack cocaine with Barry at the Ramada Inn in December 1988. James McWilliams, an attorney and city employee, testified before a grand jury this week that he was present on one occasion when Barry used cocaine.

City Administrator Carol Thompson is acting mayor in Barry's absence.

#90033u0867 02/02/1990 ~United Press International

WASHINGTON (FEB. 2) UPI - January's mild weather boosted construction employment to offset jobs lost at temporarily idled auto plants, keeping the month's civilian unemployment rate unchanged since June at 5.3 percent the government said Friday. The Labor Department's Bureau of Labor Statistics reported that 6.5 million Americans were unemployed last month.

Janet Norwood, the bureau's commissioner told the congressional Joint Economic Committee that January's unemployment report reflects slow but consistent job growth and stable unemployment in the labor market. "The jobless rate in January continued the pattern of remarkable stability that it has followed for many months now," Norwood said.

Although the number of jobless showed little change, the number of layoffs rose slightly, to continue a trend started in the middle of last year. The number of unemployed in the manufacturing sector increased nearly a full percentage point to 5.9 percent, the department said.

Economists said the report does not signal enough weakness in the economy to prompt an easing of credit by the Federal Reserve, which in recent comments has been touting its confidence that a recession is unlikely.

Still, a pocket of weakness, or what one economist termed a "mini-recession" has turned up in the manufacturing sector. Job cutbacks continued in the manufacturing sector, falling by 110,000 last month. Much of the decrease was attributed to temporary plant shutdowns in the auto industry.

The auto industry payroll dropped 90,000 jobs last month to total 734,000 from 824,000 in December. The auto plant shutdowns also caused employment to dip in the related fabricated metal products, rubber and plastics industries, the department said.

"Manufacturing surely continues in its mini-recession, with automobiles being the prime mover," said Robert Dederick, chief economist at Northern Trust Co. in Chicago.

"We are in an automobile recession and it is havings effects elsewhere but that is not capable of drawing down the rest of the economy," Dederick said.

Little change was posted in jobless rates for most individual worker groups last month. Among adult men, 4.7 percent were unemployed; adult

women, 4.6 percent; teenagers, 14.5 percent.

The department said the unemployment rate among blacks was 11.3 percent; Hispanics, 7.1 percent; and whites, 4.5 percent. Unemployment among black teenagers totaled 26.7 percent.

Total civilian employment remained at 117.6 million in January, meaning that 62.9 percent of Americans held jobs. The department said non-farm payroll employment increased by 275,000 last month to an annualized rate of 109.8 million.

The largest employment increases were in the construction and retail industries. Construction employment increased by 105,000 last month after slipping 50,000 during December. The department attributed the increase to the relatively mild weather in January, which followed unseasonably cold weather in December,

"January was a month of very mild weather, and more than the usual number of construction projects continued, resulting in a substantial seasonally adjusted employment increase," Norwood said.

Retail employment rose by 115,000 in January after slipping in December. General merchandise, food stores and restaurants each posted gains of 25,000.

Employment in the service industries increased by 105,000 with nearly half the gain in health services. Gains also were posted in the transportation and wholesale trade industries, the department said.

The average workweek for production and non-supervisory workers increased 0.1 hour last month to 34.6 hours. In manufacturing, the average workweek and overtime remained unchanged at 40.7 hours and 3.6 hours, respectively.

Hourly earnings among production and nonsupervisory workers rose by 0.1 percent in January, while weekly earnings rose by 0.4 pecent, the department said.

#90033u0906 02/02/1990 ~United Press International

WASHINGTON (FEB. 2) UPI - President Bush said Friday he is following the East German call for reunification of Germany into a militarily neutral state with ''great interest'' and will meet with his national security

advisers on the matter next week.

While flying to North Carolina aboard Air Force One, Bush was asked about East German Prime Minister Hans Modrow's call for a single German state, which belong to neither NATO nor the Warsaw Pact.

He did not respond directly but said he would be ''taking that up next week'' with his national security advisers.

Bush also told reporters he was following the situation with ''great interest.''

Since the fall of the Berlin Wall last December, the United States has walked a tight line in welcoming the democratization of East Germany and new rapprochement with West Germany while viewing more tentatively the possibility of a reunified Germany. Bush has expressed convictions in the past that Germany should not pull out of NATO.

At the same time, Chancellor Helmut Kohl has pledged that West Germany would remain in the North Atlantic Treaty Organization while welcoming a draw down of U.S. troops in Germany.

Kohl Friday praised Modrow's call but said reunification discussions must wait until after East German elections next month.

Meantime, West German Foreign Minister Hans-Dietrich Genscher was in Washington Friday to discuss the latest developments with Secretary of State James Baker.

West German officials said Genscher agreed to the one-day visit during a phone conversation with Baker shortly after Modrow presented his plan Thursday.

#90033u0918 02/02/1990 ~United Press International

WASHINGTON (FEB. 2) UPI - The Vatican, in a swifter than ususal response, has granted persmission to Archbishop Francis Hurley of Anchorage, Alaska, to delegate nuns and laity to perform marriages where priests or deacons are not present, the National Conference of Catholic Bishops said Friday.

The Vatican action follows a recommendation to the Vatican last November by the bishops conference urging the Holy See to look favorably on such requests by individual bishops in view of the shortage of ordained priests in mission territories of the United States.

Often such requests languish in the Vatican bureaucracy for over a year.

Hurley's permission from the Vatican specifies that the authority to officiate at the weddings be granted only to those nuns or lay people who are trained and qualified to give instruction on marriage to those to be wed, are qualified to perform the marriage liturgy and says such marriages must be faithfully registered and follow pertinent civil law.

Provisions for such priestless marriages were contained in the 1983 revision of the Catholic church's Code of Canon Law. Hurley's request for permission is the first granted in the United States.

''There is no intention to take the priest or the deacon from the scene,'' Hurley said in commenting on the situation. ''Rather, this permission will remove the uncertainty that at times hovers over a planned wedding when fog, rain or snow ... makes the arrival of a priest or decon questionable.''

He said the Vatican action indicates that ''the Church and Canon Law are not as rigid as some are prone to think. It has a history of adjusting to extraordinary circumstances.''

While the permission granted the Anchorage archdiocese is limited, some observers believe it is a step in the church's effort to deal with the declining number of ordained priests and a growing number of parishes without resident priests.

Currently, the median age of active Catholic priests is 56 and Catholic University sociologist Dean Hoge has predicted there could be a 40 percent decline in the number of diocesan priests in the period between 1980 and 2000.

Increasingly, nuns and lay people are performing more roles at the parish level once reserved for the priest, including presiding at liturgies that do not include celebration of the Eucharist as well as preaching.

Hurley said the Vatican ruling will allow five nuns and one lay woman in the Alaska archdiocese to perform weddings and that each of the women had been commissioned by state authorities to officiate at weddings.

At the November meeting of the bishops, Bishop John Keating of Arlington, Va., urged the bishops to seek the ''generic clearance'' from Rome for bishops making individual requests such as Hurley. He said the need ''arises in extensive missionary territories where large areas are without resident clegy.''

The bishops conferences of both Canada and Mexico have also sought such permission.

PRAGUE, CZECHOSLOVAKIA (FEB. 2) UPI - The dalai lama of Tibet, last year's Nobel Peace prize winner, arrived Friday on a five-day visit at the personal invitation of his philosophical counterpart, President Vaclav Havel.

Havel issued the invitation three days after his inauguration in a New Year's Day speech.

The dalai lama's acceptance drew a strong protest from China, which described the visit as a gross violation of its internal affairs. China considers Tibet a province and rejects calls for its independence.

Both the dalai lama and the Czechoslovak president advocate the policy of non-violence and peaceful co-existence. The dalai lama received the Nobel Peace Prize last year in recognition of his activities in favor of Tibet's independence, and Havel was one of the candidates.

Havel, an internationally known playwright and essayist who led the ''gentle revolution'' last November that toppled the communists from power has been proposed for the prize again this year by the U.S. Committee for Security and Cooperation in Europe.

The dalai lama lives in exile in India. Before his departure, he talked about the similarities between he and Havel, who he says became a politician in much the same way.

''Many ideas of his are close to mine, for example the principle of non-use of violence,'' he said in an interview with the Czechoslovak news agency CTK.

Asked whether the social changes under way in Eastern Europe will influence developments worldwide, he said he was convinced of it.

''It is very important that the whole system has been changed in a peaceful way although is very difficult sometimes, for example in Romania '' he said. ''The real test, however, will only take place with development of the economy and culture (and) assertion of freedom and democracy.''

Although it is described as private, the dalai lama's visit brought ''a rather sharp protest'' from the Chinese ambassador, a Foreign Ministry source said. In Beijing, the Czechoslovak ambassador to China was summoned to the Foreign Ministry.

The dalai lama will spend Saturday evening and much of Sunday in consultations and meditations with Havel at the presidential palace in

Lany outside of Prague, the official news service CTK said.

He began his visit with a private meeting with Cardinal Frantisek Tomasek, head of the Roman Catholic Church in Czechoslovakia. Later he was to meet with representatives of other religious groups as well as members of the independent political movement Civic Forum and its sister organization in Slovakia, Public Against Violence.

The dalai lama has had contacts with the religious group Czech Brethren, which was founded in 1457. A small mission of the church has been working for nearly 150 years in the Tibetan area of Ladakh, which is now part of Kashmir, and the dalai lama visited Leh in 1976.

On Sunday, the dalai lama will go to Wenceslas Square to light a candle for the victims of oppression and present a white silk scarf, the traditional Tibetan gesture of welcome and good luck.

On Monday he will meet with journalists, artists, writers and others on peace and spirituality. He returns to India Tuesday.

In an interview in New Delhi, the dalai lama said he still considers his five-point peace plan valid to resolve the Tibetan issue. The plan provides for China's control over Tibet's foreign policy and defense, and for Tibetan supervision of its economy, culture and religion. He said he is awaiting an answer from the Chinese leadership.

He also spoke on his personal life and creed, which he said is: ''If you can help, help others as much as you can. If you cannot help, do not make any harm.''

WINDSOR, ONTARIO (FEB. 2) UPI - Ford Motor Company of Canada Ltd. said Friday it will close its Essex engine plant for the week of Feb. 12, idling 900 hourly workers.

The plant, which produces the 3.8 liter, V-6 engine, is currently in the midst of a one-week shutdown at four of the five Ford Windsor facilities begun Jan. 29.

Ford spokesman Jim Hartford said the company's action related to the demand for engines at its various plants in the United States. "We are adjusting our inventories to meet demand in the U.S.," Hartford said. Also affected by the Jan. 29 layoff were employees at Windsor Engine plant No. 1 and No. 2 and Ford's Windsor iron casting plant. In total, 2,788 workers were placed on a temporary one week layoff.

Ford said the Essex plant employees will be put on temporary layoff for one week and will be entitled to benefits amounting to about 90 percent of their take-home pay. In earlier announcements, Ford said 406 workers at its Windsor engine and castings plants would be indefinitely laid off Feb. 5.

Other future Ford layoffs include a two-week shutdown at its Oakville plant, where Tempo and Topaz cars are assembled, starting Feb. 5, and two- and three-week layoffs at its Niagara Falls glass facility starting March 5. More than 2,700 workers will be affected.

#90033u0958 02/02/1990 ~United Press International

(FEB. 2) UPI - South Africa's oldest black liberation movement is legal again. President Frederik de Klerk today lifted a 30-year-old ban on the African National Congress, which was founded in 1912. He also lifted emergency restrictions on 33 anti-apartheid organizations. de Klerk made the announcement today in a speech to Parliament. He also said black leader Nelson Mandela will be freed from prison soon... as well as some other prisoners.

President Bush plans push for research and development in the coming year. And to do so, he announced a new set of education goals in his State of the Union message. To back up his point, the president will visit North Carolina State University and the University of Tennessee today. Tennessee hopes for federal aid for an acclaimed science project that's short on money.

West German Foreign Minister Hans-Dietrich Genschler is making a one-day rush trip to Washington today. The trip was scheduled in response to a call for German unification from East German Prime Minister Hans Modrow. West German Chancellor Helmut Kohl welcomed the unity call... but said discussions have to wait until after East German elections next month.

700 scientists... 49 of them Nobel Prize winners... have called on President Bush to fight global warming. The scientists say it's the most serious environmental threat of the 21st century. In a letter to the president, the scientists said in view of the potential consequences, actions to curb the greenhouse effect must begin immediately.

(FEB. 2) UPI - As a rule, Attorney General Thornburgh dislikes the use of special prosecutors. But he wants one now... to investigate possible criminal conduct by former Housing Secretary Samuel Pierce. The attorney general says in the Justice Department's own probe, he found NO reason to

believe Pierce is guilty of illegalities at HUD.

Barricades are up in one of the most crime-ridden neighborhoods of Los Angeles. Police put up the barricades around a 30-block area where street gang violence is blamed for 15 drive-by shootings in the last three months of 1989. Mayor Tom Bradley says people will be stopped only if they exhibit suspicious or erratic behavior. As he put it... ''We are NOT here to be oppressive.''

An explosion occurred in a subway station in New York City during the evening rush hour. The explosion filled a station in Lower Manhattan with smoke. 11 commuters and one transit officers went to hospitals. Most of the 12 inhaled smoke. Thousands of other commuters were delayed in getting home. Officials say the explosion occurred when a train caused a short on the third rail.

Investigators are trying to figure out what caused five explosions and a fire at a building in Tecumseh, Michigan. Three injuries are reported. The building houses toxic industrial chemicals. A cloud of thick smoke billowed from it during the fire. Firemen kept the blaze from spreading to a two-thousand gallon tank holding what they believe is a highly volatile and toxic chemical.

About 15-hundred people are expected in Punxsutawney , Pennsylvania, this morning. They will see whether winter is about over, or whether it will last another six weeks. It all depends on whether Punxsutawney Phil sees his shadow when he is coaxed from the hollow tree where he winters.

NEW YORK (FEB. 2) UPI - Latest metal market prices as quoted Friday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 69.50-71.00 c-lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 111.40 c-lb.

Lead, common, U.S. primary producers 40.00 c-lb.; U.S. non-primary (secondary) producers 42.00-47.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $290.00-$300.00 76-lb. flask.

Nickel, bettes delivered to customers, merchant, N.Y., $2.85-$3.12 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $135.00-138.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $509.00-$511.00; dealer-approx., $495.00-$510.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $100.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $103.33 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 310.75 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $8.87-12.96 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.35-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 68.00-68.75 c-lb.

TOKYO (FEB. 2) UPI - Most national travel offices try to generate income through tourism, but the Japan National Tourist Organization has set the unusual goal of helping travelers spend less money, tourist officials said Friday. The National Tourist Organization has mounted a campaign to demonstrate to travelers Japan is not as pricey as often reported.

On Feb. 23, the tourist office will announce the results of a survey that shows Tokyo is less expensive for travelers than several major cities in Europe and the United States.

Japanese tourist officials say their sole goal now is to foster understanding through travel not bring in dollars. "I don't care how much money foreign travelers spend in Japan," said Tsuneaki Iki, vice president of the government-funded tourist organization. "It is more important for us to gain understanding than foreign currency."

To seek money through tourism would be unseemly at a time when Japan is flush with foreign money gained through trade surpluses, Iki said. "When we were established in 1959 we needed foreign currency," he said. "But the picture has changed. If we seek more money now, we are doing an injustice."

The tourist office has published several pamphlets on cheap travel which

direct foreign visitors to inexpensive hotels, restaurants and bars. The campaign fits nicely into Japan's stated goal of reducing its trade surplus.

Under pressure from the United States and other countries, Japanese leaders have pledged to cut Japan's trade surplus and travel is proving to be an effective means of accomplishing that goal.

In 1989, nearly ten million Japanese traveled abroad for both business and pleasure while only 2.8 million foreigners visited Japan. The result in economic terms was that Japanese travelers spent nearly $20 billion more overseas than foreign travelers spent in Japan, according to Finance Ministry figures released Friday.

The travel deficit helped bring down Japan's overall trade surplus by nearly 30 percent to $57 billion in 1989, the Finance Ministry said. The number of Japanese traveling overseas has nearly doubled in the past three years. The number of foreigners visiting Japan is also on the rise but at a slower rate.

Tourism in Japan was hurt by the drop in the value of foreign currencies against the Japanese yen which in effect doubled prices for foreign visitors.

Nevertheless travel to Japan increased 20 percent in 1989, with most of the increase coming from Koreans who were recently given more freedom to travel to Japan.

The National Tourist Organization welcomed the increase not because of the income the tourists generated but the understanding they presumably gained. Surveys conducted by the travel office show most visitors leave Japan with a more positive image than when they arrived.

Japan is searching for ways to improve its image abroad which has been sagging because of aggressive trade and business practices by Japanese companies.

#90033u0991 02/02/1990 ~United Press International

TRENTON, NJ (FEB. 2) UPI - Charles Rothenberg, paroled after serving 6 1/2 years in prison for setting fire to his 6-year-old son, issued a statement Friday through the National Burn Victim Foundation pledging to do ''nothing to cause him any harm.''

''I love you, son,'' Rothenberg said in the statement.

Foundation President Harry Gaynor said Rothenberg telephoned him Thursday from an undisclosed location, saying he wanted to make a statement to the media while avoiding an on-camera interview with television networks.

''He (said) there is concern for his safety and that he is wearing a bullet-proof vest to protect him,'' Gaynor said.

Rothenberg, who did not say where he was calling from, claimed ''his son is being exploited and used by the television media for sensationalism,'' Gaynor said.

Rothenberg was released from a California prison Jan. 24 but his son, David, has said he is afraid of his father and does not want to see him.

David and his mother, Marie Rothenberg, have said they want Rothenberg kept away from the scarred and disfigured boy, now 13.

''I want my son and Marie to know I will respect David's wishes,'' Gaynor quoted Rothenberg as saying. ''I will do nothing to cause him any harm or to be more fearful of me.''

Rothenberg said parole officers assigned to him ''are pleasant to me and are concerned for my safety,'' Gaynor said.

Gaynor said Rothenberg was concerned about the impression the case had made on his son and other children about family violence.

''The foundation shares Rothenberg's concern about his son,'' Gaynor said. ''Parents must be sensitive to the fact that children are impressionable and have difficulty in understanding violence on children from their parents.''

David Rothenberg has said he will never forgive his father for setting him on fire and that he remained terrified of his father.

Rothenberg, 49, set fire to David in a Buena Park, Calif., motel room in 1983 after a domestic dispute with the boy's mother. Rothenberg has said he intended to kill the child but not to leave him disfigured.

Rothenberg is on three-year parole and is required to wear an electronic device that monitors his movements. California corrections authorities refused to say where Rothenberg went when he was released for fear that communities would turn on him.

The boy's face is severely scarred from the burning and repeated skin graft operations and his fingers have been amputated to the first joint because of the burns.

The youth now lives with his mother and stepfather, Buena Park police Lt. Richard Hafdahl, in Orange County, Calif.

The National Burn Victim Foundation is based in Orange, N.J., and disseminates information on services and support available for burn victims.

#90033u1008 02/02/1990 ~United Press International

WASHINGTON (FEB. 2) UPI - An industry trade group asked the Bush administration Friday to try to salvage the federally subsidized crop insurance program rather than pursuing its plan to terminate it.

The White House, as part of its fiscal 1991 budget, has proposed elimination of the costly program, which has consumed $5 billion in subsidies since 1980 but attracted fewer participants than hoped.

''This decision does not make good sense from either a budgetary or farm policy standpoint,'' the American Association of Crop Insurers protested in a letter to Agriculture Secretary Clayton Yeutter.

The trade group pointed to a 1989 congressional study that concluded crop insurance was the fairest way to compensate farmers for crop disasters. However, the program has been criticized for costly premiums, inadequate coverage and low participation rates. From 1981-1988, the program paid out $1.56 for every $1 collected in premiums.

''The program has not been able to provide adequate risk protection for farmers at a reasonable cost to taxpayers,'' the administration said in calling for its elimination and offering to work with Congress to ''fashion a permanent disaster assistance program'' to protect farmers.

The trade group pointed to recent upswings in farmer enrollment in crop insurance. Nearly 130 million acres were insured in 1989, half of the land on which crop insurance was available.

''Mr. Secretary, we urge that ... you consider making some radical changes in your current crop insurance program from top to bottom,'' the letter said. ''The recommendations for improving participation embodied in the reports of the Commission for the Improvement of the Federal Crop Insurance Program should not be ignored.''

The administration has said the commission's recommendations ''offered few suggestions to resolve the program's excessive losses and high federal costs.''

Yeutter has hinted the administration may suggest a possible replacement for crop insurance when it unveils its farm policy recommendations next week. Observers have said the recommendation to eliminate crop insurance was made as a way to ensure Congress works on the problem this year.

#90033u1017 02/02/1990 ~United Press International

BOSTON (FEB. 2) UPI - The Bank of Boston Corp., battered by big losses in the region's sagging real estate market, Friday announced a major reorganization that will eliminate its real estate group as one of five independent line businesses.

Instead, the region's biggest banking company said its commercial and residential mortgage real estate activities will be split and become part

of other existing units. Also, the company's New England group, which includes the five banks it owns in the region, will reorganize along functional lines, the bank said.

"This new functional alignment will refine the operations ... and lays the groundwork for significant savings, improved customer service and enhanced marketing power," said Ira Stepanian, chairman and chief executive officer.

Layoffs "are not part of the strategy," said Wayne Taylor, a company spokesman. Taylor said the point of the reorganization was not to break up the real estate group but "to have an organization that works well." The changes, "effective as soon as practical," will reduce the five line business groups to three: New England, national and global, the company said.

Also eliminated as a major operational group will be the company's treasury-banking services unit, whose components will be separated, said Taylor. Meanwhile, the executive vice president of the company's New England banking group, Clark W. Miller, will retire March 31, the bank said. He will be succeeded by Peter C. Read, 53, currently head of the treasury-banking services group, the company said.

Miller, who turned 60 last week, has been with the bank 27 years. The bank emphasized Miller's retirement was the fulfillment of a personal plan he disclosed to top executives more than two years ago.

Like most of the region's banks, Bank of Boston has been hurt by problems in the region's real estate market. Bank of Boston had a $125 million loss in the third quarter of last year because of bad real estate loans. For the year it earned $70 million, compared with $322 million the year before.

#90033u1063 02/02/1990 ~United Press International
WASHINGTON (FEB. 2) UPI - A House ethics committee report released Friday concluded that Rep. Gus Savage, D-Ill., ''did, in fact, make sexual advances'' to a female Peace Corps worker last March and said the committee ''clearly disapproves'' of the congressman's conduct.

The report also included a one-sentence letter of apology dated Nov. 20, 1989, that Savage sent to the woman.

''While in Zaire earlier this year, if you felt personally offended by any words or actions of mine, I apologize, because I never intended to offend and was not aware that you felt offended at that time,'' the letter said. ''Sincerely, Gus Savage.''

The report was made public one day after Savage said in a scathing speech delivered to an empty House chamber that the inquiry into his alleged misconduct had ended without ''even a slap on the wrist.''

Savage also charged that the investigation was prompted by racism in ''the white American mass media'' as well as members of Congress.

A spokesman for Savage said Friday he would not comment on the report, but Savage himself said Thursday he was not interested in seeing the report because ''I haven't done anything.''

The investigation into Savage's conduct was prompted by a Washington Post report last July that Savage, a frequent focus of controversy, made sexual advances toward a female Peace Corps volunteer during a visit to Zaire.

The Post quoted the unidentified woman as saying she accompanied Savage and several other people on a tour of night spots following a dinner last

March at the U.S. ambassador's residence in Kinshasa. As she rode in the back of a chauffeur-driven car, Savage repeatedly fondled her despite strong protests, she said.

The woman refused to testify before the ethics committee, but was characterized in the committee's report as a ''creditable individual.''

''Based upon its review of available information and the congressman's November 20, 1989, letter of apology, the committee believes that Representative Savage did, in fact, make sexual advances to the Peace Corps volunteer,'' the report concluded.

The report added that, ''The committee clearly disapproves of Representative Savage's conduct. ... The committee has determined that Representative Savage's actions should be the subject of a publicly available report describing his behavior, including his letter of apology. Had the congressman not taken the initiative to send such a letter the committee would have directed that he do so.''

In his speech Thursday, Savage said that ''at no time during the evening in question did (the woman) appear offended by me or anyone in our party of six. ... This was what I stated publicly when the story first broke.''

Savage also denounced three fellow Democrats who had sought the House ethics committee investigation - Reps. Patricia Schroeder of Colorado, Barney Frank of Massachusetts and Matthew McHugh of New York.

The congressman lashed out at the three, saying, ''Believe it or not, among these self-appointed guardians of personal morality was one who since has admitted keeping and prostituting a homosexual'' - a reference to Frank, who also is being investigated by the ethics panel.

''As for the other two - so-called liberals - I urge them to review their sensitivity to racism and their respect for fairness.''

The three representatives, who are white, declined comment on Savage's statements.

Savage, 64, who has represented Chicago's South side and the city's southern suburbs since 1980.

#90033u1089 02/02/1990 ~United Press International

(FEB. 2) UPI - A jury in Peoria, Illinois, sentenced a 30-year-old mother to life in prison for killing her infant daughter and stuffing the body

into a garbage can. Officials say Paula Sims had requested the death penalty.

New York officials say the bodies of the men, women and children who died in last week's crash of Avianca Flight 52 were flown to Colombia early today. A second flight carrying 78 of the victims' relatives left two minutes later.

Authorities in Florida yesterday charged an elderly Pompano Beach couple with arranging the contract killing of their only son. Officials say the couple wanted to collect a 70-thousand-dollar life insurance policy.

Federal health officials in Atlanta say the number of syphilis cases hit a 40-year high in 1989. Officials say the resurgence of the potentially deadly venereal disease is a sign that the ''safe-sex'' revolution may have hit a snag.

A spokesman for Sotheby's auction house in New York says a copy of the first printing of the Declaration of Independence sold for a record price. Chicago dealer Ralph Newman bought the document for one-Million 590-thousand dollars.

The Mexican navy says NO drugs were found aboard a Cuban-chartered freighter that was attacked by the U-S Coast Guard. The Coast Guard fired at the vessel after it refused to submit to a search in international waters.

Bulgaria's government resigned yesterday without an official explanation. The decison followed an emergency Communist Party congress. Delegates voted to abandon their Stalinist past and chart a new path to ''humane socialism.''

#90033u1100 02/02/1990 ~United Press International

BANGKOK, THAILAND (FEB. 2) UPI - Union workers Friday called off protests and a work slowdown that paralyzed Thailand's largest port, but talks will continue on union demands the government retract plans to privatize a new port, Communications Minister Montri Pongpanich said.

Montri told reporters that six port unions, which have held meetings and demonstrations that have halted work at Bangkok's Klong Toey port since Tuesday, have agreed to return to work.

The minister indicated no agreement has been reached on union demands the government scrap plans to privatize a new port due to open next year, but said talks will continue. The government wanted to allow private companies to bid for the rights to manage the port at Laem Chabang, 80 miles

southeast of Bangkok.

Unions insisted private management would be less efficient than the state-owned port authority and could threaten national security. Montri said the unions have promised to work trough the night to start unloading the dozens of ships waiting to be unloaded.

Government officials said port unions could be offered shares in any arrangement to manage the ports privately, but it was not clear whether the two sides were close to a compromise.

Officials said they told the unions their work stoppage was illegal under the labor law despite union leaders' claims the action was a legal union meeting, not a strike.

The return to work appeared to head off threats from 25 other state enterprise unions to stage a general strike Monday in support of the port workers.

The move appeared to be an effort to change government policy to privatize a number of state enterprises which have been accused of inefficiency and corruption.

Prime Minister Chatichai Choonhavan, however, said the strike was instigated by foreigners and political opponents in an effort to stop Laem Chabang from becoming a modern, efficient port that would take business away from ports elsewhere in the region. "This port is so important they have tried very hard to stop it from being fully developed as our deepwater port," he said.

"There is probably some interference from outside and from internal politics to prevent this deepwater port from becoming successful as a modern port in Southeast Asia," he said.

The board of trade estimated that shippers lost at least $40 million a day because of the slowdown. The government has tried to divert some cargo to the navy base at Sattahip and to loosen restrictions on private wharves in Bangkok to allow the unloading of some ships.

Already encountering delays because of the burden Thailand's fast expanding export industries have placed on it, the port is a key chokepoint for the whole economy. It is the only major deepwater port although other ports, including Laem Chabang, are under development.

LONG BEACH, Calif. (FEB. 2) UPI - An Air Force inspection of tools manufactured by McDonnell Douglas for production of the new C-17 cargo jet reveals more than half were defective, it was reported Friday.

Air Force officials, concerned about altered quality assurance records for the C-17 tools, ordered a special sample inspection last year of all of the master tools, which are used to assure that plane components are manufactured to precise specifications, the Los Angeles Times reported.

The inspection, according to an Air Force release, involved 23 tools for the C-17 and 12 were found ''discrepant,'' the newspaper said.

Air Force Brig. Gen. Michael Butchko, the program manager for the C-17, acknowledged this week that there were problems with the master tools for the airplane, but those problems were being corrected.

''We did find some discrepancies in Douglas's quality control,'' Butchko said. ''I think overall we are doing very well.''

An unidentified Douglas official told the newspaper Thursday that he did not believe any C-17 parts had been produced by uninspected master tools.

The Air Force has been planning to purchase 211 of the jet cargo transport planes at a cost of $37.5 billion or $178 million each, which includes design, development, initial spare parts and future inflation. The cost

estimate, however, may be increased by Air Force officials by as much as $4.5 billion due to increases in inflation estimates.

#90033u1206 02/02/1990 ~United Press International

NEW YORK (FEB. 2) UPI - New orders for electronic components dropped in January, signaling a slump in a wide range of sectors and leaving little hope for a strong rebound in the first half of 1990, the Electronic Buyers' News magazine said Friday.

The magazine, in the latest issue to be available on newsstands Monday, said the Quest Index, which the publication started computing in July 1988 dropped 5.6 points to 48.3 in January from 53.9 in December.

It was the steepest decline since July 1988 when the index stood at 54.8 points.

A rating below 50 indicates a change ''from industry growth to a negative pattern,'' the Quest Index report said, with a dramatic drop in new orders reflecting the industry's slump.

''New orders dropped an extraordinary 11.2 points, to 45.1 from 56.3,'' the report said.

Production fell 6 points to 49.7 from 55.7, inventories lost 5.4 points, to 44.7 points from 50.1. Employment in electronics-related sectors also showed a decline, although a more moderate one, with the index losing 2.2 points to 48.9, down from 51.1, the report said.

The only gainer among the Quest Index's components was vendor deliveries, which rose 2.1 points, to 54.2 from 52.1, a positive economic sign, the survey said.

The survey is based on a poll of more than 500 purchasing managers at electronic companies nationwide.

''The consensus from the survey suggests that the industry's sluggish pace extends to most sectors, from consumer to automotive and military wares,'' reflecting an overall lackluster economy, the report said.

The report warned that purchasing managers felt the slowing down was not limited to the United States, as ''some respondents believe the electronic business is flat to down worldwide.''

The purchasing pattern of capital equipment in January was mostly unchanged. But it showed a disturbing trend with short-term orders increasing to 72.6 percent from 68.5 percent, while long-term orders

dropped to 27.3 percent, down from 31.5 percent.

The highly competitive market led to the first decline in prices since July, the report said.

''Given the manufacturing sector's present flirtation with recession, it is not at all surprising that the state of business activity in the electronics industry, as reflected by the Quest Index, fell below the growth line,'' said Richard Jacobs, who heads R.A. Jacobs Associates Inc, a New York-based consulting firm.

''I expect the industry to remain flat through the first half of the year and then reinvigorate as the economy rebounds and a new electronic product cycle comes of age,'' Jacobs said.

Another industry publication, Electronics Purchasing, issued by Cahners Publishing Co., based in Newton, Mass., polled 500 electronics industry buyers.

Electronics Purchasing said that 50 percent of the buyers polled reported cutting down inventories, up from 46 percent in December.

''The U.S. electronics buyers point out that their factories are still running at only 80 or 81 percent of capacity - their lowest level since last fall,'' the survey said.

''Despite months of cutting back, January's inventories of electronic parts are still not in line with production of computers and other electronic equipment,'' the survey said.

According to the monthly magazine, half the buyers polled said they were keeping their inventories at their current level, while 25 percent will be paring their orders in the next 90 days.

It is proof that ''makers of electronic parts can expect weak orders in the months ahead,'' the report said.

#90033u1213 02/02/1990 ~United Press International

JACKSONVILLE, Fla. (FEB. 2) UPI - That ''good to the last drop feeling'' may be leaving Jacksonville for good.

Maxwell House officials said Thursday they will close one of its two East Coast coffee processing plants, either the one in Jacksonville or the one in Hoboken, N.J., because of excess capacity, a smaller market share and a nationwide reduction in coffee consumption.

The company began a comprehensive study several months ago of the two plants to determine which operates more efficiently, said Cliff Sessions, a spokesman for General Foods Corp., which is owned by Philip Morris Cos., the parent company of Maxwell House.

''It's virtually certain one will be closed,'' Sessions said. He said a decision on which plant to close has not been made, and that it will be next year before there is an actual closing.

If the Jacksonville plant is closed, it would leave about 400 workers jobless. Its closing would be another blow for the city's port area, which last month lost 1,000 jobs when Jacksonville Shipyards closed down. The two plants are across the street from each other.

(FEB. 2) UPI - A Nobel Peace Prize winner says ''We seem to be on the way to the new South Africa.'' Anglican Archbishop Desmond Tutu made the remark today after South African President Frederik de Klerk ordered far-reaching reforms. de Klerk's reforms meet most of the conditions made by South Africa's black majority for negotiations on a political settlement to the nation's racial conflict.

In addition to ending a ban on the African National Congress, de Klerk also lifted a ban on the South African Communist Party. He said events in the Soviet Union and Eastern Europe have weakened the party's support base and it NO longer poses ''the same degree of threat.''

Some education leaders say President Bush's goals for education are fine... but he's NOT willing to come up with the money to pay for reaching the goals. But the self-proclaimed ''education president'' will start trying to silence the critics today in a trip south. Bush will visit North Carolina State University and the University of Tennessee.

Delegations of Armenian and Azerbaijani nationalists are in Latvia... where Baltic nationalists hope to mediate peace. The talks in Riga are being brokered by the popular fronts of the Soviet Baltic states of Estonia, Latvia and Lithuania. It's the first time a NON-state organization has taken a leading mediation role in the Soviet Union.

A report today says more than half the master tools made for production of a new jet are defective. The report says the Air Force found the defects while inspecting the tools. McDonnell Douglas made the tools for production of the new C-17 cargo jet. The Air Force says the problems are being corrected.

#90033u1252 02/02/1990 ~United Press International
EAST BERLIN (FEB. 2) UPI - The West German government showed little enthusiasm Friday for an East German plan for reunification as a neutral country and Soviet and U.S. officials reacted cautiously, saying the proposals still had to be assessed carefully.

East German Prime Minister Hans Modrow called Thursday for the reunification of Germany under a federal government in Berlin and said both Germanys should first achieve military neutrality.

Senior West German government officials, including Chancellor Helmut Kohl, rejected the suggestion West Germany quit NATO, but did not suggest an alternative for a future united Germany.

West German Foreign Minister Hans-Dietrich Genscher said in a radio interview East Germany could not be co-opted into the Western military alliance and also warned against Germans isolating themselves by becoming neutral.

''We want to dismantle the confrontational character of the alliances and force them into cooperation and (do) not (want) to pull a country into another alliance,'' he told Deutschlandfunk radio before leaving for meetings in Washington.

He called for a European summit this year to discuss ''the future structure of Europe and consequently the position of the Germans.''

After discussing Modrow's proposals Friday with the Bush administration during a one-day visit to Washington, Genscher is due to travel to Canada, where he will meet Soviet Foreign Minister Eduard Shevardnadze.

In Washington, President Bush said he is following the East German call for reunification of Germany into a militarily neutral state with ''great interest'' and will meet with his national security advisers on the matter next week.

Soviet Foreign Ministry spokesman Juri Gremitskikh warned at a news conference in East Berlin against pitching expectations on German unity too high.

Gremitskich also said Western suggestions that ''the whole of Germany'' should belong to NATO were unrealistic.

''We are positively disposed to the concept (of reunification),'' Gremitskich said. ''(Soviet leader Mikhail) Gorbachev has said he is interested in the idea.

''But at this stage it is only a concept, a proposal. There should not be too quick a reaction,'' he said, adding that the four World War II victors and Germany's neighbors ''should have their rights considered.''

A government spokesman in Bonn indicated Chancellor Helmut Kohl would not treat the issue as a priority during planned talks with Modrow. The two German leaders are expected to meet Saturday at an international economic conference in the Swiss resort of Davos, but the spokesman said they were unlikely to even have enough time to discuss the plan. Modrow travels to Bonn for talks with Kohl Feb. 13-14.

Kohl said earlier the issue should be discussed after March 18 East German elections, when Modrow's troubled Communist party is widely expected to lose its dominant position in the government and possibly become an opposition party.

''I strictly reject a concept of German neutrality. Such a proposal contradicts the logic of a 'global European unification process' which Modrow also mentioned,'' Kohl said.

A political analyst in Bonn described the plan as ''Modrow's farewell statement.''

The West German spokesman said the Bonn government considered Modrow's proposals as an attempt to slow down the massive exodus to West Germany. Official West German figures show 58,000 East Germans migrated in January alone - a daily average of almost 2,000.

In East Berlin, the leader of the Liberal Democratic Party of Germany, Manfred Gerlach, suggested that after both German parliaments had merged, they should elect the current West German president, Richard von Weizsaecker, as president of a reunified Germany.

Polls have shown that von Weizsaecker, a member of Kohl's conservative party, is one of the most popular personalities in West Germany. He is thought to enjoy similar popularity in East Germany.

Gerlach also suggested a referendum on the reunification issue be held in both Germanys Dec. 2, when West Germans go to the polls in general elections.

He said he backed Modrow's plans in principle but said he could not imagine that East Germany would quit the Warsaw Pact this year, although he added it was possible the two military alliances would soon lose much of their military character in favor of a more political one.

Modrow, at his news conference in East Berlin, dubbed the plan ''for Germany, united fatherland,'' a slogan that has become the rallying call

for hundreds of thousands of East Germans demonstrating in favor of German reunification in recent months.

Modrow said the two nations would first sign a treaty regulating their relations, then form a confederation and finally a federation with the creation of a single parliament and new constitution.

The capital of the new government would be in Berlin, Germany's former capital, which has been administered since World War II by the Allies - the United States, England, France and the Soviet Union.

#90033u1274 02/02/1990 ~United Press International

SEATTLE (FEB. 2) UPI - The Federal Aviation Administration has issued an emergency airworthiness directive requiring U.S. operators of 43 Boeing 757s with Rolls-Royce engines to check for potentially unsafe cracking. The probe focuses on the pins that hold the engines to the wings, FAA officials said Thursday.

The directive was issued after an airline found both pins broken on a 757 engine during a routine inspection, FAA spokesman Dave Duff said in Seattle. The engine did not fall off because a bolt running through each four-inch hollow pin was still intact, he said.

Neither Boeing Co. nor the FAA would name the airline. But Boeing spokesman Mark Hooper said U.S. carriers with Rolls-Royce engines on the 757s are Eastern Airlines, America West, and American Airlines.

Hooper said 134 Boeing planes worldwide could be affected by the directive. Many foreign carriers follow FAA directives, although the agency has no jurisdiction over them. The pins broke because of fatigue, but the age of the plane did not appear to be a factor, the FAA said.

Boeing issued a service bulletin Tuesday calling for checks worldwide of 757s with Rolls-Royce engines. Hooper said two airlines found cracks in pins on 12 planes.

The FAA directive requires the planes be inspected within 30 days or before a pin accumulates 5,000 flight cycles. A flight cycle refers to a takeoff and landing, during which stress to a plane increases.

Boeing plans to produce a more crack-resistant pin by May, Hooper said. Until then, the company will furnish airlines with new pins at no charge if existing pins are cracked, he said.

The airlines must pay for the checks, which cost an estimated $320 per plane. A previous FAA airworthiness directive called for the inspection of 757s with Pratt & Whitney engines for similar problems. Three broken bolts and a broken safety cable prompted checks of Boeing 727s after an engine fell off a USAir jet over New Jersey in 1987.

A Northwest Airlines 727 engine fell off over Florida earlier this year. Leaking fluid was suspected of freezing and flying into the engine, causing it to lock up. In such instances, the engines are designed to break off to prevent damage to the wings. Last year, the right engine of a Piedmont Airlines Boeing 737 fell off after takeoff from O'Hare Airport in Chicago, scattering debris on the runway.

#90033u1281 02/02/1990 ~United Press International
KANSAS CITY, Mo. (FEB. 2) UPI - United Telecommunications Inc. said Friday it wants to adopt the name of its well-known Sprint subsidiary as a prelude to acquiring complete ownership of Sprint.

The company will ask shareholders to approve a name change to Sprint Corp. Inc. at United Telecom's annual meeting in April, said Jerry Cosley, vice president of corporate communications at United Telecom.

''Sprint has tremendous global recognition and a good reputation,'' Cosley said. ''It is vastly more recognizable than the parent company. We want all our employees to gather under one banner, and the use of the name Sprint is the most effective way to do that.''

The long-distance company would retain the US Sprint name.

United Telecom hopes to have shareholder approval of the new name before acquiring GTE Corp.'s remaining interest in Sprint, Cosley said. The acquisition is expected to occur by the end of the year or early in 1991, Cosley said.

United Telecom owns 80.1 percent of Sprint after paying GTE $600 million in early 1988 to increase its ownership from 50 percent. United Telecom and GTE of Stamford, Conn., jointly started US Sprint in July 1986.

The cost of acquiring GTE's remaining 19.9 percent stake in Sprint cannot be estimated because of a complex formula that specifies a buyout price, Cosley said.

Analysts said United Telecom would encounter no difficulties in completing the buyout of GTE's interest in Sprint.

Mary Elizabeth Pfeil, utilities analyst with Provident National Bank in Philadelphia, said GTE's decision a few years ago to withdraw from Sprint was structured in steps that acommodated United Telecom's need to finance construction of its network as well as buy out GTE.

''It's just a matter of time when they intend to do it,'' said Frank Governali, analyst with First Boston in New York.

The consolidation of Telecom and Sprint began last fall, when functions at both companies were aligned to operate as a single unit. United Telecom officials said then the changes reflected substantial growth and improvement at the Sprint subsidiary.

During third-quarter 1989, United Telecom's earnings increased 75 percent,

largely because of growth in the US Sprint long-distance subsidiary. US Sprint's operating income was $60 million during the quarter, compared with a loss of $5 million in third-quarter 1988.

United Telecom will release its fourth-quarter and year-end results next week.

#90033u1300 02/02/1990 ~United Press International

LONDON (FEB. 2) UPI - Stock prices closed mostly higher in light trading Friday on the London International stock exchange boosted in part by gold stocks and companies with South African connections.

The Financial Times 100-stock index, which gained 8.5 points Thursday, closed up 9.3 points to 2,355.1. The narrower top 30 industrial average eased 0.4 points to 1,866.4.

Volume was around 485 million shares, compared with 475 million traded Thursday.

South African President F.W. De Klerk's decision to lift the 30-year ban on the African National Congress boosted stocks with South African interests, in particular gold.

Analysts noted sentiment was also enhanced by the sharp rise in Tokyo stock prices.

Charter Consolidated climbed 16 cents to $7.50, Lonrho gained 18 cents to $4.60 and Delta Group gained 8 cents to $5.28.

Golds such as Vaal Reef surged $8.50 to $135 on the South African developments.

Renewed investment support boosted Euro Disney 32 cents to $15.48 while Eurotunnel climbed 60 cents to $10.48.

Pearson also gained from renewed support, climbing 16 cents to $12.14.

Talk of French stake building caused heavy trading in Royal Bank of Scotland shares, which jumped 16 cents to $3.40.

Elsewhere, reports of increased radio audience levels helped Radio City soar 72 cents to $7.48.

#90033u1315 02/02/1990 ~United Press International

NEW YORK (FEB. 2) UPI - Federated Stores Inc., the giant retailer now in Chapter 11 bankruptcy, said Friday it may keep its trendsetting Bloomingdale's chain rather than sell it for much-needed cash as previously planned.

Debt-plagued Federated, the U.S. retail unit of Toronto-based Campeau Corp., put Bloomingdale's, its 17-store crown jewel, on the auction block last fall after disclosing a severe cash-flow problem that eventually led to a Chapter 11 filing Jan. 15.

Several bidders submitted offers - including real estate mogul Donald Trump, Japan's Tokyu Department Store Co., a group led by Ann Taylor Stores Chairman Joseph E. Brooks and another group led by Bloomingdale's Chairman Marvin Traub - and Federated had hoped to complete a sale by this month.

"A sale will not be completed in February as we had anticipated prior to the Chapter 11 filing," said Carol Sanger, a Federated spokeswoman at the company's Cincinncati headquarters.

Sanger said the company, which operates nine other department store chains also is evaluating "whether there is more value left on the table by not selling Bloomingdale's than by selling it." Federated, analysts said, was hoping to fetch at least $1 billion for Bloomingdale's and may not have received any offers that met that price.

Sanger declined to say whether the company was dissatisfied with the value of the bids for Bloomingdale's. "It may be determined that the cash flow and profitablity of Bloomingdale's would amount to more in the short- and long-term than a one-shot sale," she said.

Because of the Chapter 11 filing, which grants Federated protection from creditors while working on a plan of reorganization, a sale of Bloomingdale's would require the approval of the U.S. Bankrupcty Court for the Southern District of Ohio.

Monroe Greenstein, a securities analyst with Bear, Stearns & Co., said if Federated did not receive acceptable bids, "they are probably better off with Bloomingdale's and its cash flow."

Federated has projected Bloomingdale's will generate revenues of $1.3 billion this year and earn $133 million before taxes and depreciation. Bloomingdale's operates stores in New York, Pennsylvania, Massachusetts, Illinois, Virginia, Maryland, Florida, and Texas.

-30- 2490

#90033u1325 02/02/1990 ~United Press International

NEW YORK (FEB. 2) UPI - A black priest suspended last year from the Roman Catholic Church after demanding black members be allowed to institute their own rituals during mass declared Friday he no longer accepted the authority of Rome.

''As of today the African-American Catholic Congregation is independent and will no longer be under Rome,'' the Rev. George Stalling said during an appearance on the ''Donahue'' show that was taped Tuesday and aired Friday.

Stallings, 41, said his Washington, D.C., congregation is ''still Catholic'' but would no longer accept the authority of the 2,000-year-old church.

''Today we go independent,'' said Stallings, displaying a colorful logo of his newly proclaimed religion to a nationwide television audience. ''We no longer consider ourselves to be under the Pope or under the aegis of the Roman Catholic Church.''

The Archdiocese of Washington said Stalling's action means he will be excommunicated.

''Once he accepts the episcopacy in another denomination, he in effect excommunicates himself, according to canon law,'' said Wilbur Pinder, a spokesman with the archdiocese.

Stallings, who was a priest in Washington for more than a dozen years, will automatically be excommunicated when he names himself bishop of his new denomination, said Pinder.

''According to canons, until he accepts ordination as a bishop from another denomination, he's still just under suspension,'' Pinder said. ''Once he is ordained, it is automatic.''

Speaking at DePaul University in Chicago Thursday, Stallings said he didn't tell his archdiocese in advance because he ''didn't think they would care.''

''I exhausted all efforts to make a change through the church,'' Stallings told reporters following his speech. ''I came to that conclusion after I desperately sought to work within the confines of the church and met opposition.''

Cardinal James Hickey, Archbishop of Washington, was at odds with Stallings since before the controversial priest called the Catholic Church a ''white racist institution'' because of its attitudes toward black parishioners and the ranking of black priests within church hierarchy.

Stallings said the church failed to ''meet the spiritual and cultural needs of African-American Catholics.''

Hickey suspended Stallings last July because of a persistent ''act of disobedience,'' one month after the maverick priest started the Imani Temple. Imani is Swahili for ''faith.'' Stallings said two other temples opened last fall in Washington and Norfolk, Va.

Three other black Catholic priests have joined Stallings in his efforts and he boasted a congregation of about 2,500.

The African-American Catholic Congregation would be the first splinter group from the Catholic Church in the United States since the Polish National Church formed in 1904 in Pennsylvania.

''We will be independent, just as the Polish National Church,'' Stallings said. ''Still Catholic, but independent.''

The new church would ordain women as priests and allow priests to marry, Stallings said, in direct contradiction to two very controversial prohibitions of the Roman Catholic Church.

Stallings had said in November he would be consecrated a bishop of his independent African-American church within a year unless the church hierarchy recognized his new movement.

#90033u1332 02/02/1990 ~United Press International

BOGOTA, COLOMBIA (FEB. 2) UPI - Two U.S. drug enforcement jets have been flying reconnaissance flights over Colombian territory since Wednesday looking for secret airports and hidden drug cartel planes possibly armed with anti-aircraft missiles, a Civil Aeronautics Board official said Friday.

Earlier this week the board's operations chief, Col. Jorge Gonzalez, authorized the flights, refueling and maintainence stops at national airports for the U.S. Drug Enforcement Administration's Turbocharge Commanders, the board reported.

''It's a security mission to try to identify the airports and verify if on those planes there are missile-firing apparatus,'' an aeronautics official said.

A spokesman for the U.S. Embassy in Bogota confirmed the flights but would not give any details on their mission.

The U.S. planes, which can fly at altitudes up to 40,000 feet and speeds

of 250 knots per hour, are equipped with high-powered spy cameras that can capture images from high altitudes without being detected by radars, the aeronautics official said.

Two weeks ago CBS reported secret service agents were investigating accounts the notorious drug cartels were smuggling SA-7 shoulder-fired missiles into the country to shoot down Air Force One when President Bush arrives in Cartagena for the Andean drug summit in February.

The reports were later denied by both the Colombian government and the U.S. Embassy in Bogota.

Bush is to arrive Feb. 15, and will be flown by helicopter to Mazanillo Island, in the bay off Cartagena, for the meeting with the presidents of Colombia, Bolivia and possibly Peru to put together a hemispheric drug strategy.

Last week some 5,000 security agents began prowling the streets of the Caribbean port city to prevent a possible drug cartel attempt to sabotage the summit during Bush's five-hour visit.

A Defense Ministry official told reporters the flights were part of routine efforts to spot clandestine drug trafficker airstrips, though this time he said they were searching for planes possibly equipped with missiles.

Authorities Friday discovered the blindfolded, bullet-riddled bodies of 10 men and a woman some 25 miles outside of Bogota, a radio station reported.

Seven of the victims, so far unidentified, were found in Guayabetal, Cundinamarca state, while four others were discovered in nearby Chirajara, RCN radio said.

Investigators were dispatched to the area to identify the victims, who were apparently bound by their captors and then shot with 9 mm bullets.

According to the reports, which could not be immediately confirmed, residents in the Guayabetal rural district have reported finding about 30 unidentified cadavers in recent months in the area.

Last week authorities found 21 bodies dumped in or near Bogota in the last 10 days, according to undercover police reports. Investigators speculate the killings are related to vendettas between drug cartel hit squads.

Authorities say most of the recent victims, at least 47 in the last two months, have a history of terrorism, homocide and drug trafficking, El Tiempo newspaper reported.

Authorities have captured many traffickers, killed a Medellin cartel kingpin, Jose Gonzalo Rodriguez Gacha, and broken up much of the Medellin ring's private hit squads since President Virgilio Barco began the anti-cartel offensive last August. The all-out war was started after drug lord gunmen assassinated a leading presidential candidate.

The cocaine czars recently threatened in a communique to blow up a helicopter filled with 1,000 pounds of dynamite in front of a military target.

Also Friday, Interior Minister Carlos Lemos Simmonds met with Minister of Defense Oscar Botero and other military leaders to piece together a security plan for comming congressional and presidential elections.

Lemos told reporters the elections, for congress on March 11 and for president on May 27, would not be postponed because of drug cartel and leftist rebel violence. Botero said the army would guarantee the peace in ''critical regions'' of the country.

Press reports said Friday 143 people had been kidnapped by drug cartel hit squads and rampaging leftist guerrillas in January.

Of the 143 cases, 16 hostages have been rescued, 20 released after ransom was collected, eight were killed and 99 are still missing, El Tiempo newspaper reported.

The account blamed ''guerrilla groups, common criminals'' and drug cartel hit squads for the string of abductions, which reportedly earned some $5 million in ransom money.

(FEB. 2) UPI - World leaders Friday saluted Pretoria's decision to free Nelson Mandela and introduce sweeping reforms aimed at solving South Africa's racial conflict, but some anti-apartheid activists said the package does not go far enough.

Britain and the United States announced they would take steps to end Pretoria's international isolation following South African President Frederik de Klerk's announcement, which included lifting a 30-year-old ban on the African National Congress.

Senior ANC leaders converged on Stockholm to hold an emergency party caucus, possibly to decide whether they would officially retract their call for South Africa's black majority to take up arms against the government.

ANC Secretary-General Alfred Nzo and Communist Party leader Joe Slovo were en route from the Zambian capital of Lusaka for Sweden, where a large ANC delegation is currently visiting, an ANC official said.

ANC President Oliver Tambo, who is hospitalized in Sweden, welcomed de Klerk's announcement in a statement, but warned that many aspects of South Africa's repressive machinery would still remain intact.

''We are ... gravely concerned that the Pretoria regime has taken the decision that some political prisoners will not be released, that the state of emergency is not lifted in its entirety and that the practice of detention without trial will continue,'' the statement said.

''We therefore expect that no country committed to ending white minority domination in South Africa will do anything to lessen the isolation of the apartheid regime,'' it said.

However, President Bush told reporters aboard Air Force One he viewed the developments positively, and would talk to congressional leaders about reviewing various trade sanctions enacted against the white minority government.

''I think when people move in the right direction, it is time to review all policy,'' Bush said. ''It is certainly timely to review all policy.

''I want to see the development now of policies and I want to talk to the various leaders involved (in South Africa) and I'm sure we will have a lot of debate and discussion inside the administration about what the move by the administration ought to be,'' Bush said.

In London, Prime Minister Margaret Thatcher's office said the measures vindicated Britain's longstanding policy of refusing to impose any trade sanctions against South Africa.

''This is an historic landmark on a road to a new South Africa,'' Thatcher's office said in a statement. ''We look to the ANC and other groups to respond positively to the offer now being made to join in negotiations to work out a new constitution.''

The office announced that Thatcher invited de Klerk and Mandela to visit Britain to discuss the developments.

In Amherst, Mass., Maki Mandela - Mandela's eldest daughter - said she considered de Klerk's reforms ''really impressive, but I would hope it is not cosmetic.'' She warned, however, that pressure must continue until the apartheid form of government is eradicated.

''They shouldn't stop the pressure. Apartheid is not over today,'' said

Mandela, a doctoral candidate at the University of Massachusetts.

''The unbanning of the African National Congress and other anti-apartheid organizations and the release of political prisoners is undoubtedly the most significant highlight of de Klerk's speech and a clear indication that the white South African government is prepared to deal equally with the black majority,'' she said.

The French Foreign Ministry hailed Mandela's ''courage and dignity'' and called for swift implementation of de Klerk's scheme to bring about the larger goal of ''a non-racial, democratic regime.''

India, a fervent opponent of Pretoria, announced the formation of a ''National Reception Committee for the Release of Nelson Mandela'' to be headed by Prime Minister Vishwanath Pratap Singh and include ''eminent persons from all walks of life.''

Israeli Foreign Minister Moshe Arens welcomed ''the steps toward liberalization'' and said Jerusalem would ''follow favorably the process of reform taking place in South Africa.'' Israel and South Africa maintain close relations and critics of Israel's policy in the occupied territories have attempted to draw parallels with South Africa's apartheid system.

The West German government welcomed the measures, ''particularly the freeing of Nelson Mandela and the lifting of the existing bans on political parties and groups.''

In Brussels, the executive commission of the 12-nation European Community called on de Klerk to free Mandela ''without additional delay.''

''Dialogue with the participation of all the authentic representatives of the different components of the population of South Africa is indispensable for the creation of a new democratic and multiracial South Africa,'' an EC statement said.

Egyptian Minister of State for Foreign Affairs Butros Ghali said Cairo would provide ''all forms of aid'' to South African liberation movements in their dialogue with Pretoria, just as it had helped in their armed struggle.

Egypt currently chairs the Organization of African Unity (OAU), and Ghali said leaders of both the ANC and other South African opposition groups were expected to arrive in Cairo ''within the next few days'' for talks on a new OAU policy toward South Africa because of the reform plans.

In Geneva, two of the largest Swiss banks - Credit Suisse and the Swiss Bank Corp. - said the moves justified their staunch resistance to blocking loans to South Africa, despite numerous pleas from anti-apartheid groups.

TOKYO (FEB. 2) UPI - A Moscow-initiated project to build an optical fiber telecommunications line linking Japan and Europe via the Soviet Union moved forward when nine participating companies decided to form a consortium to review the plan, the Japanese partner said Friday. Kokusai Denshin Denwa Co., Japan's international telecom giant, said the decision was made at a three-day meeting held in Tokyo this week.

Represented at the meeting were nine telecom companies and organizations from eight countries, including the Soviet Union, the United States, Australia, Denmark, Britain, Italy, West Germany, and Japan, KDD said. Others, including France Telecom and Spain's Telefonica de Espana, showed interest in participating in the project, it said.

"The discussions still were in the very early stage of the project, and it is too early to say that it has got under way," said a spokesman for KDD. The official cited Western controls on exports of strategic materials to communist nations as a major hurdle to be cleared.

U.S. West International telecom company reported at the Tokyo meeting that it has been negotiating with the U.S. government over the matter. "The U.S. company has been negotiating with the U.S. government for an exemption of the project from the Western export regulations," the KDD spokesman said.

He referred to the Coordinating Committee for Export Controls, the Paris-based Western organization that regulates exports of strategic goods to communist countries. The spokesman said fiber optics and related equipment are placed under COCOM controls.

The project calls for construction of an optical fiber cable extending more than 10,560 miles from Japan to Western Europe via the Soviet Union. A submarine cable linking Japan and Siberia across the Sea of Japan will be extended to Moscow and to Europe. The cable will be used for international telephone and data transmission services.

Japan and Europe are currently linked mainly by telecommunications satellites and by undersea cables via the Indian Ocean and on the Pacific-North America-Atlantic network.

The project, when completed, will greatly improve the Soviet Union's international telephone service and stimulate foreign investment in the country, industry sources said.

Japan and Europe are currently linked mainly by telecommunications satellites and by submarine cables via the Indian Ocean and on the

Pacific-North America-Atlantic network.

The companies represented at the Tokyo meeting decided to set up a corporation to deal with sales, maintenance and management of the trans-Soviet line as early as possible, the KDD officer said.

He explained that the new company will conduct a survey to determine global demands for the project before the undertaking get under way. The project members decided to hold the next session in Munich, West Germany in late March, KDD said.

WASHINGTON (FEB. 2) UPI - Rates for 30-year fixed mortgages rose 0.12 percentage points this week while adjustable-rate mortgages rose by 0.04 percentage points, the Federal Home Loan Mortgage Corp. said Friday.

The agency, which buys mortgages from lenders and packages them as securities for sale to investors, said interest on fixed-rate loans rose to 10.17 percent this week, from 10.05 percent the week before. Adjustable-rate mortgages averaged 8.45 percent, up from 8.41 percent last week.

The fixed-rate average is for a 30-year loan covering 80 percent of a home's cost. The average adjustable-rate mortgage also is for 30 years but for 75 percent of the home price.

WARWICK, RI (FEB. 2) UPI - A faulty warning light aboard a USAir jetliner forced the pilot to abort his approach Friday to the runway at T.F. Green Airport, but the plane ultimately landed safely, airline officials said.

Flight 1671, a Boeing 737 carrying 26 people from Raleigh, N.C., to Providence, was making its final approach shortly before 10 a.m. when a red light warned the pilot of a problem with the left landing gear.

The pilot aborted the landing and flew by the control tower so traffic conrtollers could check the landing gear visually, said spokeswoman Susan Young.

No emergency was declared and the pilot was cleared for landing. The plane landed safely with all landing gear locked in the landing position, Young said.

USAir mechanics inspected the plane to correct the problem, she said.

The flight stopped in Washington, D.C., before its scheduled stop at the airport in Warwick.

(FEB. 2) UPI - TODAY'S PEOPLE:

LETTERMAN LOOKS AHEAD: What's in David Letterman's future? Letterman, who marked the eighth anniversary of ''Late Night'' with a prime-time special Thursday night, told the Los Angeles Times that after two more seasons he will determine whether he wants to continue with ''Late Night.'' Letterman still would like to host the ''Tonight'' show when Johnny Carson retires but if that job isn't offered, he'll pursue other options. ''I think that's when you can expect the first of what will probably be three mediocre movies from me,'' said Letterman, who signed a movie deal with Disney a few years back. ''I think I would devote my full attention to films. I can't imagine starting another talk show.'' Letterman says he recently turned down offers to jump to ABC and the Fox network.

HITTING THE ROAD TOGETHER: When Frank Sinatra and Don Rickles hit the road this summer, it will mark the first time the two have performed together. Sinatra and Rickles, who open their tour Aug. 17 in Sacramento, Calif., first met in a Hollywood club where Rickles was performing in 1957. ''I just saw your movie 'The Pride and the Passion,''' Rickles told Sinatra that night, ''and I want to tell you, the cannon's acting was great.''

HITTING THE BROADCASTING BOOTH TOGETHER: Tennis stars Chris Evert and Jimmy Connors are going to be together again - in an NBC broadcasting booth. Evert, 35, who retired from the pro circuit after last year's U.S. Open, will make her network debut in April at the Family Circle Cup in Hilton Head, S.C., and also will work the French Open and Wimbledon. Connors will make his NBC debut at the French Open and also will handle Wimbledon.

SWITCH STORY: The story of two Florida girls who were accidentally swapped shortly after birth and raised for a decade by the wrong biological parents was sold to a Hollywood production company this week for more than $100,000. ''We're talking big bucks here,'' said Bob Mays, who learned in 1989 that his 11-year-old daughter, Kimberly, actually was the biological offspring of Ernest and Regina Twigg. ''The movie (deal) was done for one reason: to generate money to pay attorneys' fees,'' said Mays, 44, a roofing supply salesman. ''This was financially devastating to us.'' Mays said the money also would pay for Kimberly's college education. Mays' biological daughter, Arlena, who was reared by the Twiggs, died in 1988 of a heart ailment.

GLIMPSES: Lisa Bonet of ''The Cosby Show'' has been summoned to court in New York on March 1. She allegedly kicked paparazzi Michael Wehrmann in the groin on Christmas Eve at Kennedy Airport ... Dennis Hopper has been busy lately. ''Flashback,'' in which he stars as a punkish '60s radical, just came out and ''The Hot Spot,'' which stars Don Johnson and Virginia Madsen under Hopper's direction, will be released in the fall. In April he goes to Washington to play a womanizing senator in love with Diane Keaton in ''Running Mates'' ... Stevie Wonder's Friday schedule included a performance at the Maryland State Prison. Marilyn McCoo and Billy Davis also agreed to appear as part of a program put together by Charles Colson, who started a prison ministry after being released from jail for his Watergate crimes.

#90033u1391 02/02/1990 ~United Press International

WASHINGTON (FEB. 2) UPI - Environmentalists accused President Bush Friday of breaking his environmental promises by threatening to veto the Senate clean air bill, which the administration contends is too costly for industry.

The environmentalists charged Senate Republicans, acting on behalf of the administration, have signaled they will block action on the clean air legislation unless the bill is weakened, particularly its strict limits on automobile tailpipe exhaust and toxic emissions from factories.

The broadside by the National Clean Air Coalition - an umbrella organization for the nation's major environmental groups - came as Senate action on the clean air legislation ground to a halt, largely due to GOP resistance.

Richard Ayres, chairman of the coalition, said while Bush had helped spark congressional action by proposing clean air legislation last June, he was now breaking his environmental promises by siding with industry against the Senate measure, which is tougher than Bush's bill.

''This is a pivotal point in the administration's role in this legislation '' Ayres told reporters. ''The administration is changing sides. The administration has broken faith with the promises it made last summer.''

The Senate has been considering the clean air bill for two weeks, but has acted on only two amendments because senators - mostly Republicans - have asked for more time to study the economic impact of the massive and complex legislation.

In response to those concerns, key senators and administration officials have gone behind closed doors over the last two days in an attempt to find compromises that will speed consideration of the legislation.

Late Thursday, Senate Democratic leader George Mitchell of Maine announced he would delay action on the bill until Tuesday because the backroom negotiations had been ''productive'' and some compromises might be possible.

Ayres said Mitchell, a strong supporter of the Senate bill, agreed to negotiate because Republicans have threatened a filibuster that could tie up the legislation for weeks.

Ayres said Mitchell was confident he had a majority of the 100-seat Senate to win votes on the key sections of the Senate bill that the administration has targeted for removal. However, Mitchell would need 60 votes to cut off a filibuster and move ahead on the bill.

Ayres said the administration forced the backroom negotiations because it recognized it would be ''politically suicidal'' for Senate Republicans to vote against strong environmental legislation on the Senate floor.

The coalition distributed an administration plan sent to all senators that called for eliminating these key provisions of the Senate bill:

-Unprecedented limits on car emissions of carbon dioxide, the main pollutant linked with global warming.

-Deep cuts in smog-related tailpipe emissions from cars after the year 2000.

-Requirements that industry reduce toxic emissions to cut cancer risk to the most exposed individual to at least one in 10,000. The administration wants to give the Environmental Protection Agency wide discretion on how far industry will have to go.

Ayres charged the administration is misleading senators by exaggerating the cost of the Senate legislation, which Bush claims would cost $42 billion a year in pollution control expenditures. In contrast, Bush says his clean air bill would cost $19 billion a year.

The administration cost estimates are similar to those made by industry groups, who charge the Senate bill would shut down many factories and impose huge costs on consumers while providing little additional environmental benefit over Bush's bill.

Ayres said the administration's cost estimates were ''phony'' because they were based on the assumption that industry would be stuck with using today's pollution-control technology.

He said the Senate bill gave industry at least 15 years to develop cheaper

ways to reduce toxic emissions and that even the Environmental Protection Agency had conceded it was ''unreasonable'' to assume that pollution-control technology would not improve over the next decade.

#90033u1393 02/02/1990 ~United Press International

ANCHORAGE, AK (FEB. 2) UPI - Because of the difficulty in finding 12 impartial jurors for the trial of fired Exxon Valdez skipper Joseph Hazelwood, the judge Friday allowed lawyers to reject more potential jurors beyond established limits.

But defense lawyers lost a bid to expand jury selection even further - questioning more potential jurors with the right to reject an even higher number before testimony begins in the March 24, 1989, Prince William Sound oil spill.

Jury selection was in its fourth day Friday in the trial of Hazelwood, 43, of Huntington, N.Y., facing more than seven years in prison and a $61,00 fine if convicted of operating the tanker while intoxicated, reckless endangerment, negligent discharge of oil and criminal mischief.

Superior Court Judge Karl Johnstone said he expected to empanel a jury plus several alternates Monday.

Four dozen prospective jurors quizzed by midday Friday knew about the case which the judge noted has received more publicity than any case in state history, but many expressed no opinion about who was to blame for the wreck and the 11 million gallon spill, America's worst.

''Of the jurors questioned, the majority had little or no opinion,'' Johnstone said. ''That's rather difficult to believe, frankly, with the notoriety of this case.''

Although jury selection was moving faster than predicted with more acceptable jurors passing the initial challenges than expected, defense lawyer Dick Madson voiced some uneasiness that people seemed almost eager to serve on the Hazelwood jury.

Johnstone has been wary of disqualifying jurors who have links to the spill, who are familiar with the spill publicity or who have some opinion about the case - forcing defense lawyers to use more of their challenges.

At the start of the trial, the defense was given 10 challenges - the right to reject any juror for any reason. By Friday morning the defense had used all 10 and asked for five more; Johnstone granted the defense two additional challenges.

The prosecution started with six challenges and Johnstone granted one more saying that many would-be jurors put some blame for the spill on the state and that he wanted to make sure the prosecution got a fair trial, too.

For every four jurors questioned, three were rejected either by the defense, the prosecution or the judge.

The initial jury pool of 90 included Exxon's chief biologist, an oil field worker, pilots who flew over the spill and who flew oil pipeline workers to camps, a legal secretary whose firm has oil spill cases, an employee of an insurance firm that made money insuring boats hired for the spill, a fishermen who lost money because of the spill and a nurse whose patients included potential witnesses and fishermen affected by the spill.

Others have included military men, store clerks, housewives, students, surgical technicians and accountants.

The judge also heard arguments Friday by the prosecution that the defense was withholding expert witness reports as the two sides traded charges that the other had disobeyed rules about turning over certain evidence.

#90033u1397 02/02/1990 ~United Press International

(FEB. 2) UPI - Black leaders in South Africa are reacting favorably to President de Klerk's decision to initiate far-reaching racial and political reforms... including lifting a 30-year ban on the African National Congress. Archbishop Desmond Tutu, the 1984 Nobel Peace laureate, said... ''We seem to be on the way to the new South Africa.'' Cleric Allan Boesak says he's ''extremely encouraged and surprised.''

Senior West German government officials are showing little enthusiasm for East German Prime Minister Modrow's plan toward German re-unification. The West Germans object because the plan would force Bonn to disengage from NATO in favor of a neutral Germany. West Germany's foreign minister will be in Washington, D-C, today for talks with Secretary of State Baker on the plan.

The Labor Department reports that the nation's UNemployment rate for January was a steady five-point-three percent... meaning six and one-half Million Americans were out of work. The latest figures are UNchanged for the past eight months. The department also reports that although the number of jobless showed little change, the number of lay-offs rose slightly.

Washington's timetable for a U-S troop pullout from Panama has cleared the way for Peruvian President Garcia to attend the Cartagena drug summit. A

key aide to Garcia says the withdrawal announcement in President Bush's State of the Union address removes what he called ''the main obstacle'' to Garcia's attendance. Garcia was one of the harshest critics of the U-S invasion.

#90033u1403 02/02/1990 ~United Press International

(FEB. 2) UPI - There's heavy fighting in Beirut this morning... as heavily armed troops of Christian leader General Michel Aoun launched an offensive against Christian militia-controlled areas of east Beirut. Witnesses say thousands of soldiers backed by armor and artillery met fierce resistance from the rival Christian Lebanese Forces militia. It's the third day of intra-Christian fighting.

You can break out that spring wardrobe. Punxsutawney Phil, the world's most famous weather forecasting groundhog... did NOT see his shadow this morning outside his West Pennsylvania burrow. According to legend... NO shadow means spring is just around the corner. About 15-hundred cheering fans welcomed Phil as he braved a light drizzle, fog and temperatures in the 30's.

The legend of Groundhog Day is based on an old Scottish poem... ''If Candlemas Day is bright and clear, there'll be Two Winters in the year.'' A few citizens in Punxsutawney began the tradition in the early 1880's by tramping in the woods to honor, and hunt, the groundhog. The first official trip to Punxsutawney Phil's legendary den was in 1887.

#90033u1405 02/02/1990 ~United Press International

WASHINGTON (FEB. 2) UPI - Undocumented spouses and children of legal immigrants will be allowed to stay in the United States if they can show they have been in the country since 1986, Immigration and Naturalization Service Commissioner Gene McNary said Friday.

The undocumented families, who have risked deportation by living in the United States, join the ranks of other illegal aliens who were granted amnesty under the Immigration Reform and Control Act of 1986.

''The argument can be made, convincingly I think, that those who came in after Nov. 6, 1986, would be in a position to benefit from their own wrongdoing,'' McNary said.

''I think we are being very sensitive and very humane,'' McNary said of the new policy, but added the INS will be intensifying its border patrols.

''We don't want to convey a message that all you have to do is get into

the United States illegally and you've got it made,'' he said. ''If you do that you're going to get invited into a detention facility.''

The change is aimed at correcting the INS's ''fairly nebulous'' guidelines which have caused confusion among immigrants, McNary said.

Effective Feb. 14, all undocumented husbands, wifes or children of immigrants already living legally in the United States will be allowed to stay without penalty if they can prove they have been in the country unlawfully since Nov. 6, 1986, and are not convicted felons.

The policy change brings new hope to many immigrants with pending deportation cases and will save them a struggle similar to that faced by a 7-year-old Mexican boy who was ordered to leave the country in October even though he was undergoing treatment for eye cancer in Dallas.

The boy's case ended up in the courts and last month a judge ruled he could remain in the United States.

Under the old policy, the INS reviewed case-by-case whether undocumented family members of legal aliens could stay in the country. Most, such as the Mexican boy, pleaded humanitarian reasons for why they should be granted permission to stay.

''The problem with the (former) policy is that it has not been evenly and uniformly enforced throughout the country,'' McNary said. ''We've found that some district directors are lenient and others are strict. This has resulted in many thousands of people who may be eligible for the benefit not applying because of confusion and fear that they might be deported if they came forward.''

Under the new policy, all undocumented spouses and children may remain as long as they meet the requirements. They also will be eligible to obtain work permits.

The families' cases will be reviewed annually to determine whether they may remain in the country. Subsequent deportation may occur if the legalized alien loses his or her status or if the family member commits a felony.

Children born since 1986 may remain in the United States as long as their parent maintains his or her status as a legal alien.

#90033u1412 02/02/1990 ~United Press International
BY VERNON SCOTT

HOLLYWOOD (FEB. 2) UPI - Director John Frankenheimer, thanks to glasnost, feels it is finally safe for filmmakers to portray Russians, even Soviet soldiers, as humans.

Frankenheimer, who directed such films as ''Birdman of Alcatraz,'' ''Seven Days in May'' and ''Black Sunday,'' recently completed ''The Fourth War'' about an American-Soviet confrontation.

The film treats both sides with an even hand.

''There's no way I could have made this picture 10 years ago, taking the point of view we take,'' Frankenheimer said.

''The leading Russian character is a fairly sympathetic individual. We'd have had trouble getting financing for the project and we could not have expected to do well at the box office unless the Russians were made to look less than human or the Americans less than sympathetic.

''I got away with it to a limited extent in 'The Manchurian Candidate,' but not to the degree that we do with 'The Fourth War,''' he said.

The screenplay is based on a Russian colonel who is no worse nor better than his American counterpart in a peace-threatening incident on the West German and Czechoslovakian border.

''Today ... it is no longer a black and white world where the citizens of one country are virtuous and the citizens of another are all bad,'' Frankenheimer said.

''Glasnost has changed the whole perception of Russians and communists in the United States. If I'd made 'The Fourth War' 20 years ago I'd have been labeled some kind of pinko or something.

''In fact, this picture might have been labeled communist propoganda in the old days. Yet one of the most admired men in this country today is a communist and his name is Mikhail Gorbachev. He's probably more admired here than in his own country.

''A climate of fairness has been established for writers and directors. We are free to show people as individuals, not cliches.

''On the other hand, it would have been easier to make this picture financially a decade ago because it is so hard to raise money these days for non-mainstream movies.

''I feel very lucky to have been able to make this film. I think it is going to be controversial. It's not in Hollywood's commercial tradition, aimed strictly for bottom-line grosses.

''The story deals with what happens to trained military commanders when war becomes obsolete. What do you do with these soldiers when the major powers dismantle their bases and cut back armed forces?

''Once these highly trained warriors become anachronistic, what do you do with them?

''The two colonels in the story are highly decorated heroes, veterans of wars they didn't win, who find themselves face-to-face. What do they do? They manage to make their own war.

''I know for a fact men like this exist because I talked to them at an Air Force base before I started making the film - fighter pilots itching to shoot down a Russian plane at a time when such a thing is out of the question.

''There are officers in both countries trained to despise each other, to hate everything the other country stands for.

''They were trained to kill in the arena of war. Like cockfighting, once the animal is trained and blooded in the heat of battle, it is difficult to change the orientation in a time of peace or glasnost.

''Everything they've ever believed in has been discredited, but they remain a necessary part of the country's military preparedness, to be used in another time and place.

''The changing tides of politics in Eastern Europe make the timing for 'The Fourth War' fantastic. The reality of what is happening over there focuses international attention on that part of the world.

''The time frame of our picture is 1988, just before these major political upheavals take place, but it was already a time of change.

''This isn't a war movie. It's an action story involving two very strong men that could take place anywhere, at any time.

''We don't cop out at the end. We resolve the explosive confrontation for purposes of the movie. We don't, however, attempt to answer the question of what becomes of these sort of men.''

Frankenheimer's stars are Roy Scheider in the role of the American and German actor Jurgen Prochnow, who learned to speak Russian, as the Soviet officer.

''Our timing couldn't be better,'' Frankenheimer said.

#90033u1421 02/02/1990 ~United Press International
CHICAGO (FEB. 2) UPI - The manufacturers of farm field equipment in the United States predict a seven percent increase in the dollar value of retail farm machinery sales this year, the Equipment Manufacturers Institute said Friday. They also forecast a five percent increase in retail sales of parts.

The association reported sales of farm equipment last year were about 20 percent higher in dollar volume than in 1988, primarily due to favorable weather, good commodity prices, increased acreage under cultivation, and purchases that had been delayed from the previous year.

"The positive financial outlook for agriculture can be expected to provide an environment that is favorable to continue the increase in farm equipment sales in 1990," the institute said in a news release. Manufacturers surveyed predicted retail sales of more than 110,000 farm tractors this year, which would be an increase of 3.3 percent over 1989.

Last year, EMI member manufacturers sold 106,386 tractors with those under 40 horsepower accounting for about 44 percent of the total. That percentage is expected to remain the same this year while sales of four-wheel-drive tractors are expected to improve slightly, the report said.

Sales of self-propelled combines were sharply higher last year - up 52 percent from 1988 - and manufacturers expect another 15 percent increase in 1990. Final figures were not available for tillage equipment sales last year, but were expected to show some increases over the previous year.

Companies that participated in the survey manufacture more than 90 percent of the field machinery and farmstead equipment sold in the United States. The Chicago-based EMI is the major trade association in North America for farm, construction, and industrial equipment manufacturers.

-30- 2008
#90033u1432 02/02/1990 ~United Press International
WASHINGTON (FEB. 2) UPI - About 40 percent of U.S. consumers say they always read labels before buying a food product for the first time, with sodium, fat and calorie levels being their top concerns, a survey showed Friday.

The poll of 1,000 consumers conducted for the National Food Processors Association also found that 39 percent of consumer sometimes read food labels before a first purchase, 12 percent rarely scan labels and 8 percent never take a look. As for repeat purchases, 18 percent of shoppers

always read labels and 45 percent sometimes check out labels.

More than 80 percent of respondents said label information has a ''great deal'' or ''some'' influence in their decision to buy a food, the trade industry group said.

The Food and Drug Administration is currently in the midst of revising its food labeling regulations. Other government attempts to require better nutritional information on food products have fallen by the wayside in recent years.

The food processors' poll, which it said is the first such study since a 1978 FDA survey, found that among label readers, the nutritional information most often sought concerned salt, fat, calorie, cholesterol and sugar.

Reasons for label reading ranged from getting general information, mentioned by about 40 percent of respondents, and avoiding ingredients, cited by 20 percent, to health reasons and avoiding preservatives, both about 5 percent.

The study, conducted by Opinion Research Corp., of Princeton, N.J., also asked 400 consumers to rank six label formats according to their helpfulness in making decisions about food purchases.

The prototype label receiving the highest approval rating, 80 percent, bears a nutrient list resembling those found on many breakfast cereals along with more information on fat, cholesterol and fiber, and a profile providing a clearer comparison between nutrient amount and recommended daily allowance.

#90033u1436 02/02/1990 ~United Press International

BUCHAREST, Romania (FEB. 2) UPI - Four former colleagues of executed

dictator Nicolae Ceausescu were sentenced Friday to life in prison for ordering troops to shoot protesters during the December revolt that toppled the Communist regime.

Soldiers and police encircled the Bucharest Military Academy during the sentencing by three military judges and two military assessors, apparently because authorities feared a possible assault by diehard Ceausescu loyalists.

Prosecutor Aurel Cosma asked for life terms for the four on charges of being ''co-authors of genocide'' for their involvement in the deaths of at least 689 people and the wounding of some 1,200 others during the December bloodshed. About 1,000 other people are still listed as missing.

Former Internal Affairs Minister Tudor Postelnicu, 59, and the former vice president of state, Manea Manescu, 74, immediately said they would appeal the sentences. The others sentenced were former Deputy Prime Minister Ion Dinca, 62, and Emil Bobu, 63, the former Communist Party secretary.

Cosma said the four were dangerous men who lived in palatial fortresses crammed with luxury goods in a nation afflicted by chronic food shortages and rationing.

''Not long ago they were calling Ceausescu their lord and high-esteemed comrade,'' observed Cosma about the defendants' pleas that the former president was a traitor and a tyrant.

The prosecution's case that the four were directly responsible for ordering secret police to use every means against the revolutionaries mostly hinged on shorthand notes taken during final Politburo meetings held Dec. 17-22.

Evidence was also provided by soldiers and one Politburo member, Paul Niculescu Mizil, an officer of the Securitate secret police given immunity in exchange for his testimony.

''You cannot know how long life will be,'' said Dinca, upon receiving his life sentence. ''I am an orthodox man and I will die an orthodox man. God save the people.''

He sat down and soon after suffered a heart spasm that caused him to crumple in his seat. As the pain eased, he began weeping, and a handkerchief failed to catch the tears from splashing onto his starched white shirt.

Manescu described himself during the trial as a timid man who had no knowledge of any killings, but he still pleaded guilty to the charges.

Portly Postelnicu inspired laughter from spectators when he told the judges to show some mercy because: ''I was brought into my job at an age when I just did not know what it meant.''

Bobu, wringing his hands so tightly the knuckles whitened, said he bitterly regretted his appearance in court.

''It is a very hard trial with historical and international importance,'' the former communist leader said. ''The nightmare of this will never leave me.''

Lawyers for the accused justified their decision to represent the men.

''I don't forget the graves, the candles and the memories,'' said Vasile Olaru, who represented Bobu. ''The young people were not cowards. Only they could make such a revolution. The old ones were tired, on their knees their souls had been tortured.''

#90033u1452 02/02/1990 ~United Press International

CHICAGO (FEB. 2) UPI - Commercial buying rallied wheat prices but other grain and soybean futures were pressured by follow-through selling and were mostly lower Friday on the Chicago Board of Trade.

Most of the buying in wheat was based on reports that China and Egypt were in the market for 550,000 tons of wheat.

Widespread precipitation in the Grain Belt limited the gains in new-crop wheat and kept the rest of the floor on the defensive. Additional rain or snow was predicted for the weekend and forecasters said there could be heavy snow in the Upper Midwest.

Corn was lower across the board. The precipitation improved the outlook for the corn crop, prompting most of the selling interest.

Soybeans were narrowly mixed in lackluster trading. The weakness in soybean oil and meal weighed on soybean values, although losses were limited by a slight increase in basis levels.

Country movement was light.

At the close, corn was off 3/4 to 2 1/4, soybeans up 1/2 to down 1 3/4, wheat up 1 to 3 3/4 and oats unchanged to up 1/2.

#90033u1457 02/02/1990 ~United Press International

NEW YORK (FEB. 2) UPI - The price New York state homeowners pay for heating oil, a bellwether for the entire Northeast, dropped five cents a gallon during the past week as continued warmer weather cut demand, the state's energy office said Friday.

The average statewide home heating oil price fell 5.3 cents to $1.153 a gallon for the week ended Thursday, still 22.6 cents higher than a year ago, office spokesman Gary Sheffer said. Following one of the coldest Decembers ever, the statewide average had risen to a high of $1.41 a gallon in early January.

Prices in the downstate region, which includes Long Island and New York City, fell 4.9 cents to an average of $1.197 a gallon, 20.3 cents higher than a year ago. Upstate prices averaged $1.096 a gallon, 5.9 cents less than a week ago, but 25.5 cents higher than a year ago.

This was the last of the New York weekly surveys, which were started in mid-December when prices started to escalate. The state's energy office is returning to its regular bi-weekly schedule, Sheffer said.

Federal officials have said that as much as ten cents of the increase could be accounted for by higher prices for crude oil, from which the heating oil is refined.

Northeastern governors have asked the federal government to investigate whether there was profitering by oil companies and distributors during the December price runup. Congress also is currently holding hearings.

#90033u1460 02/02/1990 ~United Press International

WASHINGTON (FEB. 2) UPI - President Bush said Friday the release of Nelson Mandela from a South African prison should prompt the United States to review its sanctions against the nation, but several top Democrats opposed any softening of attitude toward the apartheid regime.

Speaking to reporters aboard Air Force One as he traveled to North Carolina, Bush welcomed the announcement by South African President Frederik de Klerk to release Mandela and to lift the 30-year ban on the African National Congress.

Mandela, a 71-year-old black leader of the anti-apartheid movement in South Africa, was sentenced to life imprisonment in 1964 on sabotage charges. In his time in prison, Mandela became a strong symbol of the fight against the white-ruled government. De Klerk did not set a date for the release, but said it would be soon.

''I view it positively and I think most of the people around the world would,'' Bush said of de Klerk's announcement, adding that the South African president ''recognizes the status quo is not acceptable to him or the people of South Africa.''

''I want to talk to the leaders (of Congress) about the status of U.S. sanctions against South Africa,'' Bush said. ''I think when people move in the right direction, it is time to review all policy. It is certainly timely to review all policy.''

The president said he wants to quickly develop a policy toward South Africa that could be implemented soon after Mandela's release. ''I'm sure we will have a lot of debate and discussion inside the administration about what the move by the administration ought to be,'' he noted.

But congressional Democrats who pushed through the economic sanctions against the Pretoria government were cool to any suggestion that the penalties be eased, even though they praised de Klerk's action.

Sen. Edward Kennedy, D-Mass., said the sanctions ''unquestionably were instrumental'' in de Klerk's announcement and argued they should not be lifted until South Africa meets other specific conditions imposed by the legislation, including establishing a non-racial democracy and freeing political prisoners.

''The sanctions have proved their value in helping to bring the regime to the brink of meaningful negotiations,'' said Kennedy. ''To ensure good faith and further progress, the sanctions should be maintained in full force. This is no time to relax them.''

Kennedy's comments were echoed by Rep. Bill Gray, D-Pa., the assistant House Democratic leader, who said while de Klerk's announcement was welcome, ''Mr. Mandela's freedom is just one issue. The major question remains: When will South Africa's system of apartheid cease?''

Rep. Ron Dellums, D-Calif., another leading proponent of sanctions, stressed that de Klerk's steps ''laudable as they are, do not constitute

the establishment of freedom or true democracy for the black majority of South Africa. We must continue our push for worldwide comprehensive sanctions against the government of South Africa.''

Some sanctions against South Africa date back to the 1960s, although the bulk of the economic penalties were approved following a battle between Congress and President Reagan in 1986.

Sen. Paul Simon, D-Ill., head of a Senate subcommittee on African Affairs, praised de Klerk for ''setting a new tone.'' However, an aide said while Simon wanted to talk to Bush about U.S. policy, ''he doesn't think now is the time to be talking about lifting sanctions.''

Sen. Richard Lugar, R-Ind., who as chairman of the Senate Foreign Relations Committee in 1986 fought to toughen the sanctions proposed by Reagan, praised de Klerk and said it was appropriate for Bush to meet with congressional leaders so the United States would present a united policy. But he said any move to lift sanctions must be ''carefully evaluated.''

The White House said Thursday that if Mandela was released, he and de Klerk would be invited to the United States soon on separate visits.

But Kennedy said Friday it was ''entirely premature'' to invite De Klerk for a state visit because he still ''represents one of the most abhorrent systems - apartheid.''

#90033u1466 02/02/1990 ~United Press International

LISBON, Portugal (FEB. 2) UPI - Angolan troops backed by Soviet-supplied warplanes and armor have seized the strategic southeastern town of Mavinga from the U.S.-backed UNITA guerrillas after several days of fierce fighting, Portuguese news reports said Friday from the Angolan capital.

A rebel spokesman in Lisbon denied Mavinga and its air field, pivotal in the U.S. air bridge to resupply UNITA, had fallen but conceded government forces had broken through rebel defensive lines north of the town.

The Marxist government in Luanda maintained silence.

The Portuguese news agency Lusa and other media cited unidentified military sources in Luanda as saying Mavinga fell Wednesday with ''thousands of casualties'' on both sides.

A Western diplomat who closely follows the 14-year civil war from Lisbon said government forces had attacked Thursday afternoon along the outskirts of Mavinga but said he had no confirmation the rebel bastion had been overrun.

The diplomat, who asked not to be identified, said there were ''heavy losses in men and equipment'' on both sides since the army broke through UNITA's defense lines Monday on the Lomba River.

But, he said, the casualty reports from Luanda were ''exaggerated.''

UNITA spokesman Norberto Castro told reporters in Lisbon the fighting was taking place some 15 miles north of Mavinga, just south of the Lomba River.

He said the rebels had downed five helicopter gunships, three MiG-23 jetfighters and one Sukhoi-25 bomber since Tuesday.

UNITA leader Jonas Savimbi on Tuesday cut short a visit to Portugal and three other European countries to return to Angola because of the air raids.

In a speech on rebel radio monitored Friday in Luanda, Savimbi ordered his guerrillas into an ''all-out attack'' across the oil-producing country, threatening to take the conflict into Angola's cities.

Southeastern Mavinga, the gateway to UNITA's bush capital at Jamba, some 190 miles further south, dominates the rebels' supply routes into central and northern Angola.

Its airfield reportedly is the pivotal point for receiving U.S. weapons, including anti-aircraft Stinger missiles.

UNITA officials in Lisbon noted that Portuguese news reports from Luanda had announced the seizure of Mavinga ''at least three times'' during the past two weeks.

Luanda and its official news agency, Angop, have yet to comment on the reports or even officially acknowledge that a major offensive was underway.

The Angolan army deployed some 10,000 men, backed by Soviet-built aircraft and armor, against Mavinga last Dec. 23.

The United States, Soviet Union, Portugal, colonial ruler of Angola until 1975, and several African countries led by Zaire have intensified efforts to bring the warring sides to the negotiating table.

Last June 22 Zairean President Mobuto Sese Seko brought Savimbi and Angolan President Jose Eduardo dos Santos to an unprecedented handshake agreement on a cease-fire but the accord quickly collapsed into escalated fighting.

#90033u1470 02/02/1990 ~United Press International

WASHINGTON (FEB. 2) UPI - Drug policy director William Bennett said Friday the nation should finish up the war on drugs ''in a few years'' and giving his post Cabinet status would be ''almost an admission we're not going to win.''

''We have the attention of the president and that is all we need,'' Bennett told Senate Judiciary Committee members who expressed concern his office does not have enough clout.

While Democrats on the committee generally complimented Bennett on his first year as director of the national office for drug control policy, there were were frequent calls for greater emphasis on educating children about the dangers of drug abuse.

Bennett pledged a vigorous, comprehensive attack as he presented President Bush's $10.6 billion anti-drug budget request, a 12 percent increase over current spending.

When the special drug policy office was created, Bush did not give it Cabinet rank, saying it was not necessary. But Democrats have argued Bennett does not have the clout he needs to win battles with other agencies for scarce federal dollars.

Bennett, rejecting that view, said he is not a ''weak, stumbling petitioner'' for money in the administration's budget deliberations.

''This should not be a permanent job,'' Bennett said. ''We should have this all over in a few years. By making it the status of the Cabinet, it is almost an admission we're not going to win this damn thing. I think we will.''

Bennett, recalling that last year he was uncertain if America could win the war against drugs, said Friday, ''The war is by no means over, but it is clearly winnable and the momentum is shifting our way.

''Indeed, while there is still too much bad news, there are scattered but very clear signs that we are beginning to win. The scourge is beginning to pass.''

He said reported drug use is down by more than 50 percent, arrests of drug traffickers are rising, and more shipments of narcotics are being seized.

''I think we're at Midway,'' Bennett said, referring to the World War II battle that was a turning point in the Pacific. ''There is still a long way to go, there will still be more casualties.''

Sen. Edward Kennedy, D-Mass., in a exchange similar to one he had with Bennett at a hearing last year, called for an increased effort to combat drugs in the classroom and schoolyards, then questioned him sharply about the administration's policy on stopping the importation of semiautomatic pistols.

Kennedy said Bennett deserves credit for persuading Bush to ban imports of semiautomatic rifles, but was being ''silent'' about fast-firing handguns that also ''spew forth death.''

Bennett said he had given Bush his private advice on the subject, and that it should rest there.

''Has the White House told you to be quiet,'' Kennedy asked.

''No,'' Bennett said in a voice as sharp as Kennedy's. ''I think it's a complicated issue - you don't. The problem I have is with people who use long (barrel) guns, short guns, to commit drug crimes.''

''It's a cheap symbolic victory you're interested in, senator,'' Bennet said. ''The world is awash in guns.''

MILWAUKEE (FEB. 2) UPI - Sunny, a groundhog shipped in from Waupun, Wis., refused to participate in Groundhog Day festivities at the county zoo Friday and escaped from his cage, officials said.

It took Milwaukee County officials five to 10 minutes to recapture Sunny, who hid in some bushes.

''It added a little excitement to the festivities,'' said Laura Pedriani, a spokeswoman at the zoo. ''I think he was a little more into sleeping and hibernating than predicting the coming of spring.

''He's not a trained groundhog. We thought he wouldn't be very active because he was hibernating,'' she said. ''He got nervous and went into the bushes.''

Sunny, who was sent back to Waupun Friday afternoon, did not see his shadow.

Don't expect Sunny to be invited back next year. Pedriani said the zoo

would like to get a trained groundhog next Feb. 2.

BY VERNON SCOTT

HOLLYWOOD (FEB. 2) UPI - Ernest Borgnine gave himself a 73rd birthday present last month that will literally take him away from it all - a 40-foot motorhome custom designed with virtually all the comforts of home.

A veteran of some 90 movies and countless television shows over the past 40 years, the husky character actor plans to work less in order to tour the country in mobile luxury.

Borgnine will continue to make his headquarters in his aerie high above Beverly Hills with wife Tove, but whenever he hears the call of the road he plans to jump into his $400,000 bus and head for the open spaces.

''All my friends have vacation homes,'' he said, ''but I couldn't make up my mind whether I wanted to build a chalet high in the Rockies, buy a cottage on a deserted beach or settle for a place on the desert in Palm Springs.

''I couldn't afford all three and I thought maybe I'd get tired of just one place. With this bus I can have a change of scene any time I want.''

The bus has a kitchen, a sitting room, a complete bathroom, bedroom and a driver's compartment.

''If I want to take friends along, there's room for seven or eight passengers who can travel in comfort,'' he said.

The bus has a refrigerator, freezer, stove, microwave, TV sets and a cellular telephone. Its interior is finished in walnut. It has Venetian blinds on all the windows and an 11-foot-high ceiling.

''It is equipped with compressors and generators so I never have to hook up to electrical or plumbing outlets,'' he said. ''It makes me completely independent.''

Borgnine said he's reached an age when people are tempted to affix themselves to an easy chair in front of a television set.

''I don't want to be tied down to a sedentary existence, wasting my life away,'' he explained. ''I plan to get out and see people and visit my country to find out what makes things click.

''I want to be in New England in the fall. I'll visit relatives in New Haven. I want to see Maine, drive through the South, visit the Midwest and enjoy the national parks. There will always be a change of scenery.

''I'll do the driving myself. The bus is as easy to drive as a baby carriage. The great thing about it is I can pull over and go to sleep if I get tired. I can stop anyplace that interests me and stay as long as I want.

''This way I won't have to worry about reservations or getting all dressed up. It will be the most wonderful life in the world.

''If I work in a movie on location, I can drive to the place and live in my bus. I'm one of the best cooks in the world, so I won't have to eat location meals.

''I love people and people always seem glad to see me. The bus will give me the opportunity to get out there and mingle and make friends. That's what life is all about.

Borgnine, who won the Oscar for best actor in 1955 ''Marty'', is far from retiring, however.

His most recent picture is ''Oceano,'' which is still in post-production in Italy. He also completed a German flick filmed in Africa. He stars in the as-yet unreleased movie ''Real Men Don't Eat Gummi Bears,'' made for a German company in the Canary Islands.

''I've spent a lot of time abroad making pictures in the past three or four years,'' he said. ''Not all of them have been released in this country. One of the reasons I work for foreign producers is that in this country actors are quickly forgotten. I'm sure there are casting directors in Hollywood who don't even know who I am.

''Europeans are more loyal to stars and keep them working and in the public eye much longer than in this town.

''It's fun working in foreign films. There's more screaming on the set of Italian pictures and the Germans are very efficient, bang-bang-bang and it's done.

''Thanks to movie locations I've seen most of the interesting places in the world, but I don't know if I want to be as busy in the future.

''It's time for me to see more of my own country, and my new bus will allow me to do just that.

''If I don't like the weather in one place, I can just put the bus in gear

and head for another spot. If anybody sees me pulling to a stop and they want to chat, I'll be happy to see 'em.''

WASHINGTON (FEB. 2) UPI - Federal and state banking authorities seized control Friday of CenTrust Bank of Miami and placed the troubled savings institution under conservatorship, the Office of Thrift Supervision said.

The action "in no way affects depositors" access to their money, OTC spokesman Tom Mason said. Centrust chairman David Paul "was relieved of management responsibility" and replaced by Kurt Wierschem, he said.

"We took it down basically because it was an unsafe or unsound condition to transact business and had grave capital and other financial problems," he said, adding the Florida's comptroller office also took part in the action with the OTS.

The $8.2 billion institution - the largest thrift in the southeastern United States and the 23rd largest in the nation - will be managed by the Resolution Trust Corporation under the federal conservatorship program, Mason said.

The thrift seizure Friday was the latest in a series of savings institutions to be taken over by federal officials, who assured CenTrust's customers that their accounts are safe and insured by the government. "The action in no way affects depositors ability to transact business as usual during the thrifts normal hours of operations," Mason said.

In addition to Wierschem, Charles Stumberger was appointed CenTrust's new chief credit officer, and Stuart Rooney was appointed the savings institutions new chief financial officer, Mason said.

Regulators slapped CenTrust with a trading suspension because of what they described as concerns over the thrift's financial reporting. The trading suspension took effect Jan. 23, and expired midnight Monday. The OTS said CenTrust would be insolvent if its financial reports conformed to generally accepted accounting procedures.

At the time CenTrust reacted angrily to the halt, saying the suspension was part of a continuing effort by regulators to force it out of business. CenTrust also said the accounting treatment urged by regulators is neither required by generally accepted accounting principles, nor used by most financial institutions.

Embattled CenTrust was the subject of more adverse publicity last week, when it was reported the Securities and Exchange Commission, IRS, and

Justice Department were investigating regulators' allegations that Paul misappropriated CenTrust assets.

Reports also indicated the SEC is investigating business links between CenTrust, junk bond king Michael Milken and Charles Keating Jr., the central figure in the $2.5 billion collapse of Lincoln Savings and Loan.

TOKYO (FEB. 2) UPI - Most national travel offices try to generate income through tourism, but the Japan National Tourist Organization has set the unusual goal of helping travelers spend less money, tourist officials said Friday.

The National Tourist Organization has mounted a campaign to demonstrate to travelers Japan is not as pricey as is often reported.

On Feb. 23, the tourist office will announce the results of a survey that shows Tokyo is less expensive for travelers than several major cities in Europe and the United States.

Japanese tourist officials say their sole goal now is to foster understanding through travel, not just to bring in dollars.

''I don't care how much money foreign travelers spend in Japan,'' said Tsuneaki Iki, vice president of the government-funded tourist organization. ''It is more important for us to gain understanding than foreign currency.''

To seek money through tourism would be unseemly at a time when Japan is flush with foreign money gained through trade surpluses, Iki said.

''When we were established in 1959 we needed foreign currency,'' he said. ''But the picture has changed. If we seek more money now, we are doing an injustice.''

The tourist office has published several pamphlets on cheap travel which direct foreign visitors to inexpensive hotels, restaurants and bars.

The campaign fits nicely into Japan's stated goal of reducing its trade surplus.

Under pressure from the United States and other countries, Japanese leaders have pledged to cut Japan's trade surplus and travel is proving to be an effective means of accomplishing that goal.

In 1989, nearly 10 million Japanese traveled abroad for both business and

pleasure while only 2.8 million foreigners visited Japan.

The result in economic terms was Japanese travelers spent nearly $20 billion more overseas than foreign travelers spent in Japan, according to Finance Ministry figures released Friday.

The travel deficit helped bring down Japan's overall trade surplus by nearly 30 percent to $57 billion in 1989, the Finance Ministry said.

The number of Japanese traveling overseas has nearly doubled in the past three years.

The number of foreigners visiting Japan is also on the rise but at a slower rate.

Tourism in Japan was hurt by the drop in the value of foreign currencies against the Japanese yen which in effect doubled prices for foreign visitors.

Nevertheless travel to Japan increased 20 percent in 1989, with most of the increase coming from Koreans who were recently given more freedom to travel to Japan.

The National Tourist Organization welcomed the increase not because of the income the tourist generated but the understanding they hopefully gained.

Surveys conducted by the travel office show most visitors leave Japan with a more positive image than when they arrived.

Japan is searching for ways to improve its image abroad which has been sagging because of the aggressive trade and business practices of Japanese companies.

SANTIAGO, Chile (FEB. 2) UPI - Military President Augusto Pinochet began a farewell tour of the country Friday to close out his 16 years of rule that ends March 11 when the opposition to his government assumes the presidency.

Pinochet, a 74-year-old general, arrived in Arica, 1,275 miles north of Santiago, as the first stop in a tour that will take him to all regions of the country he has ruled since sweeping to power in a 1973 coup d'etat.

After his arrival, Pinochet rode in an open vehicle painted with the words ''Mission Completed,'' the slogan the military government has chosen to mark the end of its rule.

The slogan also refers to the task the military believes it carried out in ousting the chaotic government of Socialist President Salvador Allende, the hemisphere's first democratically elected Marxist head of state.

Pinochet was defeated in an Oct. 5, 1988, plebiscite against his continued rule and forced by the constitution to call an open election last December.

Opposition presidential candidate Patricio Aylwin, backed by a coalition of political parties, labor and professional groups, easily won the election and will assume office March 11.

The national television channel showed a crowd of undetermined size greeting Pinochet in Arica. A dinner in his honor was planned for Friday night.

Pinochet reminisced with reporters on his arrival about his tour of duty in the area with the army early in his career, and he said that assured him of the affection of local citizens.

''I am grateful to be in Arica, as it is here that I begin my goodbye to the rest of the country,'' he said.

Col. Cristian Labbe, government general secretary, said events honoring Pinochet will be held throughout February in most of the nation's major cities.

#90033u1610 02/02/1990 ~United Press International

MOSCOW (FEB. 2) UPI - Soviet leader Mikhail Gorbachev has blessed plans for a step-by-step approach to a German confederation and possible reunification in some form, visiting East German communist leader Gregor Gysi said Friday.

In the clearest indication yet the Kremlin has shifted its thinking on the German question, Gysi said Gorbachev told him he did not oppose a cautious stage-by-stage approach to the issue within the context of a new Europe.

Asked exactly what Gorbachev said on reunification, Gysi carefully avoided putting the word ''reunification'' into Gorbachev's mouth and replied, ''Mikhail Gorbachev said that we should find a step-by-step, stage-by-stage solution to the European problem.''

Gysi said Gorbachev sees the German problem as part of a greater European problem. But he said his Socialist Unity Party's concept of a reunited Germany does not imply the end of East German sovereignty.

He also said he did not understand how the Germanys could be reunited without a resolution of NATO or Warsaw Pact membership.

''One country cannot leave a bloc and the other remain in another one,'' Gysi said, ending a one-day visit to Moscow.

Soviet Foreign Minister Eduard Shevardnadze spelled out what he said was Soviet policy toward German reunification and linked Soviet approval to the military neutrality of both German states.

''All peoples, especially those of the Soviet Union, must have a guarantee that the threat of war will never come from German soil,'' he said in aninterview with the official Tass news agency, Novosti and the two main Communist daily newspapers.

''The Soviet Foreign Minister believes that it was correct to raise the problem of the need for proclaiming military neutrality by both states and implementing by them practical measures to reduce the level of armament and to achieve the demilitarization of both states,'' Tass said.

''Reliable political, legal and material guarantees are needed that German unity will not create in the future a threat to the security of other countries and peace in Europe... We favor the eventual creation of united, peaceful, democratic Germany,'' Shevardnadze said.

He also said any Germany would have to recognize post-war borders - a reference to the Oder-Neisse line of Poland's western border, which Bonn has never officially guaranteed.

The visit by the reform-minded Gysi, who is chairman of the newly reconstituted Communist Party, came three days after Prime Minister Hans Modrow's Moscow visit. Gysi stressed his invitation dated back to December.

Modrow apparently was told of some kind of concession from Gorbachev on possible German reunification. In informal remarks to journalists, the Soviet leader indicated there is ''no doubt'' about the possibility of reunification in future.

Gysi said that in his view, East and West Germany should always be separate states but that both sides could begin building some kind of confederation - the suggestion of West Geman Chancellor Helmut Kohl.

He repeated his party's recently adopted position that East Germany should never lose its ''socio-democratic'' identity.

He continually stressed that the approach would have to be very cautious - ''taking into account the interests of all other European countries.''

''We should not do anything that creates difficulties for military organizations. The two Germanys should not increase instability in Europe '' he said.

Gysi said other topics discussed with the Soviet leader included disarmament, economic development and ''the process of democratization going on in both countries.''

LIMA, Peru (FEB. 2) UPI - President Alan Garcia announced Friday he will attend the Feb. 15 Cartagena, Colombia, cocaine summit he had threatened to boycott because of the U.S. invasion of Panama.

Garcia cited President Bush's statement Wednesday night in his State of the Union address that U.S. troops sent to Panama for the December 20 invasion would be removed by the end of February.

The Bush announcement ''removes one of the fundamental obstacles that made our presence in Cartagena difficult,'' the Peruvian president said.

Garcia has been one of the strongest critics of the U.S. invasion in Latin America, where strong resentment builds over any U.S. interference in the internal affairs of a nation.

Garcia said Peru had ''promoted, tried to arrange and achieved the formation of the summit in order to achieve a plan of common action against narcotics trafficking.''

But after the U.S. invasion Peru took the position that ''as long as there were invading soldiers or there was no concrete offer to withdraw that it was very difficult to sit cordially to discuss or to work together in a dignified manner,'' Garcia said.

His decision assures the attendence of the leaders the three South American nations that produce most of the world's cocaine and of Bush, leader of the nation that consumes the most. They are to form a common plan of action against drug production and consumption.

Joining Bush and Garcia in the Colombian resort city will be President Virgilio Barco of Colombia and Bolivian President Jaime Paz Zamora.

#90033u1628 02/02/1990 ~United Press International

(FEB. 2) UPI - South African President Frederik de Klerk lifted the 30-year ban on the African National Congress and vows to free Nelson Mandela soon to meet demands of the black majority. It's the most substantial racial reform in South Africa since 1948 when the discriminatory laws known as apartheid took effect. The reforms could clear the way for talks to settle South Africa's protracted racial conflict.

President Bush is hailing the South African moves as ''quite positive,'' and he indicated that it might be time to review U-S sanctions against the white-minority government. Bush says South Africa appears to be moving ''in the right direction,'' and he wants to talk to congressional leaders about the status of the sanctions.

The Labor Department reports that the civilian unemployment rate was unchanged in January because mild weather boosted construction employment to offset jobs lost at a temporarily idled auto plant. The January jobless rate held steady at five-point-three percent, with six-Million 500-thousand Americans out of work.

The Commerce Department says factory output surged one-point-nine percent

in December, to 244-point-two-BILLION dollars, boosted by orders for planes, ships and tanks. Manufacturers' inventories slid four-tenths of one percent, to 371-point-five-BILLION dollars, the first drop since September and the largest decline since September 1986.

(FEB. 2) UPI - It could have been a scene from a Hollywood movie, but it wasn't. A Northwest Airlines D-C-10 with an engine on fire returned to Los Angeles International Airport just after take-off and landed safely. The plane with 110 people aboard had taken off for Minneapolis. After the flames were spotted, the pilot shut down the left engine, dumped the plane's fuel over the ocean and landed.

Punxsutawney Phil, the world's most famous groundhog, failed to see his shadow today when he emerged from his burrow. And the legend says that means that spring is near. If he'd seen his shadow, according to true believers, it would have meant six more weeks of winter. It's the 103rd time the Pennsylvania groundhog has scurried out of his burrow in Jefferson County to predict the weather.

A liberal member of Bulgaria's Politburo will lead the country's embattled Communist Party. Alexander Lilov was elected early today during an all-night final session of an extraordinary party congress. His election caps a dramatic reshuffling of the party leadership and signals victory for advocates of radical reform. The leadership change comes hours after the resignation of Prime Minister Georgi Atanasov and his entire Cabinet.

In Azerbaijan, leaders of the nationalist Popular Front are demanding that Moscow withdraw its troops from the strife-torn republic. Front leaders told a news conference in the capital of Baku today that they also want a timetable for the withdrawal of Red Army forces, the lifting of the declared state of emergency in Azerbaijan and the release of all prisoners. Soviet troops stormed into Baku on January 20th to halt bloody ethnic riots between Azerbaijanis and Armenians.

#90033u1671 02/02/1990 ~United Press International

NEW YORK (FEB. 2) UPI - Lawyers for an AIDS-afflicted doctor suing the city for negligence called their last two witnesses Friday and claimed they had proved a city hospital was careless in disposing of infectious wastes.

Dr. Veronica Prego is suing in state Supreme Court in Brooklyn the city's Health and Hospitals Corp., claiming she contracted the disease from a needle left carelessly at Kings County Hospital.

Prego's Attorney, Diane Wilner, said she felt good about the case. She said she had shown that the hospital was negligent in its treatment of infectious waste.

''We've shown that if a box had been available beside the bedside then (health care workers) could have just dropped the needles into the box and nobody would be in this courthouse today,'' Wilner said.

Defense attorney Stanley Friedman said he was looking forward to presenting his case next week.

''Sympathy is one thing but I don't believe at the end of the case that the jury will think Dr. Prego is worthy of a verdict'' in her favor, Friedman said.

Dr. Joyce Fogel, the intern Prego claims left the needle in the bed, is expected to take the stand next week.

Earlier in the day, Dr. Conrad Berenson, a professor at the Columbia University Graduate School of Business, testified that Prego could have made up to $30 million in her estimated lifetime of 32.8 years, depending on which part of the country she lived in and her annual wage increase.

The findings are meant to give a guildline to the jury who will award her damages for income lost if she wins the case.

Prego is also suing Dr. Sheldon Landesman, an AIDS researcher, for allegedly disclosing the results of his state-sponsored study that found Prego had AIDS.

The doctor said she was told not to rent to Prego because she was infected with AIDS.

#90033u1704 02/02/1990 ~United Press International

SAN SALVADOR, El Salvador (FEB. 2) UPI - A group of 32 rebels wounded in the country's decade-long civil war rejected Friday a government amnesty that would allow them to seek medical treatment in a foreign country.

''We do not accept this amnesty proposal,'' said a spokesman for the group who asked to be identified only as Jose.

The amnesty was approved Thursday by the Salvadoran legislature, and would allow the rebels safe conduct to the airport from the church were they have been holed up since Nov. 7.

The former fighters, many having lost limbs in their guerrilla war against the U.S.-backed Salvadoran government, say leaving the country under an amnesty would brand them as criminals rather than combatants.

''We maintain our position of leaving under the Geneva Convention,'' Jose said in a telephone interview. ''We are not criminals, but fighters for a free country, without repression.''

The Geneva Convention of 1864 establishes rules for the treatment of prisoners of war and the sick and wounded. The international treaty, which has been signed by El Salvador, states that war wounded should be allowed to seek medical treatment. But the Salvadoran government has never officially recognized the country's internal conflict as a war, and refers to the rebels as ''criminals'' or ''terrorists.''

El Salvador has suffered through a decade of civil war that has killed more than 72,000 people, most of them civilians.

Ricardo Alvarenga Valdivieso, president of the Legislative Assembly, told reporters the amnesty was a ''good faith'' initiative on the part of President Alfredo Cristiani, who is currently on an official visit to the United States.

Cristiani met with U.N. Secretary-General Javier Perez de Cuellar in New York to help get El Salvador's stalled peace process back on track, and met with President Bush and congressional leaders in Washington to plug for a continuation of military and economic aid.

The rebel war wounded have occupied the Calvario cathedral in downtown San Salvador since Nov. 7. Government troops stand guard outside the Catholic church but have respected it as a sanctuary.

Although church leaders complain about the occupation, saying the rebel presence renders the large building useless for worship, they have not asked that the disabled fighters be removed.

A similar standoff between the government and a group of 48 rebel disabled ended peacefully last Oct. 7, when the rebels were evacuated to Cuba after occupying San Salvador's main cathedral for 1 1/2 months, and then the Mexican Embassy for several days.

The FMLN insisted that the ex-fighters left under rules of the Geneva Convention, and the government maintained they were allowed to leave under a special amnesty granted by the Legislative Assembly.

#90033u1712 02/02/1990 ~United Press International

LONDON (FEB. 2) UPI - Austro-Hungarian prisoners of war may have been used to kill Czar Nicholas II and his family in 1918 in the Russian town of Ekaterinburg, photographs and documents revealed Friday showed.

Sotheby's said it expects to fetch up to $830,000 in April for the cache of information compiled by Nikolai Sokolov, who served as an investigator for the White Russian army.

When Ekaterinburg fell into the hands of the advancing monarchists, Sokolov collected notes, bills and telegrams left behind at the local telegraph office by the retreating Bolsheviks, their enemies in a civil war that raged after the revolution.

A coded telegram sent to the Kremlin on July 17, 1918 - the day of the murders of Nicholas, his wife Alexandra and their five children - read: ''Tell Sverdlov the entire family suffered the same fate as its head. Officially the family will perish in evacuation.''

The Kremlin officially stated at the time that the czar had been shot by a rebel group of Soviet revolutionaries and that the rest of the family had been taken into safe hiding.

Although several stories have circulated about how the family died, photographs showed bullet-pocked stairs and cellar of the house where the imperial prisoners were kept.

A fragment of yellow and cream wallpaper from the basement room is inscribed in German with a line from Heinrich Heine's poem, ''Belshazzar.''

''On that very night Belshazzar was murdered by his slaves,'' the message read.

Sotheby's speculates that because this is written in German suggests former Austro-Hungarian prisoners of war, who had since signed up with the Bolsheviks, were used to carry out the killing.

The current owner of the papers - a descendant of Prince Vladimir Orlov, who inherited the archive on Sokolov's death in 1920 - did not understand their significance until she brought them to Sothebys last year.

The documents also contain notes and receipts possibly linked to the logistics of staging the massacre. Among the evidence is a bill for 358 pounds of sulfuric acid, which Sotheby's said could have been used to decompose the seven bodies.

WASHINGTON (FEB. 2) UPI - The technology exists to detect the kind of bomb that blew a Pan Am jetliner out of the sky over Lockerbie, Scotland, but terrorists may well stay a step ahead in the years it takes to develop, experts said Friday.

''We can't stop because the terrorists will not stop,'' Lee Grodzins, a consultant to the Federal Aviation Administration, told the President's Commission on Aviation Security and Terrorism.

Grodzins, a physics professor at Massachusetts Institute of Technology, was one of several experts to testify on the technology available for detecting terrorists bombs at the third hearing of the special panel.

The commission was formed after the December 1988 bombing of Pan Am Flight 103 that killed all 259 people aboard and 11 on the ground in Lockerbie, Scotland. Investigators determined the explosion was the result of a sophisticated plastic-type bomb placed in baggage by terrorists.

To date, the only screening system commercially available that can detect such plastic exlosives is the thermal neutron analysis, or TNA, system. The FAA is currently testing the first TNA device at Kennedy Airport in New York and plans to install five others at ''high risk'' airports in the United States and abroad.

Sen. Alphonse D'Amato, R-N.Y., a member of the commission, expressed reservations about the emphasis on the costly TNA system and its ability to keep up with the innovations of terrorists intent on bombing airplanes.

''It seems to me we've been placing all our eggs in one basket with this TNA,'' D'Amato said. ''I'm going back to my collegaues (in Congress) and say 'fellows, we better stop this thing.'''

While Grodzins and other experts agreed that there are other systems in development that would be superior, they supported further testing and use of the TNA in the interim. ''It certainly seems to be the only game in town at this time,'' said Allen Garroway, a physicist at the Naval Research Laboratory.

Grodzin said he was pleased the TNA will be installed in six airports, but addded, ''There are certain ways that you could fool the system.''

Grodzin, Garroway and FAA officials indicated the ''resonance absorption'' system being developed by Israelis appears to be the front-runner among detection technologies currrently being explored. But that system, which uses gamma rays to detect the high concentration of nitrogen in explosives is still at least two to three years and millions of dollars away from commercial development.

Monte Belger, associate administrator for FAA's aviation standards, said the biggest problem remains staying a step ahead of terrorists, who after devices were developed to detect plastic handguns, turned to explosives.

''As we make improvements in one area, that leads the terrorists to explore other areas,'' he said.

Noting that some half-billion passengers take more than a billion pieces of luggage on air trips annually, Garroway described the detection problem as ''the bewilderment of searching in the dark for something that usually is not there.''

New technology, he said, ''will reduce the probability of another Pan Am 103,'' but ''... it will not make the problem go away.''

PENSACOLA, FL (FEB. 2) UPI - A light plane carrying two people who appeared to be on a hunting trip with their dogs crashed into a house in a residential area shortly after takeoff Friday, killing everyone aboard, authorities said.

The Beechcraft Baron, a twin-engine plane used in general aviation, took off at 11:25 a.m. CST from Pensacola Regional Airport bound for Lake Charles, La., air traffic controllers said. The plane vanished from radar at 11:27 a.m. CST.

The pilot, who apparently was experiencing mechanical difficulties, turned the plane around and was heading back to the airport when it crashed into a house in the East Hill District, a quiet residential area of single-family homes, city spokesman Carlton Proctor said. There was no one in the house.

The plane apparently came in at a steep angle, just missing another house and breaking a tree in the back yard. It crashed through a fence and cut a deep furrow in the yard. The fuselage skidded into the house and exploded.

''There are body parts all over the place. I don't think there's a chance in the world there were any survivors,'' Proctor said, adding there were two people in the plane. Their names were not immediately available.

It was the second plane to crash in a residential area of Pensacola in less than a year.

Heavy fog was reported in the area, with visibility from one-sixteenth to a half-mile, said Fred Gonzalez, spokesman for the National Weather Service in Miami.

Proctor said the front door of the house was blown 25 feet into the front yard and glass was found as far as 100 feet away. The back yard was littered with debris, including the bodies of four hunting dogs that had been aboard the plane.

Fire Capt. Matt Schmitt said federal investigators were to arrive Friday evening.

Inez Carr, who lives next door, said the owner of the home was out for a doctor's appointment. The house was engulfed in flames, which firefighters managed to control within a couple of hours.

''There's debris scattered for blocks,'' said police Sgt. A.A. ''Skip'' Bollens, who said the presence of hunting dogs indicated the victims were going on a hunting trip.

Euna B. Locke, who lives a block away from the crash, was sitting by her

window when she heard a plane passing low overhead and then an explosion.

''I looked over and this whole thing was just blazing up,'' Locke said.

Last April, a Southern Co. corporate plane carrying three people crashed into an apartment complex in north Pensacola shortly after takeoff from the same airport, killing all three people aboard. There where no injuries on the ground.

RUESSELHEIM, WEST GERMANY (FEB. 2) UPI - Two commuter trains collided Friday, killing at least 15 people and leaving about 70 injured in the worst railroad crash in 15 years in West Germany, police officials said.

Witnesses said U.S. Army troops stationed nearby were among the first to arrive on the scene and participate in rescue efforts.

Police said preliminary investigations showed that the crash occurred after the driver of a train heading for the city of Frankfurt failed to wait for a clearance signal before driving off and rammed into an oncoming train just outside the Ruesselheim station in central Germany.

The first cars of each train smashed into each other. One train derailed and several cars crashed onto a parking lot, crushing parked automobiles.

The officials said that the accident occurred during rush hour and that both suburban commuter trains were packed to capacity.

Rescue teams found 15 dead and about 70 injured under the wreckage, the officials said, adding that at least 30 of the injured were in a critical condition.

A number of U.S. Army troops from a nearby garrison were among some 300 volunteers who searched for survivors, gave first aid to the wounded and helped transport them to nearby hospitals, using helicopters and emergency vehicles.

Witnesses said the soldiers were among the first to arrive on the scene of the crash, carrying stretchers and first aid kits.

''I heard noise like an explosion,'' said Holger Schmidt, who was in a hotel room about 30 yards away when the crash occurred.

''As I looked out the window I saw that one of the cars was standing vertically in the air and fell slowly on its side,'' he said.

''After the first awful second there was a deadly silence, then a man came crawling out of a car, his head bleeding heavily,'' said Schmidt, 34.

''Within seconds neighbors came streaming out of their houses to help the wounded,'' he said.

Officials said the crash was the worst in West Germany since two trains collided in June 1975, killing 41 people and leaving more than 100 seriously injured.

#90033u1758 02/02/1990 ~United Press International

LAS VEGAS, NEV (FEB. 2) UPI - Nevada-Las Vegas substitute Chris Jeter has been suspended for three games for his part in Thursday night's brawl following the Rebels' 124-90 rout over Utah State, Athletic Director Dr. Brad Rothermal said Friday.

Rothermal said Jeter will not be eligible to play in three games, beginning with Saturday's contest against North Carolina State at the Thomas and Mack Center in Las Vegas.

''Chris Jeter is being placed on suspension and probation and any further incidents of this nature by him will result in his permanent suspension,'' Rothermal said.

''This type of behavior will not be tolerated by any UNLV men's basketball player,'' said Coach Jerry Tarkanian.

Seconds before the conclusion of the Thursday game, Jeter and Aggie guard Gary Patterson reportedly were involved in a head-butting incident.

Moments after the 12th-ranked UNLV's blow out, Utah guard Kendall Youngblood challenged Jeter to hit him. Jeter obliged, delivering a right hand that sent Youngblood staggering back.

The ensuing brawl included UNLV junior forward Moses Scurry firing a couple of punches at Utah State coach Kohn Smith and Rebels' Stacy Augmon and James Jones sent sprawling to the floor by Utah State punches.

Scurry has been placed on probation for punching Smith. College officials said other action may result from further review of the incident. However, as of Friday afternoon, Scurry was scheduled to play in Saturday's contest against North Carolina State.

Jeter, who claimed to have accidentally bumped heads with Patterson, had to be restrained in the runway leading to the Thomas and Mack dressing rooms as he charged several Utah State players.

He initially denied throwing any punches, but college officials later determined, based on eyewitness reports and videotapes, that Jeter did throw the first punch.

''Chris was way out of line,'' Tarkanian said Friday. ''I don't want that kind of action again. I hope this (the suspension) gets the message across.''

Patterson and Youngblood required several stitches to close lacerations to the face suffered in the fight.

Smith said the fight might have been a result of comments he made last season about the expensive cars and expensive clothes he perceived UNLV players to own.

UNLV beat the Agies 94-68 in Logan the day after Smith's comments, but tempers remained in check following that contest.

''This might go back to what I said last year and what I said then was a mistake,'' Smith said. ''I've apologized over and over again, whether you believe it or not. It was just a dumb thing for a rookie coach to say.''

Tarkanian absolved Smith of any responsibility for the fight. In fact, he lightly embraced Smith as the two exchanged places at the inverview table following Thursday's game.

Friday, Nevada-Las Vegas officials issued apologies for the incident and Rothermal expressed his deep regret that it occurred.

''I am truly sorry for this incident,'' Rothermal said. ''I apologize to the Utah State community and to the citizens of Las Vegas. We are going to position ourselves so this doesn't occur again.''

SACRAMENTO, CA (FEB. 2) UPI - State Sen. Joseph Montoya, snared in an elaborate FBI sting operation against political corruption, was found guilty Friday of seven of 10 counts of racketeering, extortion and money laundering in the first felony conviction of a California legislator in 36 years.

The jury of seven women and five men heard eight weeks of testimony and deliberated four days before finding the Democrat guilty of accepting money from a bogus company to help ram a bill through the Legislature.

Montoya, 50, was convicted on five counts of extortion, one count of

racketeering and one count of money laundering. The jury found Montoya innocent on three counts of extortion.

Montoya, who is from the Southern California community of Whittier, will be sentenced April 26. The maximum penalties are 20 years in federal prison for each count.

Each racketeering and extortion count also carries a maximum fine of $250,000, while money laundering carries a $500,000 maximum fine.

Under the racketeering statute, Montoya could also have to forfeit $8,000 prosecutors say he illegally collected.

It took nearly an hour to read the verdicts Friday because each juror was polled by the judge. A stoic Montoya sat between his lawyers at the front of the heavily guarded courtroom packed with reporters and his family.

Montoya and his family declined to comment on the verdict. Asked if he would resign from the Legislature, defense lawyer Michael Sands said: ''I cannot comment on that at this time. We will have our discussions.''

His conviction leaves his Senate colleagues facing the sticky legal and political problem of whether to expel him from the Senate.

A California lawmaker hasn't been expelled by a vote of his colleagues since 1905, when four senators were removed from office on the same day after being implicated in a bribery scheme.

Since his indictment on May 17, 1989, Montoya has remained in the Senate as chairman of its Business and Professions Committee.

The last time a sitting legislator was convicted of a felony was in 1954, when Assemblyman Charles Lyon, a Beverly Hills Republican, was found guilty of bribery in a scandal involving the sale of liquor licenses.

Montoya's former top aide, Amiel Jaramillo, was indicted along with his boss. He is due to go on trial on March 5.

During the elaborate sting investigation, the FBI formed two companies seeking special legislation that would allow it to obtain cheap state-backed financing for a proposed shrimp processing plant in West Sacramento.

Undercover agents, posing as company executives, won easy passage of bills in 1986 and 1988. Both were vetoed by Gov. George Deukmejian, who had been tipped off by the FBI.

#90033u1782 02/02/1990 ~United Press International
MEXICO CITY (FEB. 2) UPI - Mexico will sign Sunday a crucial agreement with its foreign commercial lenders to significantly reduce the developing country's $93 billion external debt, a senior official said Friday.

Jose Angel Gurria, deputy finance minister for international affairs, said the agreement will cover the reduction of the debt's principal, the lowering of interest rates, and options to get new loans.

"The economic impact of the accord would mean that Mexico has only an $80 billion foreign debt," Gurria said, commenting on the long-term financial impact of the international agreement.

Gurria, Mexico's chief negotiator with the country's foreign lenders, said the Central American nation's total foreign debt currently stood at $93 billion, down from $100 billion in 1988.

The agreement will be signed Sunday between the Mexican government and a 15-member Bank Advisory Committee representing about 450 foreign commercial lenders.

A Mexican Finance Ministry spokesman said a U.S. government delegation, headed by Treasury Secretary Nicholas Brady, will attend the signing ceremony. The debt reduction negotiations fall under a plan drawn by Brady

to help rescue the Mexican economy.

Gurria estimated that the agreement will allow Mexico to reduce its annual repayments by $3 billion in 1990. Mexico last year disbursed $12 billion in much needed hard currencies to service its debt. The amount will be reduced to $9 billion after the signing.

Under the agreement, Mexico hopes to lower the amount required to service its foreign debt to 2.9 percent of its gross domestic product in 1990 and 2.3 percent in 1991, down from 6 percent in 1989, Mexican officials said. Mexico's gross domestic product in 1989 was $200 billion.

Although it falls short of Mexico's initial expectations, the agreement will reduce Mexico's $48.5 billion medium-term commercial debt by $7 billion. The debt reduction agreement includes three options that the lending banks can decide to exercize under the restructuring plan for the $48.5 billion commercial debt.

The principal could be reduced by up to 35 percent; interest rates could revised downward at 6.25 percent; or new loans amounting to up to 25 percent of the outstanding debt could be extended by stages.

Gurria said that $20 billion in commercial debt could be restructured under the first option, $22.5 billion under the second, and $6 billion under the third option.

(FEB. 2) UPI - President Bush says he's encouraged by South Africa's

pledge to free jailed-for-life black nationalist leader Nelson Mandela . Bush called President de Klerk's moves- quote- ''quite positive.'' And he indicated that it's time to talk to leaders of Congress about U-S sanctions against the white-minority government.

In Cape Town, the South African government also lifted a 30-year ban on the African National Congress... and ordered other reforms to meet key demands of South Africa's black majority. The actions are the most substantial racial reforms since the National Party won power in 1948 and imposed the discriminatory laws known as apartheid .

President Bush is traveling to some of the nation's colleges and universities to promote America's prominence in science and technology. Bush will visit scientists at North Carolina State in Raleigh and the University of Tennessee in Knoxville today. Bush won't say whether he will announce more federal aid to schools... but the University of Tennesee plans to ask for some.

The government says the nation's jobless rate held steady at five-point-three percent last month, reflecting slow but consistent job growth and stable unemployment in the labor market. Some economists say the report does NOT signal enough weakness in the economy for the Federal Reserve to ease credit.

Thunderstorms and gusty winds blasted Texas while rain drenched the Midwest. But a Pennsylvania groundhog offered reassurance that winter's stormy days will be short-lived. The legendary weather-predicting groundhog Punxsutawney Phil did NOT see his shadow. That's supposed to mean spring is near. Phil's fans say he's never wrong.

#90033u1817 02/02/1990 ~United Press International
WASHINGTON (FEB. 2) UPI - After four months of intensive diplomacy, Secretary of State James Baker said Friday it is still possible that his attempt to bring Israelis and Palestinians into a dialogue could fail.

Baker, in an interview, was asked about the possibility that he could invite the Egyptian and Israeli foreign ministers to a trilateral ministerial conference next week in Europe.

''I would not want to suggest that is going to happen,'' said Baker, ''but with this area and this problem those flickers of hope can be snuffed out very quickly.''

He recalled that he thought hopes were bright in December for a Middle East conference, but when he returned to Washington after Christmas ''the flicker of hope had nearly been snuffed out.''

According to reports from the Middle East, both the Israeli government of Yitzhak Shamir and the Palestine Liberation Organization hardened their positions in December on such issues as the composition of the Palestinian delegation and the exact agenda of any future meeting.

''We're not there yet and we don't know if we will get it, but we're going to keep plugging away,'' Baker said. ''We'll give up when there's no longer any hope that we can move the process.''

A senior American official described Baker's negotiating technique in the long-distance negotiations, in which Egypt represents the Palestinians. When one side raises new objects, Baker - in the words of the official - ''moves the ball into that court and that player gets concerned he will be seen to be the one who is killing the process'' and then makes some concessions.

Several days before his trip to Moscow, with a stop in Prague, Baker told UPI that the question of German unification will be high on the list of topics in his meetings with Soviet Foreign Minister Eduard Shevardnadze next Wednesday, Thursday and Friday.

Baker said that the German unification issue ''is not getting out of control ...but you have to recognize the issue is moving more rapidly than people anticipated three or four months ago.''

He said the U.S. government has taken the position that no formula for German unfication should be rejected beforehand - including the possibility of a neutral Germany.

On arms control issues, he said he and Shveradnadze will discuss President Bush's proposal, made Wednesday night, for deep cuts in conventional forces in Eastern and Western Europe. On strategic arms, he said they will take up three issues that have been thorny, unsettled questions in the negotiations.

They are: rules for limiting and verifying limits on air-launch cruise missiles, encoding and encryption of telemetry from missile tests, and rules for counting and verifying missiles that can be fired, but are stored away from the missile launchers.

Looking back over his first year as secretary of state, Baker said, ''It's been a fascinating time to be secretary of state.''

At the top of the list of satisfying moments, he put ''the remarkable changes in the Soviet Union and Eastern Europe,'' symbolized by the dramatic sight of the Berlin Wall coming down.

Asked if he thought the march toward democracy could be reversed, he said, ''In some places, the revolution is still in progress, but I think as a general proposition, it's hard to get the freedom genie back in the bottle. When you get a taste of freedom, it's awfully hard to reverse it.''

(FEB. 2) UPI - Published reports say the investigation into a mail

bombing that injured a minister's daughter centers on a man facing weapons charges in southeast Texas. Jeffrey Boggs was indicted by a Beaumont grand jury on two counts of possessing illegal arms. Police say items found in his car are similar to those used in a pipe bomb that injured Lisa Osteen at Lakewood Church.

There's word today that federal prosecutors are lining up witnesses to testify to long-term drug use by Washington, D-C, Mayor Marion Barry. The Washington Post says prosecutors have at least five witnesses they intend to use if Barry is ever tried on a misdemeanor cocaine charge and claims he was entrapped when he was arrested last month.

China today strongly condemned new U-S legislation authorizing economic sanctions against the Beijing government. A Chinese Foreign Ministry official protested to U-S Ambassador James Lilley China's ''utmost indignation'' over the latest U-S moves and warned that bilateral relations won't improve until the restrictions are lifted.

#90033u1857 02/02/1990 ~United Press International

WASHINGTON (FEB. 2) UPI - President Bush, citing a threat to U.S. national security, ordered a Chinese government corporation Friday to sell off a Seattle aircraft parts company it bought late last year, the White House announced.

The president's decision marked the first time he has exercised the power he has under the so-called Exon-Florio provision of a year-old trade law to block or void the foreign purchase of an American company.

The announcement followed the reported recommendation of the sub-Cabinet Committee on Foreign Investment in the United States that he nullify the sale of MAMCO Manufacturing Co. of Seattle last November to the China National Aero-Technology Import and Export Corp., or CATIC.

The decision comes at a sensitive juncture in Sino-U.S. relations, in which Bush has moved to soften sanctions imposed against the Beijing government following its bloody crackdown on the pro-democracy movement last June.

Bush won a foreign policy victory last week by narrowly beating back an attempt by Congress to override his veto of legislation extending sanctuary to Chinese students in this country.

Marlin Fitzwater, with Bush in Knoxville, Tenn., announced Bush's order that CATIC divest itself of MAMCO by May 1, 1990. However, if it cannot meet the deadline, it may apply for a three month extension.

Fitzwater, in a statement, said, ''Based on credible, confidential information, the president determined that CATIC's continued control of MAMCO might threaten to impair the national security. Moreover, the president determined that no other provisdion of law provided him with adequate and appropriate authority to protect the national security in this case.''

Fitzwater said the United States continues to welcome direct foreign investment, but because of ''circumstances of this particular transaction '' Bush was forced to nullify the deal.

''It does not change our policy and is not a precedent ... with regard to

direct investment in the United States from the People's Republic of China or any other country,'' the spokesman said.

The White House said the order does not affect any other CATIC business arrangements in the United States.

MAMCO manufactures metal components for commercial aircraft only, and its major customer is Boeing Co., also headquartered in Seattle.

The company sold its parts exclusively to American companies before its sale to CATIC on Nov. 30, 1989, and continued to do so under Chinese ownership, MAMCO President Kenneth Keller told The New York Times.

A brochure circulated by CATIC said the Chinese firm makes military fighters, bombers and helicopters, as well as civilian aircraft, The Washington Post reported.

The Post quoted one unnamed government official as saying CATIC has been involved in past attempts by China to illicitly gain advanced U.S. technology that could by used by the Chinese military.

MAMCO was the sixth foreign acquisition of a U.S. company to come under investigation by the foreign investment committee to determine whether the transaction threatened national security, according to an aide to Sen. James Exon, D-Neb., co-author of the Exon-Florio provision. The other sponsor was Rep. James Florio, D-N.J., now governor of New Jersey.

Exon, praised Bush's order and said, ''I think he (Bush) had to stop this takeover or see an important aircraft manufacturing technology fall under communist control.''

''The acquisition of MAMCO would have certainly furthered China's military power, the same military power which was used to crush the Chinese democracy movement,'' he said.

But in a statement released in Seattle, Keller said he was ''amazed and mystified by this decision.''

''We run a simple machine shop which cannot possibly have national security implications,'' he said, adding his firm was given no specific reason for Bush's order.

#90033u1882 02/02/1990 ~United Press International

CAPE TOWN, South Africa (FEB. 2) UPI - President Frederik de Klerk lifted a 30-year ban on the African National Congress Friday, vowed to free Nelson Mandela soon and ordered other reforms to meet key demands of the black majority.

De Klerk's actions are the most substantial racial reforms since the National Party won power in 1948 and erected the statutory discriminatory laws known as apartheid. The reforms could clear the way for negotiations to settle South Africa's protracted racial conflict.

In Johannesburg, police fired tear gas to break up scattered spontaneous celebrations over de Klerk's announcement. Police said demonstrators hurled stones and disrupted traffic but no arrests were immediately reported. Witnesses and police said at least six people, including two police, were injured.

About 4,000 demonstrators led by Mandela's wife, Winnie, marched through Cape Town in a protest timed to coincide with de Klerk's speech. Chants of ''ANC, ANC'' rose from the crowd as the news reached the marchers but Mrs. Mandela declared the black majority was not prepared to accept ''a bone without meat.''

''This is not what we expected today. We expected him to tell us: Go to Victor Verster (prison) and fetch comrade Nelson,'' she said.

But anti-apartheid cleric Allan Boesak said he was ''extremely encouraged and surprised.''

Anglican Archbishop Desmond Tutu, 1984 Nobel Peace laureate and one of the world's most recognized leaders in the anti-apartheid movement, said, ''We seem to be on the way to the new South Africa.

''What he (de Klerk) has said has taken my breath away. I'm not going to

be nasty to him. He has done well,'' he said.

Tutu said he believed foreign governments that imposed sanctions on Pretoria should not lift them until the course toward an apartheid-free society is ''irreversible.'' However in Washington, President Bush said he believed U.S. sanctions should be reviewed.

De Klerk said Mandela would be released from life imprisonment ''soon'' but did not set a precise date. He also did not completely lift a 3-year-old state of emergency but did withdraw many restrictions on the media, imposed a six-month limit on detentions without charge and granted the right of legal representation to detainees.

De Klerk also lifted a 40-year ban on the South African Communist Party, saying events in the Soviet Union and Eastern Europe had weakened the party's support base and it no longer posed ''the same degree of threat.''

De Klerk outlined the program in a speech lasting about 45 minutes at the opening session of Parliament in the legislative capital and reaction was swiftly positive, although some anti-apartheid leaders belived he did not go far enough.

Senior officials of the anti-apartheid umbrella group United Democratic Front said they were not satisfied ''about the fact that comrade Mandela remains in prison,'' but UDF spokesman Murphy Morobe conceded: ''We all do know that today is very different from yesterday.''

A senior ANC delegation led by former Secretary-General Walter Sisulu said during a visit to Sweden the group welcomed the announcement but remained gravely concerned that not all restrictive practices had been lifted.

''We therefore expect that no country committed to ending white minority domination in South Africa will do anything to lessen the isolation of the apartheid regime,'' a statement from the delegation said.

Current ANC Secretary-General Alfred Nzo and Communist Party leader Joe Slovo were traveling to Sweden from their headquarters in Lusaka, Zambia, Friday for a meeting to discuss the announcement, the group said.

#90033u1924 02/02/1990 ~United Press International

NEW YORK (FEB. 2) UPI - Stocks closed higher Friday in active trading, as a new burst of takeover activity and a more upbeat perception of the economy fueled a week-ending rally.

The Dow Jones industrial average, which fell 4.28 Thursday, rose 16.44 to close just above the key 2600 level, at 2602.70.

Among broader market gauges, the New York Stock Exchange composite index gained 1.23 to 182.75. Standard & Poor's 500-stock index gained 2.13 to 330.92. The price of an average NYSE share climbed 23 cents.

Advances pounded declines 1,005-497 among the 1,964 issues crossing the NYSE tape. Big Board volume totaled 164,400,000 shares, compared with 154,580,000 shares traded Thursday.

The market saw a flurry of new takeover-related activity Friday, which analysts said boosted prices, as did a strong job report, which they said allayed fears of an imminent recession.

Analysts noted Friday's news that Roche Holding Ltd. has agreed to buy half of Genentech for $36 a share and reports this morning that the Belzberg family of Canada, long active in the world of corporate takeovers has hired a financial advisor in connection with its investment in Armstrong World Industries Inc.

They also cited the new bid earlier this week for Georgia Gulf from NL Industries, controlled by investor Harold Simmons, and talk over the last few days about a new buyout bid for UAL, parent of United Airlines. Reports late Friday said Simmons had raised his stake in Lockheed to almost 19 percent and would consider seeking control of its board.

"Takeover activity is creeping back into the market," said Tom Gallagher, managing director in charge of capital commitment at Oppenheimer and Co., "Also, people are starting to look past the short term and say the economy is okay and the Federal Reserve thinks it's okay," he said, referring to testimony this week by Fed Chairman Alan Greenspan that the chances of the economy going into a recession are less than 50 percent and less than they were some months ago.

The government issued a stronger-than-expected job report early Friday, saying the nation's unemployment rate for January was a steady 5.3 percent, unchanged for the past eight months. The rate had been expected to rise 0.1 point. The department also said non-farm payroll employment increased by 275,000 last month, compared with expectations of a rise of only 181,000.

On the trading floor, Genen- tech was the most active NYSE issue, surging 8 1/8 to 29 7/8 after its agreement with Roche, and boosting the whole drug sector. Philip Morris followed, up 1/4 to 38 1/4. USX was third, up 3/8 to 34 1/4 in dividend-related trading.

Among the other blue chips, IBM rose 5/8 to 98 3/8, AT&T rose one to 39 3/8, Coca-Cola gained 5/8 to 69 3/8 and Boeing added one to 62 1/4.

Takeover-related issues were strong. UAL lost most of its intraday gains of more than $3 a share to end up 3/4 at 130 1/2 amid talk of a new buyout bid from the pilots' union. Hilton Hotels surged 2 1/2 to 61. Its board took no action on any takeover offers but told advisers to "further develop" the acquisition proposals.

Holiday jumped 2 1/8 to 60 1/4, Sea Containers rallied 2 1/4 to 63 1/2 after its board urged shareholders to approve Temple Holdings' offer to buy most of the company, and Telecom-USA extended its advance, up 1 1/4 to 19 3/4 after ending talks about a proposed takeover of ALC Communications.

Elsewhere in the drug sector, Eli Lilly rose 1 3/8 to 64 1/4, Upjohn added one to 35 7/8, and Schering-Plough jumped 2 1/8 to 80 3/8.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 195,076,260 shares, compared with 184,881,780 shares traded in the previous session.

Prices closed higher in moderately active trading on the American Stock Exchange. The Amex Market Value index rose 2.06 to close at 353.56. The price of an average share gained eight cents. Advances led declines 356-198 among the 789 issues traded. Composite volume totaled 15,425,105 shares, compared with 15,843,110 traded Thursday. Hillhaven led the Amex issues, unchanged at 1 3/4.

The National Association of Securities Dealers composite index rose 4.46 to close at 422.22.

BOSTON (FEB. 2) UPI - The new chairman of troubled Bank of New England Corp. said Friday Connecticut Bank & Trust, a $10 billion subsidiary, is up for sale in the company's efforts to regain its fiscal health.

''Obviously, at some dollar figure, that bank is gone'' because the company is trying to reduce its size, said H. Ridgely Bullock, a corporate board member who was named chairman only last week.

''This is not any kind of a fire sale,'' Bullock declared at a news conference, vowing to get an adequate price for whatever properties the company sheds.

He also said the bank, which has borrowed more than $800 million from the Federal Reserve in the past two weeks to keep up with depositor withdrawals, would have continued access to the Fed window.

He acknowledged substantial withdrawals by depositors concerned about the bank's health but said, ''the Fed has told us they have more than adequate funds available.''

Bulloc was named interim chairman but said he intended to do the job as though it were permanent. He conceded that the company probably will lose money throughout 1990.

In addition to CBT, the company's Bank of New England-Old Colony subsidiary in Rhode Island and Maine National Bank are being looked at by possible purchasers from within and outside of New England, Bullock said.

He said the company had received no specific bids and he declined to name potential buyers beyond Fleet/Norstar Financial Group Inc. and Citicorp in New York which already have identified themselves as considering purchases.

Bullock said there will be layoffs among the company's 17,000 employees but said it would be another week or two before he could estimate how many.

Connecticut Bank and Trust, with 159 branch offices, joined with the Bank of New England in Boston in 1985 in what was described as a merger of equals to form the company that is now Bank of New England Corp.

Much of the top management, including Walter J. Connolly, who was squeezed out of the top job as chairman of the corporation when Bullock took over last week, came from the Hartford-based CBT.

CBT is the second of the company's subsidiaries behind only Bank of New England N.A., in Boston.

The parent company is now ''off the critical list and getting better,'' Bullock said.

Federal regulators know the company's plan to ''fix the bank'' and sell off about $6 billion of its $29 billion in assets, Bullock said, ''and they've bought into it.''

(FEB. 2) UPI - With market attention focused on the inventory building season, gasoline led oil prices up on the New York Mercantile Exchange Friday, spurred by reports of problems in Venezuelan refineries.

Unleaded gasoline for March delivery finished the day on the Merc at 64.22

cents a gallon, up 1.52 cents on the day and 1.64 cents on the week. March home heating oil also gained 1.52 cents on the Merc to 58.22 cents a gallon, 0.50 cents higher than a week ago.

On the important New York Harbor cash market, unleaded gasoline bid for 63.35 cents a gallon, 1.75 cents higher on the day and 0.70 cent on the week. Heating oil bid up 1.50 cents to 59.25 cents a gallon, 0.85 cent less than last Friday.

The benchmark West Texas Intermediate crude for March delivery finished up 32 cents on the Merc at $23.02 a barrel, but down 46 cents on the week. WTI was being quoted at $23 a barrel on the U.S. Gulf Coast cash market, up 35 cents on the day and 50 cents on the week.

There were reports that Venezuela's state-own oil company had informed customers it was cancelling some gasoline cargos and that there had been a fire at one of its large refineries.

"(The reports) were obviously having an impact on the market today," said Chris Bray of Paine Webber Inc., Andover, Mass. Bray said gasoline led the market up with crude and heating oil prices rising "in sympathy."

"We're at the inventory building time of year when gasoline becomes the focus of attention and prices tend to rise," said Bill Hinton of Stotler & Co., New York.

Hinton noted that heating oil also received some support from colder weather moving into the Northeast after a period of unseasonably warm weather with snow reported Friday afternoon in parts of upstate New York and New England. Bray commented that over the last 18 months "we've only had a handful of (Merc) closes above $23 a barrel for WTI. You can count em."

On the European spot market, Britain's widely traded North Sea Brent climbed 25 cents to $20.85 a barrel. The United Arab Emirates' Dubai light - the key OPEC Middle East crude from the Middle East, mainly exported to the Far East - gained ten cents to $16.95 a barrel.

#90033u1952 02/02/1990 ~United Press International

WASHINGTON (FEB. 2) UPI - The Environmental Protection Agency moved Friday to tighten rules on exports of U.S. pesticides and signalled tougher enforcement of current law by proposing to fine five companies $614,800 for violations.

EPA officials said the actions represented a new effort to better protect foreign countries from pesticide contamination problems and to ensure

Americans are not exposed to health risks from tainted imported food.

By law, chemical companies are allowed to export pesticides that are not approved for use in the United States as long as they follow certain labeling and notification requirements to alert foreign purchasers and governments to health risks.

The EPA also is supposed to notify foreign governments when it restricts or bars use of a given pesticide due to new health or environmental concerns.

Environmentalists have called on the EPA to ban export of pesticides that are not approved for use in the United States, saying it not only jeopardizes residents of other countries but threatens Americans, since imports account for 15 percent of the U.S. food supply.

However, EPA officials have maintained it would be wrong for the government to prohibit exports of risky pesticides because, while the United States may be able to do without them, poor countries may need them to protect already meager food supplies or fight diseases that pose much greater health risks.

For example, they said African countries need the pesticide Dieldrin to combat the locust plague that has almost wiped out food supplies in some regions. They also noted several countries were able to wipe out malaria only through heavy use of DDT to kill mosquitos.

Instead of barring exports of such pesticides, EPA spokesman Al Heier said the agency is working through Peace Corps volunteers in Third World countries to ensure pesticides are used in an environmentally sensitive way.

Linda Fisher, assistant EPA administrator for pesticides and toxic substances, said the agency is proposing changes in its pesticide export rules to bring them into line with international requirements and keep foreign governments better informed of pesticide risks.

The changes call for:

-Closing loopholes in requirements that American chemical companies obtain statements from foreign purchasers saying they are aware the pesticide is not approved for use in the United States.

-Clarifying requirements that the acknowledgement statements be written in languages used in all countries where a pesticide might be used.

-Expanding requirements that the EPA notify foreign governments when it takes action to restrict use of a pesticide in the United States.

''With these proposed changes, EPA will be more responsive to the concerns of the U.S. public that consumes imported food,'' Fisher said in a statement.

As for the enforcement actions, Fisher said, ''Because of the concerns about the safe use of pesticides both internationally and in the United States, EPA will take increasingly more stringent enforcement actions against violations of the pesticide exportation regulations.''

The companies cited for labeling and notification violations were Mobay Corp., Pittsburgh, which faces a $314,800 fine; Shield-Brite Corp., Kirkland, Wash., $222,000; Rohm & Haas Bayport Inc., LaPorte, Texas, $36,000; Dow Chemical Co., Midland, Mich., $22,400; and Exxon Chemical Americas, Houston, $19,600. The companies have 20 days to respond to the proposed penalties.

NEW YORK (FEB. 2) UPI - Standard & Poor's News and McGraw-Hill News shut down operations permanently at the close of business Friday, affecting about 75 employees at the financial news services, a spokeswoman for McGraw-Hill Inc. said.

"The editors did a fine job of creating an online business news service, but the market for the product is developing more slowly than anticipated " said McGraw-Hill Inc., the parent of both wires, in a statement.

"In view of the current business climate and the uncertain economic outlook, McGraw-Hill is going to focus its resources on opportunities with an earlier payoff," the company said.

About 75 employees at S&P News in lower Manhattan and at McGraw-Hill News in midtown Manhattan will be affected, said spokeswoman Betsy Russo. Employees at both news services were informed of the shutdown Friday afternoon, a source at S&P News said.

"The company will make every effort to place the staff in positions at McGraw-Hill," which publishes books, information services, and magazines such as Business Week, the company said in a statement.

McGraw-Hill news, a financial news service, was launched in 1987. S&P News also started in 1987, was a real-time electronic news services designed to compete with Dow Jones and Reuters. In December, it announced it had signed its first major client, E.D. Jones and Co., a St. Louis-based

brokerage firm.

#90033u2026 02/02/1990 ~United Press International

PENSACOLA, FL (FEB. 2) UPI - A light plane carrying a judge and a businessman on a hunting trip with their dogs crashed into an unoccupied house in a residential area shortly after takeoff Friday, killing everyone aboard, authorities said.

The Beechcraft Baron, a twin-engine plane used in general aviation, took off at 11:25 a.m. CST from Pensacola Regional Airport bound for Lake Charles, La., air traffic controllers said. The plane vanished from radar at 11:27 a.m. CST.

The pilot, James Loudermilk, who apparently was experiencing mechanical difficulties, turned the plane around and was heading back to the airport when it crashed into a house in the East Hill District, a quiet residential area of single-family homes, city spokesman Carlton Proctor said. No one was in the house.

Also killed with Loudermilk of Pensacola, who owns several service stations, was Circuit Judge Clyde Wells of DeFuniak Springs, Proctor said. They were the only two people in the plane.

The plane apparently came in at a steep angle, just missing another house and breaking a tree in the back yard. It crashed through a fence and cut a deep furrow in the yard. The fuselage skidded into the house and exploded.

''There are body parts all over the place. I don't think there's a chance in the world there were any survivors,'' Proctor said, adding that there were two people in the plane.

It was the second plane to crash in a residential area of Pensacola in less than a year.

Heavy fog was reported in the area, with visibility from one-sixteenth to a half-mile, said Fred Gonzalez, spokesman for the National Weather Service in Miami.

Proctor said the front door of the house was blown 25 feet into the front yard and glass was found as far as 100 feet away. The back yard was littered with debris, including the bodies of four hunting dogs that had been aboard the plane.

Fire Capt. Matt Schmitt said federal investigators were to arrive Friday evening.

Inez Carr, who lives next door, said the owner of the home was out for a doctor's appointment. The house was engulfed in flames, which firefighters managed to control within a couple of hours.

''There's debris scattered for blocks,'' said police Sgt. A.A. ''Skip'' Bollens, who said the presence of hunting dogs indicated the victims were going on a hunting trip.

Euna B. Locke, who lives a block away from the crash, was sitting by her window when she heard a plane passing low overhead and then an explosion.

''I looked over and this whole thing was just blazing up,'' Locke said.

Last April, a Southern Co. corporate plane carrying three people crashed into an apartment complex in north Pensacola shortly after takeoff from the same airport, killing all three people aboard. There where no injuries on the ground.

#90033u2037 02/02/1990 ~United Press International

(FEB. 2) UPI - South Africa's Anglican Archbishop Desmond Tutu today cheered the government's sweeping reform initiatives, which include releasing black nationalist Nelson Mandela and lifting a 30-year ban on the African National Congress. A backer of international sanctions against apartheid, Tutu called the reforms ''incredible'' and said President de Klerk has ''gone a very long way along the road.'' But he warns against dropping sanctions against Pretoria until the move to full political rights for blacks becomes ''irreversible.''

The civilian jobless rate was unchanged last month at five-point-six percent. Most economists say the report backs up recent comments by the Federal Reserve that a recession is unlikely. But the jobless figures revealed one pocket of weakness in the nation's factory sector, with 110-thousand jobs lost last month, down to 734-thousand jobs compared with 824-thousand in December.

President Bush today took to the road to promote his education agenda. Bush arranged to spend the day visiting research laboratories and speaking with scientists at North Carolina State in Raleigh and the University of Tennessee in Knoxville. Bush's trip is a follow-up to his ''State of the Union'' address on Wednesday, when he announced a new set of education goals, including making U-S students Number One in math and science.

Lebanon's shaky one-day-old cease-fire was shattered today by a wide-scale offensive launched by Christian strongman General Michel Aoun . Aoun's army attacked militia-controlled areas of east Beirut with artillery, tanks and troops. The attack was met by stiff resistance by the Christian

Lebanese Forces militia. Shells crashed into buildings and houses as the rival forces battled on streets. There's NO immediate report on casualties.

-30- 1975

#90033u2048 02/02/1990 ~United Press International

(FEB. 2) UPI - President Bush says he's following with ''great interest'' East Germany's call for reunification of Germany into a militarily neutral state. Bush told reporters while flying to North Carolina aboard Air Force One that he will take up the issue next week when he meets with his national security advisers. Bush has expressed convictions in the past that West Germany should NOT pull out of NATO.

Fort Lauderdale, Florida, police say parents identified 14 pre-schoolers among child pornography photographs seized from a day-care center owner. Rainbow Learning Center owner John Shaver is charged with possessing child pornography. Broward County officials revoked the center's license yesterday as 140 parents began looking at seven-thousand pictures taken from Shaver's home this week. A mother who saw the photos described them as ''horrifying.''

Fans of Punxsutawney Phil the groundhog say he's never wrong. Today Phil emerged from his Pennsylvania lair to cast a shadow, signaling a short winter. Scores of tourists came to Punxsutawaney for the 103d annual appearance of the groundhog, but townspeople don't necessarily like the hoopla surrounding Phil. Bartender Loretta Cook says there are times she'd like ''to shoot him.'' Cook says she'd prefer it if Punxsutawney had an industry that could sustain business year-round.

BY JOAN HANAUER

NEW YORK (FEB. 2) UPI - ''Elvis'' lives! At least, he has been reincarnated in a new TV series about his early life that ABC hopes will hit the Nielsens the way ''Hound Dog'' swept the charts.

''Elvis,'' the series, premieres on Tuesday, Feb. 6, 9:30-10 p.m. Eastern time, following ''Roseanne,'' to give it the best shot at attracting an audience. It goes into its regular time period Sunday, Feb. 11, 8:30-9 p.m., which will pit Elvis Presley on memory lane against Angela Lansbury on ''Murder, She Wrote.'' To date, Lansbury has taken all challengers.

The show departs from normal network practice in that it is a dramatic show in the half-hour format usually reserved for sitcoms. The story of Presley's life - produced with the cooperation of the Presley estate with Priscilla Presley as a co-executive producer - goes back to the early days when Elvis was just about to get his first big break.

Episode 1 opens with a flashback to 1938. Vern Presley, Elvis' father, is being carted off to jail for forging a check while 3-year-old Elvis looks on, owl-eyed.

Fade to commerical and resume the story in 1953, with Elvis a Memphis truck driver in his teens hoping for a big break in music. He spends $4 to cut a record as a gift for his mother, Gladys (Millie Perkins).

Sam Phillips of Sun Records teams him up with two local musicans, Bill Black and Scotty Moore. He sings with them at a club date - at first shocking the patrons with his black-style music and then wowing them.

The second episode starts with another flashback - this time when the sky darkened with a twister and Gladys just barely got little Elvis into the root cellar in time.

The episode jumps to continue the story of how Elvis, despite pressure to become the family breadwinner, records three songs with Black and Moore, one of which was ''That's All Right.''

Local disc jockey Dewey Phillips (no relation to Sam) plays ''That's All Right'' on the air, Elvis is a major sensation and - well, you know where it's going from there.

How long can ABC keep a series like this going? If they continue to deal with the minutiae of Presley's life, possibly until the year 2000. That's not Presley singing, incidentally, it's Elvis sound-alike Ronnie McDowell.

Michael St. Gerard, the young Elvis look-alike who plays the title role in the series, believes a good cut-off might be 1958, when Elvis is drafted into the Army and his mother dies.

St. Gerard, 25, who was a teenager when Presley died in 1977, was asked if he were an Elvis fan. After a pause, St. Gerald laughed and said, ''Well, I am now.''

He added that before he was offered this role, his picture of Presley came from the later, Las Vegas years.

''But the estate is behind this show,'' he said, ''so I've had access to a lot of personal footage. I now own every movie he made. I've read every book, the trashy ones and the good ones. I've talked to all his friends who are still around - the Memphis mafia - and my own stand-in, Richard Davis, was Elvis's stand-in. I can see him in the kind of friends he had, the people around him, the woman he married.

''He had a double cousin, Patsy Presley. (Elvis's mother's sister married his father's brother.) She's absolutely lovely and she's been a big help to me.''

St. Gerard, who was born in upstate New York and grew up in New York City, has little in common with the man he is playing - except, he said, his religious background and faith.

''He was a very complex personality - sometimes so innocent and boyish,

other times you say, 'Boy, he really knew exactly what he was doing.' He wasn't particularly educated or sophisticated, but he knew how to charm the pants off people. He was a genius when it came to media.

''He was a man's man and a lady's man all in one. Every guy I know thinks he can do Elvis. That was part of his success - people rooted for him, the average person wanted to see him succeed. Somehow he just touched people that way.''

St. Gerard has the same kind of dark good looks that Elvis had - perhaps not quite the pretty-boy flash. And until now, without the sideburns.

His hair is brown, perhaps a little darker brown than Elvis's. Presley's hair was darkened with greasy kid stuff in the early days, and eventually dyed dark brown.

''If they take the series to the Army days, I'll have to shave my head,'' St. Gerard said, recalling that Army haircut that shook the rock world. ''That'll be nice - no more of this gel and mousse on my hair.

''I think he wanted to emulate Tony Curtis,'' St. Gerard said. ''And I think there was some influence from the Captain Marvel comic books he liked as a child.''

(FEB. 2) UPI - A House panel report concludes that Congressman Gus Savage did ''make sexual advances'' to a female Peace Corps worker last March while he was in Africa. The House ethics committee report also includes a letter of apology dated November 20th, 1989, that Savage sent to the woman. The report was made public after the Illinois Democrat charged the inquiry into his alleged misconduct had ended without ''even a slap on the wrist.''

A man who set fire to his son issued a statement today vowing to ''do nothing to cause him any harm.'' The National Burn Foundation issued the statement for Charles Rothenberg, who called the organization yesterday from an undisclosed location. Rothenberg served six years in prison but was released last month. His son, David, has said he does NOT want to see his father again.

The Vatican gave approval for Archbishop Francis Hurley of Anchorage, Alaska, to allow nuns and laity to perform marriages where priests and deacons are NOT present. While the permission granted the Anchorage archdiocese is limited, some observers see it as a step in the church's effort to deal with declining numbers of ordained.

(FEB. 2) UPI - South African President Frederik de Klerk announced

substantial racial reforms today that could clear the way for negotiations to settle the country's racial conflict. De Klerk lifted a 30-year ban on the African National Congress... and pledged to release jailed-for-life black nationalist Nelson Mandela.

East German communist leader Gregor Gysi today gave the clearest indication yet that the Kremlin has shifted its thinking on the question of German reunification. Ending a one-day visit to Moscow, Gysi said Soviet President Gorbachev told him that he did NOT oppose a cautious, stage-by-stage approach to a German confederation.

Visiting Salvadoran President Alfredo Cristiani says he's ready to negotiate with leftist rebels but is rejecting direct U-N mediation. Cristiani says the talks- quote- ''have to be between Salvadorans.'' The Salvadoran president made the comments during a news conference in Washington today.

In New York, testimony from a union chief today dealt a major blow to prosecutors in the assault and conspiracy trial of reputed mob boss John Gotti. John O'Connor testified that an attack on him four years ago may have been sparked by union infighting, and NOT ordered by Gotti, as prosecutors contend.

Authorities say a light plane with two people aboard crashed into a house in a residential area shortly after taking off from a regional airport in Pensacola, Florida. The crash set the house on fire, but there were NO immediate reports of any injuries. Firefighters are at the scene.

#90033u2589 02/02/1990 ~United Press International

(FEB. 2) UPI - Officials and witnesses in India say at least two people were killed and more than five wounded today when security forces fired on

hundreds of pro-secession Moslems in Srinagar and another Kashmir town. Thousands of troops and police under orders to shoot rioters on sight are enforcing curfews in the city some 400 miles north of New Delhi.

Aviation officials say a flaming engine forced a Northwest Airlines D-C-10 to return to Los Angeles International Airport shortly after take-off this morning. The jet, carrying 110 passengers, landed safely. An airline spokesman says the problem was caused by a stalled engine compressor... but adds there was NO fire inside the engine.

A-B-C representatives and the east coast branch of the Writers Guild of America have agreed on a contract. A guild spokesman says the three-year package includes a five percent wage increase for all employees and additional vacation time for senior union members. The Writers Guild is expected to begin negotiations with C-B-S next week.

A farm industry trade group is asking the Bush administration to salvage the federally subsidized crop insurance program instead of eliminating it as outlined by the fiscal 1991 budget. The American Association of Crop Insurers cites a 1989 congressional study that said the program was the fairest way to compensate farmers for crop disasters.

#90033u2600 02/02/1990 ~United Press International

IRVINE, CA. (FEB. 2) UPI - American Savings Bank, which nearly went out of business before being acquired by an investor group led by Texas investor Robert Bass, announced Friday the 177-branch thrift had a successful year in 1989 with profits of $214.2 million.

''By all measures, 1989 was a successful year for American Savings Bank,'' said Mario Antoci, chairman and chief executive officer.

The earnings, which have not been audited, were more than those earned by H.F. Ahmanson & Co., parent of Home Savings of America, the nation's largest thrift and generally acknowledged as one of the best-run S&Ls in the nation. Ahmanson earned $193.9 million in 1989.

The Bass group, in a $400 million deal made in late 1988, owns 70 percent of American Savings, while the federal government owns the rest through warrants.

American said it has streamlined its operations by consolidating about 20 office locations statewide into three major centers. It said its headquarters facility in Stockton, Calif., consolidated 10 former facilities into one.

The thrift's administrative headquarters are in Irvine, Calif.

American said it has met the new capital requirements for tangible and core capital, with levels of 3.01 percent. Required tangible capital is now 1.5 percent, while the core capital requirement is 3 percent.

The bank's risk-based capital is 11.2 percent, higher than the 6.4 percent now required.

#90033u2946 02/02/1990 ~United Press International

(FEB. 2) UPI - South Africa applauded for reforms to end some of the nation's racial policies... U-S unemployment rate steady at five-point-three percent... and groundhogs forecast a short winter. These stories next, from U-P-I...

World reaction to South Africa's announcement of sweeping reforms was swift and positive.

President Bush and leaders of Britain, France, West Germany, Israel and Egypt hailed Pretoria's decision to free imprisoned black nationalist Nelson Mandela... and lift a 30-year ban on the African National Congress.

South African President De Klerk said Mandela would be released from life imprisonment ''soon'' but he did NOT set a precise date. He also did NOT completely lift a three-year-old state of emergency.. but did withdraw many restrictions on the media.

Still, the actions are the most substantial racial reforms since the National Party won power in 1948 and erected the discriminatory laws known as apartheid.

Following the announcement, Britain and the United States said they would take steps to end South Africa's international isolation.

Bush told reporters aboard Air Force One that he viewed the developments in South Africa positively... and would talk to congressional leaders about reviewing various trade sanctions enacted against the white-minority government.

In London, Prime Minister Thatcher's office called the decision ''a historic landmark on the road to a new South Africa.'' Thatcher said the measures vindicate Britain's long-standing policy of refusing to impose trade sanctions against Pretoria.

The reforms could clear the way for negotiations to settle South Africa's racial conflict. While many anti-apartheid activists welcomed the announcement, some say the package doesn't go far enough.

A-N-C President Oliver Tambo warned that many aspects of South Africa's repressive machinery would still remain intact.

And South Africa's Anglican Archbishop, Desmond Tutu, said sanctions should NOT be dropped until the move to full political rights for blacks becomes ''irreversible.''

-30- 2255

#90033u2977 02/02/1990 ~United Press International

(FEB. 2) UPI - The government reports the nation's jobless rate held steady in January.

The Labor Department says a rise in jobs in the construction industry in January offset jobs lost at temporarily idled auto plants. And that helped to keep the month's civilian unemployment rate at five-point-three percent... unchanged since June.

That means that about six-point-five-Million Americans were unemployed last month.

Labor Department official Janet Norwood says January's unemployment report reflects slow but consistent job growth and stable unemployment in the labor market.

In other economic news, Treasury Secretary Brady said the Bush administration would like to see lower long-term interest rates.

In remarks before the congressional Joint Economic Committee, Brady called it ''unfortunate'' that recent increases in interest rates in Germany and Japan will- quote- ''create an uptick in rates of 30-year U-S bonds.''

He also acknowledged that differences exist between the administration and the Federal Reserve over the direction of interest rates... saying the administration probably has a bias toward economic growth that is greater than the Fed.

-30- 1342

#90033u3019 02/02/1990 ~United Press International

(FEB. 2) UPI - Colombia says two U-S drug enforcement jets have been flying reconnaissance missions over Colombian territory since Wednesday, looking for hidden drug cartel planes possibly armed with anti-aircraft missiles.

The aeronautics official says the flights were authorized in preparation for President Bush's February 15th visit to Cartagena for a one-day drug

summit.

A U-S Embassy spokesman in Bogota confirms the flights but isN'T giving any details about their objective. The D-E-A planes can maintain an altitude of 40-thousand feet, elude radar and are equipped with high-powered spy cameras.

Two weeks ago, a report said Secret Service agents were investigating reports that drug cartels planned to shoot down Air Force One when President Bush arrives in Cartagena. The reports have been denied by Colombian officials and the U-S Embassy in Bogota.

West Germany is exhibiting little enthusiasm for an East German reunification plan aimed at establishing a militarily neutral country.

East German Prime Minister Hans Modrow yesterday suggested the two Germany's reunite under a federal government in Berlin and added both nations should first achieve military neutrality.

Senior West German officials, including Chancellor Helmut Kohl, are rejecting the idea of West Germany abandoning NATO, but have NOT offered any alternative for a future united Germany.

West German Foreign Minister Hans-Dietrich Genscher, before heading to Washington today, warned East Germany could NOT be ''co-opted into the Western military alliance.'' Genscher also remarked Germany should NOT isolate itself by becoming neutral.

President Bush says he's following the East German call for reunification with ''great interest.'' A Soviet Foreign Ministry spokesman says President Gorbachev is ''interested'' in the idea of reunification, but adds it's ''only a concept'' at this time.

-30- 2088

#90033u3035 02/02/1990 ~United Press International

(FEB. 2) UPI - Today is the Moslem holy day in the Azerbaijani capital of Baku, and the mosques were full despite the ethnic crisis that has rocked the southern Soviet republic.

Security is still tight with dozens of Soviet troops posted around the main bazaar. And there are signs of life returning to normal with honking traffic oblivious to road signs.

But the bitterness remains.

Leaders of Azerbaijan's nationalist Popular Front today demanded that Moscow withdraw its troops and lift a state of emergency before serious

talks can be held between nationalists and the Kremlin.

They say the imposition of the state of emergency was a violation of the sovereignty of the republic.

Thousands of Soviet and Interior ministry troops stormed Baku last month to end bloody clashes between Moslem Azerbaijanis and Christian Armenians. City authorities say 139 people died in the violence.

The story of two Florida girls who were switched shortly after their birth and raised by the wrong biological parents is about to become a T-V movie.

A Hollywood production company this week bought the story for more than 100-thousand dollars from Bob Mays, one of the parents.

Mays learned in 1989 that his 11-year-old daughter, Kimberly, was actually the biological offspring of Ernest and Regina Twigg.

Mays' biological daughter, Arlena, who was reared by the Twiggs, died in 1988 of a congenital heart ailment. The Twiggs discovered the swap after tests were taken and confronted Mays, whose wife, Barbara, died in 1981 of cancer.

The two girls were born the same week in 1978 at Hardee Memorial Hospital in Wauchula, Florida. It's NOT known if the switch was deliberate or accidental.

Mays says the money will pay for Kimberly's college education and attorneys who represented him during a bitter legal battle with the Twiggs.

The Twiggs wanted Kimberly to take a blood test to determine who her biological parents were. Mays allowed the test only after the Twiggs agreed NOT to claim custody of Kimberly.

#90033u3123 02/02/1990 ~United Press International

(FEB. 2) UPI - President Bush says he wants to talk to leaders of Congress about the status of U-S sanctions against South Africa once Pretoria releases imprisoned black nationalist Nelson Mandela. But top Democrats say they reject any softening of attitude toward the white-minority regime.

Bulgarian communists wrapped up a crucial three-day congress by electing a liberal Politburo member to head their party and dumping dozens of conservatives from leadership posts. Alexander Lilov , a philosophy professor, is one of Bulgaria's best-known political reformers.

Environmentalists are accusing President Bush of breaking his environmental promises by threatening to veto the Senate version of the clean-air bill. The administration contends the bill is too costly for the industry.

Authorities in Pensacola, Florida, say a light plane carrying at least two people crashed into a house shortly after take-off today, killing everyone aboard. A city spokesman reports NO injuries on the ground.

Four former colleagues of executed Czechoslovak dictator Nicolae Ceausescu have been sentenced to life in prison for ordering troops to shoot protesters during the December revolt.

In Anchorage, the judge presiding over the trial of fired Exxon Valdez skipper Joseph Hazelwood is allowing lawyers to extend jury selection beyond usual limits. There has been difficulty in finding 12 impartial jurors.

-30- 1579

#90033u3132 02/02/1990 ~United Press International

(FEB. 2) UPI - Chairman Sam Nunn of the Senate Armed Services Committee warns that he may NOT support two mobile nuclear missiles contained in President Bush's fiscal 1991 budget unless the administration makes clear its policy on multiple-warhead weapons.

The World Health Organization reports that the number of AIDS cases climbed five-point-seven percent in January to a cumulative total of 215-thousand 144. Officials say the United States accounted for nearly half the nearly 12-thousand cases reported last month.

In Detroit, Chrysler Corporation says it's mailing a total of 13-point-eight-Million dollars to 27-thousand car buyers in 47 states. The money... which amounts to 500 dollars per consumer... is part of Chrysler's 1988 settlement of an odometer fraud case.

A food industry poll of one-thousand consumers finds that about 40 percent of those surveyed say they always read labels before buying food for the first time. The survey lists sodium, fat, and calorie levels as the top consumer concerns.

-30- 1183

#90033u3452 02/02/1990 ~United Press International

(FEB. 2) UPI - African National Congress leaders are meeting in Sweden today to discuss South African President Frederik de Klerk's decision to lift a 30-year ban on the anti-apartheid organization. De Klerk also vowed today to free imprisoned black activist Nelson Mandela ''soon'' but did

NOT specify when. A-N-C leaders are welcoming De Klerk's announcement, but add they are concerned that NOT all restrictive practices are being eliminated.

Soviet Foreign Minister Eduard Shevardnadze today spelled out what he says is Soviet policy toward German reunification. The foreign minister said Moscow favors the eventual creation of a ''united, peaceful, democratic'' Germany, but he linked Soviet approval to the military neutrality of both German states. Shevardnadze said in an interview with Soviet media- quote- ''All peoples, especially those of the Soviet Union, must have a guarantee that the threat of war will NEVER come from German soil.''

Peruvian President Alan Garcia says he will attend the February 15th drug summit in Cartagena, Colombia. Garcia had threatened to boycott the summit because of the U-S invasion of Panama. He cites President Bush's decision to withdraw extraneous troops from Panama by the end of the month.

Treasury Secretary Brady says the Bush administration wants lower long-term interest rates. Brady says lower interest rates stimulate business activity and consumer buying. But he acknowledges that differences exist between the administration and the Federal Reserve over the direction of interest rates.

In Phoenix, Arizona, a former plumber was arraigned today for a new first-degree murder charge involving the 1976 car-bomb slaying of reporter Don Bolles. James Robison sat quietly as a judge entered a plea of innocence on his behalf. Robison and businessman Max Dunlap were convicted in 1977 of murder in Bolles' death and sentenced to the gas chamber. But the convictions were overturned in 1980 by the Arizona Supreme Court... and the charges were later dismissed.

-30- 2201

#90033u3670 02/02/1990 ~United Press International

(FEB. 2) UPI - In Johannesburg, South Africa, police fired tear gas at demonstrators celebrating President de Klerk's announcement of several racial reforms. Police say protesters threw stones and disrupted traffic, but they report NO arrests. Earlier today, De Klerk vowed to free jailed anti-apartheid activist Nelson Mandela and lifted a 30-year ban on the African National Congress.

Two commuter trains collided in the West German city of Russellheim today, killing at least 15 people and injuring some 70 others. Police say initial findings indicate the crash occurred after the driver of a train heading for Frankfurt failed to wait for a clearance signal before heading out of the station and slammed into an oncoming train. Witnesses say U-S troops stationed nearby were among the first to arrive on the scene.

President Bush visited the University of Tennessess today in an effort to rally support for education goals he announced during Wednesday's State of the Union address. Bush has labeled his new goals the ''six R's for education in the 90's.'' The president praised Tennessee Governor Ned McWherter's unveiling of a new summer school for math and science at the university. Quoting Bush- ''It will be a model for the rest of the country.''

Two people are dead following the crash of a light plane in a residential area of Pensacola, Florida, this afternoon. The plane crashed into a house but there were NO injuries on the ground. Authorities say the pilot experienced mechanical difficulties shortly after take-off and was heading back to the airport when the twin-engine plane went down. Police say four hunting dogs also were aboard the plane, indicating the victims were going on a hunting trip.

-30- 1895

#90033u3702 02/02/1990 ~United Press International

(FEB. 2) UPI - Leaders of Azerbaijan's nationalist movement demanded today that the Soviet Union withdraw its troops from the republic. In the Azerbaijan capital of Baku, the Popular Front also called for an end to the state of emergency in the region. The Front made the demands as a pre-condition to negotiations between nationalists and the Soviet Union. The Front denied responsibility for Azerbaijanis who killed some 60 Armenians last month.

The West German government is cool toward East German proposals for reunification. East German Prime Minister Modrow yesterday called for the reunification of a Germany which would be militarily neutral. West German Chancellor Kohl rejected the suggestion that West Germany quit NATO, and did NOT suggest an alternative for a united Germany. Soviet and U-S officials are also reacting cautiously.

Thunderstorms spawned several tornadoes near Houston, Texas, today. One twister targeted a trailer park, ripping off the roof of one mobile home and damaging eight others. High winds knocked out power to 24-thousand homes. Maybe the storms were a sign of spring, as predicted this Ground Hog Day by Punxsutawney Phil... a wood chuck named after his home town in Pennsylvania. Phil did NOT see his shadow... which according to legend means spring is near.

The Census Bureau in Washington has asked libraries across the nation to destroy computer disks that contain a destructive program dubbed the ''Israeli virus.'' 350 floppy disks contaminated with the virus were sent out Monday to libraries along with a Census Bureau computer data disk. Officials warn the virus could slow down a computer system or destroy all data on a hard disk. The Bureau is trying to learn how its disks got

infected.

An American Airlines 727 landed without incident late today at O'Hare International Airport after developing a problem with one of its hydraulic systems. The plane... carrying 56 passengers and a crew of seven... was en route to Chicago from Omaha, Nebraska, when the problem developed. A spokesman for the airline said the plane's backup hydraulic system was working.

#90033u4230 02/02/1990 ~United Press International

(FEB. 2) UPI - The latest news... the details and the developments... from around the world and across the nation... from United Press International.

South Africa may be on the road toward abolishing apartheid . President de Klerk today announced several racial reforms, including the imminent release of jailed black activist Nelson Mandela and an end to the 30-year ban on the African National Congress.

De Klerk's actions are the most far-reaching racial reforms since the National Party came into power in 1948 and instituted the discriminatory

laws known as apartheid. Several A-N-C leaders, meeting in Sweden, hailed de Klerk's announcement. But said they are concerned De Klerk won't go far enough in lifting repressive measures.

De Klerk vowed Mandela would be freed ''soon,'' but did NOT specify when. Demonstrators greeted the news with a spontaneous celebration in the streets of Johannesburg. Police fired tear gas to disperse the crowd but reported NO arrests.

Anglican Archbishop Desmond Tutu said- ''We seem to be on the way to the new South Africa.'' But, Tutu was quick to add he doesn't believe foreign governments should lift imposed sanctions until the course toward an apartheid-free society is ''irreversible.''

President Bush responded to de Klerk's action today by saying the release of Mandela may lead the United States to review its sanctions against the nation. Quoting Bush- ''When people move in the right direction, it's time to review all policy.''

-30- 1664

#90033u4249 02/02/1990 ~United Press International

(FEB. 2) UPI - The Justice Department today asked for more time to try to keep Ronald Reagan's diaries out of court.

Former National Security Adviser John Poindexter wants to use the diaries in his defense against five felony charges in the Iran-Contra scandal. A federal judge in Washington had ordered the former president to turn over parts of his diaries to Poindexter by Monday.

But the Justice Department today asked U-S District Judge Harold Greene for more time. The department is trying to negotiate with special prosecutor Lawrence Walsh to agree on certain information in the diaries. That could keep the diaries themselves out of court.

But the Justice Department concedes efforts to agree on a ''stipulation'' have collapsed.

The federal attorneys say the diaries contain sensitive national security information. They warn a battle over the diaries could turn into a ''constitutional confrontation.''

Poindexter is scheduled to go on trial February 20th.

The Justice Department acknowledges deposed Panamanian dictator Manuel Noriega may be a prisoner of war but says that does NOT prohibit the government from trying him as a criminal.

In Miami federal court today, the department filed a 40-page response to Noriega's claim that U-S District Judge William Hoeveler has NO jurisdiction over his case because he's a prisoner of war under the Geneva Convention.

The government says the Geneva Convention does NOT support any claim that the court lacks jurisdiction to try the defendants on the criminal charges they face. The Justice Department further states the Geneva Convention specifically indicates P-O-W's may be prosecuted in appropriate cases by the detaining country.

Co-defendant Luis del Cid also is citing protection under the Geneva Convention because he surrendered after the U-S invasion of Panama.

Defense attorneys say they won't respond until they have thoroughly reviewed the government document.

-30- 2137

#90033u4276 02/02/1990 ~United Press International

(FEB. 2) UPI - President Bush today toured research facilities he declared ''awesome''- and pledged that the rest of the country will soon reach the same educational level.

Bush took his education bandwagon to the University of Tennesee in Knoxville. Governor Ned McWherter announced the creation of a new summer school for mathematics and science, and a new academy for teachers.

The academy and summer schools will be financed jointly by the state, the Energy Department, and the Martin-Marietta Corporation.

Bush said the programs are ''a model for the rest of the country.''

The president says he wants to make American students number one in math and science by the turn of the century.

But in his fiscal 1991 budget, Bush is asking for a two percent increase in federal spending on education. That would NOT even keep pace with inflation. Bush says we must ask more of our educational system.

Environmentalists are accusing President Bush of breaking his environmental promises by threatening to veto the Senate clean air bill.

An umbrella organization for the nation's major environmental groups, the National Clean Air Coalition, says Bush sparked congressional action by proposing clean air legislation last June and now is turning his back on his promises.

The environmentalists charge Senate Republicans with doing the president's bidding by signaling they'll block action on the bill unless it's weakened. The clean air legislation includes strict limits on automoblie tailpipe exhaust and toxic emissions from factories.

The Bush administration says the proposed measures are too costly for industry. But, the chairman of the coalition, Richard Ayres, contends- ''The administration has broken faith with the promises it made last summer.''

#90033u4286 02/02/1990 ~United Press International

(FEB. 2) UPI - Four former Romanian government officials convicted of ordering troops to shoot protesters were sentenced today to life in prison.

The four had been top officials of the administration of executed dictator Nicolae Ceausescu.

Prosecutors called the four ''co-authors of genocide'' for commanding troops to shoot protesters during the December revolt that toppled the Communist regime. At least 689 people were killed, and another one-thousand are still listed as missing.

Soldiers and police encircled the Bucharest Military Academy where the sentencing took place, to protect against a possible assault by diehard Ceausescu loyalists.

A lawyer for the accused said the will of older Romanians had been broken by years of government intimidation.

A jury has been selected in Anchorage, Alaska, to decide the case of fired Exxon Valdez skipper Joseph Hazelwood.

Seven women and five men were chosen from among a group of 52 prospective jurors. They'll spend the next six weeks hearing testimony and reviewing evidence concerning the nation's worst oil spill off Alaska's Prince William Sound last March.

The jury will decide if Hazelwood is guilty of three misdemeanors and a felony- operating the tanker while intoxicated, reckless endangerment, negligent discharge of oil and criminal mischief.

If convicted, Hazelwood could face more than seven years in jail and 61-thousand dollars in fines.

Jury questioning focused on the impact of pre-trial publicity. People were asked whether they had formed an opinion of Hazelwood's role in the wreck

and whether they have strong feeling regarding alchohol.

The jury will be empaneled Monday.

#90033u4297 02/02/1990 ~United Press International

(FEB. 2) UPI - Treasury Secretary Nicholas Brady today made clear what the administration has been hinting at- it wants lower long-term interest rates.

Brady told the congressional Joint Economic Committee in Washington it is ''unfortunate'' that recent increases in interest rates in Germany and Japan will kick up U-S loan rates.

Brady acknowledged the Bush administration has a greater ''bias'' toward low rates and economic growth than the Federal Reserve Board.

The Fed apparently is more worried about easing growth gradually and keeping inflation low. Recent economic indicators show the Fed seems to have accomplished its goals without causing a recession.

But differences are arising over what to do next.

In other economic news, the Labor Department today reported the nation's jobless rate held steady at five-point-three percent. That figure has remained the same sine June.

Economists said the report does NOT signal enough weakness in the economy to trigger an easing of credit by the Fed.

-30- 1184

#90033u4387 02/02/1990 ~United Press International

(FEB. 2) UPI - Monday is the day Ronald Reagan is to turn over parts of his diaries dealing with Iran-Contra, but the Justice Department wants the deadline pushed back. The Department today asked for a delay to conduct negotiations with the special prosecutor.

A federal judge last month ordered Reagan to turn over the documents to lawyers for John Poindexter, who was a national security adviser under Reagan. Poindexter is to go on trial February 20th on felony charges stemming from Iran-Contra.

President Bush says tensions in China are easing, but a report contradicts those assertions. The report cites a State Department report to be released later this month that says the crackdown begun last year in China is continuing.

The broadcast quotes the State Department report as saying- ''as of year's end, there were continuing reliable reports of beatings of political detainees in the Beijing area by security forces.''

Leaders of Azerbaijan's Popular Front today demanded that Soviet troops be withdrawn from the republic and a state of emergency be lifted. An army spokesman says there are five-thousand Soviet troops in Baku, and 12-thousand Interior Ministry soldiers.

About seven-thousand Serbs held a rally in the capital of Yugoslavia's Kosovo province today and said they're determined to remain in the province. Ethnic Albanians outnumber Serbs in Kosovo and want them out.

New York City Mayor David Dinkins sent letters by special courier today to Nelson Mandela inviting him to City Hall when he's released from prison. South Africa's president today promised to release Mandela ''soon.''

The E-P-A took steps today to tighten rules on exports of U-S pesticides. Officials say they're trying to protect foreign countries from pesticide contamination problems.

-30- 1976

#90033u4517 02/02/1990 ~United Press International

(FEB. 2) UPI - Stock prices on the Johannesburg Stock Exchange rose today after President de Klerk announced several racial reforms. Many blacks took to the streets of Johannesburg as word of De Klerk's reform program, including the release of activist Nelson Mandela, began to spread around lunchtime. Right-wing whites had a different reaction. They say De Klerk sold out, and they demand new elections.

The Justice Department says Panama's General Noriega may be a prisoner of war but that does NOT bar the government from prosecuting him on criminal drug charges. The department filed a 40-page response to Noriega's claim that the court has NO jurisdiction over his case because of Geneva Convention rules. The department says the Geneva Convention allows for the criminal prosecution of defendants by a detaining country.

A federal official revealed today that two U-S drug enforcement jets have been flying over Colombia since Wednesday looking for secret airports and drug cartel planes armed with anti-aircraft missiles. The Civil Aeronautics Board reported the U-S planes can spy on the ground from up to 40-thousand feet. Officials earlier had denied reports that drug cartels had missiles to shoot down President Bush when he attends a drug summit in Colombia this month.

A report says cockpit recordings from the wreckage of Avianca Flight 52

indicate some confusion in the cockpit prior to the crash last week. The recordings show the co-pilot told the pilot he had declared a fuel emergency. But the co-pilot reportedly did NOT use the word ''emergency'' during radio transmissions. Also, authorities say a survivor of the crash, who faces federal drug-trafficking charges, may be a drug cartel hit-man.

-30- 1898

#90033u4536 02/02/1990 ~United Press International

(FEB. 2) UPI - Drug policy chief William Bennett says the nation should win the war on drugs ''in a few years'' and that making his position part of the Cabinet would be- quote- ''almost an admission we're NOT going to win.'' Democrats on the Senate Judiciary Committee generally complimented Bennett on his first year on the job. But there were calls for more emphasis on educating children about the dangers of drug abuse.

Officials in India say security forces fired on hundreds of pro-secession Moslems in Srinagar and another Kashmir town today. At least two people were killed and five wounded. Officials also say separatists shot dead a suspected police informant. The violence came after police served expulsion orders on journalists considered a threat to state security. The drive for independence from India is supported by virtually all three-Million Moslem Kashmiris.

Soviet-supplied Angolan troops reportedly have seized a strategic town in southeastern Angola from U-S-backed UNITA guerrillas. Portuguese news reports say the town of Mavinga fell after days of fighting and ''thousands of casualties'' on both sides. A rebel spokesman denies the town has fallen. A State Department spokeswoman in Washington says attempts to crush UNITA are futile and urged a negotiated peace.

British royalty has averted a scandal. Pregnant 23-year-old Marina Ogilvy, a cousin of Queen Elizabeth and 24th in line to the throne, was married today... eliminating the possibility of the first illegitimate childbirth in the House of Windsor in 26 years. The private wedding ceremony appeared to end an embarrassing family spat about the pregnancy. Ogilvy said her parents tried to force her to have an abortion because she wasn't married.

STAMFORD, CT (FEB. 5) COMTEX - Financially troubled Southmark Corp., the Dallas real estate conglomerate that has been in Chapter 11 bankruptcy since July, said it will liquidate all its assets, except its ownership in San Jacinto Savings Association and selected other assets, as part of its reorganization plan.

The other assets include the capital contribution made by Southmark to San Jacinto under the plan, Southmark's net operating loss carry forward and other tax credits, cash in an amount sufficient to make payments to holders of administrative and other priority claims and working capital.

The plan was detailed in a filing with the Securities and Exchange Commission.

Until a year ago, Dallas-based Southmark was a high-flying real estate syndicator.

Along with similar real estate concerns, the company hit hard times, however. In its last fiscal year, Southmark reported a loss of more than $1.4 billion.

Under the proposed reorganization plan, San Jacinto will remain with Southmark as its principal operating asset.

Southmark and the Office of Thrift Supervision reached a settlement Jan. 17 of certain potential claims that the OTS and San Jacinto may have against Southmark. On the effective date of the reorganization, Southmark will make a capital contribution to San Jacinto and issue it five-year warrants to buy new common stock in the company.

As part of the liquidation, Southmark's real estate management, partnership administration and sales brokerage operations would either be sold at confirmation of the proposal by the U.S. bankruptcy judge or within two years after confirmation is terminated.

The net proceeds from the liquidation of Southmark's assets will be used mainly to pay holders of nonsubordinated claims against the company.

Those holders will receive shares of newly issued preferred stock of the reorganized company.

Southmark will apply to have the new preferred shares listed on a national stock exchange.

The plan calls for Southmark to issue new common stock to the holders of nonsubordinated claims, subordinated claims and existing equity interests in the company.

The new common stock will be distributed as follows: -- holders of nonsubordinated claims and fraud claims relating to those securities will receive 62 percent; -- holders of senior subordinated debentures and securities fraud claims relating to those securities will receive 16 percent; -- holders of subordinated debentures and convertible subordinated debentures, and holders of fraud claims relating to those securities, will receive 11 percent; -- holders of existing preferred stock and fraud claims relating to that stock will receive 6 percent; -- holders of common stock and fraud charges relating to that stock will receive 5 percent.

STAMFORD, CT (FEB. 5) COMTEX - Upland Minerals & Chemicals Corp. of New York has canceled an agreement with Intercommerce Investments Inc. of Boca Raton, FL, under which Upland would have traded 2 million of its shares for $777,000 in jewelry and precious stones.

The exchange was intended to allow Upland to continue its mining operations and pay debt to auditors and the transfer agent, according to a filing with the Securities and Exchange Commission.

Due to the slow market of jewelry and precious stones, and the high price Intercommerce placed on the jewelry, the merchandise did not sell or held Upland financially, according to the filing.

The Upland board voted Jan. 19 to cancel the deal.

Intercommerce returned 1.7 million shares, which have been canceled, but kept 300,000 shares in exchange for jewelry at wholesale prices.

This 8-k Filing was submitted to the Securities and Exchange Commission on FEB. 2, 1990

#90034p0002 02/03/1990 ~PR Newswire
SANTANDER, SPAIN, (FEB. 3) PR NEWSWIRE - Banco Santander (NYSE: STD) reported a 28.5 percent increase in net income for the year ended Dec. 31, 1989, according to Emilio Botin, chairman of the board, who addressed the general meeting of shareholders.

Net income was 53.5 billion pesetas ($487.5 million) as compared with 41.6 billion pesetas ($379.3 million) a year ago. Income before taxes increased 28.2 percent to 81.3 billion pesetas ($740.7 million).

He commented on the results, describing them as satisfactory "because the Santander Group managed to compensate for a decline in margins with important growth in its balance sheet, with a 35.4 percent increase in total assets."

Based on the strong 1989 earnings, the board of directors declared a supplemental dividend of 85 pesetas ($.77) per share, payable April 30, 1990. Together with the interim dividend of 100 pesetas ($.91) per share, paid Oct. 31, 1989, this will be an annual per-share dividend of 185 pesetas ($1.68), a 19.4 percent increase over 1988.

Botin said: "My initial comment on these results is to emphasize our criteria of business prudence. The special provision recorded for the coverage of possible extraordinary risks, in the amount of 8,500 million pesetas, strengthens the reserves on our balance sheet which exceed the requirements of the Bank of Spain, including 100 percent coverage of country risk, full provision for personnel retirement funds for those already retired or still active (computed at low interest rates), and provision for credit risks far above our requirements."

Botin also attached major significance to the strong capitalization achieved by the group. In 1989, consolidated equity was 243.7 billion pesetas ($2.2 billion), an equity ratio of greater than 10.5 percent as compared to the 8 percent standard established by the International Bank of Payments in Basel, Switzerland.

"One other consideration is the general profitability of operations," he said. "Return on equity was close to 20 percent and return on assets was 1.34 percent, exceptional rates among both the Spanish and international banks with which Banco Santander is compared."

He noted that during 1988 and 1989, the Santander Group strongly reinforced its organizational structure in order to develop new financial products and markets so as to offer better service to its clients.

Botin described the consolidation of the Santander Group's international position in Europe, and the initiatives that it had adopted in the Spanish market to adapt itself to a more competitive market, as the most significant activities of 1989.

He noted that the group's strategic alliance with the Royal Bank of Scotland progressed in a very satisfactory manner during 1989. A particular highlight was the joint creation of a bank in Gibraltar which will operate under the name and management of the Royal Bank.

"Our clients, both individuals as well as companies, are being served in the English market by the Royal Bank, while the same service is provided to the clients of the Royal Bank by Banco Santander's offices," he said.

During 1989, the Santander Group entered a special joint linkage with Nomura Securities and an agreement with Kemper Corporation, expanding its presence in Japan and the United States. The group also extended its

operations in Chile, Puerto Rico, the Asian-Pacific Rim and the countries of the European Community, notably West Germany, Belgium, Italy and Portugal.

Emilio Botin O'Shea was elected to the board of directors, replacing Emilio Botin-Sanz de Sautola y Lopez, former chairman, who retired from the board.

The consolidated Santander Group is composed of Banco Santander, 17 more banks and another 76 companies of various nationalities in which it maintains an ownership position. Through a network of 1,630 offices in 27 countries, Banco Santander has the premier foreign banking network and is the most profitable in Spain.

Banco Santander's shares are listed internationally on the New York, Frankfurt, London, Paris, Zurich, Geneva, and, from Jan. 25, 1990, the Tokyo stock exchanges.

Each Banco Santander ADS is equivalent to one ordinary Spanish Banco Santander share.

Conversion of Spanish pesetas was translated into dollar amounts at the exchange rate of U.S. $1 to Sp. Ptas. 109.72.

#90034p0009 02/03/1990 ~PR Newswire

GREENWICH, CT. (FEB. 3) PR NEWSWIRE - The Pittston Company (NYSE: PCO) today reported a fourth quarter loss of $18.8 million or 50 cents per share after taking into account special charges totalling $16.2 million, most of which relate to the company's coal business. For the full year 1989, the company reported net income of $3.8 million or $.10 per share. In 1988, Pittston recorded net income of $15.2 million ($.40 per share) and $48.6 million ($1.26 per share) for the fourth quarter and the full year, respectively.

Paul W. Douglas, chairman and chief executive officer, said he was gratified that the agreement reached between the Pittston Coal Group and the United Mine Workers of America (UMWA) leadership, as announced on Jan. 1, 1990, had recently been formalized in a detailed contract signed by the parties. Implementation of the agreement now awaits ratification by the UMWA membership.

Douglas said, "Initially under the skilled guidance of Mr. William J. Usery Jr., the 'super' mediator appointed by Labor Secretary Elizabeth

Dole in late October 1989, much improved communication and mutual understanding came to be established between Pittston and the union leaders. Subsequently, the basic objectives of each side could be fulfulled in the new contract."

Douglas reported that the fourth quarter special charges of $16.2 million include costs related to the labor settlement and a return to normal operations, some coal asset writedowns, the anticipation of losses on certain coal sales contracts and a reserve for noncoal litigation matter.

Turning to operations, Douglas had the following comments: COAL Pittston's coal activities reported a fourth quarter operating loss of $25.2 million reflecting the special charges outlined above and the impact of the strike on the Pittston Coal Group's operations. Strike-related losses declined in the fourth quarter compared to the third quarter but gains from asset sales declined even more. Profits realized from the sale of purchased coal were somewhat lower in the fourth quarter due to reduced trading opportunities at attractive margins. Pittston's Pyxis subsidiary, where employees are not represented by the UMWA, continued to operate normally with an operating profit for the full year that exceeded earnings in the previous year.

Douglas noted that early signs for 1990 indicate an improving year for coal markets. The company has already renewed most of its basic metallurgical coal sales contracts for the 1990 coal year, on terms which provide equivalent tonnage and some net price improvement after likely effective rail rate increases. In addition, improved supply/demand prospects for steam coal, and the anticipated enactment of acid rain legislation, are providing firm support for better market conditions in the future. However, because of reduced production expected at the Pittston Coal Group pending a return to work and to normal operations, it is expected that coal operations will continue to incur an operating loss in the first quarter of 1990, hopefully substantially reduced, however, from the level of the final two quarters of 1989.

AIR FREIGHT Burlington Air Express reported an operating profit of $2.2 million for the fourth quarter. Results would have been more in line with the $6.3 million earned in the fourth quarter last year except for sudden extra costs incurred during two weeks of extremely severe weather in December, the recent sharp escalation in jet fuel prices and continuing weakness in automotive airfreight shipments. Jet fuel prices rose more than 50 percent in the month of December.

In early January, Burlington announced that it will implement a domestic price increase on Feb. 5 -- three weeks earlier than originally planned because of the rise in jet fuel and other costs. Burlington's pricing change will affect domestic tariffs by amounts averaging about 10 percent.

In the fourth quarter, Burlington's revenues grew to $219 million from $199 million in the fourth quarter of 1988. For the entire year 1989, Burlington's revenues rose to $836 million from $781 million in 1988. This 7 percent growth was achieved despite Burlington's continued withdrawal from letter and envelope markets as the company focuses its priority attention on domestic and international express cargo.

Burlington has signed a 15 month extension agreement which will allow operations at its Fort Wayne hub to continue through the end of 1991. The environmental permitting process for Burlington's planned new sorting hub at Toledo, Ohio, is proceeding satisfactorily, with construction start-up expected before mid-1990 and completion in the second half of 1991.

BRINK'S Despite the heavy increase in legal expenses and medical and vehicle insurance costs, Brink's operating profit in the fourth quarter amounted to $8.3 million compared with $6.6 million in the same quarter last year. For the full year, Brink's operating profit totalled $28.0 million, compared with $26.0 million in 1988. Foreign affiliates accounted for $2.4 million of fourth quarter 1989 operating profits and $8.7 million for the full year compared with $1.3 million and $5.2 million in the fourth quarter and full year 1988, respectively.

BRINK'S HOME SECURITY Brink's Home Security (BHS) reported a record operating profit of $927,000 in the fourth quarter which compares with $537,000 in the third quarter and $336,000 in the fourth quarter of last year. For the year, BHS achieved an operating profit of $2.2 million, double its 1988 operating profit of $1.1 million. Net new customer installations totalled 6,400 in the fourth quarter, raising the total subscriber count to 114,400 at Dec. 31, 1989, a 28 percent increase over the subscriber count at the end of 1988. Aided by the implementation and refinement of various new marketing programs during 1989, there has been a noticeable pickup recently in the pace of new installations despite an increasingly competitive environment. BHS's plan for 1990 has as one of its objectives at least a doubling of its 1989 operating profit.

FINANCE Pittston maintained a generally conservative financial position in the fourth quarter, with a strong balance sheet at year-end. Cash flow from operating activities (before changes in working capital and other operating assets and liabilities) amounted to $38.7 million for the year 1989.

At Dec. 31, 1989, total debt stood at $97.7 million, compared with $79.3 million at the end of 1988, an increase of $18.4 million after reflecting payments totalling $22.6 million for the company's common stock under its share repurchase program. During the fourth quarter the company purchased 110,000 shares. Since the company's share repurchase programs were initiated in July 1986, the company has repurchased 5,369,000 shares at an average cost of $12.77 per share. At Dec. 31, 1989, the company had

authority to purchase 2,890,000 shares under its current share repurchase program.

At its meeting today the board of directors declared a regular quarterly dividend of 5 cents per share payable March 1, 1990 to shareholders of record on Feb. 15, 1990.

CLEAN AIR LEGISLATION The Senate Environment and Public Works Committee has sent to the full Senate for debate a clean air bill which contains most of the acid rain control provisions of the administration's proposal. Pittston has large quantities of low sulphur coal which can play an important role if a "freedom of choice" bill, such as the one now before the Senate, is finally adopted.

OUTLOOK Pittston's outlook for the first quarter of 1990 reflects the continuation into March of reduced production and therefore losses at the Pittston Coal Group companies plus usual seasonal weakness in its airfreight business compounded by sharply highly fuel costs. Accordingly, first quarter corporate results are presently expected to produce a modest loss.

However, substantial improvement is expected in the second and subsequent quarters as coal operations return to normal levels and Pittston's service businesses benefit from seasonally stronger conditions and restored or increased margins.

SATURDAY, FEBRUARY 17

8 a.m.
ABC, ''A Pup Named Scooby Doo.''
CBS, ''Dink, The Little Dinosaur.''
NBC, ''ALF Tales.''

8:30 a.m.
ABC, ''Disney's Gummi Bears/Winnie the Pooh Hour.''
CBS, ''The California Raisins.''
NBC, ''Camp Candy.''

9 a.m.
CBS, ''Jim Henson's Muppet Babies.''
NBC, ''Captain N: The Game Master.''

9:30 a.m.
ABC, ''Slimer! And The Real Ghostbusters.''
NBC, ''Karate Kid.''
PBS, ''John McLaughin's One On One.''

10 a.m.
CBS, ''Pee-wee's Playhouse.''
NBC, ''The Smurfs.''
PBS, ''Firing Line.''

10:30 a.m.
ABC, ''Beetlejuice.''
CBS, ''Garfield and Friends.''

11 a.m.
ABC, ''The Bugs Bunny and Tweety Show.''
NBC, ''The Chipmunks.''
PBS, ''Tony Brown's Journal.''

11:30 a.m.
CBS, ''Dungeons and Dragons.''
NBC, ''Saved by the Bell.''

Noon
ABC, ''The Flinstone Kids.''
CBS, ''The Adventures of Ragedy Ann and Andy.''
NBC, ''ALF Tales.''

12:30 p.m.
ABC, ''ABC Weekend Specials: 'Runaway Ralph''' - A two-part presentation about an adventurous mouse and the lonely boy who becomes

his friend. Part 1. R.
NBC, ''Kissyfur.''

1 p.m.
CBS, ''Olympic Winterfest'' - Another installment of winter sports programs leading to the 1992 Olympic Winter Games in Albertville, France. The program is scheduled to include coverage of women's World Cup super giant slalom skiing and the World Bobsled Championships from St. Moritz, Switzerland.
PBS, ''Flyers in Search of a Dream'' - Hosted by Tanya Hart, this program presents rare film footage and dramatic reenactments to tell the relatively unknown story of America's pioneering black aviators and their struggles against racial prejudice.

2:30 p.m.
CBS, ''Sports Special: 'Twin 125's at Daytona''' - Coverage of the two short races that determine pole positions for the Daytona 500, NASCAR's premier event.
NBC, ''College Basketball'' - Louisville vs. Virginia at University Hall in Charlotte, Va.

3:00 p.m.
ABC, ''Professional Bowlers Tour'' - $160,000 Budweiser Classic, Don Carter's All Star Lanes, Sunrise, Fla.

4:00 p.m.
CBS, ''NCAA Basketball Live'' - The Fighting Irish of Notre Dame vs. the Syracuse Orangemen from the Carrier Dome in Syracuse, N.Y.
PBS, ''Motorweek.''

4:30 p.m.
ABC, ''ABC's Wide World of Sports.''
NBC, ''Golf: 'Shearson-Lehman-Hutton Open''' - Live third-round coverage from the Torrey Pines Golf Course, La Jolla, Calif.
PBS, ''Hometime.''

5:00 p.m.
PBS, ''Art Underfoot.''

5:30 p.m.
PBS, ''The Frugal Gourmet.''

6:00 p.m.
ABC, ''ABC's World News Saturday.''
PBS, ''New Yankee Workshop.''

6:30 p.m.
NBC, ''NBC Nightly News.''

PBS, ''Wild America.''

8 p.m.
ABC, ''Mission: Impossible.''
CBS, ''Paradise'' - Ethan and Gideon McKay, the two best guns in the West, find themselves in the middle of a violent range war, courtesy of McKay's son, Doug, who has volunteered their services.
NBC, ''227.''

8:30 p.m.
NBC, ''Amen.''

9 p.m.
ABC, ''The ABC Saturday Mystery: 'Christine Cromwell.'''
NBC, ''The Golden Girls.''
CBS, ''Tour of Duty'' - Stranded in the jungle, Taylor and Ruiz must come to grips with death as the platoon deals with the reality that the war doesn't stop because someone doesn't come home.
PBS, ''Film on Film'' - A profile of Josephine Baker, an illiterate black girl from the St. Louis slums who danced at the Folies Bergeres, adopted 12 children, fought in the French Resistance in World War II, campaigned for civil rights in the United States, and became a symbol of a new freedom for women.

9:30 p.m.
NBC, ''Empty Nest.''

10 p.m.
CBS, ''Saturday Night With Connie Chung.''
NBC, ''Bob Hope Winter Special.''

11 p.m.
ABC, ''ABC's World News Tonight: The Weekend Report.''

11:30 p.m.
NBC, ''Saturday Night Live.''

BERWICK, PA (FEB. 4) UPI - An electrical failure in the cooling system of an eastern Pennsylvania nuclear power plant triggered a 6 1/2-hour alert Saturday, but officials said no radiation was released and the public was in no danger.

Pennsylvania Power & Light Co., which operates the Susquehanna Steam Electric Station Unit No. 1, declared the alert at the generating plant at 5:53 p.m. when a system that cools water in the reactor failed, spokesman

Ira Kaplan said. The alert was lifted at 12:25 a.m. Sunday.

No residents of the area were evacuated and there was no release of radioactivity, said Lt. Gov. Mark Singel, who held a news conference in Harrisburg late Saturday.

''Corrective action has been taken, and there was no external release at any time. There was no threat to health or safety of the public in the area,'' Singel said.

The plant has been in a ''cold shutdown'' since Thursday because of an unrelated problem, officials said. During cold shutdown, the plant is kept at 200 degrees Fahrenheit instead of the usual operating temperature of 540 degrees.

''We're back to normal shutdown,'' Kaplan said, after the temperature dropped below 200 degrees.

William Dornsife, chief of nuclear safety for the Department of Environemental Resources, said an electrical malfunction occurred during a test of the containment isolation system, which operates in an emergency to keep water and steam inside the reactor vessel.

As part of the test, circuit breakers were opened, shutting the cooling water valves. When the switch was thrown to close the breakers and re-open the valves, the system failed to operate, causing the cooling water temperature to rise to 252 degrees.

''It's an auxiliary system. There are four or five other safety systems that were always available,'' Dornsife said.

Singel said the circuit breakers were replaced, allowing the cooling water to resume circulation.

Dornsife said it was the first alert emergency declared at a nuclear power plant since an alert at the Beaver Valley power plant 2 1/2 years ago. Unusual events occur several times a year.

The Susquehanna plant declared an alert on Sept. 22, 1982, when an electrical switch that controlled a Unit 1 water cooling system caught fire. At the time, Unit 1 had just started low-power testing.

''Shutdown cooling is an important system. You have to have it,'' Kaplan said. ''If you don't have shutdown cooling, that automatically puts you in that (emergency) classification.''

Kaplan said no radioactivity was released during the incident ''and no danger to the public exists.''

PP&L notified the NRC along with state and emergency management officials in Luzerne and Columbia counties and in all municipalities within a 10-mile radius. Fire and ambulance personnel in the Berwick area were placed on standby alert as a precaution.

''State, county and local emergency staffs are at their command centers in anticipation of worsening conditions,'' said John Comey, press secretary of the state Emergency Management Agency. ''These alerts are not issued frequently or lightly.''

Located in Luzerne County's Salem Township, about 45 miles southeast of Scranton, the twin-unit Susquehanna Steam Electric Station is owned by the Allentown-based PP&L and Allegheny Electric Cooperative Inc. of Harrisburg.

PP&L said the Unit 1 reactor was shut down Thursday afternoon due to a leak in a hydraulic system associated with the unit's generator. The Unit 2 reactor was unaffected by the shutdown.

LOS ANGELES (FEB. 4) UPI - The 800-mile Trans Alaska Pipeline is suffering from corrosion that threatens its structural integrity and forces a repair program at a staggering expense to pipeline operators, it was reported Sunday.

Pipeline officials were in Juneau, Alaska last week to explain a rehabilitation plan for the 13-year-old oil line that could cost its operators in excess of $1.5 billion over the next five years, the Los Angeles Times reported.

That, in turn, could cost the Alaska state government hundreds of millions of dollars in oil royalties and related revenues.

Federal government officials are concerned because a pipeline shutdown of even a few days could add about $1 billion for additional oil purchases to the nation's foreign debt. Line operators have promised to complete the necessary repairs without cutting off the flow for more than 2 1/2 days over the next 18 months, but some federal regulators believe the work will take longer.

The reports of corrosion, coming on the heels of the devastating Exxon Valdez tanker spill last March, have cast suspicions on Alyeska Pipeline Service Co., the oil industry consortium that runs the 800-mile pipeline.

''They tell us they just got this state-of-the-art surveillance system, and that's why they found this,'' Alaska Attorney General Douglas B. Baily

told the Times. ''But we're not buying that story. This corrosion didn't just happen. They've had other technology to use.''

Federal regulators believe the severity of the problem could have been reduced if Alyeska officials had listened to their critics before the pipeline was completed in 1977.

Company officials insist there is no crisis and the corrosion problems can be corrected without imperiling pipeline operations or the ecologically fragile tundra.

''We aren't shutting down the line,'' said Bill Howitt, Alyeska's engineering manager. ''We're doing repairs on the fly. We have sufficient early warning in this case. ... We don't have pipeline integrity problems.''

But Jack Overly, head of the western regional division of the federal Office of Pipeline Safety, disagreed.

''The extent of it we don't know,'' Overly told the Times, ''but it's big enough that it could affect the integrity of the pipeline.''

Records and statements from officials indicate most of the corrosion was caused by the failure of protective coating and tape wraps, which many critics had warned were flawed long before the pipeline was finished.

Corrosion is a slow process that weakens metal over years. Most experts involved agree that the problems on the Alaska pipeline pose no immediate threat to the environment or to pipeline operations.

The $7.7 billion line was built by a partnership of oil firms including industry giants Sohio, Arco, Exxon and Mobil. Three years ago, Sohio was absorbed by British Petroleum PLC. Throught that takeover, the British firm now owns slightly more than half of Alyeska.

Although half of the pipeline is buried and the other half runs above the surface of the ground, Howitt said the known corrosion problems are in the underground sections.

During the pipeline's construction, Scotchkote epoxy was applied at joints in the line, but experts determined it would not hold up. Rather than remove the epoxy and start over, federal officials authorized covering it with a moisture-resistant tape.

Critics have said the application of the tape over the epoxy makes a weak bond, in effect like putting wallpaper on top of peeling paint. Alyeska officials argued that a pipeline buried in permafrost would not have a problem because the frozen ground is a poor conductor of the

electromagnetic currents that promote corrosion.

But because the pipeline carries oil heated to 140 degrees, it has changed the characteristics of the ground, thawing the subsoil so it does conduct electricity.

Alyeska has already excavated 308 suspect areas along the underground portion of the pipeline and found 30 spots that will need repair. The most serious corrosion was discovered in the Atigun River Flood Plain where a 9-mile stretch of pipeline will be replaced in the spring of 1991, Alyeska officials said.

#90035u1097 02/04/1990 ~United Press International

(FEB. 5) UPI - If the University of Arkansas needs to cut costs, they might consider eliminating Nolan Richardson's position. The Razorbacks proved Sunday they didn't need their coach.

No. 3 Arkansas defeated Texas 103-96 in overtime, after Richardson walked off the court with 14 seconds remaining in regulation thinking his team had lost.

Richardson came back to the court when the overtime began to the boos of a sellout crowd of 16,231 in Austin and Lee Mayberry touched off an eight-point run in the extra period that decided the game.

''I've told our team in practice that if they take their practice to the game, they don't need a coach,'' Richardson said. ''They proved me right. Scott Edgar and Mike Anderson (his assistants) did a great job. I considered not coming back out when they told me the game was in overtime.''

With 14 seconds left in regulation and the Longhorns owning an 84-83 lead, Texas' Lance Blanks was fouled heading to the basket. Replays showed Mayberry grabbed Blanks around the waist from behind rather than trying to block the shot and official Mike Tanco called an intentional foul. That meant Blanks got two free throws and Texas then got the ball.

Richardson walked onto the court, took off his jacket, yelled at Tanco and then began walking toward the exit. He strolled past stunned Texas Coach Tom Penders and kept going until he reached the Arkansas dressing room.

When play resumed, Blanks hit his two free shots to put Texas in front by three and when the Longhorns inbounded the ball, Travis Mays was immediately fouled.

Mays, however, missed the front end of a one-and-one chance with eight

seconds left and Mayberry sped down court in time to put up a three-point shot that hit nothing but net with five seconds to go.

''I thought he (Richardson) should have been called for a technical,'' said Penders, who himself was publicly reprimanded by SWC officials for critical remarks he has made about officiating.

''It's not like he just quietly walked off the court. He walked onto the floor and had some things to say. Anytime you come on the court it is an automatic technical. If that's not showing up an official, I've never seen an official shown up.''

Arkansas virtually wrapped up the Southwest Conference title with the win, moving three games in front with six to play. Arkansas won its 11th straight and improved to 10-0 in the SWC and 19-2 overall. The Razorbacks' two losses this year have been a one-pointer at home to No. 1 Missouri and a road setback against Nevada-Las Vegas.

-- AROUND THE NCAA --

In other games, No. 1 Missouri downed Colorado 93-69, No. 5 Duke beat Notre Dame 88-76, No. 11 Illinois topped Indiana 70-65 and Ohio State defeated No. 12 Louisville 91-88 in overtime.

At Columbia, Mo., Anthony Peeler, Nathan Buntin and John McIntyre each scored 17 points and the top-rated Tigers withstood a deliberate pace set by Colorado. Missouri, 21-1, has won 12 straight and is 7-0 midway through the Big Eight schedule. Colorado, stopped by No. 2 Kansas Wednesday, lost to the Tigers for the second time in eight days.

At Durham, N.C., Alaa Abdelnaby scored 22 points and Duke made 30 of 37 free throws to win a foul-filled game. The Blue Devils, 18-3, held a double-figure advantage throughout the second half. Christian Laettner led the Blue Devils with 14 points, Bobby Hurley had 13, Phil Henderson 12 and Greg Koubek 11 as all Duke starters reached double figures. Notre Dame, 11-7, was called for 28 fouls and as three Irish players fouled out.

At Champaign, Ill., Kendall Gill scored 19 of his 25 points in the second half, including four free throws in the final minute to help the Fighting Illini to a Big Ten victory. Illinois improved to 16-4 overall and 6-4 in the conference. Indiana, led by Eric Anderson's 18 points, fell to 14-5 and 4-5. The Hoosiers have lost three of four games.

At Columbus, Ohio, Jim Jackson scored 21 points, including a basket off a missed shot with 15 seconds left in overtime to lift the Buckeyes over Louisville. Ohio State, 10-9, trailed 57-40 with 15 minutes left in the regulation and Louisville, 16-4, appeared on the verge of a blowout.

In Top 20 games Saturday: No. 2 Kansas pounded Oklahoma 85-74; No. 4 Michigan rocked Wisconsin 77-63; No. 6 Georgetown nailed No. 19 St. John's 74-67; No. 7 Syracuse flattened Florida State 90-69; No. 9 Purdue was upended by Michigan State 64-53; No. 10 Nevada Las Vegas edged North Carolina State 88-82; No. 13 Louisiana State outscored 148-141; No. 14 Connecticut routed Providence 92-77; co-No. 15 La Salle downed Iona 89-73; co-No. 15 Georgia Tech topped Maryland 90-84; and No. 17 UCLA defeated DePaul 87-77.

#90036b0003 02/05/1990 ~Business Wire

BROOMFIELD, CO (FEB. 5) BUSINESS WIRE - McDATA Corp. has signed a major sales and distribution agreement with Sumitomo Corp. of Tokyo.

Under the terms of the agreement, Sumitomo will market McDATA's products within Japan through both direct sales and distributor relationships.

Beginning in the first quarter of 1990, Sumitomo will market McDATA's three product families: the LinkMaster 4000 series of cluster controllers, the LinkMaster 5000 series of channel-to-peripheral extenders, and the LinkMaster 6000 series of network processors.

In addition Sumitomo will implement direct sales efforts within Japan through marketing and advertising support.

''We are extremely pleased to have Sumitomo Corp. as our newest business partner,'' said Jack McDonnell, chairman, chief executive officer, and president of McDATA Corp.

''Sumitomo has a worldwide reputation for excellence and integrity, and we are proud to allow them to introduce us to the Japanese marketplace. We anticipate a long and valued relationship with Sumitomo.''

Masahiro Masutani, director and general manager of the Electronics and Aerospace division of Sumitomo, added: ''Sumitomo Corp. chose the LinkMaster product line because McDATA committed to the Japanese market with its high quality products. We also anticipate a fruitful business relationship with McDATA.''

Sumitomo Corp. is a key member of the Sumitomo Group, one of Japan's largest industrial groupings. As a major integrated trading company, Sumitomo handles more than 20,000 different products and commodities. Sumitomo's annual gross trading volume exceeds 14 trillion yen ($112 billion U.S.).

McDATA Corp., based in Broomfield, designs, manufactures and markets network communications systems worldwide.

INDIANAPOLIS (FEB. 5) BUSINESS WIRE - Anacomp Inc. (NYSE:AAC) announced Monday that it is filing suit in Federal District Court - Indianapolis against The Cooper Companies Inc. and certain of its officers and directors, charging violation of the Federal Racketeer Influenced and Corrupt Organization act (''RICO'').

The complaint charges that Cooper is controlled by members of two families - The Singers and the Sturmans - who have conspired to acquire control of Anacomp through a pattern of racketeering activity. The complaint further alleges that Cooper directors, Gary, Steven and Brad Singer and Bruce Sturman, acting through family owned or controlled businesses, including Cooper, utilized the proceeds of a pattern of racketeering activity spanning a period of 20 years to acquire an interest in Anacomp. Gary Singer and Bruce Sturman are the co-chairmen of Cooper. The proceeds were derived from racketeering activity including Medicaid fraud in connection with a Sturman family nursing home business and fraudulent cost overruns in connection with a New York City building project by a Singer family construction business.

Anacomp's action is in response to a letter from Cooper which indicated that Cooper intended to file shortly a Schedule 13D disclosing ownership of more than 5 percent of Anacomp's common stock and that Cooper wanted to discuss a possible business combination at what Cooper believes would be a ''substantial premium'' to Anacomp's current market price. Anacomp had previously received notice of a filing by Cooper under the antitrust laws indicating that Cooper intended to acquire more than $15 million worth of Anacomp common shares.

Louis P. Ferrero, Anacomp's chairman, president and CEO, said that the board of directors does not believe this is the time to explore the sale of the company, which recently reported record operating profits from continuing operations for its latest fiscal year and continued strong growth in its core business.

The company is the leading provider of services, supplies and products to the micrographics industry. Micrographics is the conversion to microfilm of information stored on paper or in electronic form. Anacomp's primary business is the sale of Computer Output Microfilm (COM) services, systems and related supplies and maintenance. COM is a cost-effective alternative to the use of paper or electronic files as a means of storing information.

TORRANCE, CA (FEB. 5) BUSINESS WIRE - MDT Corp. (NASDAQ:MDTC) Friday released its third-quarter and nine-month results.

Thomas Hein, vice-president, finance, and chief financial officer said that the previously announced layoff of 48 hourly employees at the Henrietta facility, reduction in salaries of all management employees and certain other measures would eliminate excess capacity and reduce costs and expenses in the fourth quarter by more than $2.2 million annually.

The company affirmed that initial deliveries of several new products will occur in the fourth quarter, that product line transfers, including transfer in-house of all Forge products, will be completed in the fourth quarter, and that production and shipment of transferred products had begun or would begin prior to March 31, 1990. The company said that it expects to mail its Third-Quarter Report on or about Feb. 15, 1990.

#90036b0025 02/05/1990 ~Business Wire

LOS ANGELES (FEB. 5) BUSINESS WIRE - J. Richard Hannan has been appointed executive director of the Westchester/LAX Transportation Management Association based at Los Angeles International Airport.

The TMA is managed through the Westchester/LAX Chamber of Commerce under Kathleen Boyd, executive director of the parent organization.

Since 1984 Hannan has served as western regional director of government affairs for the Air Transport Association of America at its Los Angeles complex. In that capacity he has been the registered lobbyist for the twenty-one largest U.S. airlines in matters before the Los Angeles City Council. During his years with the ATA he has led numerous coalitions of private sector interests in tax, environmental and consumer affairs issue areas impacting the Western United States.

A long-time resident of the Palos Verdes Peninsula, Hannan has been active in the Southern California business and professional community since 1969, when he was named as Eastern Airlines senior ranking staff person for the West Coast.

Since then, he has held a number of management positions of increasing responsibility, including executive director of Los Angeles Area Chamber of Commerce, general manager and corporate secretary of the Central City Association of Los Angeles and vice president of California Federal Savings and Loan Association.

A native New Englander, Hannan graduated summa cum laude in 1958 from Boston University and during the early 1960s was the chief public relations official for Northeast Airlines, a firm that later merged with Delta Airlines. At that time, he was the youngest senior public relations official of any of the nation's major air carriers.

In 1964 he began a ten-year career with Eastern Airlines, advancing through various management posts to become system director of public relations programs for what was then the second largest airline in the free world.

The Westchester/LAX TMA is an alliance of companies and government agencies who wish to pool information and resources to address traffic and

transportation issues on a joint basis, and by doing so, benefit from enhanced political influence and improved economies of scale. Its members include the largest airlines at LAX, the Department of Airports and leading local businesses.

The principal purpose of the TMA is to provide a means for promoting cost-efficient management of trip reduction programs and ride sharing for member organizations and to provide for collective action in government relations.

#90036b0031 02/05/1990 ~Business Wire

FREMONT, CA (FEB. 5) BUSINESS WIRE - A new T1 interface module for Alantec's MULTILan Switch (MLS) links up to eight local area networks to a T1 wide-area network connection.

The new T1IM (T1Interface Module) supports both standard and fractional T1 connections. The MLS, with its 50 Mbps sustained packet forwarding rate, is especially suited for utilizing the high T1 transmission speed.

Unlike most other Ethernet bridges that support T1, the MLS does not require a separate DSU/CSU (data service unit/channel service unit) unit, according to Edward Snyder, president of Alantec. ''By including framing in our design, we've reduced the number of devices between the LAN and the T1 link and reduced the cost of internetworking,'' Snyder said.

Fractional T1 connections are an affordable way for users to purchase only the transmission capacity they need for LAN traffic. T1IM software controls the number of T1 transmission channels that are active, up to a maximum of 24. The MLS supports any multiple of those channels, up to the 1.544 Mbps T1 bandwidth. Additional T1IM modules can be installed in an MLS to support multiple T1 links.

The MLS T1 interface provides the data framing required for T1 transmission. The MLS takes the data from the LAN and converts it to the transmission format for wide-area transmission on the T1 link, connecting directly to a CSU. A CSU provides the interface between the T1 medium and medium and the MLS. Multiplexed Data and Voice

The T1IM, priced at $3,300, will be available in 30 days ARO (after receipt of order) from network resellers or directly from Alantec. Base price for the MLS is $8,800. MLS bridges can be upgraded onsite with the new interface module.

Alantec specializes in internetworking products for local and remote networks. The company markets its products primarily through value-added resellers to managers of large networks within Fortune 1000 companies, government agencies and large universities. The company, located in Fremont, Calif., is privately held. Major investors are TA Associates, Accel Partners and Dougery, Wilder & Howard.

SCOTTSDALE, AZ (FEB. 5) BUSINESS WIRE - Famous Restaurants Inc. (NASDAQ:FAMS), operator of full-service Mexican and seafood restaurants, Monday announced through its board of directors that Dennis B. Mullen, its chairman, president and chief executive officer, is considering the feasiblity of the possible acquisition of Famous by a new company in which Mullen and other members of senior management would be substantial shareholders.

If a purchase offer is made, Mullen indicated that his expectation is that the price of such offer would be $2.50 per share cash or an aggregate cash value of approximately $17.5 million. On Feb. 2 the closing market price of Famous stock was $1.50.

The possible acquisition of Famous by Mullen's company will be subject to that company's obtaining financing and to various other matters. The Famous board of directors emphasized that no specific acquisition offer has been made by Mullen and that no decision has been made by the board whether it would accept or recommend any offer of any nature for the purchase of the company. An offer, if made, would be presented to both the board and the shareholders of Famous. The company does not anticipate issuing further information releases until any definitive offer is received.

#90036b0037 02/05/1990 ~Business Wire

FREMONT, CA (FEB. 5) BUSINESS WIRE - GRiD Systems Corp. and PowerTek Industries Monday introduced a battery-powered laptop computer with a cellular phone that transmits voice, data and images.

The GRiD Portable Cellular Workstation is a fully self-contained, modular system that incorporates any GRiDCASE Series laptop, or the GRiDLITE XL laptop, and a powerful cellular unit with a 3-watt Fujitsu transceiver and a Swisstel handset.

Users can sustain battery-powered operation for up to 4.4 hours of continuous use or up to seven hours when the workstation is used intermittently.

Unlike most other cellular/laptop combinations, which are one-piece units, users can separate the GRiD computer from the cellular unit. This allows field users to carry a lightweight GRiD computer to a remote field site, then transmit the data after returning to their car or office.

There are currently 3 million cellular phone subscribers in the United States, Maxwell said. That number is expected to grow to 5 million next year and increase to 15 to 20 million subscribers by 1995.

The workstation features a GRiD MNP 2400 baud modem with an error correcting feature that allows field users to transmit data at up to 4800 bps, double the speed of regular modems.

That feature enables users to pass from one cell to another without dropping the carrier signal. This is technically superior to other computer-based cellular systems on the market.

The cellular workstation is totally self-contained in a durable fabric case that complies with airline seat and overhead stowage regulations.

GRiD and PowerTek plan to engage in joint marketing ventures to promote the workstation. It started shipping this month.

The GRiD Portable Cellular Workstation with an 80386-based GRiDCASE 1530 weighs 18 pounds and is priced at $7,290. The 8086-based GRiDLITE XL cellular unit weighs 15 pounds and sells for $4,545.

GOLDEN, COL (FEB. 5) BUSINESS WIRE - Jerry R. Bergeson & Associates Inc., a Golden-based consulting petroleum engineering firm, has been awarded a five-year contract to provide technical support services to the Department of Energy at Elk Hills Naval Petroleum Reserve No. 1 in Kern County, Calif.

To accommodate the required scope of work, the firm has opened new offices in Bakersfield, Calif. Work will be performed in both the Golden and Bakersfield offices. Evans, Carey & Crozier, a Bakersfield consulting firm, will provide support on the contract as the primary subcontractor.

Approved funding for the contract includes $5.6 million for a three-year based period, with options for two additional years at more than $2 million each, or a total of approximately $10 million.

Elk Hills, discovered in 1911, is one of the nation's 10 largest producing oil fields, with more than 1,000 wells on 48,000 acres. Oil and gas are presently being produced from five geologic zones. Bergeson & Associates recently completed a comprehensive study of Elk Hills for DOE to determine how much crude oil, natural gas and natural gas liquids remain in the field.

The company said the new contract will require a very large effort, involving more than 100,000 man hours. Some of the areas include reservoir management analysis in support of recommended maximum efficient rates of production, determination of injection requirements and individual well withdrawal rates, and evaluation of potential enhanced oil recovery methods.

Jerry R. Bergeson & Associates Inc., founded in 1975, is an international consulting firm providing engineering services to the petroleum industry. It has performed studies of oil and gas fields throughout the world.

Also, the company conducts courses in the United States and Europe on reservoir engineering, well test analysis and reservoir simulation. It maintains a staff of 13 full time professional engineers, three associate engineers and 13 technical and administrative personnel in its Golden office.

SARASOTA, FL (FEB. 5) BUSINESS WIRE - OMNI Films International Inc. (NASDAQ:OFII) announced Monday that it has entered into an agreement with a Japanese science museum for installation of an OMNIVISION-870 projection system.

Under the terms of the agreement, OMNI will install an OMNIVISION-870

projection system including a 12-kilowatt lamphouse and film transport. This is the seventh OMNIVISION-870 system sold since the product was introduced in 1988 and the third sold in fiscal 1990. The system is scheduled to be shipped in May 1990.

Total contract sales announced have reached a record $5.4 million for the current fiscal year which began Oct. 1, 1989.

Fred Hollingsworth III, president, stated, ''We are pleased to install another of our systems in Japan. The interest in our systems from both the Far East and Europe continues to be very strong.''

The OMNIVISION-870 system is a technologically advanced product which projects a 160 degree by 120 degree spherical image onto a hemispherically shaped screen completely surrounding the viewer. The OMNIVISION-870 system requires the use of only a single camera and single projector.

OMNI Films International specializes in the design, sale and installation of five separate and distinct 70mm wide screen cinema systems, and produces, distributes, and licenses 70mm films for these systems. Since inception, OMNI has delivered approximately 200 of its cinema systems to locations in 53 countries, including every continent except Antarctica.

OMNI is traded on the NASDAQ system under the symbol OFII.

PALO ALTO, CA (FEB. 5) BUSINESS WIRE - Engineers and others using computer-aided design (CAD) applications can spend more time designing and less time waiting for their drawings because of a series of products announced by Hewlett-Packard Co.

The company introduced six plotters - ranging in price from $8,500 to $45,900 - that replace the products in its two high-end product families, the HP 7600 series electrostatic and HP DraftMaster pen plotters. HP based these products on an advanced graphics language, HP-GL/2, and announced that all future HP plotters will include this language.

The HP 7600 series Model 355 plotter sets what HP believes is a new price/performance level for color electrostatic plotters at $45,900; similar plotters made by others are priced from $60,000. HP also introduced two monochrome electrostatic plotters, the HP 7600 series Models 250 and 255, priced at $25,900 and $29,900, respectively.

To underline the reliability of this product family, HP is offering what it believes is the first one-year warranty and the lowest service-contract prices for electrostatic plotters. Most electrostatic plotters have 90-day warranties.

The HP 7600 series Models 250 and 255 monochrome electrostatic plotters use 24-in. and 36-in. media, respectively, and the color model plots on 36-in. media. Fast Pen Plotters, More Rugged Pens The HP DraftMaster SX (sheet-feed) and RX (roll-feed) plotters give users faster access to their CPUs after sending a file to the plotter and use HP SurePlot disposable pens, which are more dependable. The HP DraftMaster SX is priced at $8,495, the same as the HP DraftMaster I it replaces, and the HP DraftMaster RX is priced at $9,995, which is $1,000 less than the HP DraftMaster II plotter.

Up to four users can share a new third plotter in the series, the HP DraftMaster MX, by using the built-in 20-Mbyte hard-disk drive and four I/O ports. The HP DraftMaster MX plotter, priced at $11,995, is intended for users who are not on a network but who want an easy way to share a plotter.

HP SurePlot disposable drafting pens work in HP DraftMaster and HP DraftPro series and HP 7550 pen plotters, and are more dependable because of a leak- and clog-free design. A new ink regulator stops leaking, and ceramic tips on the pens prevent clogging and make the pens last longer. The pens are maintenance-free and do not require assembly or special storage.

HP-GL/2 is based on HP-GL and is HP's new vector- graphics language for hardcopy devices. HP-GL/2 provides faster plotting, sophisticated images and better software support. The ease of supporting HP-GL/2 encourages widespread software compatibility.

BEVERLY HILLS, CA (FEB. 5) BUSINESS WIRE - United Parcel Service has awarded Litton's Aero Products division, Moorpark, a contract valued at more than $15 million to provide 96 LTN-92 laser gyro inertial navigation systems for its fleet of 42 DC-8-71 and DC-8-73 aircraft. An option for 50 additional systems is included in the contract.

The LTN-92 is an advanced, all-weather system used by many air transport carriers, including American Trans Air, Hawaiian Air Lines, Continental, Federal Express, Air Inter and Cathay Pacific. Typical operations are

long-haul, over-water flights. The system is also used on the Presidential Air Force One.

Litton's Aero Products division is a full-line supplier providing inertial and radio navigation systems and Global Positioning System receivers to commercial airlines, government and general aviation customers worldwide.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems for U.S. and world markets.

SAN JUAN CAPISTRANO, CA (FEB. 5) BUSINESS WIRE - Nichols Institute (ASE:LAB), Monday announced the release of a test for Cathepsin D, a new prognostic indicator for breast cancer.

Performed on breast cancer tissue, the test provides physicians with new information that can help identify those patients with a higher chance of recurrence of their disease. The test is most valuable in axillary node-negative breast cancer (cancer that has yet to spread to the lymph nodes).

Axillary node-negative breast cancer represents approximately half of the 142,000 breast cancer cases diagnosed in the United States each year. Although long-term prognosis is generally favorable for this group of patients, an estimated 30 percent of these patients have been known to suffer recurrence of their disease.

A recently published study in the New England Journal of Medicine (Feb. 1, Tandon et al.) demonstrated that axillary node-negative patients with high Cathepsin D levels were at greater risk of recurrence than patients with low levels. Furthermore, patients with high Cathepsin D and having tumors classified as aneuploid (abnormal DNA content) were shown to be four times more likely to die from their disease than patients with low Cathepsin D levels.

Albert L. Nichols, M.D., chairman and president of Nichols Institute, said the availability of Cathepsin D provides important information that can have an immediate impact on the care a patient receives.

''Since the ability to predict recurrence has been so difficult, many doctors treat patients with chemotherapy or hormone therapy after surgery

as a precaution. Physicians can now begin to separate patients into high-risk and low-risk groups, an important step in identifying which breast cancer patients should be considered for adjuvant therapy.''

Cathepsin D and DNA content evaluations are available through Nichols Institute as part of a comprehensive breast cancer test offering. A leading laboratory in the field of breast cancer testing, the institute has performed over 250,000 analyses since 1975 on breast cancer tissue for measurement of hormone receptors, one of the first tests to provide prognostic information on breast cancer patients. Nichols Institute has also been recognized as the first national laboratory to offer DNA content and cell cycle analysis on breast tissue.

#90036b0059 02/05/1990 ~Business Wire

SAN DIEGO (FEB. 4) BUSINESS WIRE - The Cipher Products Group of Cipher Data Products Monday announced the addition of the F880ES (Embedded SCSI) to its nine-trach 1/2-inch streaming tape drives.

The embedded SCSI interface improves performance, system wait time and throughput with direct SCSI communications that make emulation through the Cipher/Pertec interface unnecessary.

The F880/F880ES's 92-megabyte storage capacity and 64K buffer create the ideal device for a variety of applications including backup and file organization for Winchester disks, input/output archival storage and real-time data generation for CAD/CAM, CAE, graphics and desktop publishing.

The F880/F880ES is simple in design and is available in both tabletop and rack-mount versions. Its compact vertical construction of 8-3/4 inches eliminates the necessity for large vertical rack spaces. The system was also designed for low cost and high reliability with data storage and drive function on the same circuit board.

''The F880/F880ES confirms Cipher's commitment to SCSI technology,'' said Craig Turner, vice president and general manager of Cipher Products Group. ''Systems integrators are finding the F880/F880ES offers fast and simple solutions to complicated tasks.''

The F880/F880ES will be available in February 1990 for $2,450 in OEM quantities.

BELLEVUE, WA (FEB. 5) BUSINESS WIRE - T. Ronald Morton, president of PACCAR Financial Corp., the wholly owned U.S. finance subsidiary of PACCAR Inc, Monday announced the financial results for the year ended Dec. 31, 1989.

Summary Earnings Statement
(thousands of dollars)

	Year ended Dec. 31	
	1989	1988
Revenue	$135,812	$112,442
Interest expense	86,474	67,696
Finance margin	49,338	44,746
Operating expense	17,866	15,329
Loss provision	8,919	7,798
Income before taxes	22,553	21,619
Income taxes	7,925	7,187
Net income	$ 14,628	$ 14,432

Net income in 1989 reached $14.6 million compared to $14.4 million in 1988.

The average size of the company's finance and lease portfolio, primarily related to the sale of Kenworth and Peterbilt heavy duty trucks, increased 10 percent over the previous year. This growth resulted from continued strong PACCAR Inc truck sales and expanded marketing efforts by the company. During 1989, the number of cities where PACCAR Financial has marketing offices was expanded from 18 to 20.

Revenue in 1989 increased to over $135 million, a 21 percent increase from 1988, reflecting the company's continued asset growth and higher interest rates during 1989. The company's finance margin increased 10 percent to $49.3 million.

During the year, the company increased its provision for credit losses by 14 percent. In addition, the staff was expanded to provide for better coverage of greater financing activity and more emphasis was placed on computer systems development efforts which raised operating expenses by nearly 17 percent.

SEATTLE (FEB. 5) BUSINESS WIRE - Horizon Air, a subsidiary of Alaska Air Group Inc. (NYSE, PSE), reported Monday that its January traffic increased 8 percent to 26.3 million revenue passenger miles (RPMs) from the 24.4 million flown a year earlier.

The passenger load factor (the percentage of available seats occupied by fare paying passengers) for the month was 47.4 percent, down from the 49.7 percent recorded in January 1989. Poor snow conditions at many Horizon ski destinations was a factor in the load factor decline.

The airline carried 133,006 passengers in January compared to 119,334 for the same month one year ago. Capacity during January was 55.6 million available seat miles (ASMs), a 13 percent increase from the 49 million in January 1989.

Horizon serves 33 cities in five states and Canada.

Horizon Air
Traffic Data

	Month of January 1990	1989	Percent Change
Horizon Air			
Passengers	133,006	119,334	+11.5

FORT WORTH, TX (FEB. 5) BUSINESS WIRE - Cash America Investments Inc. (AMEX:PWN) announced a 47 percent gain in fourth quarter earnings per share and first $2 million quarter.

Jack R. Daugherty, chairman and chief executive officer, Monday reported that fourth quarter earnings for 1989 were 28 cents per share, an increase of 47 percent from the 19 cents per share reported for 1988 fourth quarter.

Net income for the quarter reached a record $2.2 million on revenues of $26.6 million. Net income for the comparable quarter of 1988 was $1.6 million on $20.9 million in revenues.

Daugherty reported that the continued earnings and revenue gains are the

result of the company's continued emphasis of its base pawn loan business and the continued expansion of its pawn business markets.

Daugherty also announced record earnings for the year. Per share earnings reached a record 87 cents, a 32 percent gain over the 66 cents reported for last year. Net income for the year was $7 million, a $1.9 million gain, or 38 percent, over the $5.1 million reported for 1988.

Total revenues for the year were $87,600,000, an increase of 30 percent, over the $67,500,000 reported for last year. The company ended the 1989 year with 123 locations operating in the states of Texas, Louisiana, Tennessee and Oklahoma, an increase of 22 percent over the 101 locations in operation at the end of 1988.

Daugherty also announced that the company has just completed the acquisition of four pawnshops in Oklahoma. These four acquisitions, together with the pending start-up of the company's first pawnshop in Atlanta, and a new start-up in New Orleans, will bring the company's total operating locations to 129.

At year-end 1989 total assets were $98 million with $82 million in stockholders' equity.

#90036b0067 02/05/1990 ~Business Wire

SAN FRANCISCO (FEB. 5) BUSINESS WIRE - BankAmerica's board of directors Monday increased the dividend on the corporation's common stock to 25 cents per share, from the 15 cent per share paid in December, 1989.

The directors also set dividends on BankAmerica's (BAC's) preferred shares. The amounts were $0.8125 for series A preferred stock; $1.50 for Series B preferred; and $0.5625 for BAC's Special Series preferred.

The common stock dividend will be paid on March 9, 1990, to shareholders of record February 23, 1990. Dividends on the three series of preferred stock will be paid on February 28, 1990, to shareholders of record February 15, 1990.

BankAmerica Chairman and Chief Executive Officer A.W. Clausen said that with today's increase in the corporation's common stock dividend ''the recovery phase of our restructuring is completed. BankAmerica has now set a course to achieve a new level of excellence in the 1990s,'' Clausen added.

In increasing the dividend, he said: ''Directors took particular note of the corporation's strong earnings during 1989 and the growth that has been achieved in BankAmerica's capital base since the dividend was reinstated at the 15-cents per share level in February of last year.''

In addition to record earnings, the company reported that common shareholders' equity reached $4.9 billion at the end of 1989. In fact, BankAmerica's common equity to assets ratio was among the highest for major United States banks at the close of the year. Clausen lauded the ''excellent work performed by employees throughout the organization in 1989. Their record speaks for itself, and I know that building shareholder value will remain a constant priority.''

RANCHO CUCAMONGA, CA (FEB. 5) BUSINESS WIRE - Data-Design Laboratories Inc. (NYSE:DDL) Monday announced that M. Peter Thomas has been elected to succeed Thomas C. Beiseker as president and chief executive officer of DDL.

He has also been elected to the board of directors while Beiseker remains chairman of the board.

Most recently, Thomas has been chairman of the Stanbridge Group, a consulting company involved in the establishment of joint ventures and other forms of strategic alliances. Until June 1989, he was president and chief executive officer of Ericsson North America Inc., the $400 million operating subsidiary of Sweden's L.M. Ericsson, involved in the development, marketing and manufacturing of telecommunications equipment.

He continues to be a director of L.M. Ericsson. During his 23-year career Thomas also served in top level positions at Telenova Inc., ITT, General Instrument Corp. and Northern Telecom Ltd.

Thomas is an engineering graduate of Princeton University and holds an master's degree from Harvard Business School.

Commenting on the announcement, Beiseker said: ''We are pleased that we were able to recruit Peter Thomas. Recognizing the importance of a chief executive officer succession to the company, its customers, employees and shareholders, the board of directors spent the better part of a year in the selection process, during which many exceptional candidates were considered.''

''My own in-depth interactions with Thomas gives me great confidence in his ability to lead Data-Design to successful growth. In his previous responsibilities, he has demonstrated success in turnarounds and an ability to produce significant profit improvement.''

Thomas stated, ''I look forward to this exciting opportunity in leading DDL as it enters its next phase of aggressive growth.''

DDL is primarily engaged in the manufacture and assembly of printed circuit boards for computer, communications and instrumentation industries. Other segments of the company's business include the manufacture of signal transmission equipment for cable television and other communications applications and engineering services for the Defense Department.

CHICAGO (FEB. 5) BUSINESS WIRE - United Airlines Monday reported that its total scheduled revenue passenger miles (RPMs) increased 5.2 percent in January compared with January of 1989.

The airline's total scheduled RPMs were 5,428,222,000, compared with 5,159,259,000 in January of 1989.

The passenger load factor was 61.5 percent, an increase of 1.6 points from 59.9 percent a year ago.

In commenting on the month, Stephen M. Wolf, chairman and president, said: ''United's international traffic soared nearly 35 percent for the second consecutive month, matching the largest single-month gain in the airline's history that was achieved in December. Contributing to our performance in the international arena has been our new state-of-the-art Boeing 747-400, four of which are now deployed on the Los Angeles-Sydney/Melbourne and San Francisco-Hong Kong routes.''

For January, domestic revenue passenger miles totaled 3,872,058,000, a decrease of 3.3 percent from 4,005,766,000 accumulated in January a year ago. International revenue passenger miles totaled 1,556,164,000, an increase of 34.9 percent from 1,153,493,000 a year ago.

Total scheduled available seat miles (ASMs) were 8,828,552,000, up 2.5 percent from 8,611,152,000 a year ago. Domestic ASMs were 6,774,758,000, a decrease of 2.3 percent from 6,932,727,000 a year ago.

International ASMs totaled 2,053,794,000, up 22.4 percent from 1,678,425,000 a year ago.

The airline flew 3,999,000 passengers in scheduled service in January, a decrease of 0.3 percent from 4,013,000 flown a year earlier.

Total cargo ton miles for January were 100,923,000, up 4.8 percent from 96,255,000 a year ago.

Total RPMs including charter flights for January were 5,434,832,000 up 5.2 percent from 5,167,550,000 a year ago.

All statistics are preliminary.

SEOUL, SOUTH KOREA (FEB. 5) BUSINESS WIRE - 3Com Corp. of Santa Clara, Calif., Monday announced the signing of three sales distribution parnters

key to the Korean computer networking marketplace.

Together, distributor GoldStar Semiconductor, original equipment manufacturer (OEM) Trigem Computer and value-added reseller Dong Bang Computerworld will expand 3Com's ability to market and support its full range of internetworked client-server systems in Korea. Combined, the one-year contracts are estimated to be valued at more than $3 million.

GoldStar Semiconductor (GSS) Ltd., of Seoul, a joint venture of Korea's $6 billion Lucky-GoldStar conglomerate and American Telephone and Telegraph, has been appointed sole Korea distributor of 3Com's internetworking products. GSS was created to build and market advanced semiconductors for AT&T computers, digital exchanges and PABXs. With this expertise in communications technology, it has become one of Korea's most prominent providers of computer network solutions.

GoldStar Semiconductor will market 3Com's internetwork bridges, routers, brouters and gateways directly to existing customers and through its more than 60 dealers across the country. Under the agreement, GSS will also localize 3Com's Maxess family of SNA gateway software products, providing a user interface, documentation and source code in Hangul, the written form of the Korean language.

Completion of the Maxess project is targeted for next summer.

As part of its systems integration services, GSS is installing a nationwide data communications network to link every Korean securities firm with the nation's stock exchange in Seoul. Other major GSS projects include the Korean Telecommunications Data Network, several Korean government projects and a network for the Lucky-GoldStar Group.

Korea's largest PC manufacturer, Trigem Computer Inc., of Seoul, has signed an OEM agreement with 3Com under which it will localize 3Com's 3+Open network operating system and valued-added services, and will private-label 3Com's Ethernet adapater by this summer and will be distributed by GoldStar Semiconductor and Trigem's own 100 dealers worldwide.

3Com Corp. is a computer networking systems company providing multivendor connectivity and information sharing for workgroups, departments and corporate environments worldwide. The company designs, manufacturers, markets and supports a wide range of networked client-server computing systems based on industry standards and open systems architecture.

LOS ANGELES (FEB. 5) BUSINESS WIRE - In a move that is expected to have a major impact on both subscriber base and advertising revenue National Lampoon Inc. will begin targeting college campuses for subscriber- related promotional drives.

This move is a direct result of National Lampoon's increasingly aggressive efforts in the publishing business.

With a total audience of 1.82 million the magazine has already seen a 200 percent increase in advertising over the same period last year (April 1989). The April 1990 issue also marks the largest ad issue in four years.

In a prepared statement, publisher Michael T. Carr said: ''We are seeing a return of National Lampoon's traditional advertisers. R.J. Reynolds, Moulson Beer and even CBS are advertising in National Lampoon.

''Our core audience of 18-34 is one of the most desirable audience bases in the industry, with a median age of 28.2 and a yearly income of $35.5 thousand. National Lampoon has an unduplicated audience that extends an advertiser's reach who have traditionally used Playboy and Rolling Stone to garner relatively affluent male readership. As National Lampoon gets this word out, I believe we will see a groundswell.''

#90036b0088 02/05/1990 ~Business Wire

SAN FRANCISCO (FEB. 5) BUSINESS WIRE - A.W. Clausen, chairman and chief executive officer of BankAmerica Corp. and its wholly owned subsidiary, Bank of America NT&SA, announced Monday that he will retire from those posts effective at the end of the corporation's annual meeting on May 24.

He will be succeeded by Richard M. Rosenberg, presently vice chairman of the boards of directors and head of Bank of America's California Banking Group. Rosenberg was elected president of the corporation and the bank today in preparation for that move.

Clausen has served as chairman and chief executive officer since October of 1986 when he was called back by the board of directors to re-take the helm of the corporation at perhaps the lowest point in its history. The corporation was operating at a loss, had suspended its common stock dividend, had inadequate capital resources, and was the target of an unsolicited takeover bid.

Under Clausen's leadership, a sharply refocused short- and long-range competitive strategy was installed and a new management team assembled. The recovery has progressed rapidly since. Last month (January) BankAmerica Corp. reported 1989 net earnings of $1.1 billion and earnings per common share of $5.19, the highest in its history, with fourth quarter 1989 earnings of $270 million representing the tenth consecutive quarter of improvement in operating income.

A dividend on common stock was reinstated early last year and increased again today by 66.67 percent to 25 cents per share in recognition of the corporation's current performance and strong earnings outlook. Capital ratios are now substantially above federally mandated guidelines.

Rosenberg, who will succeed Clausen as chairman and chief executive officer in four months, has been the architect of the bank's profit resurgence in retail banking, real estate, and commercial banking in California which, in turn, has been the key to the corporation's recovery.

SANTA MONICA, CA (FEB. 5) BUSINESS WIRE - National Medical Enterprises Inc. (NYSE,PSE,LONDON:NME) Monday announced that its board of directors declared a regular quarterly cash dividend on the company's common stock.

The 18 cent cash dividend will be paid on March 9, to shareholders of record on Feb. 16.

Additionally, on Jan. 31, NME distributed to its shareholders one share of The Hillhaven Corp. stock for each share of NME stock held. Shareholders received the stock distribution as the result of NME's spin-off of Hillhaven into a separate company.

National Medical Enterprises, one of the nation's largest health care services companies, owns, operates and manages acute, psychiatric and physical rehabilitative hospitals, and substance abuse treatment centers throughout the United States and internationally.

TUSTIN, CA (FEB. 5) BUSINESS WIRE - Sunwest Bank announced Monday that profitable growth characterized their 1989 results.

Net income rose 76 percent to $2.65 million from $1.5 million a year ago. Assets totalled nearly $288 million, up 24 percent from $233 million, to help Sunwest maintain its position as the leading community bank in Orange County.

Loans finished at $232 million and deposits at $261 million, both up 24 percent from the previous year.

''As we said early in 1989, we would have a year that would make 1988 look pale in comparison, and it has,'' said William J. Mylymok, president and chief executive officer of Sunwest Bank.

''We just completed our planning process and while we won't grow as much in 1990 as we did in 1989, we still anticipate increasing both assets and return on equity by 15 percent, which will be excellent improvements on 1989.''

Mylymok added that while growth in the banking industry may be somewhat tempered by slow market conditions, the opportunities for Sunwest to build on its strong base will continue.

''We have a deep commitment to provide a high level of service to our customers and our community, and we expect that commitment to generate positive returns in the future.''

Sunwest Bank, Orange County's oldest and largest community bank, is a wholly owned subsidiary of West Coast Bancorp (NASDAQ:WCBC). With headquarters in Tustin, Sunwest serves the business community through branch locations in Tustin, Fullerton, Newport Beach, Orange and Santa Ana.

EL SEGUNDO, CA (FEB. 5) BUSINESS WIRE - Following the successful testing of JCSAT 2, Hughes Communications Inc. Monday completed in-orbit delivery and turned control of the satellite over to its owner, Japan Communications Satellite Co. (JCSAT).

JCSAT 2, the second Ku-band satellite built by Hughes Aircraft Co. for JCSAT, was launched on Dec. 31, 1989, on the maiden flight of Martin Marietta's commercial Titan rocket. During the past five weeks, satellite engineers from Hughes Communications and Hughes Space and Communications

Group completed orbital maneuvers, solar panel and antenna deployments, and communications payload testing.

JCSAT, a unique joint venture between Hughes Communications, C. Itoh & Co. Ltd. and Mitsui & Co. Ltd., is Japan's first commercial satellite venture with a U.S. company as an equity partner. Hughes owns 30 percent of JCSAT.

The JCSAT satellite system provides a variety of commercial services in Japan, including video program distribution for cable and network television, long-distance telephone, data transmission, and private business networks. JCSAT 1 began operational service in May 1989. JCSAT 2 is expected to begin operational service on Feb. 10, 1990. To date, JCSAT has received service contracts for 37 of the 64 transponders aboard the two satellites.

JCSAT 1 and JCSAT 2 are the first in a new line of high-power HS 393 communications satellites built by Hughes. Each satellite carries 32 Ku-band transponders and has a design life of 10 years.

Hughes Aircraft Co. is a unit of GM Hughes Electronics.

NEW YORK (FEB. 5) BUSINESS WIRE - In response to inquiries regarding Industrial Equity (Pacific) Ltd.'s announcement today that it has filed an amendment to its Schedule 13D with respect to Cummins Engine Co., a Cummins spokesperson said: ''The filing fully validates and confirms our claims against Industrial Equity Pacific.

''Among other things, IEP has admitted that it has actively been seeking board representation and has unlawfully failed to make the required SEC disclosures.''

The Cummins spokesperson also said, ''While Industrial Equity has repeatedly said it will 'vigorously defend' the lawsuit it still has not denied, because it cannot deny, the serious charges made by Cummins.'' Those charges include that Industrial Equity Pacific threatened to disrupt Cummins if its demand for board representation was not met.

CHATSWORTH, CA (FEB. 5) BUSINESS WIRE - For the eighth consecutive quarter, The Software Toolworks Inc., the Chatsworth-based developer and publisher of entertainment, educational, personal productivity and utility software, reported record quarterly revenue and earnings.

Revenue for the three month period ended Dec. 31, 1989 increased 56 percent to $6,060,000 from $3,885,000 for the comparable three month period last year. Net income for the current quarter increased 163 percent to $1,670,000 from $635,000 for the comparable period last year.

Earnings per share increased to 20 cents per share from 10 cents per share even though average shares outstanding increased to 8,510,000 from 6,369,000.

Revenue for the nine months ended Dec. 31, 1989 rose 109 percent to $15,997,000 from $7,655,000 for the first nine months of the prior year. Earnings for that period increased 170 percent to $3,866,000 from $1,433,000 for the corresponding period last year.

Earnings per share increased to 53 cents per share from 23 cents per share even though average shares outstanding increased from 6,208,000 to 7,258,000.

Les Crane, chairman and chief executive officer of The Software Toolworks, attributed the growth in revenue and profitability to the continued strong performance in the company's OEM licensing business coupled with a significant increase in revenues from Priority Software Packaging, its wholly owned duplication, printing and packaging subsidiary.

During the quarter ended Dec. 31, 1989, the company licensed two recently released software entertainment products for the Nintendo Entertainment System, entitled Bruce Lee Lives, an action-strategy, multi-level game employing artificial intelligence techniques and Beyond the Black Hole, a multi-level game which employs techniques that produce true stereoscopic three dimensional graphics.

Additionally, the company licensed Chessmaster on the Nintendo's new hand held video game system called Game Boy, the company's first product on that format.

CHARLOTTE, NC (FEB. 5) BUSINESS WIRE - Datasouth Computer Corp. and Data General Corp. Monday announced a volume purchase agreement that provides Datasouth dot matrix printers to current and future Data General customers.

Initial shipments under this agreement were made in October.

Under the agreement, Data General will resell Datasouth's DS 180, DS 180DD and DS 220 dot matrix printers through DG/Direct, the central catalog and telemarketing sales force for Data General. Data General will also market the products through its field sales organization. In addition, Data General will provide service, support and supplies for the printers.

''Our heavy-duty dot matrix printers represent a complementary addition to Data General's current printer line by filling a void between their

lower-end PC oriented printers and the high-end line and laser printers,'' said Jim Busby, Datasouth's president.

''This agreement provides a high degree of visibility for Datasouth through association with one of the leading mid-range computer manufacturers. Also, Data General and Datasouth are active in many of the same target markets including healthcare, transportation, government and manufacturing,'' added Busby.

Howard Berg, director of sales and marketing for Data General's customer service division said: ''Datasouth has established itself as a leading supplier of heavy-duty dot matrix printers and has an established reputation at Data General's customer sites across the country.

With Datasouth's proven acceptance among our customers, we are able to fill the gap for competitively priced heavy-duty dot matrix printers. Customers have the added benefits of getting fast shipments of these printers with a single phone call to our DG/Direct group and obtaining service for their printers through our field service organization.''

The proliferation of LANs, high-powered operating systems and workgroup technologies have led to multiple users and applications which have led to multiple printers for hardcopy output. While laser printers handle letter quality and graphics needs, dot matrix printers are required for such front-office activities as payroll checks, invoices, labels and most notably, multipart forms.

Datasouth's productline is developed for applications where reliability and high duty cycle are important considerations for virtually any system.

Located in Westboro, Mass., Data General is a manufacturer and marketer of standards based and proprietary computer systems, personal computers, related peripherals and all aspects of service and support.

Located in Charlotte, Datasouth manufactures, designs and distributes heavy-duty dot matrix printers and related products.

#90036b0137 02/05/1990 ~Business Wire
SAN MATEO, CA (FEB. 5) BUSINESS WIRE - Bay View Capital Corp., holding company for Bay View Federal Bank, reported consolidated 1989 earnings of

$15.2 million ($2.49 per share), as compared to 1988 earnings of $19.4 million ($3.21 per share).

Fourth quarter 1989 earnings were $3.5 million (56 cents per share), compared with $3.9 million (65 cents per share) for the like period last year.

Earnings before extraordinary items for 1989 and 1988 were $16.4 million ($2.68 per share) and $18.2 million ($3 per share), respectively. For the fourth quarter of 1989 and 1988 such earnings were $4.4 million (71 cents per share) and $4.1 million (68 cents per share), respectively.

Earnings for 1988 were favorably affected by a pronouncement of the Financial Accounting Standards Board on accounting for income taxes (FAS 96). The implementation of FAS 96 resulted in a one-time credit to income (accounting change benefit) which increased earnings for 1988 by $2.4 million, or 40 cents per share.

Net interest income was $50.5 million for 1989 compared to $46.5 million for 1988. This increase was mainly due to an approximate 22 percent year to year increase in average interest earning assets, net of a 17 basis point decline in average net interest margin from 1988 to 1989.

Bay View's chief executive officer, Robert E. Barnes, said that: ''Since April 1989 interest rates have significantly declined and, accordingly, our cost of funds has continued to drop while our adjustable rate mortgages repriced upward. As a result, our net interest margin favorably increased from 1.75 percent at June 30, 1989 to 2.43 percent at Dec. 31, 1989. We expect our net interest margin to continue to widen, at a slower pace, during the first quarter of 1990.''

On Oct. 17, 1989, a major earthquake occurred in the San Francisco Bay Area. The bank has carried out an inspection program on the properties securing its mortgage loans. ''We concluded that the earthquake did not result in any significant losses in the loan portfolio.

''Appropriate reserves (specific and general) have been provided,'' noted Barnes. In addition, the bank recorded an extraordinary charge (net of applicable income tax) of $680,000 (11 cents per share) in the fourth quarter of 1989 due to earthquake related damage to its headquarters building.

On Oct. 20, 1989, the bank acquired the seven branches of Independence Savings, ($350 million in deposits) plus certain of the assets and other liabilities of Independence from the Resolution Trust Corp.

The branches are located in Vallejo, Fairfield, Benicia, San Anselmo and Orange, Calif. Said Barnes: ''This acquisition fits in well with the

bank's strategy to enhance its retail banking franchise and to replace a significant portion of its wholesale liabilities with core retail deposits. From year end 1988 to year end 1989, brokered savings deposits declined from $471 million to $264 million.''

General and administrative expenses for 1989 were $32.2 million (1.14 percent of average assets) as compared to $27.7 million (1.19 percent of average assets) for 1988. Fourth quarter 1989 general and administrative expenses were $9.4 million as compared to $7.1 million for the like period in 1988, a $2.3 million increase.

Approximately $430,000 of this increase related to one-time costs of maintaining and then eliminating Independence's loan and administrative operations and integrating its branch system and loan portfolio into the bank.

Other elements of this significant quarter to quarter increase include greater federal deposit insurance premiums expense in the fourth quarter of 1989 compared with the 1988 period ($236,000) and reduced capitalization of loan origination costs in the 1989 vs. 1988 period resulting form significantly lower loan origination volume in the 1989 period ($309,000).

Nonperforming assets (loans 90 days or more delinquent, nonperforming securities, and foreclosed real estate) increased slightly from $26.9 million or .99 percent of assets at Dec. 31, 1988 to $30.8 million or 1.07 percent of assets at Dec. 31, 1989. This increase resulted from certain loans acquired as part of the Independence transaction. ''These loans have been recorded on our books at conservation values,'' noted Barnes

Bay View Federal Bank headquartered in San Mateo is the sole subsidiary of Bay View Capital Corp. The bank has 25 branch offices and five loan production offices serving principally the San Francisco Bay Area.

SAN FRANCISCO (FEB. 5) BUSINESS WIRE - James Volk and Gerald E. Smith joined Sutro & Co. Inc. Monday (Feb. 5).

Volk fills the newly created position of senior vice president and manager of equity trading in San Francisco. Smith, a vice president, now heads the firm's mortgage-backed securities trading operations.

Volk (50) began his 28-year career in the investment industry in 1962 at

Solomon Brothers in New York as a clerk on the utility bond trading desk.

When he left the firm 10 years later, he was in charge of trading OTC insurance stocks. Most recently, Volk was with Montgomery Securities, where he was a limited partner managing OTC sales/trading since 1986. He previously served as senior vice president and manager of West Coast Equity Trading for L.F. Rothschild, Unterberg Towbin from 1983-1986 in San Francisco and senior vice president and manager of OTC trading at AG Becker & Co. in New York for five years.

Volk received his bachelors degree in business from Ohio University and obtained his master of business administration degree from Northwestern Graduate School of Business. He resides in Tiburon with his wife, Anita.

Smith (35) joins Sutro & Co. from Boettcher & Co. where he held the position of vice president of mortgage-backed trading in that firm's Denver office from 1986 to 1990. Previously he was a mortgage salesman at the Exchange National Bank of Chicago. Smith served in the United States Airforce in active duty for five years and for four years in the Reserve; he departed with the rank of Staff Sergeant.

Smith attended Florida Atlantic University where he received his bachelor of business administration in finance. He currently lives in San Francisco with his wife, Rhonda, and his son, Taylor. The Smiths are expecting their second child in June.

Sutro & Co. Inc., founded in 1858, is the longest-established investment firm in the West. It is a wholly owned subsidiary of John Hancock Freedom Securities. The firm is engaged in securities brokerage and investment banking as well as a full range of financial services focused on high-net-worth individuals and institutional investment firms nationwide.

The company's retail branch system includes 13 offices throughout California and one office in Arizona. Corporate headquarters are located at 201 California St. in San Francisco.

#90036b0161 02/05/1990 ~Business Wire

REDONDO BEACH, CA (FEB. 5) BUSINESS WIRE - The TRW-built Gamma Ray Observatory, a 17-ton NASA scientific spacecraft, Monday began the first leg of its journey to space.

It was carried by truck from TRW and then loaded aboard a U.S. Air Force cargo plane for shipment from Los Angeles International Airport to Cape Canaveral, Fla., where it will be launched aboard the Space Shuttle in November.

The cargo plane, an Air Force C-5A, is expected to touch down tomorrow morning at Kennedy Space Center in Florida, where the observatory will undergo further testing and eventual integration with the Space Shuttle Atlantis.

Following the Shuttle launch, the Gamma Ray Observatory (GRO) will be deployed in a near-circular orbit 279 miles from Earth, where it will gather gamma ray data generated at the beginning of time -- perhaps 15 billion years ago -- in a comprehensive scientific effort to learn more about the origin and fate of the universe.

GRO will be the heaviest spacecraft ever deployed from the Space Shuttle, weighing nearly 17 tons. It is among the first spacecraft designed exclusively by computer techniques.

Its four scientific instruments are the largest, most advanced and most sensitive of their type ever flown in space. They are designed to study gamma rays emitted by some of the most exotic and explosive objects in the universe. After an initial two-year mission, GRO may continue to function for eight years or longer.

GRO is one of four ''Great Observatories'' NASA is developing for the 1990s to extend mankind's knowledge of astronomy and basic cosmological processes. The first of these is the Hubble Space Telescope scheduled for launch in April.

TRW Space and Technology Group built the Gamma Ray Observatory under a $250 million contract awarded by NASA's Goddard Space Flight Center in 1983. TRW Space & Technology Group, based in Redondo Beach, Calif., is an operating group of Cleveland-based TRW Inc.

The group has built more than 175 communications, defense and scientific spacecraft, developed over 200 advanced space instruments and integrated some 550 experiments into their host spacecraft.

SEATTLE (FEB. 5) BUSINESS WIRE - Alaska Air Group Inc. (NYSE, ALK) Monday announced that it has completed the previously announced sale of a new issue of Series B Preferred Stock to International Lease Finance Corp. (NASDAQ:ILFC).

ILFC paid $59,375,000 for 1,187,500 preferred shares. It is anticipated that the funds obtained from the sale of the preferred stock will be used to purchase up to 3 million shares of Alaska Air's common stock through its currently outstanding ''Dutch auction'' tender offer, at a purchase price not greater than $24 nor less than $20 per share.

The sale of the Series B Preferred to ILFC satisfies the principal condition existing with respect to Alaska's tender offer. The offer, which was commenced on Jan. 24, 1990, is currently scheduled to expire on Wednesday, Feb. 21, 1990.

As previously announced, the sale of the preferred stock to ILFC is one component of a strategic program which also includes the tender offer, the acquisition of up to 64 new jet aircraft, the sale of investment options to a broad group of management employees, and the establishment of a $20 million employee stock ownership plan.

Alaska Air Group Inc. is the parent company of Alaska Airlines Inc. and Horizon Air Industries Inc.

DALLAS/FORT WORTH AIRPORT, TX (FEB. 6) BUSINESS WIRE - American Airlines will begin nonstop service twice a day between Oakland and the airline's mega-hub at Chicago, effective March 26, American announced Monday.

Through the Chicago hub, American and its commuter partner, American Eagle will offer Oakland travelers convenient connecting service to about 100 other major cities with a total of more than 420 flights a day.

These connecting points include such places as New York, Boston, Philadelphia, Washington, Detroit and Toronto. European points offered through Chicago include Paris, Frankfurt, Brussels, Zurich, Stockholm and Manchester, England.

The Oakland-Chicago route will combine with existing services from San Francisco and San Jose to give American nonstop service to Chicago from all three Bay Area airports.

In addition, the route will increase American's operations at Oakland from three daily flights to five. The existing service is to and from American's largest hub at Dallas/Fort Worth, where the airline and its American Eagle partner operate more than 500 flights a day to nearly 120 cities.

''We are pleased to be adding the Oakland-Chicago service,'' said Joseph J. D'Ambrosio, American's western division vice president. ''It shows American's basic commitment to the Oakland community and allows us to make good on an earlier promise to add service at Oakland when it makes economic sense to do so.

''Moreover, by adding service to the Chicago mega-hub, we are using our resources where they can do the most good and provide the most service to the greatest number of passengers,'' D'Ambrosio said. ''This makes more business sense than adding flights in other corridors that already have

abundant service and are not linked to major connecting hubs.''

SANTA ANA, CA (FEB. 6) BUSINESS WIRE - Roger Torriero, president of Santa Ana-based Griffin/Related Properties, Monday announced that 25 percent of the office space in HighPointe at HighPark, phases I and II, now under construction in Mission Viejo, Calif., has been leased.

Merit Property Management Inc. is moving its corporate headquarters from Laguna Hills to HighPoint, according to Steven P. Rakhshani, senior marketing consultant for Norris, Beggs & Simpson, who handled the $4 million transaction for Merit.

In a separate transaction handled by Rakhshani, Lakeview Real Estate Inc. has leased 10,000 square feet on the ground floor of phase II. The 10-year lease is valued at $500,000.

The total area of the three-story twin buildings is 100,000 square feet.

The entry includes a dramatic semi-circular motor court and pedestrian walkway lined with palm trees. Floor to ceiling windows overlook a sculpture garden on the bluff, with views of Saddleback Valley and the Laguna Hills.

State-of-the-art technology provides individual custom-controlled air, high-speed elevators and a 24-hour security system.

Conveniently located near the 5 and 405 Freeways, HighPointe is 12 miles south of John Wayne Airport.

#90036b0202 02/05/1990 ~Business Wire

SEATTLE (FEB. 5) BUSINESS WIRE - Metropolitan Federal Savings and Loan Association of Seattle (NASDAQ:MSEA), an FDIC-insured financial institution with $566 million in assets, Monday announced that its total capital under Generally Accepted Accounting Principles was $28.4 million or 5.01 percent of total assets on Jan. 31, 1990.

The Association's capital now exceeds all present regulatory requirements including the risk-based capital requirements established by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA).

Metropolitan completed the sale of 1,875,000 shares of common stock at $8.00 per share on Jan. 9, 1990 in connection with the Association's conversion from mutual to stock form. Net proceeds from the stock sale were approximately $13.4 million.

The Association is undergoing a restructuring designed to enhance profitability and return its focus to expanding its retail deposit base and its mortgage generation capability for loans secured by one-to-four family homes. The restructuring has involved the sale of a large portion of its securities portfolio including the sale in mid-1989 of approximately $160 million of U.S. Government and Federal agency securities.

Metropolitan announced it has completed an additional sale of approximately $60 million of U.S. Government and Federal agency securities. The sale enables Metropolitan to repay repurchase agreements used to finance these securities which consisted of fixed-rate U.S. Treasury notes and bonds and Federal National Mortgage Association (Fannie Mae) bonds of various maturity dates between 1996 and 2016 with yields between 5.33 percent and 7.81 percent. The yields were significantly below the Association's average cost of funds, resulting in a negative spread on these securities.

The liquidation of these government securities was contingent upon the successful conversion of the Association to stock ownership. The Association established a $3.7 million reserve for unrealized losses on

these bonds to reflect their value at the lower of cost or market as of Dec. 31, 1989 when it was deemed probable that Metropolitan would successfully convert to stock ownership. However, actual sale of the government securities was not deemed prudent until after the completion of the Association's conversion on Jan. 9, 1990. Subsequent to the completion of the conversion, the bond market deteriorated and the Association realized a loss of $5.2 million after tax. This loss on the sale of the securities exceeded by $1.5 million the reserve established on Dec. 31, 1989.

The Association also has been selling securities from its portfolio of non-rated or below investment grade corporate bonds in response to a FIRREA requirement to divest these securities by July 1, 1994. On Sept. 30, 1989 the Association had $20.4 million of such securities. Since then $8.3 million of the bonds have been sold or redeemed, leaving $12.1 million in the Association's portfolio on Jan. 31, 1990. Metropolitan established reserves at Sept. 30, 1989 which have been utilized to substantially offset realized and unrealized losses on the portfolio. An additional market value reserve of $264,000 was recorded on Jan. 31, 1990. The portfolio is being carried on the books of the Association at the lower of cost or market value.

Metropolitan said its interest rate spread improved to 1.80 percent at Dec. 31, 1989 from 1.44 percent at Sept. 30, 1989 and 1.12 percent at June 30, 1989. The Association reported that during the third quarter ended Dec. 31, 1989 it took a $3.7 million after tax reserve for its Government Bond portfolio, a $900,000 reserve for general loan losses and recorded a $359,000 non-recurring after tax loss on the sale of a subsidiary of the Association. As a result, the Association reported a net loss for the third quarter of fiscal 1990 of $5,760,000 compared to a net loss of $485,000 in the like quarter a year ago. Earnings per share figures are not meaningful as the Association had no shares of common stock outstanding until the completion of its conversion to stock ownership on Jan. 9, 1990.

Metropolitan's portfolio of loans totaled $337.6 million at Dec. 31, 1989 compared to $362.0 million at March 31, 1989. Deposits at Dec. 31 totaled $427.1 million compared $446.3 million at the end of March. Metropolitan's portfolio of loans serviced for others totalled $82.8 million at Dec. 31, 1989 compared to $93.7 million at the end of March. As a result of the ongoing restructuring, the Association's total assets at Dec. 31, 1989 were $586.6 million compared to $758.0 at the end of March. Metropolitan is an FDIC-insured, federally-chartered savings and loan association organized in 1935, with seven branch offices located in the greater Seattle area.

BRISBANE, CA (FEB. 6) BUSINESS WIRE - Southwest Diversified (SWD), a leading developer of homes and master-planned communities in California and Arizona, has named Dan Christians as project coordinator for its Northeast Ridge development, according to an announcement by Clark D. Atwood, senior vice president and Northern California division manager.

Christians will be responsible for securing the approximately 300 conditions of approval required for development by the city of Brisbane. He will work closely with the Brisbane Planning Commission and coordinate the interaction between the city, SWD and the company's environmental, architectural and geological consultants.

Since 1977, Christians has been senior planner for the city of South San Francisco, where he was responsible for the negotiations with land owners and potential developers and coordination of numerous planning consultants for various residential projects, including Hillside Estates, Parkway Estates I and II, Avalon Heights, Ridgeview Homes, Stonegate Ridge Unit No. 4, Viewmont Terrace, Sunrise, St. Francis Terrace and St. Francis Heights.

He worked on the planning and coordination of the Gateway Redevelopment Project when it was established in 1980. Since then, he has coordinated the planning and implementation of the proposed Marriott Courtyard, Embassy Suites, Comfort Suites and the first two high-rise office buildings in the Gateway Center.

Christians has also been instrumental in the development of the Oyster Point Business Park, Edgewater Business Park, Oyster Point Marina, Grand Pointe Business Park and dozens of large industrial buildings in the Cabot Cabot and Forbes Industrial Park.

In 1983-84, Christians was the primary staff member responsible for the update of South San Francisco's general plan.

During 1985, the city of South San Francisco provided Christians with a one-year leave of absence to work in Riyadh, Saudi Arabia. He was employed by the Riyadh Development Authority as project coordinator for the Justice Palace District Revitalization Strategy. This gave him the opportunity to travel for 10 weeks throughout Europe, Africa, Asia and the Middle East.

Since 1986, he was responsible for the creation of the new Downtown/Central Redevelopment Project, while he helped establish the Downtown Commercial Rehabilitation Program. This program provides loans

and grants to downtown South San Francisco businesses to make building improvements.

Christians received a bachelor's degree in urban studies and sociology from the University of California, Riverside, and has worked on a master's degree at San Francisco State University.

Southwest Diversified, with headquarters in Irvine, is a master developer of residential projects and residential communities in California and Arizona. The company operates in financial partnership with the Toronto-based Coscan Corp. and its major shareholder, Carena Bancorp Inc., two of Canada's major publicly held development corporations.

NEW YORK (FEB. 6) BUSINESS WIRE - Avalon Corp. (NYSE:AVL) Monday announced that The Honorable Eldon Rudd and Richard Lister have been appointed to the board of directors.

The Honorable Mr. Rudd is a lawyer who has been a member of the U.S. Congress representing Arizona from 1976 to 1987. He has also served in the United States Marine Corps and with the Federal Bureau of Investigation on diplomatic assignments in Latin America. Currently, Rudd is a director of the Salt River Project, a public utility in Arizona, and the Arizona-Mexico Commission, a joint body for the economic development of Arizona and Mexico.

Lister is the chairman of Campbell Resources Inc., a Canadian-based mining company, and a director of Camreco Inc., a Canadian-based natural resources company.

The above appointments have been made to replace Peter R. Mitchell and Hardwick Simmons who recently resigned as directors of Avalon.

DALLAS (FEB. 6) BUSINESS WIRE - National Heritage Inc. Monday announced that effective March 1, it will no longer manage 20 nursing home facilities owned or controlled by certain syndicated partnerships of which subsidiaries or affiliates of Southmark Corp. serve as general partners.

As previously reported by National Heritage, these properties have been the subject of a proxy solicitation by Forrest Preston, pursuant to which Preston has sought proxies to remove the Southmark affiliates as general partners and to remove National Heritage as the manager of these 20 facilities.

National Heritage understands that Preston has sufficient proxies to be elected managing general partner of these partnerships and to terminate National Heritage's management contracts at a meeting of limited partners scheduled for Feb. 26.

As previously announced, National Heritage is engaged in merger discussions with Life Care Centers of America Inc., a company controlled by Preston.

In connection with these discussions and in light of the proxies received by Preston, National Heritage agreed to terminate its management agreements relating to these 20 facilities on March 1, which will allow Life Care Centers of America to commence management of these faciliites on that date.

National Heritage will receive a $75,000 payment from Preston in consideration of its agreement to terminate these agreements and to assist in the transfer of management of these facilities to Life Care Centers of America Inc.

SEATTLE (FEB. 6) BUSINESS WIRE - Gerald Grinstein, president of Burlington Northern Railroad, announced Monday that he has just returned from the USSR where Burlington Northern and the USSR Ministry of Railways executed a Protocol of Cooperation.

The Feb. 1, 1990, agreement consummates months of discussions between the largest railway in the United States and the largest railway in the world.

The agreement implements the undertakings agreed upon in September 1989 by Gilbert Carmichael of the United States Federal Railway Administration and the Soviet Ministry of Railways. It provides the formal basis for new cooperation between the Soviet and American railroad industries in such areas as scientific and technical research, and railroad management and marketing.

According to Grinstein, ''The foundation for this agreement was laid by our talks with the Soviet Ambassador, Yuri Dubinin, here in the United States over the last few months. Ambassador Dubinin forwarded information concerning the Burlington Northern Railroad to the Soviet Minister of Railways, Mr. Konarev. Mr. Konarev then invited me to bring a delegation of experts to discuss possible cooperation between our railroads.''

Grinstein explained that Burlington Northern visited the newest and most ambitious portion of the Soviet railway, the Siberian Baikal-Amur Mainline last fall. ''We have now viewed Soviet railway and port operations from the Soviet Far East to Leningrad. The agreement we have signed reflects the parties' intention to pursue cooperative commercial relationships in a broad range of railway matters.

''This is a concrete example of the improving relations between the United States and the Soviet Union. This unique relationship between the Soviet rail system and Burlington Northern can only work to the mutual benefit of our two countries.''

SANTA ANA, CA (FEB. 6) BUSINESS WIRE) - Alpha Microsystems (NASDAQ:ALMI) Monday announced a corporate restructuring of its work force.

The company's two acquisitions this year, coupled with softness in domestic computer sales, has led to a consolidation of certain functions. This consolidation, which includes a reorganization of both corporate and field groups, resulted in an approximate seven percent reduction in total company employment.

In addition, the restructure is intended to bring the number of employees more in line with revenue levels.

John S. Cain, president of Alpha Microsystems, stated, ''The decision to reduce employment levels is always difficult, but we felt it important to take the necessary actions now in order to size the company for the future.''

With headquarters in Santa Ana, Alpha Microsystems, with its subsidiaries Rexon Business Machines and AMS Computers, designs, manufactures, markets and services multi-user, multitasking computer hardware and software products.

Operating software environments are provided for Alpha Microsystems' AMOS

and Rexon Business Machines' RECAP, proprietary, multi-user business-oriented operating systems, as well as industry-standard software including XENIX, PICK OA and R83, Thoroughbred Basic and MS/DOS.

Distributed worldwide, the company's families of high-performance systems provide cost-effective, multi-user computer solutions for businesses of all kinds.

LOS ANGELES (FEB. 6) BUSINESS WIRE - Vision International, one of the largest foreign sales agencies in the motion picture industry, has entered into an agreement with Epic Productions to handle international sales for all the product of the company and its affiliates, it was announced Monday by Mark Damon, chairman of Vision International and Moshe Diamant and Eduard Sarlui, co-chairman of Epic Productions.

The combined companies have annual sales in excess of $100 million, making Vision one of the most important entities in the foreign sales arena.

Under the terms of the agreement, Vision will handle all Epic motion pictures previously distributed abroad by Emerald International Films. Emerald and its executive personnel will be consolidated into Vision reporting to Damon.

First of the Vision films to be distributed in the United States will be ''Wild Orchid'' starring Mickey Rourke, Jacqueline Bisset and Carre Otis set for April 20th release nationwide. ''Wild Orchid'' has previously been released in Italy, where it toppled 73 house records and is currently number one at the Italian box office for the third week in a row.

In addition, Vision will release ''Dark Angel,'' starring Dolph Lundgren and the horror sequel, ''Gate II,'' later this year.

''The agreement with Epic will help ensure Vision a consistently strong line-up of quality films for international release,'' commented Damon.

''The Epic slate of pictures is one of the most exciting in the independent marketplace and ensures us a stream of important commercial pictures for the overseas marketplace. In addition to the Epic and Vision product, we are constantly seeking to expand our relations in the independent production community.

Adding to our AFM product line, we have just entered into an agreement

with Imagine Films and RKO Pavilion for overseas distribution of their upcoming production, 'Needles.'''

''In enhancing our production schedule for the new decade, it is essential that our foreign market potential be maximized,'' said Diamant.

''We know that with Mark Damon and Vision this will be achieved.''

Current Emerald Films head 'Etchie' Stroh, as well as his entire Emerald staff, will now become part of Vision's organization.

Among the new Epic films that Vision will be representing at the American Film Market is the futuristic, action-adventure ''Alamagordo,'' an Epic Pictures presentation of a Guber-Peters production, with Peter Guber and Jon Peters executive producing and Ken Finkleman producing. The film will be directed by Donald Cammell and will star Jean-Claude van Damme.

The other Epic films which Vision will now be offering overseas are: ''Bad Influence'' starring Rob Lowe and James Spader which opens stateside March 9; ''Courage Mountain,'' starring Charlie Sheen and Leslie Caron; ''Men at Work'' starring Emilio Estevez and Charlie Sheen; ''Ski Patrol'' currently enjoying box office grosses domestically and starring Martin Mull and Roger Rose; ''Waiting for the Light' starring Shirley MacLaine and Teri Garr; ''Why Me'' starring Christopher Lambert and Christophr Lloyd; as well as ''Ambulance'' with Eric Roberts and James Earl Jones and ''Ghosts can't do it'' featuring Bo Derek.

Announcement as to additional motion picture projects to fall under this new agreement will be made during the upcoming American Film Market, which opens Feb. 22.

#90036b0307 02/05/1990 ~Business Wire

SAN JOSE, CA (FEB. 6) BUSINESS WIRE - Business Bancorp, holding company of California Business Bank, N.A., announced net income of $177,000, or 16 cents per share, for the fourth quarter of 1989 which ended on Dec. 31, 1989.

These results compare to net income of $172,000, or 17 cents per share, for the fourth quarter of 1988, which included $80,000, or 8 cents per share, of non-recurring income resulting from a change in accounting.

Average shares outstanding for the quarters ending Dec. 31, 1989 and 1988 were 1,089,842 and 1 million, respectively.

For the twelve months ended Dec. 31, 1989, Business Bancorp reported net income of $759,000, or 74 cents per share, as compared to $425,000, or 42 cents per share, for the like period in 1988.

1989 results included $60,000, or 6 cents per share, of non-recurring income from a negative accrual to the loan loss provision. 1988 results included $80,000, or 8 cents per share, of non-recurring income from an accounting change.

Without the effect of these non-recurring items, net income for 1989 would have been $699,000, or 68 cents per share, and net income for 1988 would have been $345,000, or 35 cents per share.

Average shares outstanding for the years ended Dec. 31, 1989 and 1988 were 1,030,303 and 1 million, respectively.

Total assets at Dec. 31, 1989, were $55,910,000 as compared to $49,005,000 at Dec. 31, 1988.

Total deposits were $49,474,000 as compared to $44,412,000 and net loans outstanding were $37,876,000 as compared to $28,706,000. Total shares outstanding at Dec. 31, 1989 and 1988 were 1,089,242 and 1 million, respectively.

Business Bancorp is a bank holding company founded in 1982. California Business Bank, N.A., is a federally chartered commercial bank with one office in the downtown area of San Jose. The bank serves the needs of businesses and professionals in Santa Clara County.

Business Bancorp had approximately 650 shareholders at Dec. 31, 1989. The common stock of Business Bancorp is traded over-the-counter.

#90036b0608 02/05/1990 ~Business Wire

MALVERN, PA (FEB. 5) BUSINESS WIRE - Surgical Laser Technologies Inc. (NASDAQ:SLTI), developer and manufacturer of the proprietary Contact Laser delivery system used in surgery, Monday reported that for the quarter ended Dec. 31, 1989, it earned $569,000, or 10 cents per share, on net sales of $6,833,000.

This compares with 1988 fourth-quarter net sales of $4,290,000, and a net loss for that period of $172,000, or 4 cents per share.

The fourth quarter was the fourth consecutive period in which the company has recorded a profit.

Surgical Laser Technologies reported fiscal 1989 net sales of $22,628,000 - 86 percent higher than 1988 net sales of $12,172,000, which reflected a 53-week period. Net income for the year ended Dec. 31, 1989 was $1,277,000, or 29 cents per share, compared with a 1988 net loss of $2,193,000, or 57 cents per share.

In commenting on the results, David S. Joseph, chairman and chief executive officer, said: ''Our growth is attributable to increases in sales from both the capital equipment and contact laser delivery accessories segments of our business.

''The increases were expressed both domestically and internationally. Our balance sheet is the strongest in our history, with net working capital of $19.1 million, up from $3.7 million at 1988 year-end, primarily as a result of the proceeds generated from our initial public offering in September 1989.

''Looking forward, I believe SLT is well-positioned to continue our growth in the 90s. We recently expanded our direct sales force in the U.S. to 27 professionals - approximately twice the level of representation we had during most of 1989.

''The new members of our sales team will focus on growing our contact laser delivery systems accessories business, an area we believe holds tremendous growth potential. Additionally, we expect further international growth through the joint marketing - by SLT and Medtronic - of the Tactilaze peripheral angioplasty laser catheter, which was recently introduced in Europe,'' Joseph said.

Joseph said that SLT and Medtronic are jointly pursuing clearance from the U.S. Food & Drug Administration to market the Tactilaze product line in the United States, expected in late 1990.

During 1989, Surgical Laser Technologies completed its initial public offering of 1.3 million shares of common stock, netting approximately $14.5 million.

Surgical Laser Technologies developed, manufactures and markets proprietary Contact Laser delivery systems for surgery. Unlike conventional laser systems, the Contact Laser enables surgeons to operate in direct contact with tissue, thereby enhancing the ease of use and precision of surgery.

The SLT Contact Laser System has been cleared by the FDA for use in most general and specialty surgical applications.

SALT LAKE CITY (FEB. 5) BUSINESS WIRE - Thomas F. Seal, president of ALPNET Inc. announced Monday that the board of directors recently approved the listing of the company's securities with the Boston Stock Exchange in addition to its continued listing with NASDAQ (AILP).

ALPNET's symbol on the Boston Stock Exchange is APN.

The Boston Stock Exchange (BSE) is the third oldest stock exchange in the United States. Its primary business today is the trading of nationally recognized stocks which are also traded on other exchanges. Over 135 member firms are presently active in the Boston Stock Exchange, with over 1,900 securities traded.

The Boston Stock Exchange has been a participant in the Intermarket Trading system (ITS) since the system's inception in 1978. The ITS ties together the New York and American Stock Exchanges, five regional exchanges, and the National Association of Securities Dealers (NASD).

The Boston Stock Exchange's participation in the ITS has expanded rapidly over the last six years, making the BSE one of the country's fastest-growing equities exchanges. During 1989, over 815 million shares were traded on the BSE trading floor. In December, 1989, the daily trading volume averaged over 3.5 million shares.

ALPNET's listing with the Boston Stock Exchange provides a number of benefits to the company, its stockholders, and the investing public. Among the most important benefits is the assignment of a permanent specialist. In addition to the maintaining fair and orderly trading in a company's stock, the specialist must always make a continuous two-sided market. Accordingly, his or her bids and offers are required to bear an orderly and reasonable relationship to previous sales in the stock.

''ALPNET's listing with the Boston Stock Exchange offers an additional market for the company's shares and new market makers, and enables investors to take advantage of margin opportunities,'' said Thomas F. Seal.

SAN JOSE, CA (FEB. 5) BUSINESS WIRE - Dataquest Monday introduced a new product designed for those who sell and market PBX and key telephone systems.

Named CPE Market Dynamics (Customer Premises Telecommunications Equipment Market Dynamics), the product is a series of charts, statistics and analytical reports that track the sales trends of U.S. PBX and key telephone systems.

Based on quarterly information derived from telephone equipment users, the series details which manufacturer sold what type of product on what date to whom and tracks these nationwide sales trends within six categories:

1) vertical markets (15 different industry groupings such as banking and manufacturing);

2) geographic areas (seven regional Bell operating companies regions, 20 state zones and 20 metropolitan areas);

3) top nine PBX or top 10 key system manufacturers;

4) five product line sizes;

5) top 10 system models; and

6) the type of transaction (purchased or leased).

The reports are the first in the industry that are updated each calendar quarter and are based on tens of thousands of UCC-1 filings and interviews Dataquest conducts with users of telephone equipment. (UCC-1 filings are government reports that list companies which lease equipment.)

CPE Market Dynamics Core Module includes quarterly reports and one annual summary and analysis report. The quarterly reports provide approximately 300 tables and charts that track significant sales trends across market segments.

In addition, a detailed written analysis and an executive summary of the most notable trends are delivered with each quarterly report.

Dataquest, founded in 1971, is an international company of The Dun & Bradstreet Corp. It is a leading market intelligence company that provides market research and consulting services to the high technology industry and the venture capital and banking communities.

#90036b0617 02/05/1990 ~Business Wire

IRVINE, CA (JAN. 5) BUSINESS WIRE - The recently announced Memorex Telex 7025, an 80286-based intelligent workstation, utilizes a custom systems board jointly designed by Western Digital Corp. (ASE:WDC) and Memorex Telex.

The Western Digital systems board is highly integrated, using Western Digital proprietary devices which control core logic, video, floppy disk and serial/parallel port functions.

In January Memorex Telex signed a major three-year contract for its 7025 workstations with Galileo, Europe's leading computerized reservation and travel information consortium.

A powerful and flexible system featuring a highly integrated systems engine in a compact, slim chassis, the 7025 is designed to be the desktop workstation solution for network users. It provides maximum system functionality in a minimal amount of space.

The 7025 can be used as a terminal replacement, providing an intelligent alternative for traditional desktop terminal users. It can also be used as a local area network (LAN) node, giving LAN users the functionality, performance and price they require; or as a desktop PC, combining a full complement of features and expansion capabilities in a small footprint AT-compatible system.

The Western Digital FE3600 chipset is a four-chip core logic solution (CPU control logic, address bus buffer, peripheral control logic and data bus buffer) which provides improved operating speed and functionality, while reducing overall component count, board space and power requirements.

Also included on the Memorex Telex 7025 system is Western Digital's PVGA1B a single-chip VGA video controller. The PVGA1B is 100 percent downward compatible, register-level compatible with IBM's VGA and features enhanced resolution modes.

Memorex Telex is the world's largest supplier of plug-compatible equipment and accessories with revenues of over $2 billion. Among the company's products are disk and tape storage devices, terminals, intelligent workstations, local area networks and printers, as well as telecommunications equipment. The company operates in 27 countries around the world with distributor links in 50 other markets.

Western Digital, with headquarters in Irvine, is a multinational company that designs, develops, manufactures and markets semiconductors, subsystems and intelligent disk drives for OEMs and resellers which serve the microcomputer industry.

#90036b0620 02/05/1990 ~Business Wire

MILPITAS, CA (FEB. 5) BUSINESS WIRE - Cirrus Logic Inc. (NASDAQ:CRUS), Monday introduced the CL-CD2400 Intelligent Multi-Protocol Communications Controller, an integrated circuit that can improve the performance and efficiency of a computer-based system by reducing the amount of time the computer must spend controlling data communication operations.

Typical applications include front-end processors, cluster controllers, multiplexers, local area networks and terminal servers.

The ''intelligence'' of the CL-CD2400 is provided by a proprietary RISC microprocessor that is embedded in the chip. This RISC-based architecture has been shown to improve system data throughput and efficiency as much as eight times over non-intelligent devices.

The CL-CD2400 is the only currently available single-chip communications controller to offer both an eight-channel direct memory access (DMA) capability and four data channels. Each data channel can transmit and receive information either asynchronously, or synchronously, formatted according to a different protocol, including HDLC, SDLC, X.21, X.25, and SS7.

The CL-CD2400 can also reduce the number of chips on, and the size of, a controller board, offering increased system reliability and lower overall system costs.

Cirrus Logic said that the general-purpose multiprotocol CL-CD2400 will also serve as the basis for a family of devices that will have all four channels dedicated to specific protocols. Packaging, Pricing and Availability

The CL-CD2400 is packaged in an 84-pin plastic-leaded chip carrier (PLCC) and is available now in sample quantities at a price of $45. Volume production of the CL-CD2400 is planned for late in the first quarter of 1990, with pricing to be less than $40.

With headquarters in Milpitas, Cirrus Logic Inc., provides innovative

semiconductor products that perform complex peripheral control functions in high-performance personal computers, workstations, and other office automation products.

It is the largest producer of PC/AT-interface controllers for 3-1/2-inch and sub-3-1/2-inch hard disk drives, and pioneered the use of embedded-RISC controllers in data communications devices.

GARDEN CITY, NY (FEB. 5) BUSINESS WIRE - Esselte AB, the Solna, Sweden based international office supplies and media company, Monday requested a stop in trading of its shares on the Stockholm Stock Exchange and other exchanges.

Esselte AB subsequently informed Esselte Business Systems Inc. (NYSE:ESB) that it does not expect the circumstances which have led to the request for a discontinuance of trading to alter its previously announced plan to acquire the shares of Esselte Business Systems Inc. which it does not already own.

Esselte AB owns approximately 78 percent of the outstanding shares of ESB. Esselte Business Systems is the American holding company for Esselte AB's office supplies, graphic arts, and retail supplies and equipment operations. Esselte AB's shares are listed on the Stockholm and London Stock Exchanges. ESB shares are listed on the New York and Stockholm Stock Exchanges.

#90036b0624 02/05/1990 ~Business Wire

WASHINGTON, DC (FEB. 5) BUSINESS WIRE - In response to market demands, Advanced Computer Communications (ACC) Monday announced at Communications Networks '90 the latest addition to its ACS Series 4000 family of internetworking products, the ACS 4000TR token ring hardware option.

''Targeted for medium to large-scale token ring users the ACS 4000TR meets the demands of high-performance and unified SNMP network management,'' says Gary Krall, ACC's director of marketing. ''The new offering

reinforces ACC's commitment to providing flexible hardware, software and management solutions to LAN interconnectivity.''

Network connections on the ACS 4100 and ACS 4400 hardware platforms can now be configured to link remote Ethernet or token ring local area networks (LANs). The new token ring option connects two or more geographically separate token ring LANs into a single integrated network.

With the ACS 4000TR, data between token ring LANs can be transparently bridged or routed at aggregate speeds of up to 4Mbps. Flexible Series 4000 application software provides the internetworking function. Operating independent of high-level protocols, the token ring bridge forwards data regardless of protocol. As a router, IP packets are sent directly to their destination, alleviating unnecessary traffic.

As a member of the ACS Series 4000 family of internetworking products, the ACS 4000TR also supports the Simple Network Management Protocol (SNMP), the first open systems management protocol for heterogenous systems in a networking environment. SNMP provides the performance and troubleshooting statistics needed to plan the network, measure system traffic loads and isolate network errors.

The token ring option is configured into the ACS 4100 or ACS 4400 hardware at the time of order. It can easily be installed into existing units in the field. The ACS 4000TR is priced at $1,400.

For the last 14 years, Advanced Computer Communications has been a driving force in the data communications industry. The hardware and software products ACC develops and manufactures provide compete solutions to customer needs. Worldwide, ACC products are connecting local and long-distance networks for government and commercial users.

#90036b0625 02/05/1990 ~Business Wire

CORAL GABLES, FL (FEB. 5) BUSINESS WIRE - Ramsay-HMO Inc. reported Monday that income before extraordinary item for the second quarter ended Dec. 31 1989 totalled $609,354 up 331 percent from $141,353 for the like period last year.

Earnings per share were 28 cents for the current quarter (a loss of eight cents after extraordinary item) vs. 11 cents in the prior year. Revenues increased by 11 percent to $24.4 million.

Income before extraordinary item for the six months ended Dec. 31, 1989

totalled $1,030,606, up from $231,321 for the like period last year. Earnings per share before extraordinary item totalled 59 cents for the current six months (15 cents per share after extraordinary item), vs. 18 cents in the prior year. Revenues increased by 6.3 percent to $48.1 million.

The company reported an extraordinary loss of $771,043 for the quarter and six months ended Dec. 31, 1989 (net of applicable taxes of $464,000) as a result of a $500,000 restructuring fee and a writedown of deferred loan costs associated with the early repayment of bank debt.

Ramsay-HMO Inc., which recently completed a successful initial public offering of $25 million, further announced that membership enrolled for January 1990 increased to 62,199, an increase of 11.4 percent over the previous month and 15.3 percent over the membership enrolled for September 1989.

The increase is largely attributable to increases arising out of the January enrollment period at two large commercial accounts, Metropolitan Dade County, and the County School Board. Further monthly increases of this magnitude are not anticipated.

Paul Ramsay, chairman of the board, stated, ''The Company's strong earnings growth for the period was driven by appropriate management of medical resources and tight control of administrative expenses, together with premium rate increases, and a reduction in amortization of intangibles.

''Earnings would have been further inproved if Gramm-Rudman deductions amounting to approximately $250,000 had not been made in the December quarter.''

Paul Ramsay continued, ''The successful completion of the initial public offering in December allowed the Company to repay approximately $18 million in debt as well as improving working capital. The Company should significantly reduce interest costs in subsequent quarters as a result.''

Ramsay-HMO Inc. owns and operates a South Florida-based health maintenance organization (''HMO'') serving the Miami Hispanic community and others in the Miami and Fort Lauderdale area. Approximately 80 percent of the company's HMO members receive pirmary medical care through the company's staff model ambulatory health care centers.

Approximately 30 percent of the company's membership is enrolled in its Medicare Plus plan. The company's HMO is the oldest HMO in Florida and is one of th largest HMOs in the Miami area.

#90036b0626 02/05/1990 ~Business Wire

SAN JOSE, CA (FEB. 5) BUSINESS WIRE - Plus Logic Inc. announced that it had begun shipping its PLUSTRAN Design System version 1.0 for 286 and 386 MS-DOS compatibles.

Plus Logic's PLUSTRAN Design System and PLUS Array field and subsystem programmable devices provide a fast and cost-effective solution to the high performance (40 MHz) system designer.

With the PLUSTRAN Design kits, designers can work with existing standard tools and not have to worry about hand placement and routing to obtain performance.

The process from netlist to bit map for fully utilized devices occurs in less than three minutes on a 20 MHz, 80386-based PC.

The PLUSTRAN Design System 1.0 reads EDIF netlists created by Orcad and Viewlogic design entry tools. It extracts all Plus Logic library components in the EDIF netlist and maps the design into the target PLUS Array device, generating a bit map for the device programmer.

PLUSTRAN includes:

-- Symbol libraries for Orcad.

-- Symbol and simulation libraries for Viewlogic.

-- PLUSASM equation assembler for defining supported PLD components which are included in the generated netlist.

-- Device programmer interface software.

PLUSTRAN also generates reports for pinlist, mapping summaries and resource utilization.

The PLUSTRAN Design System is available in three versions:

PLUSTRAN Design System 1.0 (part number DPKITAZP-10) lists for $2,795. It includes PLUSTRAN, the PLUS Array programmer, component libraries for Viewlogic and Orcad and one year of maintenance.

All the design kits are available immediately through Plus' distributors, Hall-Mark Electronics Corp. and Western Microtechnology Inc.

Plus Logic Inc. is a semiconductor company providing innovative high performance hardware products and software design tools for the programmable gate array and subsystem logic market.

#90036b0629 02/05/1990 ~Business Wire

SAN JOSE, CA (FEB. 5) BUSINESS WIRE - Plus Logic Inc. has set up the initial sales representative network for the United States.

The reps will provide sales and support for the PLUS Array FPGA2000 family of high performance field programmable gate arrays, the FPSL5000 family of field programmable subsystem logic and the PLUSTRAN Design System.

The reps will be working with Plus' distributors, Western Microtechnology and Hall-Mark, in all of their franchised locations.

Paul Buma, Plus' eastern regional sales manager, has signed up ATS and SJ

Associates.

ATS, based in North Redding, Mass., will cover Massachusetts and Connecticut. SJ Associates, based in Rockville Center, N.Y., will service New York, New Jersey, Maryland and Washington D.C.

John Mucciaro, Plus' recently appointed western regional sales manager, has signed up three rep organizations.

BAE Sales, based in San Jose, will cover northern California and Sacramento. Infinity Sales, based in Newport Beach, Calif., will service Los Angeles and Orange County. Nova Marketing, headquartered in Dallas will cover Texas and Oklahoma.

The West Coast sales office for Plus Logic is located at 3020 Old Ranch Parkway, Suite 325, Seal Beach, Calif. 90740.

Phone: 213/799-5519. FAX: 213/799-5593.

The East Coast sales office for Plus Logic is located at 33 Boston Post Road, Marlboro, Mass. 01752.

Phone: 508/485-4774. FAX: 508/481-7522.

Plus Logic Inc. is a semiconductor company providing innovative high performance hardware products and software design tools for the programmable gate array and subsystem logic market. For more information, contact Plus Logic, 1255 Parkmoor Ave., San Jose, Calif. 95126.

#90036b0630 02/05/1990 ~Business Wire

NASHUA, NH (FEB. 5) BUSINESS WIRE - Ferrofluidics Corp. (OTC:FERO) Monday announced sales of $8,012,000 for the second quarter ended Dec. 31, 1989, vs. $4,865,000 for the comparable period of the preceding year, a 65 percent increase.

The net loss for the second quarter was $273,000, or 9 cents per share, compared to a net loss of $333,000, or 11 cents per share, adjusted to reflect the effect of a one-for-four reverse split, for the second quarter

last year. The loss from operations was $143,000 vs. a loss of $430,000 for the same period last year.

The second quarter included a net pretax translation gain of $86,000 resulting from the strengthening of certain European currencines against the U.S. dollar.

For the six months ended Dec. 31, 1989, sales totaled $13,533,000 vs. $9,591,000 for the comparable period in 1988 and the net loss was $263,000 or 9 cents per share, vs. net income of $19,000, or $0.00 per share, for the prior year. The loss from operations was $121,000 compared to a loss of $271,000 for the same six-month period last year.

Second quarter bookings were $8,444,000 compared to $4,770,000 for the comparable period last year and totaled $15,593,000 year-to-date vs. $8,914,000 for the same period in the prior year. Backlog as of Dec. 31, 1989, was $10,597,000 vs. $4,336,000 at the same time last year and $8,294,000 at Sept. 30, 1989.

Commenting on the second quarter results, Dr. Ronald Moskowitz, chief executive officer, stated, ''The increased revenues in our second quarter reflect improved revenue contributions from our primary business sectors including rotary seals, computers seals and crystal growing systems. In addition, our recently acquired subsidiary, Advanced Products and Technologies, GmbH, contributed 27 percent of our consolidated revenues.''

Continuing, Moskowitz said, ''Contributing to the loss in the quarter was an increased tax liability in Europe resulting from higher pretax earnings from both of our German subsidiaries, while, at the same time, we had a reduced tax benefit domestically.

Ferrofluidics Corp. is the pioneer and world leader in ferrofluid (magnetic fluid) technology. The company manufactures proprietary products for high growth market applications including rotary seals for semiconductor manufacturing and a variety of controlled environment processes; exclusion seals and ferrofluid film bearing spindles for computer memory disk drives; fully automated crystal growing furnaces; and ferrofluids for audio loudspeakers.

CUPERTINO, CA (FEB. 5) BUSINESS WIRE - Tandem Computers Inc. (NYSE:TDM) Monday announced the strengthening of its midrange NonStop CLX product family with the introduction of seven new disk and communication products.

The new products allow large database applications to use the power and price performance of the NonStop CLX midrange systems including continuous availability, ease of growth, linear expandability, and the ability to distribute or centralize systems and data. The seven products include: internal and external disk drives; high performance tape drives, high speed and parallel interfaces, and communication subsystems.

Roy Graham, manager, Tandem distributed systems, product management, stated: ''During the past year, Tandem has made significant announcements and enhancements across the entire product line. We continue to provide users with products from the midrange to the mainframe that offer superior price/performance whether at the processor or peripheral level.

''And at all times, the original Tandem investment is protected since our systems are compatible.''

All storage and communication products are available first calendar quarter. Pricing is U.S. list. The 4230 CLX internal disk drive is $16,500. The XL80 disk subsystem starts at $115,000. The 5170 tape subsystem, table top model, is $23,000. The 3604 bit synchronous controller price is $6,059 and the 3601 parallel interface is $2,850. The 3650 communication subsystem starts at $11,400. SNAXLINK is priced at $49,550.

Tandem Computers Inc. manufactures and markets computer systems and networks for online transaction processing, large database applications and the UNIX marketplace. Company headquarters are located in Cupertino.

#90036b0641 02/05/1990 ~Business Wire

NORTH HOLLYWOOD, CA (FEB. 5) BUSINESS WIRE - Ventura Entertainment Group Ltd. (NASDAQ:VEGG) announced results for its fourth quarter and fiscal year ended Oct. 31, 1989.

For the fourth quarter the company reported revenues of $3,146,500 and net earnings of $304,956, or 10 cents per share. For the year it reported $3,146,500 in revenue and a net loss of $455,316, or 22 cents per share.

Comparable year-end figures for the previous year are not available since the company was formed on May 16, 1988.

Harvey Bibicoff, chairman of the board, commented that: ''The company is very proud of its accomplishments during its first full operating year.

The successful development, production and licensing of 65 half-hour episodes of 'Crosstown,' which has been licensed domestically by New World Pictures and internationally by Capital Cities/ABC, and the two-hour movie for television, 'It Nearly Wasn't Christmas,' licensed domestically by LBS Communications and internationally by Pandora Distribution, has established Ventura as a producer of high-quality programming.

''Our recent acquisition of the former Osmond Studios, renamed the Ventura Media Center, truly sets the stage for us for 1990.''

Ventura Entertainment Group develops and produces network, cable and syndicated television series and music/variety specials for the domestic and international marketplace and, through its subsidiary Ventura Motion Picture Group Ltd., develops and produces commercial broadcast and cable network television mini-series and MOWs and theatrical motion pictures.

The company owns the Ventura Media Center in Orem, Utah, one of the largest production facilities outside of Los Angeles.

#90036b0651 02/05/1990 ~Business Wire
OAKLAND, CA (FEB. 5) BUSINESS WIRE - Dreyer's Grand Ice Cream Inc. (OTC:DRYR) reported record sales and earnings for the fiscal year ended Dec. 30, 1989, according to T. Gary Rogers, chairman.

Consolidated net sales for the year were $227,286,000, an increase of 20 percent over 1988 sales of $188,678,000. Net sales for the fourth quarter were $51,560,000 compared with $43,360,000 for the like period in 1988.

Net income for the year was $10,402,000, or $1.69 per primary common share and includes a one time extraordinary gain (net of taxes) of $1,908,000 related to a litigation settlement in the second quarter.

Income before the extraordinary gain was $8,494,000, or $1.38 per share, an increase of 25 percent when compared with net income of $6,798,000, or $1.11 per share, for all of 1988.

Net income for the fourth quarter was $804,000, or 13 cents per share, compared with $628,000, or 10 cents per share, in the fourth quarter of 1988.

The increase in earnings for the year was primarily the result of strong sales growth accompanied by a lower ratio of selling, general and administrative expenses to sales, and a lower income tax rate when compared to the like period in 1988.

These improvements were partially offset by a somewhat lower gross margin, resulting from a higher proportion of distributed product sales and increased material costs, and lower interest income.

Dreyer's Grand Ice Cream Inc. manufactures and distributes premium ice creams and other premium dairy-based products made only from the highest quality ingredients available.

CONTACT: Dreyer's Grand Ice Cream Inc., Oakland
William C. Collett, 415/283-9400.

#90036b0652 02/05/1990 ~Business Wire
LINCOLNSHIRE, IL (FEB. 5) BUSINESS WIRE - Clear Communications Monday introduced a new software-only version of the Clearview Surveillance System, easing implementation and reducing the cost of the Clearview wide-area T1 network management system.

The new version of the Clearview System, available now, integrates intelligent CSU hardware from Larse Corp. for on-line data collection and T1 diagnostics.

The Clearview software application analyzes network data and provides high-level management information on T1 performance, giving managers the first real-time decision support system available for common carrier-provided T1 facilities in their wide-area networks.

Because the Clearview software now works with CSU equipment already installed in many networks, managers can immediately take advantage of the powerful expert systems features of the Clearview network management product, according to Robert Copithorne, president and chief executive officer of Clear Communications.

CSUs (Channel Service Units) are components located at each end of every T1 link in a network. In addition to providing data collection and diagnostic capabilities, they fulfill FCC requirements for the T1 interface between common carriers and customer-premise private network equipment.

In the past year, CSUs have become strategically crucial elements in the management of enterprise networks, with large private networks upgrading to ''intelligent'' CSUs to capture the new ESF (Extended Superframe Format) performance data available from common carriers.

The Clearview Surveillance System is the first network management system to perform sophisticated analysis of this ESF performance data to analyze where, when and why problems occur on the transmission links through their networks.

Clear Communications is a telecommunications systems company that delivers wide-area network management solutions. The Clearview Surveillance System is a comprehensive decision support system for managing carrier-provided facilities in wide-area digital networks.

The Clearview System integrates a powerful multi-tasking workstation, point-and-click user interface, and advanced information management and presentation technologies to provide network managers a complete set of surveillance, diagnostic and reporting capabilities.

#90036b0655 02/05/1990 ~Business Wire

STAMFORD, CT (FEB. 5) BUSINESS WIRE - General Re Corporation reports a combined underwriting/expense ratio for the domestic property/casualty companies for 1989 of 99.6 percent compared with 99.1 percent in 1988.

For the fourth quarter of 1989, the combined ratio was 98.8 percent the same as that recorded in the fourth quarter of 1988.

Operating income for the year ended December 31, 1989 was $598.5 million or $6.52 per share, an increase of 21.0 percent over $5.39 per share in 1988. Operating income includes ''fresh start'' tax benefits arising from the 1986 Tax Reform Act in 1989 of $.27 per share compared with $.07 per share in 1988. In accordance with FASB Statement No. 97, operating income per share includes after- tax realized capital gains of $.44 per share in 1989, compared with a loss of $.05 per share in 1988.

Net income is $598.5 million or $6.52 per share for 1989, an increase of 29.4 percent from the 1988 results of $5.04 per share which included a charge relating to the sale of life reinsurance operations of $.35 per share.

Operating income in the fourth quarter of 1989 was $152.9 million or $1.66 per share, an increase of 3.8 percent over $1.60 per share in the fourth quarter of 1988. Operating income includes ''fresh start'' tax benefits of $.07 per share compared with $.02 per share in the fourth quarter of 1988 and also includes after- tax realized capital gains of $.05 per share compared with gains of $.14 per share in the comparable period of 1988. Net income was $152.9 million or $1.66 per share for the fourth quarter of 1989, an increase of 1.8 percent from fourth quarter 1988 results of $1.63 per share.

Domestic property/casualty written premium was $1,788.7 million in 1989. This is an increase of 0.5 percent from the $1,779.7 million figure for 1988. For the fourth quarter, domestic property/casualty written premium was $483.8 million, a 22.6 percent increase from the fourth quarter of 1988.

Worldwide net after-tax investment income for 1989 was $558.5 million, an increase of 13.0 percent over $494.3 million in 1988. In the fourth quarter, investment income was $144.9 million, an increase of 12.2 percent over the fourth quarter of 1988. On a per share basis, net investment income was $6.12 for 1989, an increase of 17.9% over $5.19 per share for the 1988.

#90036b0669 02/05/1990 ~Business Wire
SCOTTSDALE, AZ (FEB. 5) BUSINESS WIRE - Broken Arrow Petroleum Co. announced that arrangements for an initial $900,000 drilling unit of a $7.8 million drilling program has been completed.

The initial drilling unit includes the Blue Mountain Prospect, Latimer County, Okla., and the Chinquapin Ridge Prospect, Johnson County, Ark.

Each of the units has been evaluated by third party engineers and accorded proven undeveloped reserves of natural gas and are a product of Broken Arrow's Arkoma Basin Exploration Program. Drilling activity is expected to commence in February.

The initial project is the first segment of a development program which is designed to develop approximately 21 currently identified drilling units which embrace a gross reserve in excess of 100 billion cubic feet of natural gas.

Sixteen of these units are now scheduled to begin during 1990. The total cost of the 16 well project is approximately $7.8 million.

Larry W. Smith, president of Broken Arrow, said that with the development program now started, it is anticipated that other developmental projects, involving separate prospects, will be announced as appropriate financial commitments are obtained.

Broken Arrow has focused its exploration program on the Arkoma Basin, which straddles the states of Arkansas and Oklahoma, since 1982. The Arkoma is a prolific producer, exclusively of dry natural gas. Currently the basin is served by eight major pipeline systems which enables producers to transport their natural gas to virtually all sections of the

United States.

Broken Arrow and Kimco Energy Corp. (NASDAQ:KIMC), Denver, announced last month an agreement to combine the two companies. The goal of the combined company is to quickly become a leading low-cost developer of natural gas with reserves necessary to support a market capitalization in the $100 million range.

Presently the two companies are operating as one under an interim operating agreement. The business combination is expected to close on or before April 30, 1990.

#90036b0671 02/05/1990 ~Business Wire
WHITE PLAINS, NY (FEB. 5) BUSINESS WIRE - IBM and NeXT-a, Inc. Monday announced that IBM plans to offer NextStep-a on AIX-a.

IBM's NextStep offering will provide AIX users with a major new application environment for enhanced business and professional productivity.

NextStep is an application software development and user interface environment, created by NeXT and licensed to IBM in 1988. IBM will support the same application programming interfaces (APIs) as NextStep providing compatibility and consistency so that developers can offer applications on both machines, resulting in a larger market for their efforts.

NextStep will join OSF/Motif-a as graphical user interface offerings planned for the IBM PS/2-a and RISC computers running AIX, IBM's open-standard UNIX-a operating system based on AT&T System V and BSD 4.3. Specific product offerings and availability will be announced at a future date.

The UNIX operating system offers sophisticated features such as powerful networking and multitasking but it may be considered, by some users, to be too complicated for those who are not UNIX experts. NextStep, which hides the complexity of the UNIX operating system under an object-oriented environment, will allow users to take advantage of the benefits of UNIX.

NextStep can be envisioned as an object-oriented environment sitting ''between'' the operating system and the application programs. It provides tools that allow programmers to construct applications in a fraction of the time traditionally required, and to make the applications easy to use for even non-technical people.

NextStep has four components: the Window Server, the Application Kit, Interface Builder, and the Workspace. The Window Server, taking advantage of a Display Postscript-a interpreter from Adobe Systems, routes signals from the keyboard and mouse to applications and from applications to on-screen windows, and it manages the windows. Because the Display Postscript system uses the same Postscript language that controls printed output, everything looks the same on the screen as it does when printed.

NASHUA, NH (FEB. 5) BUSINESS WIRE - Ekco Group Inc. (NYSE:EKO) Monday announced net income for the fourth quarter ended Dec. 31, 1989, of $5.1 million, or $0.29 per share, a 91 percent increase from the $2.7 million, or $0.15 per share, reported for the fourth quarter of 1988.

Sales for the fourth quarter were $50.4 million, up 30 percent from $38.9 million reported in 1988's fourth quarter.

For the year ended Dec. 31, 1989, Ekco reported net income of $4.1 million or $0.22 per share, a 32 percent increase from the $3.1 million, or $0.17 per share, reported for 1988. Sales for 1989 were $166.5 million, up 23 percent from the prior year's $134.8 million.

Results for 1989 include the operations of Woodstream Corp. since Jan. 23, 1989, the date of its acquisition by the company.

Fourth-quarter 1989 results benefited from a seasonal revenue shift from the third to the fourth quarter, and certain year-end adjustments at Woodstream.

Ekco Group President Robert Stein said, ''Our 1989 performance marks three consecutive years of increased sales, earnings and cash flow for Ekco Group. Earnings in 1989 were the highest for the company since fiscal 1980.''

Stein attributed the company's increased revenues primarily to the Woodstream acquisition. The higher profit level resulted from increased revenues, a decreased tax provision, and a pension plan curtailment gain. These were offset in part by increased interest expense relating primarily

to the Woodstream acquisition.

Ekco Group Inc. manufactures and markets a variety of consumer products which it broadly markets through leading retail outlets. The company's products include a range of household and recreational products sold under the ''Ekco,'' ''Baker's Secret,'' ''Victor,'' ''Woodstream'' and ''Havahart'' brand names.

The condensed consolidated statement of income for the company is attached.

CLEVELAND, TN / DALLAS (FEB. 5) BUSINESS WIRE - Officials of Life Care Centers of America Inc. (LCCA) and National Heritage Inc. (NYSE: NHR) Monday announced that they are engaged in discussions regarding the merger of the two firms.

These discussions call for the establishment of a new company comprised of the combined assets and operations of LCCA and National Heritage along with selected assets and operations of certain affiliates of the two firms and certain health care assets of Southmark Corp. It is anticipated that securities of the new company would be publicly traded, with LCCA and its affiliates maintaining a controlling interest in the new company.

Forrest L. Preston, Chairman of LCCA, said, ''National Heritage has a national network of long-term care and retirement facilities, staffed by committed, professional personnel. Although we have been involved in disputes with National Heritage and its affiliates for several years, after discussions with National Heritage's new management, we are convinced the combined operations and talents of Life Care and National Heritage will result in an enterprise with a strong commitment to the nation's elderly and improved returns to investors in properties currently managed by LCCA and National Heritage.''

It is expected Preston will serve as chairman and CEO of the new entity.

In announcing their discussions, officials of both companies indicated there was mutual interest in pursuing a combination of the assets and operations of their respective businesses, but they also emphasized the discussions are in preliminary stages.

In addition, the combination would be subject to numerous conditions and to approval by National Heritage's shareholders as well as a number of regulatory and legal approvals, including approvals from constituencies having jurisdiction over the reorganization of Southmark Corp.

LCCA, together with certain of its affiliates, own and/or operate 100 intermediate and skilled nursing care facilities with 13,732 beds and 12 retirement centers with 1,692 units.

National Heritage Inc. manages and operates over 200 long-term care facilities with approximately 23,000 beds and 41 retirement centers and assisted living facilities with approximately 5,800 units.

PALO ALTO, CA (FEB. 5) BUSINESS WIRE - ALZA Corp. and Bio-Electro Systems Inc., both of Palo Alto, Calif., announced Monday that they have entered into a collaborative arrangement with Medtronic Inc. of Minneapolis, Minn. whereby both ALZA's and Medtronic's electrotransport drug delivery activities will be managed by ALZA pursuant to agreement with Bio-Electro Systems.

In addition to this collaboration, Bio-Electro Systems has obtained an option, exercisable through June 1992, to acquire Medtronic's electrotransport technologies and business unit. ALZA currently has an option to acquire Bio-Electro Systems through January 1995. Assuming both options are exercised, ALZA would then own the consolidated electrotransport activities and technologies of the companies.

Electrotransport technology involves the delivery of drug compounds through the skin with the assistance of an extremely low electrical current. Electrotransport systems are being developed in order to deliver drug compounds that cannot be delivered through skin via passive transdermal systems for various reasons, including the size and type of molecules and required pattern of delivery.

Medtronic has received warrants to acquire 500,000 shares of ALZA Class A Common Stock at $50 per share and prepaid royalties and certain other payments from Bio-Electro Systems totalling $2.9 million, and will receive royalties on future sales of electrotransport products by Bio-Electro Systems, ALZA and/or their sublicensees.

Medtronic's electrotransport facilities and personnel are located in surburban Minneapolis. Medtronic has been conducting research and development in the electrotransport area since 1982 and their work has resulted in more than 60 issued and pending patents worldwide in the electrotransport field.

Bio-Electro Systems was formed in 1988 to develop drug delivery systems utilizing ALZA Corp.'s proprietary Alzamer bioerodible polymer and electrotransport drug delivery technologies, and to commercialize, most likely through licensing, pharmaceutical products based on these technologies. Bio-Electro Systems has obtained a $17 million bank line of credit to fund the electrotransport activities with Medtronic.

ALZA Corp. is a leading drug delivery systems company focusing on the development, manufacture and marketing of a broad range of pharmaceutical products based on proprietary, rate-controlled drug delivery systems technology.

LONDON (FEB. 5) BUSINESS WIRE - British Gas (NYSE:BRG) has appointed William J. Soderman as Vice President, Exploration and Production, BG Exploration America, Inc., headquartered in Houston, Texas.

Mr. Soderman will be based in Houston and will be responsible for managing British Gas' hydrocarbon exploration and production interests in the United States. He will report to Mr. Arthur O. Beall, Vice President and General Manager of the Company's Houston E&P office, which is responsible for the Americas and Africa.

With more than 28 years' experience in oil and gas exploration and development, with several major companies, Mr. Soderman holds B.S., M.S. and Ph.D. degrees in geology from Columbia University and the University of Illinois.

British Gas recently announced its involvement in two major hydrocarbon exploration joint ventures in the Gulf of Mexico and Gulf Coast regions. These programs will involve the drilling of some 20 exploration wells and some development work associated with previously discovered gas fields.

The company has expressed its intention of becoming a significant explorer and producer in the U.S. oil and gas business, in line with its worldwide expansion strategy.

British Gas, headquartered in London, is the largest integrated gas company in the Western world and is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industrial and commercial customers in Great Britain. Important support activities to its marketing efforts include appliance trading and customer services to domestic gas customers.

British Gas is also active in the exploration for and production of hydrocarbons both offshore and onshore. Expertise developed in the gas business is offered for sale overseas through the British Gas International Consultancy Service. British Gas American Depositary Receipts are traded on the New York Stock Exchange. One ADR is equivalent to ten Ordinary Shares.

RIVIERA BEACH, FL (FEB. 5) BUSINESS WIRE - Tele-Optics Inc. (NASDAQ: TOPT) disclosed that General Dynamics, one of its U.S. defense contractor customers, accepted delivery in advance of the contracted date on the first digitizer production unit designed and built by the Company, a major milestone in the Company's digital image processing undertakings.

The Company earned an incentive under the contract for such early delivery.

General Dynamics, in a letter to the Company stated ''The resourcefulness, dedication and effort of your team in producing the first of these highly complex state-of-the-art machines within the very aggressive 9 month contract schedule is to be commended.''

The Company is building the remaining three digitizers called for in the initial contract, and anticipates General Dynamics may exercise options therein for additional units in coming months.

The Company also announced that one of its European customers and the Company have elected to terminate an existing contract for a classified video sensor system for reasons of mutual convenience. This termination will, however, adversely impact the Company's military backlog and may

require a write down of inventory.

TELE-OPTICS Inc. is engaged in the development, manufacture and marketing of optical, electronic, and electro-optical products and systems for use in the medical and defense industries.

MARKHAM, Ontario (FEB. 5) BUSINESS WIRE - International Semi-Tech Microelectronics Inc. (''Semi-Tech'') and Berjaya Corp. (Malaysia) Berhad (''Berjaya'') announced Monday the signing of a definitive agreement whereby Berjaya and Semi-Tech, through a jointly owned company, will acquire Consumers Distributing from Provigo.

Berjaya will own 81 percent of the joint venture and Semi-Tech 19 percent with an option to increase its interest to 49.9 percent. Semi-Tech will manage Consumers on behalf of the joint venture.

The transaction is subject to the approval of the appropriate regulatory agencies. It is expected to close by mid-April, but is effective as of Jan. 27, the last day of Provigo's 1990 fiscal year. The purchase price is based on the net asset value as stated on Consumers Distributing's books as at Jan. 27, plus accrued interest from the effective date to closing date. Consuemrs' net asset value is subject to audit adjustments but is currently estimated at approximately $160 million.

Berjaya is a publicly traded investment holding company based in Kuala Lumpur, Malaysia with interests in steel wire manufacturing, property development, gaming, textile/apparels manufacturing, insurance, credit and retail through Singer (Malaysia) employing more than 9,000 employees. Berjaya owns 21 percent of Semi-Tech's Hong Kong based subsidiary, Semi-Tech Microelectronics (Far East) Limited, which purchased the U.S. East Coast operations of Consumers Distributing in May 1988.

Berjaya also was a bidder for SSMC Inc. (''Singer'') which Semi-Tech (Far East) purchased last year. Since the takeover, Berjaya became a partner of Semi-Tech purchasing majority control of Singer (Malaysia) and entering into a joint venture for the manufacture of Singer sewing machines in Malaysia.

Consumers is a Canadian retail distributor of consumer goods through 196 company owned and 30 franchised catalogue showrooms in all provinces. In fiscal 1989, revenues were approximately $750 million. Consumers employs 1,800 full time and 7,000 on a part-time seasonal basis. All operating

management will be retained.

International Semi-Tech Microelectronics Inc. is a Canadian public company headquartered in Markham, Ontario whose shares are listed on the Toronto Stock Exchange, trading under the stock symbol - ISE. Its Hong Kong subsidiary, Semi-Tech Microelectronics (Far East) Limited, is listed on the Hong Kong Stock Exchange, under the symbol - 448. Its U.S. subsidiary SSMC In., is listed on the New York Stock Exchange under the symbol - SSM.

SEATTLE (FEB. 5) BUSINESS WIRE - The merger of Technoarts Corp. and Leeds Capital Corp. was completed Feb. 2.

It was announced that the resulting corporation would be known as ''Technoarts Corporation''.

In a separate action on Jan. 31, the board of directors of Leeds Capital Corp. gave unanimous consent to extend the exercise period for ''B'' warrants from Jan. 31 to Feb. 28.

Technoarts is a manufacturer and marketer of computer-aided sign making equipment. Technoarts' equipment offers state-of-the-art computer drafting capability to the commercial sign industry. The company features its systems at prices well below the competition and offers a nationwide support network to the end-user customer.

Technoarts has been profitable in each year since its founding in Jan. 1987. Sales nearly tripled in 1988 to $3.5 million vs. $1.2 million the year before. The merger will allow Technoarts to expand its worldwide marketing effort and should sufficient warrants be exercised, Technoarts may seek listing on NASDAQ.

WEST CHESTER, PA (FEB. 5) BUSINESS WIRE - Commodore Business Machines Inc. Vice President of Marketing Lloyd Mahaffey Monday announced the

introduction of a new Amiga upgrade program offering A1000 owners the opportunity to upgrade to any A2000 series machine at a substantially-reduced cost.

The offer, which runs now through March 31, was developed to encourage the large base of Amiga 1000 owners to upgrade to higher-performance Amiga 2000 series machines which are designed to take advantage of future product improvements and software offerings.

Mahaffey said the upgrade program requires A1000 owners to return their machines to a local dealer where they can purchase an A2000 series machine for as little as $999 (a) -- a discount of approximately 50 percent under standard retail price (see below for specific pricing).

The multi-tasking Amiga (R) line includes the Commodore Amiga 2000 (TM), the Commodore Amiga 500 (TM) and three enhanced products: the Commodore Amiga 2000HD (TM), the Commodore Amiga 2500 (TM) and the Commodore Amiga 2500/30 (TM).

Commodore's line of MS-DOS (R)-compatible computers includes the Colt (TM) Select Edition (TM) and Professional Series III (TM). (a) Valid at participating dealers only; taxes not included

Amiga Upgrade Pricing

Amiga 1000 owners can upgrade to the following Amiga 2000 series machine for the prices indicated:

Machine	Price
Amiga 2000	$ 999 + trade-in
Amiga 2000HD	$ 1,599 + trade-in
Amiga 2500	$ 2,999 + trade-in

NASHVILLE, TN (FEB. 5) BUSINESS WIRE - REN Corporation - USA (NASDAQ/NMS:RENL), a provider of kidney dialysis services, Monday announced that it has entered into a $24 million credit agreement with First Union National Bank of Charlotte, N.C.

This new line of credit replaces a $12 million credit facility negotiated with First Union in July 1989 and will be used primarily to finance the

acquisition and development of new dialysis centers.

Dr. Jerome S. Tannenbaum, president and chief executive officer, stated: ''This new credit agreement, following closely on our successful initial public offering in late November, will enhance our ability to acquire and develop additional dialysis facilities. Our goal of adding 10 to 15 dialysis centers during the next 18 months is attainable.''

The terms of the credit facility call for $6 million of the $24 million to be used for working capital and $18 million to be used for acquisition and development activities.

Borrowings are available on a revolving basis until March 31, 1992, at which time the balance will convert to a five-year term loan.

REN Corporation - USA was founded by Dr. Tannenbaum and a colleague in 1986 with the opening of two dialysis centers. Four additional centers were opened, two each in 1987 and 1988. Nine REN Centers were acquired or developed in 1989. An additional center was acquired in January 1990, bringing the total number of centers presently in operation to 16.

NASHVILLE, TN (FEB. 5) BUSINESS WIRE - Dollar General Corp. (NASDAQ/NMS:DOLR) Monday reported higher sales for January and for the year ended Jan. 31, 1990.

Chairman and Chief Executive Officer Cal Turner Jr., said retail sales for the period ended Jan. 31, 1990, totaled $44 million, compared with $43.4 million in 1989, an increase of 1.3 percent. Same store sales for the period decreased 3.4 percent.

For the fourth quarter, retail sales increased .4 percent to $190 million over sales of $189 million in the fourth quarter a year ago. Same store sales for the quarter decreased 3.3 percent.

Retail sales for the year totaled $610 million, a slight increase over sales of $608.8 million last year. Same store sales year to date decreased 1.3 percent. Total sales for the year totaled $615.2 million, as compared to $613 million last year.

''While we expected higher sales for the year, we have demonstrated our commitment to an everyday low price strategy by cutting the number of advertising circulars from 13 in 1987 to 10 in 1988 and 8 in 1989,'' Turner said. ''This has increased profitability while hurting short term sales comparisons. We have ended the year with significant reductions in debt and inventory.

''We have also successfully closed our distribution center in Arkansas and expanded and automated our distribution center in Scottsville, Ky. We have increased profits each quarter this year and expect the fourth quarter to continue that trend. In all, we are now better positioned for the new year than we have been in many years. We look forward to continued profitable growth throughout 1990.''

Dollar General Corp., a major discount retailer now in its 50th year of operation, is a chain of 1,378 neighborhood stores operating in 23 states with distribution centers in Georgia and Kentucky.

#90036b0729 02/05/1990 ~Business Wire

RENO, NV (FEB. 5) BUSINESS WIRE - In an effort to find new ways for its customers to enhance their business, AT&T's Cellular Systems Business Unit Monday announced that it has entered into an agreement with Cellular Solutions International (CSI) Ltd., developers of a ''point-of-sale'' software system for the cellular industry.

The agreement calls for AT&T to market CSI's Cellular Automation Support Software (CASS) to Autoplex(r) System users throughout the United States.

CASS will become the latest addition to AT&T's line of Quality Management Tools -- software packages designed to enhance the quality of cellular systems.

CASS improves efficiency on the retail side of the cellular business. It provides an up-to-the minute accounting of inventory levels, and where and when installations and service calls are scheduled. The system keeps track of sales leads and sales calls, and at the same time, follows finances -- from accounts receivable and accounts payable to general ledger sheets.

Although there are many such systems available for retail businesses, CASS is one of a select few created specifically with cellular businesses in mind.

''This is an excellent product,'' said Scott Forbes, supervisor of AT&T Cellular Operations Systems Planning. ''It will help cellular providers offer better service to their customers -- to run their business like a true, customer focused retail operation.''

CASS was developed over a three-year period in response to a request from a high-volume cellular communications reseller. The software program has been endorsed by many major cellular carriers. According to Tom Powers, president of AT&T Cellular Systems, the CSI agreement underlines AT&T's commitment to the cellular industry as a whole. ''We're getting involved in other parts of the business to find products and services that will provide new business solutions -- new alternatives -- for our customers. If another company has a quality product, we'll work with them so our cellular customers get the best service we can provide.''

''We're excited about having AT&T on our team,'' says CSI president Linda Rosen. ''It adds a new dimension in what we consider to be an evolutionary move -- one that fulfills the needs of our explosive industry.''

#90036b0735 02/05/1990 ~Business Wire

RENO, NEV (FEB. 5) BUSINESS WIRE - AT&T Monday introduced its next generation cell site - a uniquely flexible radio platform to meet the needs of the industry now and in the future.

Designed to accommodate the rapidly-changing world of cellular technology, the Autoplex(r) System 1000 Series II Radio Cell Site will ready service providers for the transition to an all-digital cellular network.

To that end, the Series II will work with today's analog radio standard as well as emerging digital standards. Once the standards are in place, a digital radio plug-in will be all that's required to make the analog to digital conversion.

And because the Series II is compatible with its predecessor, the Series I service providers who already have this equipment in place will be able to grow and modify their systems without disruption. Other customers will find the Series II cell site and the Autoplex 1000 switch perfect for overlay strategies.

Another advantage for service providers: The Series II is the most space efficient cell site available today. It packs 200 radio channels - twice the capacity of current equipment - into an area one-quarter the size.

While the new product provides a framework for the future, it also offers important new operations and administration features that can be put to work in today's cellular network.

Programmable radio channels will allow service providers to control and re-configure their system without making a trip to the cell site.

#90036b0737 02/05/1990 ~Business Wire

SALT LAKE CITY, UT (FEB. 5) BUSINESS WIRE - DTI Medical Corp. announced

Monday that it has sold U.S. rights to distribute its Biocompatible Osteconductive Polymer (BOP) products to ORTHO-TEX INC. of San Antonio, Texas.

J. Randolph Harig, president of ORTHO-TEX estimates that the annual human surgical market for the United States is $250 million.

Vladimir Skondia, M.D. DTI's president and CEO, said that for the U.S. territorial rights, ORTHO-TEX has agreed to pay all costs related to the FDA approval process for BOP products. DTI estimates the remaining FDA approval costs could amount to $500,000.

In addition to the FDA costs ORTHO-TEX will pay DTI $1,400,000 at various intervals throughout the FDA approval process. DTI received $100,000 at the time the contract was signed.

BOP is a synthetic bone material that has been widely used in numerous human applications throughout Western Europe and the U.S.S.R., notably in areas of spinal fusion, hip reconstruction and as a substitute for allographs or autographs.

Dr. Skondia noted that BOP acts as a scaffold for bone in-growth or osteoconduction. BOP is available in block, fiber, and sealant forms. In block form it provides stability where needed during bone in-growth.

In fiber form it produces a lattice work for more rapid bone in-growth when stability is not required. In sealant form it is used for cranioplasties to mold a new surface for skull defects.

In addition to its BOP technology, DTI holds the right to develop, manufacture, license, and market several other Soviet medical technologies in the Western World.

BOSTON (FEB. 5) BUSINESS WIRE - Psychemedics Corp. (NASDAQ:PCMC) Monday introduced two testing products which detect methamphetamine and marijuana through the use of the company's hair sample testing technique.

The announcement was made by Dr. Lawrence A. Kaufman, president and chief executive officer of Psychemedics Corp.

These new products, called GS/MS Confirmation Tests, complete Psychemedics' five-drug screen/confirmation methodology which detects cocaine, opiates, PCP, and now marijuana and methamphetamine through the use of hair sample analysis instead of the traditional urinalysis technique.

The introduction of these new products caps a 12 year research and development effort conducted under the direction of Dr. Werner Baumgartner at the company's Santa Monica, Calif. laboratories.

GC/MS Confirmation (Gas Chromatography/Mass Spectroscopy) complements Psychemedics' proprietary RIAH (Radioimmunoassay of Hair) Screening procedure which provides historical, quantitative and qualitative information regarding an individual's pattern of drug use.

The non-invasive technique is based on a simple scientific principle, whereby as the blood circulated through the body it nourishes the hair follicle.

If there are drugs in the blood, traces become entrapped in the core of the hair in amounts roughly proportionate to those ingested.

In addition to the dectection of long term usage of drugs, the hair test has proven highly accurate in independent testing, is more cost effective than urinalysis when used in pre-employment and employee screening programs; and resists attempts of evasion and false negatives due to temporary abstention, excessive fluid intake, or the substitution or adulteration of specimens.

Psychemedics' drug testing method is being used by over 50 corporations, banks, hospitals and some government agencies nationwide including Steelcase Corp., Caesar's Tahoe Casino, Michigan National Bank, Chapparral Steel and the Federal Reserve of Chicago.

KENILWORTH, NJ (FEB. 5) BUSINESS WIRE - Harmonia Bancorp (NASDAQ:HBCI), the parent company of Harmonia Savings Bank, Monday reported net income of $867,000 for the fourth quarter of 1989.

This compares with net income of $1.5 million (which included $900,000 of

joint venture income) for the three months ended Dec. 31, 1988. For 1989 net income was $4 million vs. $4.3 million in 1988. Per share figures are not available as the bank converted from mutual to stock form on Nov. 7, 1989. Harmonia Savings Bank is a New Jersey-chartered savings bank whose deposits are insured up to applicable limits by the Bank Insurance Fund/FDIC.

According to Walter D. Tombs, chairman of the board and chief executive officer, the 1989 performance reflects positive gains in net interest income even though there was a decline in income from joint ventures compared with the prior year and an additional provision for loan losses in 1989.

''Earnings from our basic banking operations, as well as the bank's capital position, were strong, noninterest expenses remained on budget, and asset quality continued to be excellent,'' said Tombs. Tombs further stated that he is pleased with the year-end results and the company's performance, which is consistent with 1988 results, particularly in view of the softening of the local real estate market and economy.

Net interest income was $4.9 million in the fourth quarter of 1989 compared with $4.6 million in the year-ago quarter. For the year, net interest income was $19 million in 1989 vs. $17.1 million in 1988.

Other operating income was $371,000 and $1.8 million for the quarter and year, respectively, in 1989 vs. $1.1 million and $2.2 million in the comparable periods of 1988. The 1989 fourth quarter and full year included a loss from joint ventures of $94,000 and a gain of $17,000, respectively, vs. gains of $896,000 and $919,000 for the same period in 1988.

SMYRNA, TN (FEB. 5) BUSINESS WIRE - Independent Air Holdings Inc. (NASDAQ:IAIR), announced Monday that it has filed a registration statement with the Securities and Exchange Commission relating to the proposed issuance of 333,334 units with each unit consisting of 70 shares of common stock, no par value, and 20 of the company's Class C common stock purchase warrants.

The price of the units to the public is $6. The sale of the units will be underwritten by the Stuart-James Co. Inc., subject to the terms and

conditions set forth in the registration statement.

Proceeds from the offering will be used to pay a portion of a loan from the Stuart-James Co. Inc., a recent bridge loan, certain other deferred vendor indebtedness and to provide the company with general working capital and to extablish a reserve for possible acquisitions.

The registration statement relating to these securities has been filed with the Securities and Exchange Commission, but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective.

This announcement shall not constitute an offer to sell or the solicitation of any offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

NEW YORK (FEB. 5) BUSINESS WIRE - Weaver H. Gaines Jr., Esq. and Kenneth M. Levine, FSA have been promoted to executive vice presidents at Mutual of New York, according to MONY Chairman, president, and chief executive officer James B. Farley.

Gaines, 46, is and will continue to be the company's general counsel. He will also continue to serve as president of Unified Management Corp., a MONY broker-dealer subsidiary located in Indianapolis.

Levine, 43, has most recently served as senior vice president of pension operations, and will continue to head MONY's pension operations in Purchase, N.Y.

Gaines graduated with a BA from Dartmouth College in 1965, and from the University of Virginia Law School in 1968 with an LLB. He served as a Captain in the U.S. Army, where he was awarded the Bronze Star. He is a member of the New York and Pennsylvania State Bar Associations, the Association of the Bar of the City of New York, the American Bar Association, and the Federal Bar Council.

MONY disclosed in early January 1990 that an agreement had been signed for the purchase of the broker-dealer by Unified Holdings Inc., a Delaware-based corporation.

Levine graduated with a BA from Queens College in 1968, and served in the U.S. Army as First Lieutenant.

MONY provides life and disability insurance, annuities and pension and investment management services for individuals and businesses. With more than $22 billion in assets under management, the enterprise operates throughout the United States and serves U.S. military personnel abroad.

CHICAGO (FEB. 5) BUSINESS WIRE - Bally Manufacturing Corp. (NYSE: BLY) announced Monday the signing of an agreement between their Life Fitness Inc. subsidiary and the National Football League.

The four-year contract recognizes Life Fitness as the Official Computerized Fitness Equipment Supplier to the National Football League.

The agreement gives Life Fitness access to NFL player spokespersons, visibility options in NFL sweepstakes and broadcasts, rights to use the NFL logo on advertisements and collateral literature and product marketing rights through the NFL Pro Line catalog consumer sales.

In exchange, Life Fitness will install LIFECYCLE(R) and LIFESTEP(R) aerobic trainers, LIFEROWER(R) total body conditioners and LIFECIRCUIT(R) computerized strength-training equipment in all 28 NFL training rooms.

Roger N. Keesee, president of Bally Manufacturing Corp., said in commenting on the agreement, ''Bally, through our Life Fitness subsidiary, is pleased to be recognized as an official supplier to the National Football League. We look forward to a mutually beneficial relationship.''

Bally Manufacturing Corp. is a world leader in the leisure industry with four casino hotels, a nationwide network of fitness centers, and a complete line of gaming equipment, fitness products and lottery products and services.

#90036b0745 02/05/1990 ~Business Wire

MILWAUKEE (FEB. 5) BUSINESS WIRE - Badger Meter Inc. (AMEX:BMI) Monday

reported record sales and increased earnings for 1989.

Net sales for the year ending Dec. 31, 1989 were $72,266,000, a 1.6 percent increase from 1988 sales of $71,150,000, and a 7.5 percent increase after excluding results of the company's former Mexican subsidiary which was sold in December 1988.

Net earnings for 1989 were $2,375,000, up 14.7 percent from profits of $2,071,000 in 1988. Earnings per share were $1.54 in 1989, an 11.6 percent increase from 1988 earnings of $1.38 per share. For the fourth quarter of 1989, net sales were $17,289,000, a 2.1 percent decrease from sales of $17,653,000 for the like period in 1988. Fourth quarter sales increased after adjusting for the sale of the Mexican subsidiary. Earnings for the fourth quarter rose 29.8 percent to $409,000 in 1989 from $315,000 for the fourth quarter of 1988. Earnings per share for the fourth quarter of 1989 were 26 cents, up 23.8 percent from 21 cents for the fourth quarter of 1988.

''We made excellent progress in 1989. Sales, which broke company records for the third consecutive year, increased in both the Industrial and Utility divisions after adjusting for the sale of the Mexican subsidiary. The 1989 earnings increased at a faster rate than sales as a result of higher gross profit margins, reduced general and administrative expenses and lower interest expense,'' said James L. Forbes, president and chief executive officer of Badger Meter.

''Research and engineering and marketing expenses continued to increase. These expenses represent our investment in the future through the development and sale of new and existing products. We plan to introduce new products in each division during 1990,'' Forbes said.

Gross profit margins increased in both the fourth quarter and for the year. The increases in the cost of raw materials, especially brass, which affected the company throughout 1989 appear to be abating, Forbes said. The company offset these increases through expense reductions, higher productivity and price increases on new contracts.

Badger Meter is a leading marketer and manufacturer of products using flow measurement and control technology serving industrial and utility markets worldwide.

STOUGHTON, MA (FEB. 5) BUSINESS WIRE - Paul R. Duncan has been promoted

to executive vice president of Reebok International Ltd., it was announced Monday by Paul Fireman, Reebok's chairman and chief executive officer.

Duncan adds this new title to his current responsibilities as Reebok's chief financial officer.

With the added office of executive vice president, Duncan's responsibilities will expand to include coordination of day-to-day operations of the company's divisions with the presidents of these operating units.

''Paul has been an integral part of the management team that has built Reebok,'' Fireman said. ''For some time now, his responsibilities have increasingly inlcuded operational areas outside of finance.

''His promotion to executive vice president will accelerate this process and will be a big help to me and the division president in managing our growth.''

Duncan has been Reebok's senior vice president - finance since joining the company in 1985. He was elected to the Reebok board of directors in 1989.

Before joining Reebok, Duncan was vice chairman of the board, senior vice president of finance and chief financial officer for Towle Manufacturing Co. Prior to Towle, Duncan was a partner of Ernst & Whinney, a firm of independent public accountants.

A 1962 graduate of Dartmouth College, Duncan also holds an MBA from Dartmouth's Amos Tuck School of Business Administration, class of 1963. Duncan lives in Sudbury, Mass. with his wife Margery and two children.

Reebok International Ltd., headquartered in Stoughton, is the leading designer and marketer of active lifestyle and performance products, including footwear and apparel.

The company's operating units include Reebok's U.S., International, and Apparel Products division, and Avia, Ellesse North America, Rockport, and Boston Whaler Boats.

RENO, NEV (FEB. 5) BUSINESS WIRE - Cellular subscribers driving along the

coast from Pensacola to Fort Walton Beach, Fla., will soon be able to continue their telephone conversations - even as they move between two calling areas served by different switching equipment.

On Jan. 26, Contel Cellular and AT&T Cellular Systems successfully completed the first hand-off between the AT&T Autoplex(r) System switch and Motorola's EMX-100, which serves CENTEL. The hand-off followed the IS-41 standard established by the Telecommunications Industry Association and the Electronic Industries Association (TIA/EIA).

Today, as callers ride farther from their ''home'' switch, the radio signals that provide cellular service deteriorate, and communication eventually fades. CONTEL and CENTEL subscribers will be among the first in the nation to talk clearly -- and uninterruptedly -- as they travel between two systems. The hand-off feature will be available to them at the end of March.

As more and more cellular subscribers are able to stay on the phone for longer time periods, service providers like CONTEL and CENTEL will ultimately generate new revenues from the increased usage.

Successful completion of the Pensacola-Fort Walton Beach trial required AT&T and Motorola to work through a series of technical details that involved testing protocols, system interfaces and data links.

The next step will be to achieve inter-system ''call delivery,'' which will let cellular subscribers receive calls from their original service areas -- without going through elaborate dialing sequences.

AT&T Cellular Systems and Ericsson have already scheduled the first such trial for mid 1991. It will take place in California in an area served by McCaw Communications.

NEW YORK (FEB. 5) BUSINESS WIRE - Business advertisers can now feature their ads in a stimulating setting as well as reach professionals and managers nationwide through SI Business, a new SPORTS ILLUSTRATED advertorial section that will appear six times a year, beginning with the March 12, 1990 issue.

The other issue dates are: April 9, May 7, Sept. 10, Oct. 8, and Nov. 5.

SI Business has a circulation rate base of 500,000 SI subscribers who have been identified as key business decision makers. Each issue of SI Business will have a bonus circulation of 20,000 that will be distributed to major airlines.

The one-time, four-color page rate for SI Business is $32,000, while the cost for a full black-and-white page is $24,960.

Four of the six editions of SI Business will feature ''Fast Track,'' a special business and sports-related section designed to help readers improve the quality of their business lives, whether at home or on the job.

''Fast Track'' will explore such topics as management and motivational techniques, business travel, and career satisfaction, as well as the relationship between sports and business -- how lessons learned on the playing field might accurately parallel business success.

The section will feature ''Executive Quarterback,'' a regular column by Fran Tarkenton, a Hall of Fame quarterback with the Minnesota Vikings and New York Giants who is now a successful businessman, author, and television personality.

PURCHASE, NY (FEB. 5) BUSINESS WIRE - Citing U.S. President George Bush's January 31 State of the Union Address pledge to increase the nation's tree cover by a billion trees per year during the next decade, John A. Georges, chairman and chief executive officer of International Paper, Monday announced public donation by the company of ten million seedlings for 1990 to support this national undertaking.

International Paper will immediately offer to federal and state government authorities genetically improved seedlings which produce high quality southern pine stock.

These seedlings develop into healthier, taller and faster growing trees with greater pest and disease resistance than naturally regenerated trees. During the last decade, the company's ''Supertree''nuseries produced over one billion seedlings either planted on land controlled by International Paper or sold to other landowners.

The company additionally announced under the terms of this arrangement acceptance of a request by the State of Mississippi's Cooperative Extension Service for 1.8 million seedlings.

This gift is schedulted for delivery on Feb. 7 to extension service offices in Brookhaven, Ellisville, Grenada and Tupelo. This donation precedes the Mississippi Arbor Day celebration Feb. 9 which begins a week of statewide tree planting ceremonies.

The announcement of other grants is expected shortly.

Georges exphasized the need for environmentally sound management of existing timberlands while hailing the president's program as ''a seminal contribution towards public recognition of the benefits of responsible forest management.''

He added, ''We are pleased to participate in, and support, initiatives for woodslands expansion. The returns will serve as cherished assets for the benefit of future generations.''

International Paper, headquartered in Purchase, manufactures products including business communication papers, commerical and magazine printing

papers, corrugated containers, food packaging papers, photographic films and wood products.

The company also distributes paper and wood products. In addition to the United States and Canada, the company has sales or manufacturing facilities in a number of countries in Europe, Latin America, Africa and Asia.

MANCHESTER, NH (FEB. 5) BUSINESS WIRE - EnergyNorth Inc. (NASDAQ:ENNI), the parent holding company of EnergyNorth Natural Gas Inc. and EnergyNorth Propane Inc., Monday reported financial results for the first fiscal quarter ended Dec. 31, 1989.

Earnings applicable to common stock rose to $3,112,000 from $2,603,000 in the same quarter one year ago. Based on 2,568,131 and 2,425,565 average shares outstanding respectively, earnings on a per share basis for the first quarter were $1.21 vs. $1.08 last year.

The improvement in the first quarter results is due mainly to higher sales of natural and propane gas as a result of colder than normal weather and additional customers.

Firm natural gas sales for the quarter increased 6.9 percent while temperatures were 5.5 percent colder than the same quarter last year and 14 percent colder than normal. Natural gas customers numbered 60,390 at Dec. 31, 1989, an increase of 3.1 percent.

Having also been impacted by the colder weather in the first quarter, the retail propane business showed significant improvement with sales up more than 20 percent while customers numbered 6,200 at Dec. 31, 1989.

For the 12 months ended Dec. 31, 1989, EnergyNorth Inc. reported operating revenues of $75,498,000 compared to $65,924,000 during the prior year. Earnings applicable to common stock for the last 12 months increased to $4,131,000, or $1.65 per share. This compares to $3,788,000, or $1.57 per share for the previous 12 months.

VANCOUVER (FEB. 5) BUSINESS WIRE - Braner Resources Inc. has recently completed the acquisition of CEMCO Products Inc., a Washington State producer of specialty piping systems.

CEMCO holds the exclusive manufacturing rights to the SubRain System in the United States. Braner Resources previously acquired the exclusive marketing rights to the SubRain System for Canada.

Braner is pleased to announce that it has retained the services of an inter- national marketing consultant, Jeffrey C. Davis, to assist in identifying new project opportunities in developing countries including Eastern Europe.

Davis will also assist Braner, Cemco and SubRain in identifying appropriate grant making and funding agencies in the public and private sectors as well as to help position their respective organizations properly within those agencies.

Davis has created, initiated and helped implement the Friendship Forest Park Program in Algeria. The United States Forest Service was also instrumental in implementing this unique project which included the specification of the SubRain subsurface irrigation system in Algeria. Other such Friendship Forest Parks are planned in the future.

Some of the most important issues facing the developing world are to increase food production, conserve limited water resources and upgrade crop lands. A ''state of the art'' irrigation system, SubRain, has been developed to meet these objectives.

The SubRain subsurface irrigation system is a cost effective, ecologically safe system, using proprietary technology to deliver a uniform amount of water and nutrients to the plant root zone. It fully meets the standards set by the American Society of Agricultural Engineers.

LARGO, FL (FEB. 5) BUSINESS WIRE - Sunstyle Corp. (OTC - SSCO), homebuilder and real estate developer, reported an unaudited net loss of $436,000 or 40 cents per share for the year ended Dec. 31, 1989 on gross revenues of $12,823,000.

This compares to a loss of $350,000 or 32 cents per share, for the comparable period ended Dec. 31, 1988. Gross revenues for 1988 totalled $9,724,000.

For the quarter ended Dec. 31, 1989, the Company recorded a profit of $21,000 or two cents per share. This compares to a loss of $102,000, nine cents per share, for the prior quarter of 1989 and a loss of $161,000, or 15 cents per share, for the comparable quarter for 1988.

''The Company's performance improved for each of the last two quarters in 1989, however, because of the worsening housing market in Tampa Bay we were unable to show an annual profit,'' said Ralph W. Quartetti, president of Sunstyle Corp.

''During 1989 we completed sales in one community, as a result we show a decline in new contracts backlog as of year-end,'' he added. The housing sales contract backlog as of Dec. 31, 1989 totalled $2,339,000 compared to

$3,260,000 as Dec. 31, 1988.

Gross revenue for the last quarter was $3,693,000. ''It is therefore unlikely that there will be a continuation of 4th quarter profits,'' he said. ''However, management believes that sales in future periods will improve with the introduction of new models in two communities during the first quarter.''

Sunstyle Corp.'s principal subsidiary is Sunstyle Homes Corp. a 12 year old real estate developer involved in five building and land development projects in Pinellas and Manatee Counties, Fla. Sunstyle Corp. stock is traded over the counter.

BRIDGEPORT, CT (FEB. 5) BUSINESS WIRE - Connecticut Energy Corp. (NYSE:CNE) Monday reported earnings of $1.28 per share compared to a $1.49 in 1988.

These results were significantly affected by a non-utility operating loss of 19 cents per share for the year compared to a loss of approximately 1 cent in 1988 and a one-time early retirement offering which had an earnings per share impact of 4 cents.

All per share results reflect the 3-for-2 stock split which was effective in Oct. 1989.

Losses by the non-utility operations resulted primarily from settlement of a long-standing lawsuit arising out of activities of the oil and gas subsidiairies and a substantial writedown of the assets of those companies to their net realizable value.

The combined impact of these actions negatively impacted earnings by 13 cents per share.

In October 1989, the company's principal subsidiary, The Southern Connecticut Gas Co., filed a request with the Department of Public Utility Control to increase its rates.

Base rates have been not increased since 1985. The company anticiaptes a decision on this request in April 1990 and expects rate relief to have a positive impact on 1990 earnings.

Connecticut Energy Corp. is a utility and energy holding company. Its

principal subsidiary provides natural gas service to approximately 150,000 customers in growing Fairfield, New Haven and Middlesex counties. Other subsidiaries engage in exploration, production and transportation of natural gas and oil.

BEAUMONT, TX (FEB. 5) BUSINESS WIRE - A Lafayette, La., geologist and a Bryan, Texas, banker have been elected to the board of directors of Gulf States Utilities Co. (NYSE:GSU).

Frank W. Harrison Jr., a consulting geologist and former president of the American Association of Petroleum Geologists, and Bookman Peters, chairman and chief executive officer of First City Bank of Bryan, were elected during a Feb. 1 meeting of GSU's board of directors.

Dr. E. Linn Draper, GSU chairman and chief executive officer, said two current directors will be retiring in the near future and the two new directors are being added, effective March 1, to help provide the board with continuity.

Draper said the board also granted Dr. Paul W. Murrill's request to retire on March 2 as special advisor to the chairman, a post he has held since 1987 when he stepped down as chairman of the board. Murrill will remain a member of the board.

In another personnel matter, the board elected J. Lee Miller to be vice president of human resources, a position that has been vacant since Nov. 27 when James R. Aldridge was granted early retirement. Miller, a GSU employee since 1982, formerly was general manager of organization development.

#90036b0814 02/05/1990 ~Business Wire

INDIANAPOLIS (FEB. 5) BUSINESS WIRE - Indiana Energy Inc., the holding company for Indiana Gas Co., reported consolidated earnings available for common stock for the three months ended Dec. 31, 1989, the first quarter of the current fiscal year, of $11,103,000 as compared to $11,679,000 for the like period in 1988.

Earnings per average common share for the quarter were $1.01, compared to $1.06 in 1988.

The decrease in earnings for the quarter primarily reflects increased operating costs, reorganization expense and increased reserves, which more than offset colder weather and customer growth.

For the 12 months ended Dec. 31, 1989, earnings per average share of common stock were $1.87. This compares to earnings of $1.99 for the like period in 1988.

INDIANA ENERGY INC.
Summary of Consolidated Earnings Data
(In thousands except per share data)

	Three Months Ended Dec. 31	
	1989	1988
Operating revenues	$124,704	$115,403
Income before preferred dividends	11,531	12,107
Net income	11,103	11,679
Earnings per average common share (1)	$1.01	$1.06
Average common shares outstanding at December (1)	11,010	11,009

Note: Net income for the 3-month period ended Dec. 31 is not indicative of net income for an annual period due to the seasonal sales of gas for space heating purposes.

	Twelve Months Ended Dec. 31	
	1989	1988
Operating revenues	$353,977	$344,072
Income before preferred dividends	22,291	23,598
Net income	20,581	21,888
Earnings per average common share (1)	$1.87	$1.99
Average common shares outstanding at December (1)	11,010	11,003

(1) Adjusted to reflect the 2-for-1 stock split January 1989.

OAK BROOK, IL (FEB. 5) BUSINESS WIRE - McDonald's Corp. Monday announced plans to issue Notes for 100 million New Zealand Dollars due February 21, 1993. The non-callable Notes will bear interest at 12 1/2 percent payable semi-annually and will be offered at 100 percent of the principal amount.

These Notes will be issued under a shelf registration statement previously filed with the United States Securities and Exchange Commission.

A portion of the proceeds will be lent to McDonald's majority owned New Zealand subsidiary. Through a swap, a portion of the issue will be effectively converted into a U.S. Dollar borrowing which will float at below commercial paper rates. The proceeds will be used for general corporate purposes, which may include capital expenditures and debt refinancing.

Merrill Lynch Capital Markets will be the lead manager for the issue. Co-managers will be Dean Witter Reynolds Inc.; Kidder, Peabody & Co. Inc.; and Prudential-Bache Capital Funding.

A copy of the prospectus may be obtained by written request to: Mr. Donald P. Horwitz, Secretary, McDonald's Corporation, McDonald's Plaza, Oak Brook IL 60521.

McDonald's is the world's leading foodservice organization, serving 22 million people each day in more than 11,000 restaurants in 52 countries. Seventy-five percent of McDonald's restaurant businesses are locally owned and operated by independent entrepreneurs.

WASHINGTON (FEB. 5) COMTEX - Upland Minerals & Chemicals Corp. filed a Form 8-K with the SEC stating it has cancelled an agreement signed with Intercommerce Investments Inc.

Pursuant to the agreement, Upland issued 2 million shares of its treasury stock to Intercommerce in exchange for $777,000 in jewelry and precious stones. The exchange was made to enable Upland to continue its mining operations and pay its outstanding debts to its auditors and transfer agent.

Upland reports that due to the slow market for jewelry and precious stones the merchandise was not salable, and as a consequence, did not bring any financial help to Upland.

The cancellation occured on Jan. 23, 1990.

Upland's executive office is located at 500 Fifth Ave., New York, NY 10110 and its telephone number is (212) 302-9096.

#90036c0249 02/05/1990 ~Comtex

WASHINGTON (FEB. 5) COMTEX - Rovac Corp. filed a Form 8-K with the SEC stating effective Jan. 19, 1990, Thomas C. Edwards, Ph.D. resigned from its board of directors. The company is unaware of any disagreements with Dr. Edwards on any matters relating to the company's policies, practices or procedures.

Rovac's executive office is located at P.O. Box 111, 1030 Stafford Street, Rochdale, MA 01542 and its telephone number is (508) 892-4841.

-30- 590

#90036c0251 02/05/1990 ~Comtex

WASHINGTON (FEB. 5) COMTEX - Sunrise Bancorp filed a Form 8-K with the SEC announcing on Jan. 29, 1990 that its subsidiary, Sunrise Bank of California is a defendant in a mater entitled Precision Lathing Inc. Defined Pension Plan vs. Sunrise Bank of California.

The first phase of the jury trial, pertaining to general damages, was decided adversely to Sunrise Bank's interest. General damages assessed were equal to $969,464. Exemplary damages will be the subject of further hearings which were scheduled to begin on Feb. 2.

Sunrise Bancorp reports management will continue to review its reserve requirements in light of these developments.

#90036c0252 02/05/1990 ~Comtex

WASHINGTON (FEB. 5) COMTEX - Capital Enterprises Inc. filed a Form 8-K with the SEC stating on Jan. 22, 1990 it engaged Harry D. Sweeney as its principal independent accountant, replacing Michale B. Johnson, C.P.A.

In connection with the audits of the two most recent fiscal years and the subsequent interim period, there were no disagreements with the former

accountant on any matter of accounting principles or practices, financial statement disclosures, or auditing scope or procedure.

The former accountant's report on the financial statements for the past two years contained no adverse opinion or disclaimer of opinion and was not qualified or modified as to uncertainty, audit scope or accounting principles.

The executive office of Capital Enterprises is located at 5820 N. Federal Highway, Boca Raton, FL 33484 and its telephone number is (407) 241-1984.

#90036c0253 02/05/1990 ~Comtex

WASHINGTON (FEB. 5) COMTEX - Phoenix Ventures Inc. filed a Form 8-K with the SEC stating on Jan. 22, 1990 its wholly owned subsidiary, Pocono Airlines Inc., filed for reorganization under Chapter 11 of the U.S. Bankruptcy Code for the middle district of Pennsylvania.

The executive office of Phoenix Ventures is located at 1717 Main Street, Suite 5600, Dallas, TX 75201 and its telephone number is (214) 648-1700.

-30- 589

#90036c0254 02/05/1990 ~Comtex

WASHINGTON (FEB. 5) COMTEX - The Toen Group Inc. filed a Form 8-K with the SEC stating on Jan. 19, 1990 it entered into a letter of intent to acquire all of the issued and outstanding common stock of Brentwood Communications Inc. of Los Angeles, CA.

The executive office of The Toen Group is located at 535 South 44th Street Boulder, CO 80303 and its telephone number is (303) 499-4319.

-30- 556

#90036c0255 02/05/1990 ~Comtex

WASHINGTON (FEB. 5) COMTEX - LaSalle Street Funding Corp. filed a Form 8-K with the SEC stating on Jan. 29, 1990 it appointed KPMG Peat Marwick as its independent accountants, replacing Wenner, Silverstain & Co.

In connection with the audits of the two most recent fiscal years and the subsequent interim period, there were no disagreements with the former accountant on any matter of accounting principles or practices, financial statement disclosures, or auditing scope or procedure.

The former accountant's report on the financial statements for the past two years contained no adverse opinion or disclaimer of opinion and was not qualified or modified as to uncertainty, audit scope or accounting

principles.

LaSalle's executive office is located at 42 North Benson Ave., Upland, CA 91786 and its telephone number is (714) 946-1000.

-30- 1014

#90036c0256 02/05/1990 ~Comtex

WASHINGTON (FEB. 5) COMTEX - Vision Ten Inc. filed a Form 8-K with the SEC stating on Jan. 10, 1990 it dismissed Ernst & Young as its independent accountant.

There were no disagreements with Ernst & Young regarding any matter of accounting principles or practices, financial statement disclosures, or auditing scope or procedure in connection with the audit of Vision Ten's fiscal period from Jan. 1, 1989 (inception) through March 31, 1989 or any subsequent period prior to dismissal.

The former accountant's report on the financial statements for its fiscal period from Jan. 1, 1989 (inception) through March 31, 1989 contained no adverse opinion or disclaimer of opinion and was not qualified as to audit scope or accounting principles.

Such report, however, did address Vision Ten's development stage, the fact that its current liabilities were in excess of its current assets and that it had a net capital deficiency which raised substantial doubt about the company's ability to continue as a going concern.

Vision Ten's executive office is located at 1880 Crenshaw Blvd., Torrance, CA 90501 and its telephone number is (213) 533-4971.

#90036c0259 02/05/1990 ~Comtex
SCHEDULE 14D9

SEC - AMENDMENT NUMBER: 45

ANNOUNCEMENT:

Sea Containers announced that its board has unanimously decided to recommend that its shareholders accept the offer by Temple to acquire certain assets and to not accept the agreements with Genstar.

A settlement agreement between Sea Containers and Temple provides that neither Temple, Stena AB, nor Tiphook will acquire any of Sea Container's common stock for a ten-year period.

The agreement also terminates all existing litigation between the parties, adjourns the special shareholder meeting, and ends Temple's tender offer.

SCHEDULE 14D1

SEC - AMENDMENT NUMBER: 37

ANNOUNCEMENT:

Georgia-Pacific responded to the request of the Speaker of the House and President of the Senate of the state of Maine to outline GPC's plans for its intentions in Maine should it acquire Great Northern Nekoosa (TICKER: GNN).

Specifically, Georgia-Pacific stated that it will, among other things, honor company legal commitments and contract agreements, operate the Millinocket mills on an economically viable basis, give first consideration to workers who are presently laid off, and develop projects that will general 300 or more new jobs in Maine.

-30- 795

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 1

GROUP LED BY VENTURESTRIDENT II L P OWNS 5,250,000 SHARES (23.25%) OF CANYON RESOURCES CORP (TICKER: CYNR) OF GOLDEN, CO.

ANNOUNCEMENT:

Venturestrident has designated Paul A. Bailly as a director, who was elected to the board of Canyon effective Feb. 10, 1990.

On Jan. 27, Venturestrident purchased 1 million shares and agreed to loan Canyon $2 million in consideration for a variable interest debenture.

According to a security agreement, Canyon granted Venturestrident an interest in certain property to secure the indebtedness stemming from the debenture. The parties also signed a registration rights agreement.

LATEST TRANSACTION:

On Jan. 26, 1990, Venturestrident purchased 2,600,000 shares for $2.50 and received warrants for 650,000 shares, exercisable at $3.50 per share.

PURPOSE:

For investment.

-30- 1053
#90036c0408 02/05/1990 ~Comtex
SCHEDULE 14D9

SEC - AMENDMENT NUMBER: 19

ANNOUNCEMENT:

The date that either party may terminate the merger agreement has been extended from Jan. 31 to Feb. 20, 1990 and the offer itself has been extended until Feb. 9, 1990.

The amendment to the merger agreement permits the warrants or options to be issued to Citibank by the surviving corporation, rather than by the shareholders of the corporation, reduces the number to be issued from 7 million to 5 million and the par value of the common stock of the surviving corporation from $1 to $.01 per share.

TOKYO (FEB. 6) - Sales of imported cars in Japan soared 57.6 percent in January from a year earlier to 11,350 units, a new high for the month, the Japan Automobile Importers' Association reported Tuesday.

Association officials attributed the upsurge, the 73rd consecutive year-on-year-rise, to growing consumer demand for luxury imported vehicles.

Sales of West German cars jumped 52.2 percent to 7,591 units while sales of British cars rose 118 percent to 1,109 units.

Swedish cars accounted for 841 units, a 255 percent rise.

Sales of French cars rose to 609 units, a 138 percent rise, and Italian car sales were up 18.4 percent to 251 units.

Fewer U.S. cars were sold in the month, with sales declining 2.4 percent to 861 units.

Sales of Australian-made cars totaled 18 units, up from four units a year earlier, while sales of cars from other countries rose to 70 units from 24 units a year earlier.

TOKYO (FEB. 5) - Mitsui Co., Japan's second-ranking conglomerate, will reorganize its European activities under a Netherlands-based holding company controlling eight subsidiaries, a source close to the company said

here Monday.

The company, to be called Mitsui Co. International Europe, should have a capitalization of some 23 billion yen (158 million dollars), or about double that of the eight subsidiaries, the source said.

The European restructuring reflected Mitsui's concern to develop its business there, and was also aimed at helping Japanese firms enter the European market, the source said.

Mitsui has some 160 foreign subsidiaries, including the Netherlands, Britain, France, West Germany, Belgium, Italy, Sweden and Norway.

#90036d6680 02/05/1990 ~French/German News Agency

AMMAN (FEB. 5) - An Islamic fundamentalist faction active in the occupied territories Monday claimed responsibility for an attack on an Egyptian tour bus that killed eight Israeli tourists and wounded 17.

Islamic Jihad (holy war), in a statement delivered to the Agence France-Presse office here, said it "carried out the operation against the Jewish bus near the city of Ismailia, as part of a struggle between us and the Jews that will continue until victory and the crushing of those who dream of a peaceful solution."

Two masked assailants aboard a private car intercepted an Egyptian tour bus carrying Israeli passengers on Sunday evening, hurling grenades and raking the vehicle with automatic weapons fire.

The attack took place on a desert road 60 kilometers (37 miles) east of Cairo, according to the Egyptian Interior Ministry.

Islamic Jihad claimed responsibility for three anti-Israeli attacks in 1989, including one in July on a bus travelling from Tel Aviv and Jerusalem that killed 14 people and injured 27.

An anonymous caller to a Western news agency in the Egyptian capital on Sunday claimed responsibility for the assault in the name of the previously unknown "Organization of the Oppressed in Egyptian Prisons."

#90036d6710 02/05/1990 ~French/German News Agency

TOKYO (FEB. 5) - A study released here Monday found Hitachi Ltd. to be Japan's most diversified conglomerate, with its 688 subsidiaries producing everything from chemicals to machine tools.

Its subsidiaries include Hitachi Chemical Co., Hitachi Cable Ltd., Hitachi Metal Ltd., Hitachi Construction Machinery Co. and Hitachi Credit Corp., said the study published in the Japan Economic Journal.

The subsidiaries - consolidated into the conglomerate's accounts last March 31 - have considerable autonomy, it said.

The study, ranking Japan's largest industrial groups, was done by the economic daily Nihon Keizai Shimbun (Nikkei).

Matsushita Electric Industrial, which Nikkei ranks eighth with 340 subsidiaries, on the other hand retains tight control over its subsidiaries,
which supply materials to the parent company.

Bridgestone tire manufacturer holds second place with 657 subsidiaries in Japan, or 532 more than in December 1987 when it was acquiring U.S. competitor Firestone Tire and Rubber Co.

The largest Japanese firms are among the top 10 because of the diversity of their business interests: C. Itoh Co. ranks third with 628 subsidiaries, followed by Mitsui Co. with 513, Mitsubishi Corp. with 459, and Marubeni with 378.

Appearing in the top 20 are Dai Nippon Printing Co., ranked 14th, and Sony Corp, 15th, both of which have been active in mergers and acquisitions lately.

TAIPEI (FEB. 5) - Taiwan's consumer price index rose 0.69 percent in January over the previous month, bringing the country's annual inflation rate to 3.86 percent, the Directorate General of Budget, Accounting and Statistics said Monday.

The government agency attributed the rise to skyrocketing real estate prices and rising costs for consumer goods, medical treatment, education and recreation.

Taiwan's inflation registered an eight-year high of 4.41 percent in 1989, a sharp rise over the 1.28 percent in 1988.

The government has adopted a package of measures including credit tighting by the Central Bank and tariff reductions by the Ministry of Finance to combat inflationary pressures.

PESHAWAR, Pakistan (FEB. 5) - An earthquake rocked northwestern Pakistan and parts of India early Monday, but no loss of life or property was immediately reported, official sources said.

In Peshawar, bordering Afghanistan, people ran out of their houses as the tremor jolted the city for several seconds, witnesses said.

The temblor, measuring 5.7 on the Richter scale, was also felt in other cities bordering Afghanistan, the seismological department here said.

The earthquake hit at 10.17 a.m. (0517 GMT) and its epicenter was located some 250 kilometers (150 miles) northwest of here in the Hindu Kush mountain range, the department said.

The earthquake was also felt in neighboring India, but officials in New Delhi said there were no immediate reports of damage or casualties.

The meteorological department in New Delhi said it shook the Hindu Kush region between India and Pakistan and measured 6.5 on the Richter scale.

A tremor measuring over 4.0 on the open-ended Richter scale can cause considerable damage.

TAIPEI (FEB. 5) - Trade between Taiwan and the Soviet Union totalled 141.34 million U.S. dollars in 1989, up 311 percent over the previous year, the Board of Foreign Trade (BOFT) said Monday.

The Soviet Union, this island's largest trading partner in Eastern Europe followed by Poland and East Germany, sold 105.57 million dollars worth of goods to Taiwan last year, a 242 percent surge, BOFT said.

Aggressive marketing strategies by local traders and removal of trade and telecommunications restrictions by the Taipei government pushed exports to the Soviet Union up 914 percent to 35.77 million dollars, it said.

Export-oriented Taiwan sold mainly consumer goods, electrical appliances and information products to the Soviet Union, while it imported mainly

lumber, minerals and industrial raw materials, the BOFT said.

Taipei allows local businessmen to conduct only indirect commerce with the Soviet Union and Albania, which it considers hostile, while trading with other Eastern European countries is unrestricted.

But the government is to consider opening direct trade with Moscow and Albania in a bid to diversify overseas outlets for Taiwan products and acquire cheaper raw materials for local manufacturers, economic officials have said.

BOFT statistics also showed that trade between Taiwan and the eight Eastern European nations, including the Soviet Union, grew 30 percent to 547.28 million dollars last year, amounting to 0.43 percent of the island's total foreign trade in 1989.

Exports to Eastern Europe rose 82 percent to 168.64 million dollars, while imports from there increased 15 percent to 378.64 million dollars, BOFT said.

#90036d7190 02/05/1990 ~French/German News Agency

LONDON (FEB. 5) - The recent rates downturn continued during the past week in the freights market, as lack of demand on most routes was still weighing on sentiment, brokers said.

The Baltic International Freight Futures Exchange (BIFFEX)'s Baltic Freight Index (BFI) registered its second consecutive weekly fall, losing 16 points to 1,635 points.

Most traders predict that the downturn will continue in the short term, with the most pessimistic among them expecting a fall in the BFI index to below 1,600 points, the point at which it began the year.

Soviet charterers booked Panamax vessels (50,000 to 70,000 ton carriers), defying recent reports that the Soviet Union was about to freeze bookings because of congestion in domestic ports.

The two return trips they arranged were concluded at 12,250 and 13,000 dollars per day, although the going rate on the same route the previous week was 14,000 dollars per day.

In the single voyage sector, the biggest falls in rates occurred in U.S. Gulf grain loading, coal carriers booking from the U.S. East Coast, and vessels loading ore out of West African ports.

#90036d7390 02/05/1990 ~French/German News Agency
COPENHAGEN (FEB. 5) - Danish bank Sydbank and savings bank Sparekassen Soenderjylland said Monday they had decided to merge, creating the country's fifth largest banking organisation.

The merger, backdated to January 1, was aimed at creating an alternative to two major bank groups, Den Danske Bank and Unibank, formed through mergers last year, Sydbank and Soenderjylland said.

The newly-created bank, Sydbank Soenderjylland, will have a turnover of some 53 billion kroner (8.8 billion dollars).

Sydbank, the largest of the two banks in the merger, has subsidiaries in West Germany, Switerland and Luxemburg.

The banks said that the merger would lead to the axing of five per cent of their total 1,800 jobs and the closing of some branches.

#90036d7480 02/05/1990 ~French/German News Agency
MOSCOW (FEB. 5) - Soviet cosmonauts Alexander Viktorenko and Alexander Serebrov, took a second ride Monday aboard their space "scooter" to put the machine through a new series of trials, Soviet television reported.

The two cosmonauts, who have been aboard the orbital space station Mir for more than five months, have been outside their space craft five times up to now.

The "scooter", shaped like an armchair, was experimented for the first time last Thursday, but for security reasons the riders remained attached to the space station by a 40 meter (130 foot) cable.

Viktorenko and Serebrov are due to return to Earth later this month.

TOKYO (FEB. 5) - The average interest rate on loans by Japanese banks jumped 0.189 percentage points from November to 5.782 percent in December, the sharpest increase in almost 10 years, the Bank of Japan said Monday.

The central bank also said that the average rate on short-term loans rose 0.283 points to 5.388 percent while the rate on long-term loans climbed 0.143 points to 5.986 percent.

The increase in the average rate was the sharpest since June 1980.

ATHENS (FEB. 5) - The eight main ports in Greece, including the port of Piraeus, were closed on Monday by a five-day, renewable strike by administrative staff, union sources said.

Foreign ships due in these ports were heading instead for ports in Egypt, Malta, the west of Turkey, and southern Italy.

The strikers were demanding that their employment be classified as being difficult, and they were seeking improved overtime payments, and an increase in basic pay of 18,000 drachme (about 112 dollars) per month in line with an increase paid last year to other civil-service employees.

-30- 743
#90036d7880 02/05/1990 ~French/German News Agency
TOKYO (FEB. 5) - Japanese plant engineering firm JGC Corp. has agreed to build a petrochemical plant for Taiwan's Chinese Petroleum Corp. for 22 billion yen (152 million dollars), a company spokesman said Monday.

The plant is expected to double Taiwan's production of paraxylene, a material used to make synthetic rubber, and will be located near Kaohsiung the spokesman said. The plant is due to be completed in late 1992.

#90036d8650 02/05/1990 ~French/German News Agency
LONDON (FEB. 5) - British food group Allied-Lyons said Monday it had ceded its auto distribution company Normand to staff and a group of investors because this activity was not in line with its development strategy.

Allied did not give the price of the deal, but City analysts put it at around 30 million pounds (50 million dollars).

Allied said it would retain a 10 percent stake in the new company, Normand Motor Group Ltd, which would be controlled by staff and the investment company Phildrew Ventures.

Normand groups 20 distributors selling eight brands of passenger car, three commercial vehicles labels and two motorcycle brands.

Allied has said it wants to refocus its operations on its main sector of interest, food and drink.

The group recently acquired the spirits division of Whitbread breweries and U.S. fast food chain Dunkin' Donuts, and has put up for sale its Embassy hotel chain.

#90036d9400 02/05/1990 ~French/German News Agency

LONDON (FEB. 5) - Housing starts in Britain in the fourth quarter of 1989 were 34 percent down on the same period of 1988, according to provisional seasonally adjusted figures released by the Department of the Environment Monday.

Compared with the third quarter of 1989, the number of new dwellings was down by four percent.

In the whole of 1989 191,800 dwellings were started, compared with 245,400 in 1988, a fall of 22 percent, while 192,500 dwellings were completed last year, 11 percent down on the 215,500 completed in 1988.

Last year was the first in which housing starts were down on the previous year since 1985, the Department said.

#90036d9550 02/05/1990 ~French/German News Agency

PARIS (FEB. 5) - The Euro Disneyland company, which is building and will run a theme park outside Paris, said Monday it had an after-tax profit of 7.3 million francs (1.3 million dollars) in the year to the end of September.

The 1989 result showed the company's first ever profit in four years, after losing between 2.18 million and 4.42 million francs in the previous three years.

Chairman Robert Fitzpatrick told the first annual general meeting since Euro Disneyland shares were introduced on European stock markets late last year that the shares had breached the 100 franc (17 dollars) mark for the first time Monday, gaining 13.6 percent on the day.

The stock has gained almost 40 percent since its introduction at 72 francs.

Monday's steep rise may have been partly due to the fact that U.S. investors were authorised for the first time to buy shares in Euro Disneyland, in which Walt Disney holds a 49 per cent stake.

Euro Disneyland said that the profit figure was not particularly significant, as it is based not on turnover but on financial products as a result of an increase in capital with last year's share listing.

The annual general meeting decided not to issue a dividend, as it is planned that no dividend will be issued until after the theme park opens in 1992.

TOKYO (FEB. 5) - An official advisory panel recommended in a report Monday that foreigners be allowed to deal on Japanese commodity exchanges, government officials said.

Such a step is necessary to internationalize and open up Japanese commodity exchange markets, the Commodity Exchange Council was quoted as saying in the report.

Foreign dealers should be permitted membership to the exchanges, the advisory panel said.

The government is expected to submit a bill to parliament in March to revise the Commodity Exchange Law on the basis of the recommendation, the officials added.

CLERMONT-FERRAND, France (FEB. 5) - French tyre maker Michelin has said that it would significantly reduce investment and may have to cut production this year, union sources said here Monday.

"The outlook for the market for new vehicles and replacement tyres, in both passenger and heavy goods vehicles, does not seem to be developing in the trend towards expansion that we had envisaged, particularly in the export sector," the sources quoted a letter to the workers' committee as saying.

A recent increase in tyre stocks "could lead to a reduction in production whose extent would essentially depend on sales in the first four months of 1990."

The world's leading tyremaker gave no figures for a reduction in production, but said that a slowdown in the U.S. auto market in the past six months and that predicted in the European market meant that "caution

suggests a slowdown."

The letter also said that the company would be making "a very significant reduction" from last year's six billion francs (1.05 billion dollars) in investment, and that it was expecting a "slight drop" in net profit for last year from 1988's 2.37 billion francs.

Fears of a fall in profit for last year sent Michelin shares down 6.1 per cent in Paris Monday.

"The growth in our costs at all levels leads us to believe that the competitiveness of our company is on a downward trend, which is particularly dangerous for the future in a highly competitive sector," Michelin's letter said.

"Such prospects oblige us to ask all staff concerned to analyse the consequences of a major reduction in our investment expenditure."

The letter said Michelin management expected to present more detailed proposals to a workers' committee meeting in early March.

The Michelin group employs 117,000 people in 59 factories in 12 countries, about 35,000 of them in its 17 French factories.

OREM, UT (FEB. 5) PR NEWSWIRE - Wicat Systems Inc. (NASDAQ: WCAT), today announced it has reached an agreement to provide integrated learning systems to the Maryland Department of Juvenile Services. The contract is valued at approximately $500,000.

The Wicat learning systems will be installed in five juvenile facilities throughout the state and will include three 16-user learning centers, one 48-user center, and one 64-user learning center.

Students at the juvenile centers range from age 14 through 18 and serve at the state facilities for an average of 6 to 12 months. While the students are under jurisdiction of the state, they have the opportunity to use the Wicat learning systems as part of their daily education program.

Juvenile centers in other parts of the nation have achieved success using the Wicat integrated systems in this type of learning environment. According to Wicat's senior vice president of Education, Marvin Higbee, it is not unusual for these unique students to achieve five months of normal learning improvement for each month they spend subsidizing their education with the Wicat system.

Wicat Systems is a world leader in technology-based training and education solutions, providing products and services to help clients achieve 30 to 50 percent learning improvement in schools, industry and government. Wicat's stock is traded in the NASDAQ market under the symbol of WCAT.

CONCORD, CA (FEB. 5) PR NEWSWIRE - Fibreboard Corp. (AMEX: FBD) today reported 1989 earnings from continuing operations of $3.8 million, 97 cents per share, on sales of $218 million. This compares with earnings of $817,000, 21 cents per share, on sales of $175 million in 1988.

The 1989 results include a gain of $26.1 million ($13.5 million after tax or $3.47 per share) from the sale of the Truckee, Calif., timberlands in the fourth quarter. Also included is the establishment of a $25 million ($15.0 million after tax or $3.87 per share) reserve to cover minimum anticipated future unreimbursed legal costs for asbestos- related litigation.

Income from discontinued operations was $1.5 million for 1989, compared to $10.8 million in 1988.

For the fourth quarter, continuing operations recorded a loss of ($3.0) million, compared to a loss in the fourth quarter of 1988 of ($1.7) million. The fourth quarter of 1989 also includes the impact of the timber sale gain and other unusual items and establishment of the asbestos-related cost reserve, which combined reduced earnings for the quarter by $1.8 million ($1.1 million after tax or 28 cents per share). Sales for the fourth quarter of 1989 were $47.9 million versus $50.8 million for 1988. Results of discontinued operations was a loss of ($1.0) million in the fourth quarter of 1989 compared to a loss of ($6.7) million for the year earlier period.

Fibreboard Corp., headquartered in Concord, manufactures lumber, hardwood plywood, moulding and millwork, agricultural container components, composite structural lumber, precision molded industrial insulation and fireproofing materials. It also owns and operates Northstar-at-Tahoe, a ski resort and year-round vacation and conference center in California.

#90036p0026 02/05/1990 ~PR Newswire

MEMPHIS, TN (FEB. 5) PR NEWSWIRE - Holiday Corporation (NYSE: HIA) today announced that it has received verbal assurances from banks for up to $1.07 billion of bank financing for its subsidiary, The Promus Companies Incorporated. The Sumitomo Bank, Limited, has been joined by other major U.S. and international banks to provide the financing. Promus, which will own Harrah's Casino/Hotels, and the Embassy Suites, Hampton Inn and Homewood Suites hotel brands, will be spun off immediately before the pending acquisition of the Holiday Inn hotel system by Bass PLC.

Proceeds of the financing will be used to finance the $30 per share special cash dividend which Promus intends to pay following completion of the spin-off and acquisition, and to provide a working capital and capital expenditure facility for Promus.

As previously announced, the components of the debt are expected to include a $400 million letter of credit which supports currently outstanding bonds and up to $670 million in new floating rate bank debt, including a $200 million revolving working capital and capital expenditure facility. The amount of floating rate bank debt will be reduced by the amount of Holiday Inns, Inc. public debt assumed by Promus. The commitments are subject to customary conditions, including the execution of definitive loan documents.

Holiday anticipates that the merger with a new U.S.-based subsidiary of Bass will be consummated on February 7, 1990. The spin-off of Promus is expected to be effected immediately before consummation of the merger, with Promus shares distributed to Holiday stockholders of record as of the close of business on February 6, 1990. Immediately after the merger is consummated, Promus intends to declare the special cash dividend of $30.00 per share to Promus stockholders of record at the time of the spin-off distribution. It is currently expected that the declaration will be conditioned on the receipt of acceptable financing subject to customary conditions. Assuming such conditions are satisfied, it is expected that the special dividend will be paid by checks mailed with certificates representing Promus shares on or about Feb 22, 1990.

WAYNE, NJ (FEB. 5) PR NEWSWIRE - The Grand Union Company and P & C Food Markets, Inc., announced today that they have reached agreement with the Price Chopper Operating Company of Vermont, Inc., for the sale of a total of 12 Grand Union and P & C Food Stores in Vermont.

No sale price was disclosed.

Under terms of the agreement, Price Chopper will purchase two Grand Union food stores, one on Cherry Street in Burlington and another in West Rutland. Ten P & C Food Markets are included with three in Burlington and one each in Barre, Brattleboro, Manchester, Morrisville, Rutland, Springfield and Windsor.

The stores must be sold pursuant to an agreement reached with the Federal Trade Commission (FTC) and Vermont Attorney General. Under the agreement, 13 stores in Vermont and three stores in New York State must be divested.

The agreement was reached following the acquisition of Grand Union last July by an affiliate of Miller Tabak Hirsch + Co., which also controls the Penn Traffic Company (AMEX: PNF), parent of P & C Food Markets. Negotiations are proceeding to sell the remaining four stores as well as the White River Junction warehouse.

Grand Union and P & C also announced that they are proceeding with negotiations whereby Grand Union will lease P & C's remaining 13 stores in its New England division in Vermont and New Hampshire and operate them as Grand Union food stores. Additionally, Grand Union would be granted an option to later acquire the stores.

The agreement with Price Chopper is subject to approval by the FTC and Vermont Attorney General. Both agencies have 60 days in which to approve or deny the agreement following its filing with them. Additionally, the agreement, as well as the proposed lease arrangement, are also subject to consent by lenders of Grand Union and P & C.

Grand Union currently operates 303 food stores under the Grand Union and Big Star trade names in eight Eastern states. P & C Food Markets currently operate 88 P & C Food Stores in five states, franchises 73 Big M food stores and provides wholesaling operations for 120 independent food stores. The Penn Traffic Company, parent of P & C Food Markets and a 24 percent equity holder in Grand Union, currently operates a total of 219 food stores in eight states as well as 31 department stores, four combination stores, food production facilities and grocery wholesaling operations.

MONONGAHELA, PA (FEB. 5) PR NEWSWIRE - Coventry Care Inc. announced today that it has entered into a merger agreement with Providence Health Care Inc. of Berea, Ohio, pursuant to which Coventry Care would be merged into a wholly owned subsidiary of Providence.

Each share of common stock of Coventry Care would be exchanged for the right to receive cash in the approximate amount of $15.71 subject to adjustment upward or downward. Of the price, $14.884 per share would be paid at closing and the balance, if any, paid from time to time over a period of at least one year. Consummation of the merger is subject to a number of conditions, including approval of the merger plan by each class of stock of Coventry Care and various licensing approvals and the right of Providence to terminate the agreement during a 30-day due diligence period.

Coventry Care is primarily a provider of long-term nursing care and also operates a machine shop and medical supply business. Coventry Care operates five nursing homes in western Pennsylvania and provides in-patient care at the intermediate, skilled and sub-acute care levels. Coventry Care's principal office is located at 1277 Country Club Road, Monongahela, Pa. 15063.

Providence is a privately held provider of long-term nursing care based in Berea, Ohio. Providence and its subsidiaries own and operate 14 nursing care facilities in Ohio and Vermont. Providence's principal office is located at 181 Front St., Berea, Ohio 44017.

WASHINGTON (FEB. 5) PR NEWSWIRE - Industrial Equity (Pacific) Limited, 70 percent held by Brierley Investments Limited, New Zealand's second largest publicly held company, today is filing notice with the Securities and Exchange Commission that it is "reevaluating its investment position in the Company (Cummins Engine Co. of Columbus, Indiana) in light of developments that have occurred to date, including what it considers to be management's hostility to IEP's position as a shareholder of the Company."

IEP owns 14.9 percent of Cummins.

Since IEP's initial 13D filing on July 17, 1989, a number of significant events have occurred to reduce the value of its investment. Contrary to earlier projections, Cummins produced a substantial loss in the third

quarter of $39.7 million or $4.12 per share.

The Cummins board of directors reduced the stock ownership threshold on its "poison pill" from 25 percent to 15 percent of outstanding shares. Meanwhile, the price of Cummins stock has fallen from a peak of $72 per share to $48 per share. IEP's investment has lost $17 million in value since its acquisition.

Bruce Hancox, chairman of Brierley Investments Limited, said IEP would vigorously defend a lawsuit initiated by Cummins on Jan. 25, 1990. Hancox said that the lawsuit was merely a tactic to divert attention from the performance of Cummins management. He also rejected any suggestion that Brierley/IEP would in any way participate in actions that would reduce the value of its investment or negatively impact customers, suppliers or employees of Cummins.

"Brierley/IEP does not impose a threat. All we asked for is one seat on a 15-seat board that meets several times a year -- I'm just at a loss to see how that could threaten anybody or destabilize relationships with its constituents," Hancox said.

Brierley Investments Limited (BIL), founded by Sir Ronald Brierley 29 years ago, is a long-term investor in companies located in New Zealand, Europe and the United States. Ronald Brierley was knighted in 1988 for his services to business and the community.

IEP, with the same long-term investment philosophy of BIL, has in excess of $1 billion invested in the United Kingdom and a U.S. portfolio of $700 million. IEP has investments in some 40 U.S. corporations, including majority positions in Anadite, Inc., Associates Hosts, Inc., Steego Corporation, Everest & Jennings International, Ltd., Smith International and Molokai Ranch Limited.

CHICAGO (FEB. 5) PR NEWSWIRE - Howard Grafman, founder and long- time president of Century Broadcasting Corporation, today announced he has submitted a tender offer for the company valued at over $60,000,000.

Century is a broadcasting company created by Grafman in 1962 and incorporated in 1964 with George A. Collias, a Chicago attorney.

The history of the company describes one of the more impressive success stories in broadcasting. Founded with a total investment of less than

$20,000, Century through the years has owned and operated radio stations in Los Angeles, Detroit, Dallas and St. Louis -- in addition to its current city lineup of Chicago, San Francisco, Denver and Tampa. An example of its successful business strategy was the sale of its St. Louis FM station in 1983 for $10,000,000. The property had been purchased in 1964 for $72,000.

Century Broadcasting Corporation is privately owned and headquartered in Chicago. Currently, the company owns and operates WXEZ FM (FM 100), WXEZ AM in Chicago; KMEL FM in San Francisco; WLFF AM Tampa-St. Petersburgh; and KYBG AM/FM in Denver.

PALO ALTO, CA (FEB. 5) PR NEWSWIRE - Collagen Corp. (NASDAQ: CGEN) today announced that William R. Mullen, 49, has been promoted to vice president of operations. Mullen will be responsible for materials manufacturing, quality assurance and quality control, physical plant and technical support at both the Fremont and Palo Alto manufacturing facilities.

"Bill came to Collagen in January 1988 as our director of manufacturing with a strong background in quality assurance, quality control and manufacturing operations," said Bruce B. Pharriss, Ph.D., senior vice president, science & technology, Collagen Corp. "He will now undertake full responsibility for our new manufacturing facility in Fremont, Calif., opened in January 1990, as well as the current facility in Palo Alto."

Prior to joining Collagen, Mullen was director of operations with Barnes-Hind Corp., where he was responsible for the company's materials management manufacturing and engineering.

Prior to Barnes-Hind, Mullen held positions as vice president and director of operations with Winfield Corp. and Allergan Corp. He holds an M.B.A. degree in general management from Pepperdine University, Malibu, Calif., and a B.S. degree in microbiology from the University of California, Los Angeles.

Collagen Corp., based in Palo Alto, is a scientific and commercial leader in applying the science of cell biology to healing human tissue.

DAVIS, CA (FEB. 5) PR NEWSWIRE - Calgene Inc. (NASDAQ: CGNE) announced today that it has finalized its acquisition of privately held Bioseeds International Inc. of Minneapolis, and affiliated corn seed companies including NobleBear Inc. of Gibson City and Decatur, Ill.

The agreement became effective on Jan. 31, 1990, at 5 p.m. PST, as expected.

The terms of the acquisition call for the issuance of 150,000 shares of Calgene Common Stock to Bioseeds International and the assumption of certain NobleBear bank debt.

Calgene is an agribusiness biotechnology company that is developing improved plant varieties and plant products for the seed, food and specialty chemical industries. The company has four operating subsidiaries serving these markets -- Plant Genetics Inc., Stoneville Pedigreed Seed Co., Calgene Chemical and Ameri-Can Pedigreed Seed Co.

MOUNTAIN VIEW, CA (FEB. 5) PR NEWSWIRE - Agilis Corp. today announced that it has received Federal Communications Commission (FCC) certification for its packet radio module, or "slice." This certification allows end users to operate radios without an FCC license. In addition, the company announced it has begun shipping the packet radio slice to beta test customers.

The 21CSP, which supports wireless networking at 230 kilobits-per-second, is based on spread spectrum radio technology which transmits information encoded in low power signals over a broad frequency band, minimizing interference with other radio devices. It has a range of one kilometer outdoors and 100 meters indoors.

"We have taken networking out of the office and placed it in the hands of workers at the point of action," said Peter Cripps, vice president of Agilis' Digital Radio Division. "Mobile network computing was only a vision a few years ago. Agilis has made it reality."

The Agilis System consists of modular slices which can be latched together in a variety of configurations and tailored for each application. Agilis workstations are an industry-standard platform for mobile communications. As an example, the Agilis System was used by IBM and Motorola last week to demonstrate the interoperability and open architecture of the new Advanced Radio Data Information Service (ARDIS) network.

The 21CSP sells for US$2,495 and will be available in the second quarter of 1990 from the company's direct sales force, system integrators and network of industrial representatives.

Agilis Corp. is a privately held company which designs, manufactures, markets and supports handheld workstations and wireless networks for mobile network computing in demanding environments. The company's headquarters are located in Mountain View. Agilis was founded in December 1987.

MOUNTAIN VIEW, CA (FEB. 5) PR NEWSWIRE - Agilis Corp., manufacturer of handheld workstations and wireless networks, today announced the promotion of Ken Biba to president.

Biba, who co-founded the company with John Ellenby in December 1987,

previously held the position of chief operating officer (COO). As president, he succeeds Ellenby, who continues as chairman of Agilis. The title of COO has been eliminated.

Prior to co-founding Agilis, Biba co-founded Sytek Inc., which is now Hughes LAN Systems. At Sytek, he was a senior executive in marketing and operations over a period of eight years.

"Ken is well deserving of his new position and has done an outstanding job " said John Ellenby, chairman. "Wireless networks are an increasingly important aspect of our business. Ken's experience and leadership in networking products make him a natural fit for this position."

Agilis Corp. is a privately held company which designs, manufactures, markets and supports handheld workstations for mobile network computing in demanding environments. The company's headquarters are located in Mountain View. Agilis was founded in December 1987.

#90036p0048 02/05/1990 ~PR Newswire

BILTHOVEN, THE NETHERLANDS (FEB. 5) PR NEWSWIRE - ASM International N.V. (NASDAQ: ASMIF), the Netherlands-headquartered manufacturer of semiconductor equipment, today announced it was awarded a second ESPRIT program involving manufacturing technology for the formation of critical parts in the semiconductor device structures, utilizing Chemical Vapor Deposition processes. ESPRIT (European Strategic Program for Research and Development in Information Technology) is the initiative of the European Community to boost the precompetitive research activity in microelectronics, information processing systems and application technologies in Europe.

In two programs, ASM is acting as the prime contractor and cooperates with a number of leading European semiconductor manufacturers, research institutes and other equipment manufacturing companies. On ASM's side, development work, valued at $7.5 million for the two programs, is being performed at the ASM Microelectronics Technology Center in Bilthoven. Evaluation of equipment and processes will be done at various sites of the involved partners. The programs complement development work done separately at ASM.

ASM and its partners will jointly develop and evaluate processes and equipment for the manufacturing of advanced semiconductor devices. The programs aim at certain manufacturing steps of chips with line geometries below 1 micron and down to 0.5 micron. These line geometries will be used

for such memory devices as 4 megabit and 16 megabit DRAMs which are expected to be introduced for mass-production within the next few years.

The latest ASM-led program was formally approved by the ESPRIT steering committee in December 1989. This program will target the development of processes for new contact materials, which will enable improved characteristics of metal films in advanced semiconductors.

ASM also announced that it has successfully completed the first phase of another ESPRIT program. That program, for which work had already started in 1988, targets the development of manufacturing processes for the formation of multilayer dielectric films. The first phase included the design of reactors capable of forming such films. The resulting reactors are compatible with ASM's Advance 600 system architecture. As part of the next phase, ASM will ship an Advance 600 system incorporating the new reactor to one of the partners by the end of this quarter.

Under the terms of both programs, ASM will deliver in total six Advance 600 systems in varying configurations to the partners. The Advance 600 is a semiconductor manufacturing system, allowing the performance of multiple subsequent processing steps without the silicon wafers leaving the machine. The machine maintains its own internal controlled and ultra-clean vacuum environment. This feature is considered critical for the targeted applications where even the ambient clean room atmosphere could be detrimental. The Advance 600 was announced by ASM in May 1989, at which time the company stated it was the first of a new family of products to be introduced over the next several years.

ASM International N.V. dedicates its resources to the research, development, manufacturing, marketing and servicing of equipment and materials used to produce semiconductor devices. The company provides production solutions for the main areas of semiconductor production: wafer processing, assembly and encapsulation. The company's principal facilities in the Netherlands, the United States, Hong Kong and Japan enable it to meet local specifications and to sell and service its products in the world's major semiconductor markets of Europe, the United States and Asia.

GREENSBORO, NC (FEB. 5) PR NEWSWIRE - Burlington Industries said it will restructure its Transportation division, reducing the size of its own trucking fleet and assigning some routes to other carriers.

The changes will include closing three terminals and reducing employment at the four remaining facilities.

Ben Tyler, president of Burlington Transportation, said, "We will continue providing reliable service to Burlington Industries and its customers."

Tyler emmphasized that the changes will be implemented gradually, over the next several months, and the quality of service will be maintained.

"The transportation needs of Burlington's businesses are unchanged, and we will take great care to make sure there is no disruption of service," he said.

Burlington's trucking terminals at North Bergen, NJ; Dublin, VA; and Rossville, GA will be closed, and the number of employees will be reduced at the Lynchbburg, VA; Cramerton, NC; and Burlington, NC terminals. The support staff at the Transportation division's main office in Burlington, NC will also be reduced. In total, the division's employment will be reduced from approximately 1,030 to approximately 580.

"We regret that we will be losing talented people who have contributed much to our success," said Tyler.

"We will offer our employees assistance in finding other employment."

Tyler said all Burlington employees who lose their jobs will be given at least 60 days notice, and will receive profit sharing, retirement and other benefits for which they are eligible.

ATLANTA (FEB. 5) PR NEWSWIRE - The Home Depot (NYSE: HD) today reported net sales of $713,249,000 for its fiscal 1989 fourth quarter, the 13 weeks ended Jan. 28, 1990, a 36 percent gain over sales of $524,773,000 in the fourth quarter of fiscal 1988.

For the fiscal year, net sales increased 38 percent, to $2,758,535,000, from $1,999,514,000 for fiscal 1988.

On a comparable store-for-store basis, sales were up 13 percent for the quarter and 13 percent for the fiscal year.

The company also reported that in terms of weighted average weekly store sales, The Home Depot posted a rise of 12 percent, from $444,000 for the fourth quarter of fiscal 1988 to $496,000 for the fourth quarter of fiscal

1989. For the 1989 fiscal year, the weighted average weekly store sales rose 11 percent, to $515,000 from $464,000 during fiscal 1988.

During the fourth quarter of fiscal 1989, there were 22,334,000 customer transactions, 33 percent more than during the fourth quarter of fiscal 1988. For all of fiscal 1989, there were 84,494,000 customer transactions a 32 percent increase over the previous fiscal year. The average customer sale rose 5 percent during fiscal 1989, to $32.65 from $31.13 during the fiscal year 1988.

At the close of fiscal 1989, the company was operating 118 stores, compared to 96 stores at the end of fiscal 1988. The company expects to open approximately 30 new stores during fiscal 1990.

In addition to opening 22 new stores during fiscal 1989, The Home Depot remodeled six of its existing stores and added a total of approximately 71,000 square feet to three of those locations. During fiscal 1990, the company plans to remodel 12 stores, expanding 10 of them by a total of approximately 241,000 square feet.

At the close of fiscal 1989, the company had approximately 10,424,000 square feet of store space, 27 percent greater than the 8,216,000 square feet it had at the end of fiscal 1988.

The Home Depot operates warehouse-style home center stores in 26 markets in 12 states. The stores, ranging in size from 67,000 to 140,000 square feet, sell approximately 30,000 different kinds of building materials and home improvement and lawn and garden products primarily to the do-it-yourself market. The company is widely regarded as the leading retailer in the home center industry and its stock is traded on the New York Stock Exchange under the symbol, "HD."

The Home Depot will release is fiscal 1989 fourth quarter and annual earnings results on March 13.

NEW YORK (FEB. 5) PR NEWSWIRE - The Cooper Companies, Inc. (NYSE: COO) announced today that it has made a filing with the Securities and Exchange Commission disclosing that it beneficially owns 2,320,600 shares of the common stock of Anacomp, Inc. (NYSE: AAC), or approximately 6.26 percent of Anacomp's outstanding common shares.

The filing indicated that Cooper had requested that Anacomp management

meet with Cooper to discuss various matters, including a possible business combination between Anacomp and Cooper at a substantial premium over recent market prices of Anacomp's common stock. Cooper stated that no response had been received to date from Anacomp with respect to its request.

Cooper's filing also indicated that Cooper had previously made a filing with the Department of Justice and the Federal Trade Commission seeking clearance and early termination of the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act to exceed the $15 million threshold with respect to Cooper purchases of Anacomp common stock.

Cooper also stated that, depending on a variety of factors, including results of any contacts with Anacomp's management, Anacomp's financial condition, business and prospects, other opportunities available to Cooper and developments with respect to Cooper's business, the results of the Hart-Scott-Rodino filing process and general economic and financial market conditions, Cooper may determine to acquire additional Anacomp shares or dispose of all or a portion of the Anacomp shares held by it.

The Cooper Companies further stated that it has elected at this time not to exercise the previously announced authority granted to it by its board of directors to repurchase up to 1.5 million shares of its common stock. The company indicated that no shares had been purchased pursuant to the authorization.

The Cooper Companies develops manufactures and markets a range of daily and flexible wear contact lenses in the U.S. and Canada.

#90036p0052 02/05/1990 ~PR Newswire

CHICAGO (FEB. 5) PR NEWSWIRE - Sears, Roebuck and Co. (NYSE: S) today reported fourth quarter consolidated net income of $602.1 million compared with $117.4 million in 1988 after major restructuring and business disposition charges.

Earnings per share rose to $1.76 compared with 32 cents a year ago. In the 1988 fourth quarter, earnings per share reflected after-tax charges of $1.17 per share for the restructuring of Sears Merchandise Group and 16 cents per share for a loss on the sale of the Allstate group life-health business.

Claims from the San Francisco earthquake and severe cold weather in the South reduced fourth quarter net income, the company said. For the full year, catastrophic losses after reinsurance from Hurricane Hugo, the San

Francisco earthquake and other natural disasters were the worst in the history of Allstate Insurance Co.

Earnings per share for the year ended Dec. 31 rose 12.0 percent to $4.30 per share compared with $3.84 per share in 1988, partly reflecting the company's share repurchase program. Net income for the year was $1.51 billion compared with $1.45 billion in 1988. The 1988 results reflected after-tax restructuring charges of $457.9 million and income of $544.2 million from a tax accounting change.

Average shares outstanding totaled 342.4 million for the fourth quarter and 351.0 million for the year ended Dec. 31 compared with 377.3 million for the year-ago quarter and 378.8 million for 1988.

Fourth quarter consolidated revenues rose 4.2 percent to $15.18 billion from $14.56 billion in 1988. For the full year, revenues rose 7.1 percent to a record $53.79 billion from $50.25 billion in 1988.

Edward A. Brennan, chairman and chief executive officer, said: "The company's restructuring announced in 1988 has been completed, and we are encouraged by the progress shown by all Sears business groups in 1989.

"The merchandise group's achievements exceeded its financial results," he said. "It was a year of transition, and much has been accomplished. Allstate's performance was impacted by record catastrophe claims, partly offset by an increased contribution from life operations. Dean Witter's securities-related business and Discover Card produced excellent results," he added. "Coldwell Banker's results benefited from the sale of the commercial division.

"The company is well-positioned as it enters 1990," Brennan said, "and we expect momentum to build as the year progresses."

#90036p0054 02/05/1990 ~PR Newswire

WILMINGTON, DE (FEB. 5) PR NEWSWIRE - Beneficial Corporation (NYSE: BNL) today reported that 1989 fourth quarter earnings rose 48 percent to $31.6 million from $21.4 million in the fourth quarter of 1988. Benefiting from a reduced preferred dividend requirement this year as a result of the repurchase of the company's 9.25 percent redeemable preferred stock, comparable earnings per share rose 62 percent to $1.36 per share from $0.84 per share in the 1988 quarter.

Fourth quarter 1988 net income included a $7.9 million aftertax charge, or $0.35 per share, related to the decision to switch to IBM Corporation as

hardware supplier for the Bencom III computer network project. Absent this special charge, fourth quarter 1988 earnings per share were $1.19. Thus, 1989's $1.36 per share represents an increase of 14 percent on a directly comparable basis.

For the full year, Beneficial Corporation's earnings were $120.9 million, an increase of 15 percent over earnings of $105.0 million in 1988. Reflecting the reduced preferred dividend requirement in 1989, comparable earnings per share rose 20 percent to $5.01 per share from $4.19 per share in 1988. Excluding the special $7.9 million aftertax charge from 1988 results, 1989 earnings rose 7 percent from $112.9 million in 1988. Core operating earnings per share rose 10 percent to $5.01 per share from $4.54 per share in 1988.

Continued Strong Receivable Growth During the fourth quarter, two Beneficial subsidiaries sold over $248 million of California home equity loan receivables through a securitization in the capital markets. Before the impact of this sale, receivables growth continued strong in the fourth quarter, increasing $270 million compared to $264 million in the fourth quarter of 1988. Removing the impact of foreign exchange translation in both periods, receivables increased $247 million in this year's quarter before the securitization compared to a $230 million gain in the fourth quarter of 1988.

Full year receivables outstanding increased $304 million, a 5 percent gain over the Dec. 31, 1988 level, to end the year at $6,902 million. Before the impact of the securitization, 1989 receivables grew $552 million, or 8 percent. Full year average receivables outstanding of $6,737 million represent an increase of 7 percent over 1988 average receivables of $6,285 million.

Credit Quality Continues Excellent Although the net chargeoff ratio increased slightly in the fourth quarter, credit quality remained excellent by any historical measure. Loan balances more than two months delinquent, on a recency basis, were 0.66 percent at year-end, compared to 0.72 percent at September 30 and the all-time low of 0.59 percent at Dec. 31, 1988. Overall loan delinquency at year-end also improved from the Sept. 30, 1989 level, although it was modestly higher compared to the exceptionally low level at year-end 1988.

Reflecting an aggressive chargeoff policy at year-end, fourth quarter net chargeoffs increased to $20.6 million from $17.7 million in the fourth quarter of 1988. As a percentage of average receivables, fourth quarter net chargeoffs were 0.29 percent of average receivables compared to 0.26 percent a year earlier.

For the full year, net chargeoffs increased to $78.0 million from $68.6 million in 1988. However, as a percentage of average receivables, net

chargeoffs increased only modestly to 1.11 percent from 1.05 percent in 1988. At December 31 the allowance for credit losses as a percentage of receivables was 3.03 percent, covering 1989 net chargeoffs 2.7 times, a highly conservative ratio by industry standards.

Beneficial Corporation provides consumer financial services through a network of over 1,000 offices located across the United States, and in Canada, the United Kingdom and West Germany.

HESTERFIELD, MO (FEB. 2) PR NEWSWIRE - Comprehensive Care UCorporation (NYSE: CMP) announced today that it has entered into an agreement for the sale of its corporate headquarters facility in Irvine, Calif.

The sale price is $9,000,000.

The closing of the sale is subject to the satisfaction of a contingency which permits the buyer to conduct an environmental investigation of the property.

The contingency has not yet been satisfied.

The buyer has deposited $500,000 into escrow which becomes nonrefundable upon satisfaction of the environmental contingency.

W. James Nicol, president and chief executive officer of the company, stated that he was pleased with the agreement, but he noted that while there was no financing contingency in the agreement, the ultimate consummation of the sale will also depend upon the buyer's ability to deposit the purchase price in escrow.

NEW YORK (FEB. 5) PR NEWSWIRE - Grace Specialty Chemicals Co., the world's largest specialty chemical producer and the more than $3 billion operating unit of W. R. Grace & Co. (NYSE: GRA), today announced the appointment of four executive vice presidents.

Serving as executive vice presidents of operations for Grace Specialty Chemicals will be Jean-Louis Greze, Carl W. Lorentzen and Robert C. Walsh. Greze and Walsh were also elected corporate senior vice presidents, joining Lorentzen in that position. F. Peter Boer will function as executive vice president of technology and development for Grace Specialty Chemicals Co. and will continue as a corporate executive vice president and head of Grace's Corporate Technical Group.

All four will report to Donald H. Kohnken, who was recently named president of Grace Specialty Chemicals Co.

Jean-Louis Greze, 58, most recently served as president of the company's European Darex Division, based in Lausanne, Switzerland. In his new capacity, he will be responsible for the company's Cryovac, Davison Chemical, European Darex and Interamerican Divisions.

Carl W. Lorentzen, 59, most recently served as a group operations officer of Grace Specialty Chemicals Co. In his new capacity he will be responsible for the Construction Products, Organic Chemicals, Dewey and Almy Chemical, Polyfibron and European Technical Products Divisions. He also serves as a member of Grace's board of directors on a rotating basis.

Robert C. Walsh, 51, most recently president of Grace's Construction Products Division, will now be responsible for the Amicon, Dearborn, Japan and Pacific Divisions. He will also remain as chairman of Grace- Sierra Horticultural Products Company.

Dr. F. Peter Boer, 49, will serve in a newly-created position as executive vice president of technology and development for Grace Specialty Chemicals Co. In this position, he will play a key role in formulating GSC's strategic plans and will be responsible for new business development, engineering, environmental activities, health, safety and toxicology, public relations and the international technical services department. He will continue as an executive vice president of Grace and group executive of the Corporate Technical Group, in which capacity he reports to J. Murfree Butler, a Grace vice chairman.

WHEELING, W.VA. (FEB. 5) PR NEWSWIRE - Election of Paul K. Morrison to the position of vice president-engineering by the board of directors of Wheeling-Pittsburgh Steel Corp. (NYSE: QWHX) was announced today by James L. Wareham, president and chief operating officer.

The appointment was effective Feb. 1, 1990.

Morrison, 46, comes to Wheeling-Pittsburgh with more than 23 years experience in the steel industry. He joined U.S. Steel Corp. (now a subsidiary of USX Corp.) in 1966 as a member of the engineering department at the Clairton (Pa.) Works. In the succeeding 15 years at Clairton, Morrison served as superintendent-environmental and health services, superintendent of utilities and chief engineer. In December 1981, he moved to the Gary (Ind.) works as chief engineer, before returning to the

Pittsburgh area in February 1984 as manager of plant engineering-East Division. Morrison returned to Gary in July 1984 as manager-energy and environmental control division. Prior to joining Wheeling-Pittsburgh Steel Morrison was manager-plant engineering at Gary.

A 1966 graduate of Pennsylvania State University, Morrison holds a B.S. degree in fuel science, and is a member of the Association of Iron and Steel Engineers. He, his wife Shirley and two sons, Dan and Alan, plan to relocate to the tri-state area.

FORT LAUDERDALE, FL (FEB. 5) PR NEWSWIRE - BLOCKBUSTER Entertainment Corporation (NYSE: BV), the world's largest home video retailer, today reported record earnings for 1989, its 12th consecutive profitable quarter and its second consecutive year that earnings per share (as restated) have increased by more than 100 percent.

Systemwide revenue was $663,000,000 in 1989 as compared to $284,000,000 in 1988, an increase of 133 percent.

The company reported revenue for the year ended Dec. 31, 1989 of $402,500,000, a 124 percent increase over 1988 revenue of $179,800,000.

Net income increased to $44,200,000 compared to $17,500,000 in 1988, an increase of 153 percent. Earnings per share increased 128 percent to 57 cents for 1989, up from 25 cents per share in 1988.

Revenue for the fourth quarter ended Dec. 31, 1989, was $130,400,000 a 97 percent increase over revenue of $66,100,000 for the comparable quarter in 1988. Fourth quarter net income rose to $15,600,000 from $5,400,000 in 1988, an increase of 189 percent. Earnings per share increased by 186 percent to $ .20 per share in the fourth quarter of 1989 versus $ .07 per share for the comparable quarter of 1988.

All 1988 and 1989 figures have been restated to reflect the 1989 acquisitions of Major Video Corp. and Video Superstore Master Limited Partnership, which were accounted for as pooling of interests business combinations.

The number of BLOCKBUSTER Video stores in operation increased from 589 at Jan. 1, 1989 to 1,079 at Dec. 31, 1989, 561 of which were company-owned and 518 franchise-owned. Stores are located in 132 markets in 43 states, Canada, the United Kingdom and Guam.

SALT LAKE CITY (FEB. 5) PR NEWSWIRE - JB's Restaurants Inc. (NASDAQ: JBBB) reports that its board of directors authorized the repurchase of up to 500,000 shares of its common stock.

The company said it will buy back the shares on the open market from time to time as market and other conditions warrant. The shares may be purchased in open market or privately negotiated transactions. The company did not set a deadline for completing the buyback.

Clark D. Jones, the company's chairman and chief executive officer, stated "We believe our stock, at current levels, to be undervalued and represents a unique investment opportunity. The company continues to have confidence in the JB's Restaurant concept and the stock repurchase program does not change our previously stated plans to add 10 to 12 restaurants per year to fill in our core markets. The company believes it has adequate financial resources to fund these growth plans along with the stock repurchase program."

In an unrelated matter, Thomas J. Russo, group chairman and chief executive officer of the Housewares Division of Hanson Industries, was elected to the company's board of directors at the annual meeting of shareholders. Russo replaces Daniel T. Hogan who is retiring after serving 18 years on the company's board. Russo's backround includes over 20 years experience in the restaurant industry.

JB's Restaurants Inc. operated 120 family-style restaurants in 10 Western states.

DANBURY, CT (FEB. 5) PR NEWSWIRE - First Brands Corporation (NYSE: FBR) announced today results for the second quarter and for the six months ended Dec. 31, 1989, which met expectations.

For the second quarter, revenues were $302,575,000 versus $308,768,000 recorded in the second quarter last year. Last year's second quarter sales included $20,520,000 from the company's European Home Products business which was sold in March, 1989. Excluding these European sales for comparative purposes, fiscal 1990 second quarter sales increased

$14,327,000 or 5 percent from the same quarter last year. Income before extraordinary credit was $22,269,000 or $1.09 per share as compared with $20,925,000 or $1.04 per share earned a year ago. Net income was $22,269,000 or $1.09 per share versus $22,910,000 or $1.14 per share last year which included an extraordinary credit of $1,985,000 or $.10 per share resulting from the utilization of a tax loss carryforward.

For the six month period, revenues were $617,272,000 versus $666,356,000 in the six month period last year. Last year's six month sales included $35,481,000 from the company's European Home Products business. Income before extraordinary credit was $42,533,000 or $2.10 per share as compared to $38,990,000 or $1.94 per share a year ago. Net income was $42,533,000 or $2.10 per share versus $44,016,000 or $2.19 per share a year ago which included an extraordinary credit of $5,026,000 or $.25 per share resulting from the utilization of a tax loss carryforward.

ST. PAUL, MN (FEB. 5) PR NEWSWIRE - Green Tree Acceptance, Inc. (NYSE: GNT), today reported net earnings for the fourth quarter ended Dec. 31, 1989, of $8,556,000, or 54 cents per share, compared with net earnings of $4,919,000, or 22 cents per share, in the same quarter of 1988.

For the 12 month period ended Dec. 31, 1989, net earnings were $29,356,000 or $1.75 per share, compared with 1988 earnings before change in accounting principle of $27,400,000, or $1.45 per share. After a cumulative effect charge of $39,637,000 related to the present valuing of cash flows, 1988 had a net loss of $12,237,000, or $1.74 per share.

Income was $41,841,000 and $143,953,000 for the 1989 fourth quarter and fiscal year, respectively. This compares to income of $31,334,000 and $133,124,000 for the similar periods of 1988.

In the fourth quarter, loan production increased 42 percent. Green Tree originated $221 million in contracts compared with $156 million in the fourth quarter of 1988. For the 12 months,contract production was $803 million compared with $726 million for 1988. As of Dec. 31, 1989, Green Tree Acceptance was servicing approximately 217,000 contracts with a principal balance of $3.6 billion.

Green Tree Acceptance is the market leader in manufactured housing financing. It purchases, pools, sells and services conditional sales contracts for manufactured homes through 40 regional offices nationwide. In 1989, it commenced home improvement lending for site-built housing. Green Tree's common stock is traded on the New York and Pacific Stock Exchanges under the symbol GNT.

#90036p0072 02/05/1990 ~PR Newswire

MOUNT VERNON, NY (FEB. 5) PR NEWSWIRE - Michael Anthony Jewelers, Inc. (NASDAQ: MAJL) reported net sales for the second quarter ended Dec. 31, 1989 of $30,400,000, a decrease of 14 percent from the $35,400,000 for the same period last year. The company experienced revenue reduction resulting primarily from a decrease in the average price of gold.

Net income for the current quarter was approximately $1,400,000, up 547 percent as compared to $200,000 a year ago. Earnings per share during the second quarter were $.28 as compared to $.04 last year.

Net sales for the first six months were $51,000,000 as compared to $58,100,000 a year ago. Net income increased to over $2,200,000, or $.45 per share, as compared with $384,000 or $.08 per share for the six-month period ended Dec. 31, 1988.

Michael Paolercio, chief executive officer and co-chairman of Michael Anthony Jewelers, Inc., commented that the sharp increase in earnings is attributable to improved productivity and cost controls, as well as changing the company's product mix to include higher margin merchandise. Paolercio said, "We have strengthened our manufacturing response system and financial controls, resulting in increased inventory turn and improved cashflow, thereby eliminating short-term seasonal borrowings. We now have a cash position at Dec. 31, 1989 of $6,400,000 as compared to net short-term borrowings of $2,400,000 at Dec. 31, 1988, which represents a positive cash swing of $8,800,000. In addition, our current ratio, excluding gold on consignment, exceeds 7:1."

Paolercio also commented that the company has attained a strong financial position, thus allowing the company to continue to expand its research and development efforts, enhance product selections, as well as improve gross margins and manufacturing efficiencies. Paolercio stated that, "attaining these goals will enable the company to meet the challenges for the company and the jewelry industry in the 1990's."

The company also announced that the board of directors has approved a stock repurchase program, providing for the repurchase of up to 250,000 shares of the company's common stock in the open market or through privately negotiated transactions.

Michael Anthony Jewelers, Inc. designs, manufactures and sells an extensive line of handcrafted 14 karat gold jewelry. It has over 600 customers nationwide, including jewelry distributors, retail stores, jewelry chain stores, catalog showrooms, department stores, mass merchandisers, and home video shopping clubs.

BOULDER, COL (FEB. 5) PR NEWSWIRE - NBI, Inc. (NYSE: NBI) today reported a net loss from continuing operations for the second fiscal quarter ended Dec. 31, 1989 of $25.6 million, or a loss of $2.99 per common share. This compares to a net loss from continuing operations of $5.8 million, or a loss of $.69 per common share for the same period of the previous year. For the first six months of this fiscal year, the company had a net loss from continuing operations of $32.8 million or a loss of $3.86 per common share. Comparable figures for the first six months of the previous fiscal

year show a net loss from continuing operations of $12.7 million or a loss of $1.53 per common share.

Included in the net loss from continuing operations for the second fiscal quarter were $18.0 million of restructuring costs. This includes severance costs, including those costs associated with the federal plant closing law based on the company's down- sizing in November of 1989. Also included were costs associated with the write down, to estimated net realizable value, of certain assets including property, plant, equipment and inventory. In addition, accruals of other costs incurred or expected to be incurred, as a result of the company's strategic repositioning in November of 1989 and the company's current financial restructuring activities, were included.

Stephen G. Jerritts, president and CEO of NBI stated, "These financial results reflect NBI's restructuring and downsizing in November of this past year. We have made the transition to being a provider of service and support to our installed customer base and have entered the software market. We are also continuing our dialogue with creditors for the purpose of implementing a financial restructuring of the company."

Jerritts added, "Our current software product, Legend, continues to receive interest in the growing Microsoft (TM) Windows word processing arena. We have focused our efforts toward creating product awareness of Legend in the corporate end-user market along with establishing new distribution channels for the product. We recently announced a republishing agreement with Frame Informatique of France, who will republish and market a French version of Legend in Europe."

NBI, Inc. designs and markets advanced word processing software packages. NBI has been a leader in the word processing industry for more than a decade and also provides customer service and support to a wide base of system users in domestic and international locations.

WINDSOR LOCKS, CT (FEB. 5) PR NEWSWIRE - The Dexter Corporation (NYSE: DEX) has retained The First Boston Corporation to assist in the sale of Dexter's polyvinylchloride (PVC) compounding business headquartered near Charlotte, N.C. and with additional facilities in Newark, N.J. and Orlando Fla.

Explaining the reasons for the sale, K. Grahme Walker, president and CEO of Dexter, said, "A major part of the business has become commodity oriented while another part is dedicated to a market outside Dexter's

focus for the future. As a market led specialty materials company, we need to make this change to our corporate profile."

It is expected that the sale of the PVC business, which in 1989 was profitable and contributed sales of approximately $50 million, will result in a capital gain the amount of which cannot be determined at this time.

The Dexter Corporation is a Fortune 500 producer of specialty materials. Founded in 1767, Dexter is the oldest company listed on the York Stock Exchange.

ATLANTA (FEB. 5) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) will begin nonstop service to its Dallas/Fort Worth hub on April 1 from both Pensacola Regional Airport and Southwest Regional Airport at Fort Myers, Fla.

"Delta's new nonstop service to our Dallas/Fort Worth hub opens the West to thousands of passengers both in Florida's Panhandle and Southwest areas " Brian Reid, Delta's district marketing manager at Pensacola, and Judy Williams, district marketing manager at Fort Myers, said in making the announcement today. "The nonstop service brings dozens of new connections and more convenient travel times not only to the Southwest and the Rocky Mountain states, but also the West Coast."

Delta offers nonstop service from eight Florida destinations to Dallas/Fort Worth, Delta's second largest hub with 245 flights daily to 66 nonstop destinations. Reid and Williams noted that Delta passengers are sure to enjoy the convenience of Delta's one-terminal connections from its 31 gates there.

The new Pensacola service will feature two nonstop flights daily to DFW, in addition to the one-stop service already offered. The new nonstop flight to DFW from Fort Myers is in addition to the one-stop service Delta already offers via its Orlando, Fla. hub.

DALLAS (FEB. 5) PR NEWSWIRE - Officials of Life Care Centers of America,

Inc. (LCCA), Cleveland, Tenn., and National Heritage Inc. (NYSE: NHR), Dallas, today announced that they are engaged in discussions regarding the merger of the two firms.

These discussions call for the establishment of a new company comprised of the combined assets and operations of LCCA and National Heritage along with selected assets and operations of certain affiliates of the two firms and certain health care assets of Southmark Corporation. It is anticipated that securities of the new company would be publicly traded, with LCCA and its affiliates maintaining a controlling interest in the new company.

Forrest L. Preston, chairman of LCCA, said, "National Heritage has a national network of long-term care and retirement facilities, staffed by committed, professional personnel. Although we have been involved in disputes with National Heritage and its affiliates for several years, after discussions with National Heritage's new management, we are convinced the combined operations and talents of Life Care and National Heritage will result in an enterprise with a strong commitment to the nation's elderly and improved returns to investors in properties currently managed by LCCA and National Heritage."

Hugh C. Shurtleff, chairman of National Heritage, said, "Preston's Life Care Centers of America is one of the most respected firms in the long-term care field. The experienced leadership that Preston's organization could bring to the combined operations would result in stability and efficiencies that would inure to the benefit of our shareholders." It is expected Preston will serve as chairman and CEO of the new entity.

In announcing their discussions, officials of both companies indicated there was mutual interest in pursuing a combination of the assets and operations of their respective businesses, but they also emphasized the discussions are in preliminary stages. In addition, the combination would be subject to numerous conditions and to approval by National Heritage's shareholders as well as a number of regulatory and legal approvals, including approvals from constituencies having jurisdiction over the reorganization of Southmark Corporation.

LCCA, together with certain of its affiliates, own and/or operate 100 intermediate and skilled nursing care facilities with 13,732 beds and 12 retirement centers with 1,692 units.

National Heritage Inc. manages and operates over 200 long-term care facilities with approximately 23,000 beds and 41 retirement centers and assisted living facilities with approximately 5,800 units.

BOULDER, CO (FEB. 5) PR NEWSWIRE - TelWatch Inc. of Boulder has secured a new minority investment by Ameritech Development Corporation, as well as additional funding from the company's existing capital backers. The amount of the investment was not disclosed.

In addition, plans are underway to fold the TelWatch expertise into the integrated network management capabilities provided by Ameritech Information Systems. The Ameritech subsidiary markets network-based services, telecommunications equipment and comprehensive, multiple- vendor systems solutions to large business customers throughout the five-state midwestern region.

TelWatch Inc., a privately-held company formed in 1987, is a developer and marketer of integrated network management tools and systems for multi-vendor networks. Headquartered in Boulder, the company's products include Unix-based network management software and line monitoring software that operate on generic platforms. TelWatch applications provide customers with a strong solution to effectively monitor and control their telecommunications networks.

Other TelWatch investors include Abacus Ventures; Ampersand Ventures, Hill Carman, Kirby & Washing; Menlo Ventures and Salomon Brothers Venture Capital.

Ameritech is the Chicago-based parent of Ameritech Development, the Bell operating companies serving Illinois, Indiana, Michigan, Ohio and Wisconsin, and other information related companies providing cellular communications, voice messaging, audiotex services, directories and lease financing.

Ameritech Development Corporation supports the technical and financial growth of the Ameritech companies by investing in communications technologies that complement Ameritech's strategic direction.

CHICAGO (FEB. 5) PR NEWSWIRE - Morton International (NYSE: MII) and Whittaker Corp. (NYSE: WKR) jointly announced today that they have reached a definitive agreement for Morton to acquire Whittaker's specialty chemicals segment, which produces principally adhesives, and Whittaker's coatings group for approximately $225 million plus the assumption of certain liabilities. The sale is contingent on several conditions including approval by government agencies. The parties expect to close the transaction in February. Morton intends to finance the purchase by internally generated funds and debt.

Whittaker's coatings and adhesives businesses had combined sales of approximately $180 million in the fiscal year ending Oct. 31, 1989. They comprise ten operating divisions, thirteen manufacturing facilities and two research laboratories. Most of the operations are in the United States; one significant manufacturing facility is located in France. Product lines include coil coatings, metal extrusion coatings, spray coatings, highway marking systems and a variety of high performance adhesives. All of the products involve industrial applications.

"This acquisition represents a very significant increase in our specialty chemicals business," said Charles S. Locke, chairman and chief executive officer of Morton International. "Not only do Whittaker's products expand our commitment to specialty coatings and adhesives, but we will also benefit from the talents and experience of the Whittaker employees who will be joining us."

While the coatings group had previously been identified as among businesses slated for sale by Whittaker as part of its ongoing divestiture program, Whittaker had not been planning to sell its adhesives business. Commenting on the decision to sell the adhesives business, Joseph F.

Alibrandi, chairman and chief executive officer of Whittaker, stated, "Selling our adhesives business provides us with the opportunity to make a substantial reduction in our outstanding debt which we consider a priority at this time. It further permits us to focus our energies and resources on further development of our aerospace and biotechnology businesses."

The adhesives, coatings and sealants part of Morton's specialty chemicals business had sales of $322 million in the fiscal year ending June 30, 1989. Included in those numbers are flexible packaging adhesives and coatings, powder coatings and liquid coatings for plastic substrates. "With the Whittaker acquisition, we emerge as the industry's most diverse supplier of specialty coating technologies and application methods," said Locke. "This acquisition is consistent with the company's strategy of making acquisitions to augment existing product lines."

Morton International is a Chicago-based manufacturer and marketer of specialty chemicals, salt and automotive inflatable restraint systems.

WALTHAM, MA (FEB. 5) PR NEWSWIRE - Thermo Process Systems (AMEX: TPI) today reported revenues of $12,787,000 for the third quarter of fiscal 1990, compared with $10,237,000 for the third quarter of fiscal 1989. Net income was $611,000, compared with $440,000 last year.

Walter J. Bornhorst, chairman and chief executive officer of Thermo Process Systems, said, "We are pleased to report that net income rose 39 percent during the quarter, in spite of the increased expenditures required to expand our soil-remediation business. In addition to manufacturing new mobile units, we are actively securing permits allowing us to operate in a number of states."

Thermo Process Systems designs, manufactures, and sells advanced custom-engineered thermal processing systems for the incineration of hazardous wastes and the automated heat treating of metal parts. The company also provides services for the on-site remediation of hazardous wastes and petroleum-laden soils, in addition to a comprehensive range of metallurgical processes. Thermo Process Systems is a public subsidiary of Thermo Electron Corporation.

TACOMA, WA (FEB. 5) PR NEWSWIRE - GK Carbonate, a unit of Georgia Kaolin Co., Inc., today announced an agreement with Willamette Industries, Inc. (NASDAQ: WMTT), Portland, Ore., to build a precipitated calcium carbonate (PCC) plant on-site at their Bennettsville, S.C., paper mill. This 30,000-ton-per-year PCC facility is scheduled to be completed by September 1990 in order to coincide with commencement of the Bennettsville paper mill. This plant is the third on-site PCC plant completed or scheduled to be constructed by GK Carbonate. Precipitated calcium carbonate is a white mineral pigment increasingly used as an additive for making alkaline or non-acid papers.

Richard D. Ryan, president of GK Carbonate, commented, "GK Carbonate and Georgia Kaolin are committed to the growth and development of the paper industry for both alkaline and acid papermaking."

Georgia Kaolin Co., Inc., located in Union, N.J., is a leading suppler of kaolin clays for the paper and process industries.

MONTGOMERY, AL (FEB. 5) PR NEWSWIRE - Kinder-Care Learning Centers Inc. (NASDAQ: KIND), the nation's leading child-care company, today announced that Ken Miller has been named chairman and Tull Gearreald "acting" president and chief executive officer.

Perry Mendel, 67, founder and former chairman of Kinder-Care Learning Centers, becomes chairman emeritus, will remain a member of the board of directors and serve the company in a consulting capacity. Miller and Gearreald are president and vice chairman, respectively, of The Lodestar Group, the merchant banking and investment advisory firm which owns approximately 63 percent of Kinder-Care Learning Center's stock. Gearreald, the board announced, will be assuming the chief executive officer's duties until a new president and chief executive officer is hired. A search committee has been formed to fill the position. Edward Gibson, formerly president, has been named vice chairman of the company.

2-million share buy-back plan; investment portfolio to be liquidated:

The board of directors also announced that the company has approved a stock buy-back program, authorizing the company to buy-back as many as 2 millions shares, or approximately 10.4 percent of the outstanding shares not owned by The Lodestar Group. Kinder-Care Learning Centers, Inc. closed Friday at 3-1/4. The company plans to hold the shares for future acquisitions in the day care/child care business and other corporate matters. There are 51,740,400 outstanding shares, and The Lodestar Group owns 32,475,715, leaving 19,264,685 in the market. Funds for the stock buy-back plan will come from the proceeds of the liquidation of Kinder-Care's investment portfolio and the company's cash flow from operations.

HOUSTON (FEB. 5) PR NEWSWIRE - NL Industries, Inc. (NYSE: NL), announced today that its wholly owned subsidiary, GG Acquisition Corp., has commenced an offer to purchase all shares of the common stock including the associated preferred share purchase rights of Georgia Gulf Corporation (NYSE: GGC) at a price of $45 net per share in cash.

NL stated that it intends, as soon as practicable after the completion of the offer, to propose and seek to consummate a merger or other similar business combination between Georgia Gulf and itself, or an affiliate, in which all shares not tendered in the offer will be converted into the right to receive an amount of cash equal to the price per share paid in the offer.

GG Acquisition stated that its offer will expire at 12:00 midnight, New York City time, on Monday, March 5, 1990, unless the offer is extended.

The offer is conditioned upon, among other things, (A) there being validly tendered and not withdrawn prior to the expiration of the offer a number of shares, which when added to any shares beneficially owned by GG Acquisition and NL, would represent at least a majority of the total number of outstanding shares of Common Stock on a fully diluted basis, and (B) GG Acquisition being satisfied in its sole discretion, that (1) the preffered share purchase rights have been redeemed by Georgia Gulf's Board of Directors or have been invalidated or are otherwise inapplicable to the offer and a merger or other business combination involving Georgia Gulf

and GG Acquisition or any affiliate of GG Acquisition, (2) after consummation of the offer, section 203 of the Delaware corporate law would not prohibit for any period of time, or impose any voting requirements in excess of majority stockholder approval with respect to, merger or other business combination involving Georgia Gulf or any of its subsidiaries and GG Acquisition or any affiliate of GG Acquisition, (3) the discriminatory vote requirements of articles IX and X of Georgia Gulf's certificate of incorporation, as amended, are inapplicable to the offer or other business combination involving Georgia Gulf and GG Acquisition or any affiliate of GG Acquisition, and (4) GG Acquisition has obtained sufficient financing on terms satisfactory to NL and GG Acquisition to enable GG Acquisition to purchase all shares sought in the offer.

GG Acquisition stated that the offer is being made only by its Offer to Purchase, dated Feb. 5, 1990, and related Letter of Transmittal, copies of which may be obtained from D.F. King & Co., Inc.

GG Acquisition announced that it has appointed MTrust Corp., N.A., as depositary and D.F. King & Co., Inc., as information agent for the offer.

TROY, MI (FEB. 5) PR NEWSWIRE - Kelly Services, Inc. (NASDAQ: KELYA, KELYB) the nation's largest temporary help company, announced today its acquisition of two temporary employment services companies located in the Netherlands and New Zealand. Kelly has acquired eight temporary services companies outside the U.S. since January of 1988.

"These acquisitions in the Netherlands and in New Zealand are natural extensions of our continued growth of operations on the European continent and in the Pacific Rim," said Terence E. Adderley, president and CEO of Kelly Services, Inc.

Kelly Temporary Services B.V., a wholly owned subsidiary of Kelly Services Inc., has purchased Job Partners B.V. This purchase includes acquisition of Free-lance Uitzendburo, a subsidiary of Job Partners B.V., which operates six temporary services branch offices in the Netherlands. The offices are located in the cities of The Hague, Rijswijk, Gouda, Woerden, Arnhem and Nijmegen.

In a separate transaction, Kelly Services also acquired Adstaff Associates Ltd., an independent company which operates in Auckland, New Zealand. Established in 1971, Adstaff Associates is one of New Zealand's oldest temporary employment services companies.

Under the purchase agreements of both acquisitions, each company's staff will maintain its current management and customer service responsibilities.

Kelly Services, Inc., which employs more than 560,000 temporary employees annually, owns and operates more than 950 offices in the U.S., Puerto Rico Canada, the United Kingdom, Ireland, France, Australia, and with these acquisitions, New Zealand and the Netherlands. In its 42nd Annual Report on American Industry, Forbes magazine recently selected Kelly Services as the Best Business Services and Supply Company for the 1990s. Kelly was one of 20 American companies chosen by Forbes as best prepared for the 1990s.

Kelly Temporary Services, a division of Kelly Services, Inc., provides temporary employees in the areas of office, marketing, light industrial and technical to 175,000 customers each year.

Kelly Assisted Living, a wholly owned subsidiary of Kelly Services, Inc., provides companionship and care in the home through 100 offices located in 30 states throughout the U.S.

SLATE HILL, N.Y. (FEB. 5) PR NEWSWIRE - Balchem Corporation (NASDAQ-NMS: BLCC) today reported the following results. This was Balchem's best quarter in several ways, however, these results were not sufficient to rescue the slow sales of midyear:

BALCHEM CORPORATION
(Unaudited; 000s omitted, except for net earnings per share and dividend per share)

Three months ended Dec. 31	1988	1989	Difference, pct.
Sales	$2,338	$2,728	17
Pretax profit	152	287	89
Taxes	58	110	90
Net income	94	178	89
Earnings/share	$0.08	$0.15	

Preliminary year ended Dec. 31	1988	1989
Sales	$8,359	$9,629
Pretax profit	642	501
Taxes	238	197
Net income	404	304
Earnings/share	$0.34	$0.25
Dividend/share (A)	0.03	0.03

(A) Limited to 5 percent of pre-tax by bank agreements.

NEW BUSINESS

Just as there was an unusual absence of orders in early summer, there were an unusual number of new accounts obtained in December, with annual purchases from these new accounts expected to exceed $1 million.

At the South Carolina facility, sufficient new business has been obtained to significantly offset its long drag on earnings.

A new product line, SAFOAM(TM) has been launched to replace the chlorinated fluorocarbons (CFC's) as blowing agents in certain plastics and as a second source of supply for blowing and nucleating agents to the existing foamed plastic industry. Enough initial orders have been obtained to assure that this will make at least a modest contribution to sales and profits during 1990.

A new application has been developed for the company's microencapsulated salt in microwaveable products.

Balchem said it has more than enough exciting new prospects to keep the company busy on its conversion into commercial business in 1990 and beyond.

INTERNATIONAL

Through the Canadian trade agreement, Balchem said it expects to obtain some modest sales for its products in Canada.

Based on the success of its products for certain specialty domestic markets, it will attempt to enter the much larger global international market this year.

OTHER DEVELOPMENTS

Balchem said it has moved up a notch in its banking arrangements. The company negotiated a change in the status of its financing with a new bank Chemical Bank, which has greatly improved its balance sheet. In addition, it will provide Balchem with the means to finance its growth for some years.

With a more solid base in place, Balchem is now in a position to try to accelerate its growth. It has already begun a cautious expansion of its professional staff and is undertaking projects of broader significance in its technical work to open up major market opportunities.

The company stated that it appreciated the patience and confidence of its stockholders and looks forward to 1990 with enthusiasm.

SKOKIE, IL (FEB. 5) PR NEWSWIRE - U.S. Robotics, Inc., today announced that it has acquired 100 percent of the stock of Communications Research Group (CRG), a closely held software developer and maker of BLAST communications products, located in Baton Rouge, La. The transaction expands U.S. Robotics' position as a leading data communications hardware manufacturer and bolsters its place in the growing data center market. Terms of the purchase were not disclosed.

Commenting on the transaction, Casey Cowell, U.S. Robotics chairman and president, said, "The purchase of CRG is consistent with our strategy to widen our business, while paying particular attention to communications systems and data center operations. CRG's software connectivity expertise coupled with our decade-long commitment to innovation in the modem marketplace, now allows us to provide full solutions spanning the full range of micro, mini and mainframe hardware platforms."

Cowell added, "The purchase of CRG, along with last year's acquisition of Miracom Technology Ltd. (U.K.) and our 1988 sales agreement with Japan's NTT International, positions us to enter the 1990s as a formidable competitor in hardware and software communications markets worldwide."

CRG will continue to operate in Baton Rouge as a wholly owned subsidiary of U.S. Robotics, with its founder, Daniel R. Henderson, remaining in his role as president. Casey Cowell will become chairman and U.S. Robotics executive vice president for sales and marketing, Jonathan Zakin, will become chief executive officer.

"As we continue to grow, integrated hardware and software communications systems will become the cornerstone of our business," said Jonathan Zakin. "With CRG's solid representation in data center environments, we are well-positioned to create a dynamic presence in any market requiring complete communications solutions."

The acquisition brings to U.S. Robotics the highly regarded BLAST asynchronous file transfer and communications software products, which allow over 30 different operating systems running the software to communicate with any other computer equipped with BLAST. The most recent addition to the product line, BLAST RemoteControl, is a wide area network (WAN) product giving remote access capability to BLAST's file transfer and terminal emulation functions. With software available for systems including DEC, Data General, Apple Macintosh, AT&T and IBM, BLAST has amassed a customer base of over 50,000 installations. BLAST users include Exxon, General Motors, Hallmark, U.S. Department of Agriculture, U.S. Air

Force Logistical Office Network System and U.S. Department of Transportation.

U.S. Robotics, Inc. is a leading designer, manufacturer and marketer of modems and data communications software. Both corporate headquarters and manufacturing operations are based in Skokie, Ill. The privately held company markets its products to business, industry, government agencies and original equipment manufacturers.

LANGHORNE, PA. (FEB. 5) PR NEWSWIRE - Ecogen Inc. (NASDAQ: EECN) today announced it has signed a two-year manufacturing agreement with Pfizer Inc. (NYSE: PFE), New York, to manufacture Ecogen's Bacillus thuringiensis (Bt)-containing biopesticides. The agreement extends the contract manufacturing relationship which the two companies established in 1989.

Under the new agreement, Pfizer will manufacture Cutlass(A) vegetable bioinsecticide and Condor(A) forestry bioinsecticide, which were registered by the Environmental Protection Agency (EPA) in September 1989. Both products will enter their first full year of marketing in 1990.

Pfizer will also manufacture Foil(A) potato bioinsecticide, which, subject to EPA approval, will be available for spring 1990 sales to potato growers.

Ecogen Chairman John E. Davies said, "We are delighted to have a firm of Pfizer's stature and technical expertise and a world leader in fermentation as our manufacturing partner. Our experience with Pfizer producing for us in 1989 was excellent and we are confident they will be able to meet Ecogen's increasing production requirements."

Ecogen Inc. is an agricultural biotechnology company, specializing in biological pest control. In addition to Cutlass and Condor, Ecogen markets Dagger(A) G cotton biofungicide and Collego(A) rice bioherbicide. Additional biopesticides for cotton, corn, potatoes and other vegetables, and home and garden use are under development at Ecogen.

BIRMINGHAM, MI (FEB. 5) PR NEWSWIRE - Special message delivery, access to information services, and voice mail services are just some of the

advanced features that will be available with Allnet ACCESS, a long-distance calling card service introduced today by Allnet Communication Services, Inc. Allnet, one of the nation's largest long-distance carriers has developed a calling card service that gives travelers easy access to a variety of services from anywhere in the United States, Puerto Rico and the U.S. Virgin Islands. In addition to domestic calls, international calls can be made to Canada and 44 other countries.

William Oberlin, executive vice president, sales and marketing of Allnet, described the benefits of Allnet ACCESS. "A simple dialing plan makes it easy to make the call, and the Allnet ACCESS personal calling code is 11 digits, shorter than other calling plans," he said. "The service can be used with rotary or touch-tone phones, and, in addition, an operator will come on the line if you need assistance."

"Where ACCESS really gets fun is in its special features," Oberlin said. "Easy-to-understand voice prompts walk the caller through the menus of available programs."

"There are endless scenarios," Oberlin said, "but here's one that could by typical. Picture a businessman stranded in the airport waiting for his late plane to take off. With ACCESS it is possible, through just one phone call, for him to get an update on his stock market portfolio, and call his office to get messages that have been left in his absence."

"He also needs to reach his wife to tell her his new arrival time. And she may not be home. With ACCESS he can record a call message, and automated delivery will continue dialing the called number, until the message is delivered. Our typical businessman has also been playing 'phone tag' with an employee all day. This time, he can leave a message for delivery first thing tomorrow. The result is that this Allnet customer can board the plane with peace of mind, knowing business is completed and his family knows his whereabouts. And all of it can be done by dialing ACCESS just once."

"Of course, parents with children away at school may also want an ACCESS card, so the children can use ACCESS to call home," said Oberlin.

Allnet ACCESS offers a variety of discount plans, providing substantial savings. The Hometown Discount offers savings when the caller uses Allnet ACCESS from the same area code as the account. The Homebound Discount gives discounts for weekday-evening calls to the same area code as the account. Allnet Metro Discounts are for business hour calls to any of 37 select cities. Weekend and volume discounts make Allnet ACCESS even more economical. In addition, Allnet ACCESS has no surcharges, except for operator assistance, and billing is on a six- second rounding basis.

The stock market updates and other information services are available

through Allnet InfoReach, a series of interactive programs providing access to information such as international time and weather, sports and entertainment news, tips for health, home and cars and horoscopes. With the voiceQuote program, an Allnet customer can create and store an individual portfolio, and dial it at any time to hear an update.

Allnet Call Delivery has several options. Immediate call delivery is useful when the caller is trying to reach someone and the line is busy or there is no answer. The delivery service makes up to eight attempts, at 15 to 30 minute intervals, to deliver the message. Future call delivery allows the caller to schedule the exact time the recorded message is to be delivered. This is helpful for callers trying to reach someone in a different time zone, or for programming personal wake-up calls. A confirmation line, which provides the status of messages with the date and time of delivery, is also available.

Allnet Voice Mail options provide subscribers with a personal voice mail box number. Messages can be retrieved from anywhere in the U.S., 24 hours a day. Future messaging options will include message forwarding.

According to Oberlin, the introduction of Allnet ACCESS is part of Allnet's continuing commitment to providing innovative services for Allnet customers. "Our customers need calling options to make it easier to communicate to others, no matter where they are or what time it is. Allnet Access has been designed to make communication with others fast and simple. We provide customers with a wide array of information services, and advanced features for message delivery."

"And, because we are committed to personal service, we go a step further and say that if you do have a problem or aren't at a touch-tone phone, and operator will be right there to complete your call, hassle free."

Allnet ACCESS service will be available in March. Other features, such as teleconferencing and private speed dial, will be added to the Allnet ACCESS portfolio of services this summer.

LARGO, FL (FEB. 5) PR NEWSWIRE - Paul Chellgren, 34, has been named president of Nokia-Mobira Inc., it was announced today by Jan Loeber, president Nokia Inc.

Chellgren, who was Nokia-Mobira's vice president of sales and marketing, succeeds Leober, who had been acting president. Leober continues his duties as president and CEO of Nokia Inc. in Basking Ridge, N.J.

Nokia-Mobira, the world's leading producer of cellular telephones, has its North American headquarters in Largo, Fla. It is a division of Nokia Mobile Phones Limited, a Finland-based European technology group. The Nokia Corp. is the largest publicly traded company in Finland with sales in excess of $5 billion.

"We are very fortunate to have someone within the organization with Paul's background and talents," said K.P. Wilska, senior vice president of Nokia Mobile Phones. "His more than six years with the Nokia Company and his experience with the cellular industry make him ideally suited to this position."

Before assuming his position as vice president of sales and marketing, Chellgren was national sales manager for the Largo-based company. He joined the Nokia family of companies in 1983 as eastern regional sales manager for Largo's Nokia Data Communications Corp.

Prior to joining Nokia, Chellgren held a variety of management positions with Rogers Foam Corp. a Massachusetts firm in the plastic product business.

Chellgren is a graduate of Siena College in Loudonville, N.Y., where he received a Bachelor of Science degree in marketing and management. He and his wife Marianne live in Oldsmar, Fla. with their two children.

CHICAGO (FEB. 5) PR NEWSWIRE - The Tribune Company (NYSE: TRB) today reported that fourth quarter net income rose seven percent to $67.6 million from $62.9 million due to improved newspaper results, a reduction in net interest expense and a lower effective tax rate. Primary net income per share also rose seven percent in the quarter to $.90 from $.84.

For the full year, net income rose 15 percent to $242.4 million from $210.4 million in 1988. Primary net income per share was $3.17 versus $2.78, up 14 percent.

Revenues rose seven percent for the quarter and five percent for the full year to $668 million and $2.5 billion, respectively. Operating profit was $118.8 million for the fourth quarter, down five percent, and $433.1 million for the year, up four percent. The 1989 fourth quarter and full year include one more week than the comparable 1988 periods.

#90036p0123 02/05/1990 ~PR Newswire

EDMONTON, ALBERTA (FEB. 5) PR NEWSWIRE - Chieftain International Inc. (Toronto: CID) reports year-end reserves, operating and financial highlights for its initial period of operations, April 20 to Dec. 31, 1989.

At Dec. 31, 1989, proved reserves of natural gas in the United States totaled 66.1 billion cubic feet (bcf) (54.1 bcf net of royalties). Proved U.S. gas reserves increased, after production of 4 bcf and before royalty deductions, by 27 percent or 14 bcf from the acquisition date of April 20, 1989.

At Dec. 31, 1989, the company's proved reserves of light oil and natural gas liquids (NGLs) were 6,281,000 barrels (5,487,000 barrels net of royalties). Proved oil and NGLs, after production of 422,000 barrels and before royalty deductions, increased by 26 percent or 1,293,000 barrels from the acquisition date.

Among the oil and gas assets purchased by the company on April 20, 1989, were certain properties in the British Sector of the North Sea to which a value of US$4.6 million (C$5.3 million) was assigned. Proved natural gas reserves were attributed to the two blocks located in the West Sole area. No drilling activity has taken place on these blocks since the acquisition date. The operator recently completed a computer reservoir simulation study which projected a lower recovery factor for the gas in place. This indicated reduction in the proved recoverable reserves would, under the terms of the operating agreement, render the production of Chieftain

International's reserves uneconomic at this time.

The company has engaged an independent, U.K.-based geological and engineering consulting firm to undertake a reserve study in order to determine the reserve quantities and the exploration potential of these blocks and to test the conclusions of the operator's computer study. Further geophysical information has also been obtained and is currently being interpreted. The results of these studies are not expected to be available until after the first quarter of 1990. The company follows country-by-country accounting rules and, therefore, has eliminated US$2.7 million (C$3.1 million) in carrying value associated with these reserves as at Dec. 31, 1989. As a consequence, the company is not currently attributing any proved reserves to its North Sea holdings.

Chieftain International's financial results for the period April 20 to Dec. 31, 1989 were: revenue of US$16,464,000 (C$19,062,000), cash flow of US$9,403,000 (C$10,887,000) and net income of US$828,000 (C$959,000). The net income figure is net of after tax charges of US$1.5 million (C$1.7 million) relating to the U.K. reserves. Per share results were: cash flow of US$0.99 (C$1.15) and net income of US.$0.09 (C$0.10).

Canadian dollar amounts have been calculated using the Dec. 31, 1989, exchange rate of C$1.1578 per U.S. dollar.

WALTHAM, MA (FEB. 5) PR NEWSWIRE - Tecogen Inc. (NASDAQ: TCGN) today reported that its revenues for the quarter ended Dec. 30, 1989, were $4,088,000, compared with $4,730,000 in 1988. Net income was $61,000 compared with $171,000 in 1988.

Dr. Ravinder K. Sakhuja, president and chief executive officer of Tecogen, said, "Lower revenues during the quarter are primarily the result of a decline in contract sales. We expect that our initiatives in research and development, such as work on new applications for our Tecodrive(tm) engines in transportation and other fields, will contribute to sales in coming quarters."

Tecogen develops, manufactures, markets and services a complete line of packaged cogeneration systems, as well as gas-fueled air conditioners, for sale to a wide range of commercial, institutional, industrial, and multi-unit residential users. Tecogen is a public subsidiary of Thermo Electron Corporation.

ST. PAUL, MN (FEB. 5) PR NEWSWIRE - Pentair, Inc. (NASDAQ: PNTA), the St. Paul-based manufacturer of industrial products and paper, today reported 1989 net income of $36.4 million, or $2.85 per fully diluted share. Net sales for the year ended Dec. 31, 1989, were $1,163.6 million. These results compare to net income of $39.8 million, or $3.35 per fully diluted share, on net sales of $823.3 million in 1988.

For the 1989 fourth quarter, net income was $9.1 million or 71 cents per share on a fully diluted basis. Revenues were $284.9 million. In the 1988 fourth quarter, net income was $11.0 million, or 90 cents per share on a fully diluted basis, on net sales of $221.1 million.

"The results achieved in 1989 reflect good performance despite weak markets for paper, and slow housing and construction activity," said Pentair Chairman and Chief Executive Officer D. Eugene Nugent. "Significant improvements in subsidiary manufacturing operations and the benefits of ongoing capital investment and human resource programs helped make 1989 Pentair's second best earnings year."

According to Nugent, Pentair will continued to develop its 10 subsidiaries in order to sustain current earnings levels and position the companies for renewed growth as markets improve. Given continued improvements in the paper and industrial markets during 1990, Pentair anticipates net sales in excess of $1.2 billion.

Pentair, Inc., is a St. Paul, Minn.-based company comprised of 10 businesses which manufacture woodworking equipment, electric power tools, sporting ammunition, electrical enclosures, automotive and industrial lubrication systems, material dispensing equipment, pumps and paper.

ATLANTA (FEB. 5) PR NEWSWIRE - The Nuclear Regulatory Commission (NRC) staff has proposed to fine Georgia Power Company $7,500 for alleged violation of NRC security requirements at the Vogtle nuclear power plant, located near Waynesboro, Ga.

The NRC said the proposed fine was the result of an inspection at the plant on Oct. 23-27, during which NRC inspectors identified repeat violations in the area of safeguards information document control. Details of safeguards and security requirements at nuclear power plants are required by federal regulations to be exempt from public disclosure, but NRC inspectors said the company failed to properly protect and account for documents containing safeguards information.

The NRC said the violation was categorized as a Level 4 violation, which ordinarily does not involve assessment of a civil penalty. However, the agency told Georgia Power that, due to the repetitive nature of the violation, the penalty was being proposed. The agency did say that the fine was reduced by 50 percent because of the company's identification of the problem.

Georgia Power has 30 days from receipt of the notice of violation to either pay the civil penalty or to protest it, in whole or in part.

SEATTLE (FEB. 5) PR NEWSWIRE - Seafirst Corp. today announced the opening of a new International Trade Finance office in Bellevue. Located on the fifth floor of Bellevue Place, 10500 NE 8th St., the office will serve as one of three Washington satellite locations for the bank's international financial services division.

Joining offices in Spokane and Tacoma, the new Bellevue office places Seafirst in the middle of one of the nation's fastest growing international communities.

"Our Eastside client base is growing so rapidly that we find ourselves needing to be closer to the market," said David H. Hayden, manager of Seafirst's International Financial Services Department. "Although we have been doing business on the Eastside for a number of years, our presence here further emphasizes Seafirst's position as the Northwest's premier international bank."

The new office will be managed by Trade Finance's Debbie Austenson, who

has helped Eastside companies conduct international transactions since 1987. The department offers a full spectrum of financial services to importers and exporters, including funds transfer, foreign exchange, letters of credit, and special financing programs specifically designed for Northwest companies involved in international trade.

According to the Washington Council on International Trade, the number of Washington companies involved in international tade has grown by more than 300 percent over the past ten years. Largely concentrated on the Eastside much of that growth is attributable to the influx of foreign companies, but also reflects the number of local companies realizing the potential of marketing their products worldwide.

"More and more small companies are entering the international marketplace " Austenson commented. "The first time around, importing or exporting can seem like a maze of never-ending complications. It's important that these companies have a good experience from the start, and that's why we're here."

Seafirst Corp. is a Seattle-based bank holding company that engages in commercial banking through its principal subsidiary, Seafirst Bank, which has 183 branches in Washington state and two offices in Portland. Seafirst also offers mortgage banking, leasing and credit-related insurance underwriting services.

#90036p0139 02/05/1990 ~PR Newswire

EAST HARTFORD, CT (FEB. 5) PR NEWSWIRE - Orders and options for Pratt & Whitney commercial aircraft engines totaled about $12 billion in 1989 -- a company record.

The end-of-year tally more than doubled the company's 1988 total of about $5 billion.

Pratt & Whitney said the orders and options totaled nearly 2,600 for its PW4000, PW2000 and JT8D-200 engine models, compared to about 1,300 engines in 1988.

The $12 billion includes Pratt & Whitney's share of International Aero Engines, a multi-national consortium based in East Hartford that markets V2500 engines for use on Airbus A320 and McDonnell Douglas MD-90 aircraft.

In 1989, IAE received orders and options for about 850 V2500s worth more than $4.2 billion. Pratt & Whitney's share of the V2500 business last year was valued at about $1 billion. In 1988, IAE had orders and options

for 34 V2500s valued at about $160 million.

Selwyn Berson, president of Pratt & Whitney's Commercial Engine Business, described 1989 as "an acceleration of a business turnaround that began in 1988.

"We were among the major beneficiaries of the airlines' huge buying activity last year," Berson said. "But we also saw growing recognition by the airlines of the long-term value that our modern technology engines offer in terms of greater efficiency and performance and lower cost of ownership."

Berson noted that deliveries of engines ordered in 1989 will not be made for two years or more due to the industry's long production lead times and record backlog. The company does not record an engine order as a sale until the engine is delivered.

Berson said Pratt & Whitney's year-end backlog for commercial engine orders and options was potentially worth about $20 billion, also a record.

During the year, Pratt & Whitney's newest and most powerful engine, the PW4000, won 19 of 39 competitions to power wide-body aircraft. Airlines and leasing companies placed orders and options for some 700 PW4000 engines in 1989 worth a potential $4.7 billion. In 1988, the company received orders and options for 460 PW4000s.

Cumulative orders and options for the PW4000 total more than 1,600 engines. The customer base for PW4000s also broadened in 1989 with the addition of 16 new customers, bringing the total to 39.

The PW4000, which entered commercial service in 1987, has been selected for Boeing 747 and 767, McDonnell Douglas MD-11, and Airbus Industrie A300-600, A310, and A330 aircraft.

Pratt & Whitney's PW2000 became the market leader in its thrust class in 1989, winning more than 75 percent of the orders and options in competitions to power the Boeing 757.

Last year customers placed orders and options for 593 PW2000 engines, more than doubling the previous year's total of 254 orders/options. The PW2000 business in 1989 has a potential value of about $2.7 billion to Pratt & Whitney.

The company said it now has cumulative orders and options for more than 1,100 PW2000 engines.

Orders and options for Pratt & Whitney's JT8D-200 engine series, totaled more than 1,300 engines in 1989, compared to about 600 the year before.

The 1989 orders for JT8D-200s have a potential value of about $3.6 billion.

Pratt & Whitney is a unit of United Technologies Corporation based in Hartford, Conn.

DALLAS (FEB. 5) PR NEWSWIRE - Mary Kay Cosmetics, Inc. announced today a management realignment involving the creation of a sales group to join existing manufacturing, marketing and distribution operating groups. Two senior female executives were promoted in the reorganization of the

nation's second-largest direct selling cosmetics firm.

The newly formed sales group will be headed by Barbara Beasley, promoted to executive vice president. The marketing group will be directed by Curran Dandurand, promoted to senior vice president. The manufacturing group is led by Executive Vice President Pat Howard. The distribution group is overseen by Executive Vice President Larry Harley.

In the announcement, President Richard C. Bartlett said, "We are creating a clearer focus on the needs of our sales organization and our ultimate consumers. We must continue to be preeminent in both the cosmetics and direct selling industries to meet the myriad challenges of the '90s. I am confident these women will provide us committed, talented and inspirational leadership into the exciting decade ahead."

Beasley, former senior vice president of marketing, has directed various marketing and communications departments for the company for nine years. She will be responsible in the sales group for programs and functions that support the sales force of independent beauty consultants.

Dandurand, former vice president of product marketing is also a nine-year Mary Kay employee. She began her career in manufacturing and has extensive experience in market research as well as product marketing. As head of the marketing group she will be responsible for functions focused on consumers.

Other promotions announced included that of Gary Jinks as the company's first regional director. Jinks will direct the sales development activities in all states west of the Mississippi. Three sales development divisions will report to him. Jinks was former Western division director. He continues to report to the senior vice president of sales development and sales administration, Bart Bartolacci.

Erin Ruble, former director of sales administration, has been named sales development director for the Western division. She will be responsible for supporting the Mary Kay sales force in 12 Western states.

Cheryl Halpern, former product manager, responsible for heading the introduction of the company's new skin care packaging in 1989, was promoted to director of product marketing.

Mary Kay Cosmetics, Inc., a leader in personal service, is an international manufacturer of premium cosmetics, including skin care products, toiletries and fragrances, which are distributed through a worldwide network of approximately 200,000 independent Mary Kay Beauty Consultants. The company also sponsors Skin Wellness(SM) -- a national public service program to help educate people about the dangers of skin cancer. The Dallas-based company was founded in 1963 by Mary Kay Ash and

her son, Richard R. Rogers.

HARRISBURG, PA (FEB. 5) PR NEWSWIRE - Bell of Pennsylvania today asked the Public Utility Commission (PUC) to approve the company's plan to offer all business and residential customers a "Customer Satisfaction Guarantee" on specific services.

Under the proposed guarantee, any customer who is not completely satisfied with the services, may notify the company within 60 days of obtaining the service and receive a full credit on his/her bill.

The Customer Satisfaction Guarantee will cover Touch Tone service, subscription IQ services, Identa Ring service, Electronic Service Package (ESP), Residential Services Variety Package (RSVP), voice message services Optional Wire Maintenance, Sentry and Guardian service.

"We are absolutely committed to our customers. If for any reason they are not totally satisfied that these services meet their needs, customers deserve the right to cancel, and Bell of Pennsylvania will credit their bill," said Bill Harral, vice president of External Affairs.

If approved by the PUC, the Customer Satisfaction Guarantee will go into effect in April. All customers will receive notification of the guarantee and the services to which it applies with their April telephone bills.

NEW YORK (FEB. 5) PR NEWSWIRE - J. Richard Munro and Steven J. Ross, co-chairmen and co-chief executives of Time Warner Inc. (NYSE: TWX), today announced they have appointed Arthur Barron chairman of Time Warner Enterprises, effective immediately. Barron will primarily be involved in the development of Time Warner's strategies and ventures, principally abroad.

Time Warner Enterprises is a strategic and business development unit created to comprise various new ventures and minority equity holdings of Time Warner, both domestic and foreign.

Said Barron: "In 1987 I announced my long-planned intention to retire from Paramount at the age of 55, after 26 years of continuous service. The entertainment and media industry is entering one of the most exciting periods in its history, one that will determine the global competitive landscape for decades to come. The past several months have allowed me to consider several possibilities that would allow me to play a role in this exciting future. Time Warner offers a unique opportunity because of its talented and energetic people, enormous resources, and unprecedented array of businesses and opportunities around the world, all positioning it to become a global leader in the next century. Having been a friend, partner and competitor with Time Warner people over the years, I now look forward to helping the company become an even greater global force in our industry."

"We are pleased that a man of such prodigious talent as Art Barron has chosen to join our team," said Ross and Munro. "With his entire career in the entertainment industry and a true internationalist's grasp of the potential that lies ahead of us, Art will be an invaluable asset as we chart what promises to be a very exciting course for Time Warner as the world leader in media and entertainment"

Added Time Warner President N.J. Nicholas Jr., "Time Warner's already strong overseas franchises will serve as a powerful springboard into post-1992 Europe and the Pacific Rim, and we are glad Art will be helping guide the company to that very bright future."

From 1984 until his retirement in July 1989, Barron was president of Paramount Communications Inc.'s Entertainment Group, which includes Paramount Pictures, Madison Square Garden, the New York Knicks and New York Rangers, theater operations, Cinema International Corp., and United International Pictures. Previously he had been executive vice president of the entertainment and publishing group of Paramount Communications, then known as Gulf+Western Inc.

From 1967 to 1983, Barron held several positions, including chief financial officer and executive vice president at Paramount Pictures Corp. and for the previous four years he was vice president and general sales manager for worldwide syndication at Desilu Productions Inc.

OTTAWA, Ontario (FEB. 5) PR NEWSWIRE - SHL Systemhouse Inc. (NASDAQ: SHKIF) of Ottawa announced today that it has been awarded a $7.8 million contract by First City Trustco Inc. of Toronto to manage First City's Canadian data processing operations which will assist First City Trustco in migrating to new technologies.

Under the agreement, Systemhouse will acquire the assets of First City's IBM-based data center in Vancouver and hire 22 First City employees to operate the center which supports the data processing operations of its branches across Canada. Systemhouse will also assist First City in the design and implementation of the new telecommunications network and front-end Local Area Network's (LAN) which will bridge First City's new systems.

Tim O'Connell, First City Trustco's senior vice president and chief information officer, said, "This is a rare moment for us all. The spirit of partnership demonstrated by Systemhouse has provided us the opportunity to concentrate our focus on the future services and products while maintaining continuity of existing quality services to our customers. Of equal importance, is the opportunity for our staff to continue their careers with one of the largest technology companies in the country. A unique win-win situation."

Don Stuckert, general manager of Systemhouse's Vancouver branch, said, "First City is determined to apply innovative and appropriate technologies in support of financial services offered to their customers and we are pleased to be working with the company. Moreover, the addition of 22 professionals to our staff gives us an even more significant presence in British Columbia."

First City Trustco is a Toronto-based financial services company that specializes in innovative financing and investment/advisory services for mid-size Canadian businesses. First City Trustco provides individual

financial services, commercial lending, equipment and real estate financing through First City Trust Company, and merchant banking through First City Capital Markets.

SHL Systemhouse Inc. is one of the largest systems integrators in North America with 1989 revenues of $630 million and 3,100 employees in 70 locations in Canada, the United States and Europe.

DEARBORN, MI (FEB. 5) PR NEWSWIRE - Ford Motor Company (NYSE: F) today reported the following sales figures:

	1990	1989	Pct. Change	Memo: Selling Days 1990	1989
Total Cars					
Jan. 21-31	65,107	79,055	-17.6	9	9
January	165,764	173,369	- 8.1	26	25
Imported Cars					
Jan. 21-31	2,769	3,217	-13.7		
January	6,935	7,534	-11.3		
Total Trucks					
Jan. 21-31	44,046	48,073	- 8.4		
January	114,932	111,943	- 1.3		
Light Trucks					
Jan. 21-31	42,261	46,033	- 8.2		
January	110,906	107,681	- 1.0		
Total Vehicles					
Jan. 21-31	109,153	127,128	-14.1		
January	280,696	285,312	- 5.4		

Note: Percentage changes are based on daily selling rates. Comments: The following may be attributed to Robert L. Rewey, vice president - Sales Operations, Ford North American Automotive Operations.

"Business during January was even better than the numbers suggest, especially in the car market. Our dealers report that, since the holidays their showroom traffic has improved significantly."

"January a year ago was an especially strong fleet sales month for Ford. Due to the downtime at a number of our plants in the early part of this January, assembly and shipment of many fleet units was delayed. As a consequence, our car sales comparisons for the month understate considerably the degree to which retail demand recovered from the

depressed levels of the fourth quarter."

"Our dealers' inventories have been reduced dramatically during the past month. Their days supply of cars, which stood at 97 at year end, now is down to about 65 -- actually quite a bit below the norm for this time of year with the spring selling season rapidly approaching."

RADNOR, PA (FEB. 5) PR NEWSWIRE - Sun Co. (NYSE: SUN) has named Jonathan Waller the company's assistant general counsel and Jack L. Foltz vice president and general counsel of Sun Refining and Marketing Co., a Sun subsidiary.

Waller had been chief counsel for operations, lubes and chemicals at Sun R&M. He succeeds Foltz, who took over as Sun R&M vice president and general counsel from Robert O. Lewers, who retired.

Waller left private practice to join Sun in 1976 in Philadelphia where he worked as a marketing attorney. In 1979 he relocated to Sun's Dallas office to practice oil and gas law. In 1985 he was named chief counsel, corporate affairs, for Sun in Radnor. He joined Sun R&M's legal staff in 1987, working in regulatory and product liability litigation, ultimately becoming chief counsel to Sun R&M's refinery operations and the lubes and chemical business lines. Waller led the legal team that concluded Sun's 1988 acquisition of Atlantic Petroleum Corp.

Waller was born in Fort Monmouth, N.J. He has an A.B. in history and a JD from Villanova, where he was a member of the Villanova Law Review. He lives in Berwyn, Pa.

Since joining Sun in 1980, Foltz was general attorney in charge of the corporate law team and worked on various corporate, securities and finance legal matters. He became Sun's assistant general counsel in 1985 and directed the legal aspects of such projects as the creation of a master limited partnership in 1985 and the 1988 corporate restructuring, which involved the distribution of Sun's domestic exploration and production subsidiary to the company's shareholders.

Prior to coming to Sun, Foltz worked for Shell Oil Co. for 19 years, where he had several positions in the legal department, including general attorney-oil products, administrative assistant to the vice president and general counsel, staff attorney and patent attorney. His responsibilities at Shell included working on legal matters involving patent, licensing,

trademark, copyright, antitrust, unfair competition, advertising, marketing, franchising, contracts, transportation, pipeline, marine and purchasing activities.

Foltz is a native of Terre Haute, Ind. He received a BS degree in chemical engineering from Rose-Hulman Institute, an LLB from The George Washington University Law School and an LLM in trade regulation from New York University. He is admitted to practice law in five states and several federal courts. He lives in Radnor, Pa.

WESTFORD, MA (FEB. 5) PR NEWSWIRE - The Perkin-Elmer Corporation (NYSE: PKN) has agreed to sell its Applied Optics Operations in Garden Grove, Calif., to Optical Corporation of America, a manufacturer of electro-optical components and subsystems.

Terms of the agreement were not disclosed.

Perkin-Elmer's Applied Optics Operations designs, engineers, manufactures and markets electro-optical and optomechanical subsystems and components. Customers are national laboratories and aerospace, defense, and surveillance firms.

Through its Lambda/Ten Optics and MicroCoatings divisions, Optical Corporation of America designs, manufactures, and markets electro- optical components and subsystems. They are used in scientific equipment, optical test applications in analytical and clinical instruments, and in aerospace and lightwave communications systems.

"Applied Optics Operations is ideally suited to OCA's goals and purpose and are compatible with OCA's various businesses," said Donald A. Johnson, president of OCA. "In addition, AOO provides OCA with the benefits of having facilities located in the two largest U.S. optics market areas, the Northeast and California."

AOO is one of several units that Perkin-Elmer is divesting as part of a major restructuring announced last year.

OCA is a privately held company with headquarters in Westford, Mass. Perkin-Elmer, based in Norwalk, Conn., is a major manufacturer of analytical instruments and materials coating systems for a variety of industrial applications.

RESTON, VA (FEB. 5) PR NEWSWIRE - Freddie Mac (NYSE: FRE) today announced a new annual earnings record with net income of $437 million for 1989, or $6.57 per share of voting common stock, up 15 percent over last year's earnings of $381 million, or $5.73 per share

The corporation also announced a quarterly record of $115 million in fourth quarter 1989 income, or $1.72 per share, a 19 percent increase from the $97 million, or $1.45 per share, reported for fourth quarter 1988 and

up 3 percent from the $112 million, or $1.68 per share, reported in the third quarter of 1989.

Freddie Mac also reported earnings of $426.52 per share for its 100,000 shares of outstanding non-voting common stock in 1989. This compares with $370.99 in earnings per share of non-voting common stock for 1988. All shares of the non-voting common stock, which do not trade, are held by the 12 district Federal Home Loan Banks.

Freddie Mac is a stockholder-owned corporation chartered by Congress in 1970 to create a continuous flow of funds to mortgage lenders in support of home ownership and rental housing. By linking the capital markets with the mortgage markets, Freddie Mac brings the efficiencies and lower costs of the secondary mortgage market to the lender, the investor and the homebuyer. Over the years, Freddie Mac has helped finance one in eight American homes, including more than half a million apartment units.

#90036p0165 02/05/1990 ~PR Newswire

NEW YORK (FEB. 5) PR NEWSWIRE - BMI announced today it has renewed the copyright infringement litigation against Home Box Office Inc. it had originally filed on Dec. 28, and amended in late January. The litigation had been put in abeyance during January after representatives of the pay TV programmer had agreed to a one-month extension of its BMI license agreement under a substantially increased fee structure.

"When HBO's counsel became directly involved in new litigation against BMI in suits filed in Washington, D.C. and California" said Edward W. Chapin, BMI vice president and general counsel, "and Time- Warner Cable systems were the plaintiffs in the California suit, it became clear to us that we would have to renew our earlier infringement litigation against HBO."

The BMI suit seeks preliminary and permanent injunctions to prevent the pay cable programmer from using BMI repertoire on the Home Box Office channel without a music license, and the new amendment to the complaint asks the court for a declaratory ruling that BMI may proceed with its plan to license both the national cable programmer and local cable system operators, each of whom receive revenues for the use of BMI's repertoire.

BMI is a non-profit-making corporation representing more than 100,000 songwriters, composers and music publishers.

LOS ANGELES (FEB. 5) PR NEWSWIRE - A science team from Logicon's (NYSE: LGN) R&D Associates subsidiary will continue to study the lethality of laser and particle beam weapons being developed for the U.S. Strategic Defense Initiative (SDI) under a $4.7 million contract that funds research through Sept. 30, 1992, the company said today.

Work under the contract from the Defense Nuclear Agency will be performed by company scientists based in Los Angeles and Albuquerque, N.M. RDA's previous research in the field was funded by the U.S. Air Force. The company will provide technical support in studying the lethality of laser and particle beam weapons that might be used against ballistic missiles and defense suppression weapons.

Work ranges from basic research on the interaction of materials with directed energy beams, to studies of how complete systems respond after being damaged by beams. Research includes small-scale experiments with laboratory systems to help scientists understand more about the basic effects of energy beams strikes and the extrapolation of the results to large-scale systems.

Component-level validations also are planned during the study. Logicon is a leader in providing advanced technology systems and services to support national security, civil and industrial needs.

DETROIT (FEB. 5) PR NEWSWIRE - MCN Corporation (NYSE: MCN) today reported earnings per share for 1989 at $2.20, compared to $2.17 per share for 1988. Earnings per share for 1988 before an extraordinary item were $2.32.

Earnings for the year were $49.8 million vs. $44.6 million for 1988. Earnings for the year 1988 were $47.7 million before an extraordinary item.

According to MCN Chairman Alfred R. Glancy III, "The increase in earnings in 1989 was primarily due to weather-related increased gas sales by our principal subsidiary, Michigan Consolidated Gas Company." He added, "MCN's 1989 earnings translate to an 18.2-percent return on common equity, reflecting the sixth consecutive year of superior returns for the company."

MCN Corporation is the holding company for Michigan Consolidated Gas Company, a natural gas distribution, transmission and storage company serving more than 1 million customers in 400 communities throughout

Michigan, and for MCN Investment Corporation which owns subsidiaries involved in international data processing, natural gas technology and energy services.

#90036p0171 02/05/1990 ~PR Newswire

OAK BROOK, IL (FEB. 5) PR NEWSWIRE - Federal Signal (NYSE: FSS) announced its audited earnings per share for 1989 increased 23 percent over the prior year's amount. Its board of directors declared a 3-for-2 split in the company's common stock. The board also declared the regular first quarter dividend for 1990 of $.16-1/2, an increase of 18 percent, on post-split shares outstanding. The higher quarterly dividend of $.16-1/2 compares to prior quarters' dividends of $.14 per share on a post-split basis. Both the cash dividend and the additional shares to be issued as a result of the 3-for-2 split will be distributed on March 1, 1990, to holders of record at the close of business on Feb. 14, 1990. The quarterly dividend represents the 168th consecutive quarterly cash dividend paid to common shareholders of the company.

The 3-for-2 stock split will be made in the form of a 50 percent stock distribution by issuing one additional share for every two shares of common stock issued and outstanding on the record date. A cash payment will be made equal to any fractional share interest. Brokers, nominees and custodians will have from Feb. 14, 1990 through Feb. 21, 1990 to notify the disbursement agent, Harris Trust and Savings Bank of Chicago, of their requirements for full and fractional shares for each of their customers.

Federal's earnings per share increased in 1989 to $1.50 per share ($2.25 on a pre-split basis), up 23 percent from $1.22 per share ($1.83 on a pre-split basis) in 1988. Net income of $23.0 million in 1989 was 24 percent above 1988's net income of $18.6 million. Return on shareholder's equity rose to 18.7 percent in 1989 compared to 17.0 percent in 1988.

Consolidated sales in 1989 reached a record $414.2 million, 10 percent higher than the $375.4 million posted in 1988. Backlogs increased 24 percent to $181.4 million at Dec. 31, 1989, compared to $146.5 million a year earlier. All four of the company's operating groups increased sales and earnings in 1989 over the prior year with Sign Group achieving the greatest increases.

The Sign Group achieved increases of 36 percent and 166 percent in sales and earnings, respectively, over 1989. Sign Systems, the Sign Group's most recent acquisition, accounted for approximately one-half of the increases. Higher sales by the remainder of the group and broad success in reducing operating costs accounted for the balance of the earnings

increase.

Vehicle Group sales and earnings increased 9 percent and 8 percent, respectively, over 1988 levels. Elgin Sweeper significantly improved its earnings in 1989 while Emergency One's 1989 earnings were essentially even with 1988's record levels.

Sales and earnings of the Tool Group increased 8 percent and 12 percent, respectively, in 1989. Higher sales volume, including an 18 percent international increase, and improved operating margins resulted in the significant earnings improvement.

Signal Group earnings increased 19 percent as sales from continuing businesses increased 7 percent. Signal Products Division continued to emphasize improvement of its internal operations. In addition, Signal Products discontinued certain unprofitable product lines and reduced its working capital significantly during 1989. Federal APD and Autocall also posted strong sales and earnings gains over 1988 amounts.

Federal's consolidated net income for the fourth quarter of 1989 was $6.3 million, 22 percent above the 1988 fourth quarter. Earnings, adjusted for the 3-for-2 stock split, were $.41 per share, a 21 percent increase over 1988's fourth quarter. Consolidated sales were $106.7 million in the fourth quarter, 9 percent above 1988's fourth quarter of $97.9 million.

ARLINGTON HEIGHTS, IL (FEB. 5) PR NEWSWIRE - Motorola's MicroTAC(TM) Personal Telephone has been named a winner of Japan's 1989 Nikkei Award for Creative Excellence in Products and Services. Selected from a field of nearly 20,000 new products introduced in Japan during 1989, the MicroTAC is one of only a handful of U.S. products to win the much-coveted Nikkei Award.

Motorola's win of the Nikkei Award stands as a positive symbol of an American company's ability to compete as a world-class manufacturer in the worldwide technology market.

Established in 1983, the Nikkei Newspaper Award is one of Japan's highest honors. The newspaper is considered to be the U.S. equivalent to the Wall Street Journal. Motorola's senior vice president and general manager of the Cellular Subscriber Group, Rick Paggeot, accepted the award at a ceremony held in Tokyo on Feb. 1.

Other winners in 1989's Creative Excellence in Products and Services

category include Toshiba's personal lap-top computer, Dyna Book; Sony's video camera, the Passport; Japan's convention center, Makuhari Messe; and Japan's Satellite Communication Services.

Motorola is the leading source for the majority of cellular telephones, systems and services in use around the world. The company's dedication to quality earned it the prestigious Malcolm Baldrige National Quality Award, the highest level of national recognition for quality that a U.S. company can receive.

JACKSONVILLE (FLA. FEB. 5) PR NEWSWIRE - Record earnings from operations, a 4 for 3 stock split and a 13 percent cash dividend increase were reported today by American Heritage Life Investment Corporation (NYSE: AHL).

Earnings from operations for the year ended Dec. 31, 1989 were $11,920,392 up 11.9 percent from the $10,649,624 for the year ended Dec. 31, 1988. This represents $2.65 a share for 1989 versus $2.36 for the same period in 1988. Including the sale of the old Home Office property in the fourth quarter of 1989 and realized capital losses, 1989 net earnings were $14,937,953, compared to $10,749,195 for the year 1988, a 39 percent increase.

Earnings from operations for the three months ended Dec. 31, 1989 were $2,984,015, up 11.4 percent from the $2,679,722 for the same period in 1988. This represents $.66 a share for the fourth quarter 1989 versus $.60 for the fourth quarter 1988. The aforementioned sale of Home Office property in the fourth quarter 1989 and realized capital losses made fourth quarter 1989 net earnings $5,845,746 compared to $2,228,293 for the fourth quarter 1988, a 162.3 percent increase.

The board of directors declared a $0.10 dividend a share payable Feb. 27, 1990 to shareholders of record Feb. 16, 1990.

The board of directors also declared a 4 for 3 stock split in the form of a stock dividend, payable Feb. 27, 1990 to shareholders of record Feb. 16, 1990 and a 13 percent cash dividend increase to $.085 a share a month on the shares outstanding after the stock split, payable March 23 and April 27, 1990 to shareholders of record March 12 and April 16,1990, respectively.

Total income for the year ended Dec. 31, 1989 was $201,628,521 compared to $186,436,156 for the same period last year, up 8.1 percent.

The company's assets at Dec. 31, 1989 were $610,910,321 compared to $504,134,042 at Dec. 31, 1988; equity a share at Dec. 31, 1989 was $24.31 compared to $21.19 at Dec. 31,1988.

This is the company's fourteenth consecutive annual increase in operating earnings and the twenty-first consecutive annual dividend increase.

PRINCETON, N.J. (FEB. 5) PR NEWSWIRE - Cytogen Corp. (NASDAQ: CYTO) announced today the election of John M. Pietruski to its board of directors.

Pietruski is the former chairman and chief executive officer of Sterling Drug Inc. Since his retirement from Sterling, Pietruski has served as president of Dansara Co., a privately held management consulting firm. He is a director of Hershey Foods Corp., General Public Utilities Corp., Lincoln National Corp. and the National Council of Better Business Bureaus.

Pietruski's career began at Proctor & Gamble Co., where he held various management positions. Subsequently, he served as president of the Hospital Supply, Manufacturing and Medical Products divisions of C.R. Bard Inc. In 1977, Pietruski was named group vice president of Sterling Drug Inc. and became a member of the board of directors in 1978. In his 11 years at Sterling, he served as executive vice president, and president and chief executive officer. He was elected chairman in 1985.

A Phi Beta Kappa graduate of Rutgers University, Pietruski received his bachelor of science degree in business administration. He currently is a member of the Board of Overseers of the Rutgers University Foundation.

"Mr. Pietrusky's election to the Cytogen board is timely," said George W. Ebright, president and chief executive officer. "Jack's background and experience will be invaluable to Cytogen as we complete our transition from a research-based company to an organization focused on product commercialization."

Cytogen Corp. is a biopharmaceutical company which has developed proprietary systems for linking drugs and diagnostics agents to monoclonal

antibodies in order to optimize the function of the antibody as a delivery vehicle. With major emphasis on human cancer, current product development efforts at Cytogen are focused on improved cancer diagnostic imaging agents and the targeted delivery of cancer therapeutic agents directly to tumor sites.

TORONTO (FEB. 5) PR NEWSWIRE - Petrolantic today announced that it has signed a letter of agreement to participate in a joint venture with a private Canadian oil and gas company to acquire, explore and develop oil and gas properties in Western Canada.

The joint venture represents the company's first participation in a Canadian project and comes at a time when the company said it feels tremendous opportunities exist to acquire and develop oil and gas properties to take advantage of today's low finding costs.

Petrolantic is a debt-free oil and natural gas producer, and operator of natural gas gathering systems.

Petrolantic's common shares were recently approved for trading on NASDAQ under the trading symbol PLANF and trade on the Over-the-Counter market in the province of Ontario (COATS system) under the trading symbol PTLR.

NEW YORK (FEB. 5) PR NEWSWIRE - Kidder, Peabody & Co. Friday announced two key additions to the Health Finance Group of its Municipal Finance Department.

C. Gordon Howie has been named senior vice president in the San Francisco office and will manage Kidder's health care clients in the Western region. He is returning to Kidder after a two-year absence.

During his career, Howie has managed more than $2.5 billion in numerous hospital financings including extensive experience in developing financing programs for multi-hospital systems and tertiary care facilities in a variety of institutional and regulatory situations.

Howie was a senior consultant in the Health and Medical Division of Booz,

Allen & Hamilton, Inc., management consultants. Howie was a senior health care banker in Kidder, Peabody's Health Finance Group from 1976 to 1987, and has been at First Boston Corp. since 1987.

Howie holds a bachelor of arts in economics from Harvard College and a master of business administration from Harvard University Graduate School of Business Administration, where he concentrated in finance and managerial economics.

Hillary J. Demby has also joined the Health Finance Group of Kidder, Peabody & Co. as a vice president. She will be based in Kidder's headquarters in New York City.

Prior to joining Kidder, Peabody, Demby was employed as a health care credit analyst at Standard & Poor's Corp. and as a vice president at Bond Investors Guaranty.

Demby is a graduate of Yale University School of Medicine, Department of Epidemiology and Public Health and holds a bachelor of arts from New York University.

"We are extremely pleased about Gordon Howie's return and with Hillary Demby joining us," said Kathy Costine, managing director in Kidder, Peabody's Municipal Finance Department. "Gordon Howie is recognized as one of the best health care bankers in the country, and together with Hillary's analytical expertise, we have made a significant enhancement to our team.

"Both have impressive career backgrounds in the health care finance marketplace, and are confident they will help bolster our position in the field."

MINNEAPOLIS (FEB. 5) PR NEWSWIRE - Varitronic Systems Inc. (NASDAQ: VRSY) said today that sales for its second quarter ended Jan. 31 were approximately $10.1 million, compared with sales of $9.8 million in the preceding quarter which ended Oct. 31, 1989, and $13.9 million in the second quarter of fiscal 1989. Earnings per share for the second quarter of fiscal 1990 are expected to be within the range of 17 cents to 19 cents per share, compared with less than 1 cent per share in the preceding quarter and 35 cents per share in the comparable quarter of fiscal 1989.

Scott Drill, president and chief executive officer, said, "Second quarter

earnings reflect the benefit of reduced operating expenses resulting from our Nov. 2, 1989, restructuring."

MINNEAPOLIS (FEB. 5) PR NEWSWIRE - First Bank System Inc. (NYSE: FBS) today announced that three executives have resigned from the company in conjunction with restructuring actions.

Richard W. Schoenke, chief credit and administrative officer, Jay B. Walters, president, Commercial and Investment Banking, and Richard L. Shepley, executive vice president, Credit Policy, have left First Bank System, effective immediately.

According to John F. Grundhofer, chairman, president and chief executive officer, Darrell G. Knudson, vice chairman, will lead the restructuring process currently underway in Commercial and Investment Banking. These actions, designed to strengthen the company's credit processes, include revisions to current loan underwriting standards, continued reduction of commercial assets, evaluation of current lender performance standards and compensation programs and review of the bank's internal lending limits.

"This transition will allow us to better serve our customers as we continue to make needed changes in our lending focus, strengthen our credit policies and improve the performance of our loan portfolio," Grundhofer said.

Schoenke, 46, joined FBS in 1979 as vice president, National Banking, at First Bank Minneapolis. During his career at FBS, he served in a number of executive positions in commercial banking, credit and administration.

Walters, 43, started his career with FBS in 1983 as president of First Bank Milwaukee. He moved to Minneapolis in 1987 and has been involved in commercial banking since that time.

Shepley, 44, joined First Bank St. Paul in 1969 as a commercial lending officer. He's held various lending and executive positions since that time and has held his current position since 1986.

WASHINGTON (FEB. 5) PR NEWSWIRE - National Cooperative Bank (NCB) today reported net income of $14.4 million for the 12 months ended Dec. 31, 1989 an increase of 3.1 percent over the $14 million earned in the same period last year. This represents the sixth consecutive year in which NCB has reported a net income increase.

Total assets also hit a record high last year, rising 20.7 percent to $430.2 million.

Other significant results at year-end included the signing of a bill into law that clarifies the post-1990 repayment schedule of NCB's Class A Notes to the U.S. Treasury and the rating of NCB Capital Corporation's commercial paper program.

Thomas S. Condit, president and chief executive officer, attributed the increased year-end earnings to strong commercial loan growth, increased credit quality and sharply increased earning assets, which stood at $424.3 million at year-end, up 20.7 percent.

Condit noted that the Treasury agreement "provides NCB with significant flexibility for asset/liability management and guarantees us a stable capital base that will facilitate continued growth well into the next century."

Charles E. Snyder, president of NCB Capital Corporation and chief financial officer of NCB, said that, as a result of the commercial paper program's ratings, "institutional investors from throughout the country will buy our debt based solely on the creditworthiness of NCB. That's a major step for us, and it marks the financial community's continuing growth of confidence in our future."

For the fourth quarter, NCB's net income was $4 million, a decrease of 17.4 percent from the same period in 1988. Net interest income, however, was up 26.8 percent for the quarter and 19.1 percent for the year. The net interest margin improved 45 basis points for 1989.

Other income decreased 48.2 percent for the year, reflecting substantial one-time gains on loan sales occurring in 1988.

#90036p0203 02/05/1990 ~PR Newswire

WILMINGTON, DE (FEB. 5) PR NEWSWIRE - GWC Corp. (NASDAQ-NMS: GWCC) today reported consolidated net income of $16,540,000 or $1.65 per share, on revenues of $140,507,000 for the year ended Dec. 31, 1989, as compared to net income of $18,048,000 or $1.80 per share, on revenues of $130,335,000 for 1988.

Operating income from utility operations declined in 1989 due to lower volumes of water sold as a result of the unusually wet weather and due to higher operating expenses. Operating income from non-regulated operations increased due to higher shipments by Infilco Degremont Inc. The increase in other income in 1989 resulted from higher gains from the sales of utility and non-utility assets, partially offset by a writedown in the carrying value of the company's digital mapping operation.

Net income during the fourth quarter of 1989 was $4,368,000 or $.43 per share, on revenues of $40,954,000 compared to net income of $4,474,000 or $.44 per share, on revenues of $37,003,000 during the comparable period in 1988. Operating income from utility operations was lower in 1989 due to higher operating expenses, while operating income from the non-regulated operations and other income increased for the reasons stated above.

GWC Corp., headquartered in Wilmington, is a water utility holding company that is also engaged in non-regulated activities. Its major subsidiary, General Waterworks Corp., owns 30 regulated utility subsidiaries operating in 14 states. The company's common stock is traded on the NASDAQ National Market System under the symbol "GWCC." There are 10 million shares of common stock outstanding.

ST. LOUIS (FEB. 5) PR NEWSWIRE - LaBarge Electronics has been awarded contracts totaling $9 million for the production of automatic direction finder (ADF) systems for use aboard U.S. Army helicopters. The announcement was made today by Craig E. LaBarge, president and chief operating officer of LaBarge, Inc. (AMEX: LB), the parent company of LaBarge Electronics. The contracts were awarded by the U.S. Army.

LaBarge has produced the systems since 1985. The contracts will continue LaBarge's involvement in the program for an additional 18 months. The program is expected to be further extended by future U.S. Army requirements and numerous foreign sales opportunities which LaBarge is currently supporting.

The equipment is being produced and tested at LaBarge Electronics' Tulsa, Okla., facility. Approximately 60 LaBarge employees are working on the program.

LaBarge, Inc., is engaged in the contract engineering and manufacture of sophisticated electronic systems and devices and complex interconnect assemblies for defense/aerospace and commercial electronics markets.

#90036p0208 02/05/1990 ~PR Newswire

DAVOS, SWITZERLAND (FEB. 5) PR NEWSWIRE - Speaking to corporate executives and economic leaders at the 1990 annual meeting of the World Economic Forum in Davos, Switzerland, Tom Stephens, president and chief executive officer of the Manville Corp. (NYSE: MVL), candidly shared the lessons Manville learned as a result of the asbestos health tragedy that resulted in one of the most complex product liability issues to ever face an international corporation.

"I'm not here to give a lesson in bankruptcy. I'm here to talk about avoiding problems, not how to fix them," said Stephens.

"Nothing like the asbestos nightmare must ever happen again. Manville has learned some unique lessons stemming from the exile that threatened the very existence of our company. For any part of the world economic community not to learn from Manville's experiences would be foolish," he said.

Stephens explained that keeping a clean but low profile when it comes to health, safety and environmental issues is no longer enough. "If we in industry are merely complying with today's regulations and existing standards we aren't really doing all of the job. We are failing to represent the best interest of our investors and the long-term best interest of our companies and the communities in which they exist."

"Just as citizens of the world are sending a clear signal about political freedom, they are clear in their message to industry," said Stephens. "In the U.S., for example, a strong majority now believes that environmental protection and improvements must be made -- regardless of costs."

Stephens explained that the bankruptcy taught the company to listen to

society very carefully, not to sit back and rely on today's law, but to anticipate the future. "We will be held accountable in the future for what we're doing today. Just as with asbestos, those companies that put toxic material in landfills twenty years ago will get no comfort from the fact that the rules were different then."

"We also learned," Stephens explained, "that as progressive business leaders, we must have the courage to promote actions that reflect what is ethical, not just what is expedient."

"Words don't find environmental solutions and they don't initiate proper product testing. Actions do! Health, safety and environmental issues are not like wine," said Stephens. "They do not improve with age. Left to the course of least resistance, they get worse not better."

"Tired, worn out attitudes about business and industry must not stand in the way of the new partnerships which must be formed to promote environmental consciousness and safeguards," he explained. "The only way, it seems to me, to make those worn out attitudes disappear, is for business leaders to seize the environmental initiative."

"We can waste a lot of time debating who is responsible for the rap business is taking, and we can engage in defensive tactics. That's exactly what Manville did until we finally realized that both of those strategies were exercises in futility," he stressed. "We started to make progress when we stepped up to the plate and demonstrated that we were really prepared to take responsibility for our part in the problems we created."

Manville, founded in 1858, is an international manufacturing and natural resources company. The company's primary businesses include paper and wood products, packaging, fiber glass and industrial insulation products, roofing systems and filtration and minerals. The corporation's headquarters is in Denver.

#90036p0214 02/05/1990 ~PR Newswire

WASHINGTON (FEB. 5) PR NEWSWIRE - The Navy has awarded a contract to Ford Aerospace to pursue development of a new focal plane array technology that could revolutionize the accuracy and reliability of infrared sensors. If successful, the work could slash the cost of making such sensors.

The focal plane array is the heart of an infrared imaging system. It is the sensor that detects the image of any object that is emitting thermal radiation -- or heat. The array itself is comprised of individual infrared detectors.

Ford Aerospace has long been a leader in the development and production of infrared sensors, including those used on the Sidewinder missile. Over the past several years, the company has been funding its own search for ways to improve focal plane array technology and now believes it has scored such an advance.

The laboratory success involves the combination -- on a single silicon chip -- of the infrared photosensors and the electronic circuits needed to process the data they gather. In current systems, two chips of different material must be used and it is extremely difficult to link them physically and electronically.

To put the components on one chip, Ford Aerospace has devised a means of "growing" a single crystal compound of mercury, cadmium and tellurium directly upon a silicon chip containing the required signal processing circuitry. The company predicts the new technique will make possible infrared systems with images so clear they exceed those of regular television.

The Navy, through its Naval Research Laboratory, reviewed the Ford Aerospace research this summer along with approaches advocated by several other competitors. NRL then selected Ford Aerospace from the field and awarded a two-phase demonstration contract totaling about $2.2 million.

Ford Aerospace, a wholly owned subsidiary of Ford Motor Company (NYSE: F), is a leader in command, control, communications and intelligence systems; tactical weapon systems; satellites and space systems; and professional and technical services. The corporation is headquartered in Newport Beach Calif. with major operations in California, Colorado, New Mexico, Ohio, Pennsylvania, Texas and the Washington metropolitan area.

NITRO, WV (FEB. 5) PR NEWSWIRE - Heck's Inc. (NASDAQ: HEXXE) announced today that definitive agreements, including an Asset Purchase Agreement and a Management Agreement, have been completed and are in effect in connection with the company's previously announced letter of intent with Retail Acquisition Corp. ("R.A.C.").

Under the Management Agreement, R.A.C. will manage the reduction of Heck's existing inventories, while at the same time introducing new merchandise in preparation for a grand opening of Heck's 55 stores under a new name in March 1990. Upon consummation of the contemplated agreements, Heck's will no longer conduct any retail operations and will concentrate its ongoing resources on developing its wholesale operation, which currently distributes automotive merchandise through the Steel City Products division in Pittsburgh.

Under the Management Agreement, R.A.C. will infuse up to $2 million, if required, to pay all obligations and ongoing expenses of Heck's retail division. Pursuant to the Asset Purchase Agreement, R.A.C. will, subject to the approval of Heck's shareholders, acquire all the assets and will assume substantially all the liabilities of Heck's retail division. The company anticipates that the shareholders' meeting to consider the sale will be held in late March or early April. If the sale is approved, Heck's will receive nominal consideration for its retail operations, but will be relieved of all related expenses and obligations of those operations. The retail division's base rental expenses to be assumed by R.A.C. are approximately $3.5 million per annum and mortgage liabilities to be assumed by R.A.C. will exceed $22 million. If shareholder approval of the Asset Purchase Agreement is not obtained, R.A.C. will have the option to operate its new retail business under long-term lease agreeements in up to 20 stores. If the contemplated transactions are not consummated under certain circumstances, Heck's will pay R.A.C. a fee of $2 million and reimburse R.A.C.'s expenses up to $350,000.

Under a related Supply Agreement with respect to the retail locations it acquires from Heck's, and any new retail locations opened in the future, R.A.C. will purchase automotive products exclusively from Heck's Steel City division for a period of three years. In return, R.A.C. will be granted warrants to purchase Heck's common stock at a price based upon the average market price over the 10-day period ended Feb. 2, 1990. The number of warrants will vary, depending on the level of purchases made by R.A.C. from Steel City, up to a maximum of 7 percent of Heck's stock if

purchases over the three-year period are increased over current levels by approximately $10 million.

John R. Isaac Jr., Heck's chairman, said that the agreements with R.A.C. enable the company to curtail the operating losses of its retail division. Following approval of the Asset Purchase Agreement by its shareholders, Heck's will operate only the Steel City division, which has been consistently profitable, and expansion opportunities for this business are under consideration. In addition, Heck's will have a substantial net operating loss carryforward.

Maarten Hemsley, Heck's chief financial officer, noted that the company has not yet issued final financial statements in respect to the quarter and nine months ended Nov. 25, 1989, pending completion of the definitive agreements with R.A.C. Such financial statements are now expected to be issued within the next two weeks and will reflect operating losses (including interest expense) of the discontinued retail division of about $10 million for the third quarter, together with a substantial write-off reflecting the discontinuance of the retail business. Although this amount has not been finalized, it is expected that Heck's net worth following such write-off will not be less than $7 million.

#90036p0219 02/05/1990 ~PR Newswire

WHITE PLAINS, NY (FEB. 5) PR NEWSWIRE - NYNEX Information Solutions Group Inc., today introduced a unique new product for integrated network management -- NYNEX ALLINK(TM) Operations Coordinator. The announcement was made at Communications Networks '90 in Washington.

NYNEX ALLINK Operations Coordinator presents a unique solution to the typical management problem in complex corporate networks. These networks are made up of a number of elements, such as T1 switches, mainframe computers, modems, multiplexers, PBXs and local area networks. Each of these elements typically is managed by its own, insulated management device -- a network element manager -- which is unable to communicate or interact with other element managers operating on the network. No consolidated view of the network is available.

NYNEX ALLINK Operations Coordinator is designed to solve this problem by collecting information from the element managers and presenting an integrated overview of the network.

It is uniquely able to interface with virtually any network element manager on a corporate network, using the supplier's own protocols. This protocol-independence preserves the users' existing investment in network

management systems.

NYNEX ALLINK Operations Coordinator does more than simply collect information from the various element managers. It uses artificial intelligence to filter, correlate and consolidate the information, based on a customer's needs. The end-result is a comprehensive, integrated view of the entire network, end-to-end and in real-time, that enables operators to make effective and efficient network management decisions.

NYNEX ALLINK Operations Coordinator is complementary to NetView(TM), IBM's network management system for networks based on IBM's System Network Architecture (SNA). NYNEX ALLINK Operations Coordinator can use an installed NetView system to collect information on a network's SNA elements and integrate it with non-SNA element information in a comprehensive overview. Alternatively, NYNEX ALLINK Operations Coordinator can collect information from non-SNA element managers and pass it along to NetView for integration.

A key feature of the NYNEX ALLINK Operations Coordinator is its flexibility. It can be used to centralize network management functions in a single operator position, or can distribute those functions among a number of different operator positions, based on geographical location, operational function, or network configuration.

The first two sales of the product -- to National Westminster Bank of New York and CNCP Telecommunications of Toronto, Ontario -- were also announced today.

NYNEX ALLINK Operations Coordinator is the first available module of the NYNEX ALLINK Network Management Solution, an integrated set of software-based products and services that is being developed to provide comprehensive network management functionality, including network configuration, administration, performance, design, remote control and chance management. With this solution, NYNEX also provides the professional services to help you plan, design, customize, install and train.

NYNEX Information Solutions Group, a subsidiary of NYNEX Corporation (NYSE: NYN), offers systems and network integration, integrated network management solutions, applications software and related professional services to a number of markets, including financial services, state and local government, retailing, health care and manufacturing. NYNEX Information Solutions Group has over 6,000 employees in 13 countries and more than 30 U.S. cities.

WHITE PLAINS, NY (FEB. 5) PR NEWSWIRE - NYNEX Information Solutions Group Inc. today announced their second sale of NYNEX ALLINK(TM) Operations Coordinator, its just released integrated network management solution, to CNCP Telecommunications of Toronto, Ontario. The announcement was made at Communication Networks '90 in Washington.

CNCP Telecommunications, the second-largest provider of long distance telecommunications services in Canada, will use NYNEX ALLINK Operations Coordinator to help manage its sophisticated coast-to-coat network. Through this network, CNCP provides a range of switched and dedicated voice and data services to major Canadian customers, including the Canadian federal and provincial governments and a majority of Canada's financial institutions.

At CNCP, NYNEX ALLINK Operations Coordinator will manage T1 and X.25 data lines, multiplexers, PBXs, and a coast-to-coast Integrated Services Digital Network (ISDN).

NYNEX ALLINK Operations Coordinator is a software-based integrated network management system for heterogeneous corporate networks. It uses artificial intelligence to collect, consolidate and correlate information provided by managers already existing on each element of the network -- such as T1 managers, PBX managers and LAN managers. The product is protocol-independent, unique in its ability to interface with virtually any element manager using the manufacturer's own protocols.

CNCP Telecommunications is Canada's only national telecommunications facilities-based carrier with fiber-optic, digital microwave and satellite networks.

CNCP Telecommunications provides a wide range of cost-effective solutions and sophisticated voice, data and message services across Canada, the United States and overseas.

NYNEX Information Solutions Group, a subsidiary of NYNEX Corporation (NYSE: NYN), offers systems and network integration, integrated network management solutions, applications software and related professional services to a number of markets, including financial services and state and local government. NYNEX is currently installing NYNEX ALLINK Operations Coordinator at National Westminster Bank USA in New York. NYNEX Information Solutions Group has over 6,000 employees in 13 countries and more than 30 U.S. cities.

WHITE PLAINS, NY (FEB. 5) PR NEWSWIRE - NYNEX Information Solutions Group Inc. today announced the first sale of NYNEX ALLINK(TM) Operations Coordinator, its just-released integrated network management solution, to National Westminster Bank USA. The announcement was made at Communication Networks '90 in Washington.

NatWest USA will use NYNEX ALLINK Operations Coordinator to manage two complex networks, the branch network and the back-office network, covering New York and New Jersey. Installation is currently underway.

NYNEX ALLINK Operations Coordinator is a software-based integrated network management system for heterogeneous corporate networks. It uses artificial intelligence to collect, consolidate and correlate information provided by managers already existing on each element of the network -- such as T1 managers, PBX managers and LAN managers. The product is protocol-independent, unique in its ability to interface with virtually any element manager using the manufacturer's own protocols.

At NatWest USA, NYNEX ALLINK Operations Coordinator initially will integrate information provided by NetView(TM), which monitors the IBM SNA environment; a Memotech Infinet modem subnetwork; and an Avanti T1 backbone system.

The two networks are managed out of the NatWest USA Network Control Center in Melville, Long Island, N.Y. The branch network serves 265 branches, and supports teller, platform and automatic teller machine functions in an IBM-based integrated network. The back-office network, also IBM-based, supports 3,500 terminals.

NYNEX Information Solutions Group, a subsidiary of NYNEX Corporation (NYSE: NYN) offers systems and network integration, integrated network management solutions, applications software and related professional services to a number of markets, including financial services and state and local government. NYNEX has also won a contract with CNCP Telecommunications of Toronto, Ontario, to supply NYNEX ALLINK Operations Coordinator. NYNEX Information Solutions Group has more than 6,000 employees in 13 countries and more than 30 U.S. cities.

National Westminster Bank USA is a subsidiary of National Westminster Bancorp Inc., which, along with its New Jersey subsidiary, National Westminster Bank NJ, has combined assets of $22 billion and more than 265 branch offices in New York and New Jersey.

#90036p0223 02/05/1990 ~PR Newswire

NEW YORK (FEB. 5) PR NEWSWIRE - Capital Cities/ABC, Inc. (NYSE: CCB) reported record revenues and earnings for 1989, according to an announcement today by Thomas S. Murphy, chairman.

Consolidated net income for 1989 was $485,727,000, an increase of 25 percent from the $387,076,000 earned in 1988. Earnings per share for 1989 were $27.25, a gain of 22 percent over the $22.31 reported in 1988. Average shares outstanding for 1989 were 17,825,000 compared with 17,350,000 in 1988, the increase resulting from the 1988 exercise of warrants (issued in connection with the acquisition of ABC in 1986), partially offset by repurchases of the company's common stock in 1989.

Net revenues for 1989 were $4,957,394,000, an increase of 4 percent over 1988, with the broadcasting operations also increasing 4 percent. The television network reported a slight increase in revenues. Strong advertising demand in the second half of 1989 offset the impact of incremental prior year revenues from the 1988 telecasts of the Winter Olympics and the Super Bowl. Revenues for ESPN increased significantly, while television station and radio revenues increased moderately. Publishing revenues increased 3 percent, with the newspaper operations accounting for most of the gain.

Operating income for 1989 was $922,512,000, an increase of 13 percent over the prior year. Total broadcasting operations reported a 16 percent gain in 1989, with the ABC Television Network reporting significantly improved results (excluding the impact of purchase price adjustments) in 1989, compared with a slight loss in 1988. Operating earnings for ESPN were well ahead of last year, while the television stations and radio operations reported moderate increases. Publishing earnings improved slightly, with gains for the newspapers being offset by declines for several of the specialized publications.

Results for 1989 and 1988 reflect reductions in entertainment programming and sports rights at the ABC Television Network from historic costs to fair market values recorded in connection with the acquisition of ABC. These reduced costs benefited per share earnings in 1989 and 1988 by approximately $3.10 and $6.60, respectively.

Net income for the fourth quarter of 1989 was $182,020,000, a 30 percent improvement over the same period of 1988, with earnings per share increasing 33 percent to $10.33. Average shares outstanding for the fourth quarter of 1989 were 17,615,000, compared with 18,070,000 in the prior year, the decrease resulting from the company's 1989 repurchases of its common stock.

ATLANTA (FEB. 5) PR NEWSWIRE - "Because of lower fourth-quarter results, our financial performance for 1989 is virtually unchanged from 1988," Southern Co. President Edward L. Addison said today.

The Southern Co. (NYSE: SO) is the parent firm of five electric utilities: Alabama Power, Georgia Power, Gulf Power, Mississippi Power, and Savannah Electric. The Southern Co.'s common stock is one of the 20 most widely held corporate stocks in America.

Addison announced that earnings for the fourth quarter of 1989 totaled $104 million or 33 cents per share -- down $44 million or 14 cents per share from the fourth quarter a year ago. For the full year 1989, net income was $846 million -- matching the results for the previous year. However, earnings per share of $2.68 for 1989 were down four cents per share, reflecting a greater number of shares outstanding.

#90036p0228 02/05/1990 ~PR Newswire

PHILADELPHIA (FEB. 5) PR NEWSWIRE - Bell Atlantic Corp. (NYSE: BEL) announced, effective today, the election of two new members to its board of directors: Rozanne L. Ridgway and Thomas H. Kean.

Ridgway, 54, is president of The Atlantic Council of the United States, which is a private sector effort to support the North Atlantic Treaty Organization (NATO) Alliance. She is a former U.S. ambassador to Finland and the German Democratic Republic. Kean, 54, a former governor of the state of New Jersey, became president of Drew University in January.

Ridgway received a bachelor of arts degree from Hamline University, St. Paul, Minn., in 1957. She was a member of the Foreign Service of the United States from 1957 to 1989. During her career, Ridgway served in Manila, Palermo, and Nassau.

In 1975, she was named deputy assistant secretary of State and became ambassador for Oceans and Fisheries Affairs. Two years later she was sent to Finland as the U.S. ambassador, where she remained until 1980, returning to Washington as counselor of the State Department. In 1981, she became special assistant to the secretary of State and the following

year was assigned as ambassador to the German Democratic Republic.

In 1985, Ridgway returned to the United States as assistant secretary of State for European and Canadian Affairs. She assumed the presidency of The Atlantic Council of the United States in January 1990. She also serves as a director of the 3M Co., RJR Nabisco, Union Carbide, and Berlitz International.

Ridgway and her husband, U.S. Coast Guard Capt. (ret.) Theodore E. Deming, live in Arlington, Va.

Kean received a bachelor of arts degree from Princeton University in 1957 and a master of arts degree from Columbia University in 1963. He served in a variety of political offices in New Jersey, culminating in his election to the governorship in 1982, and his re-election to a second term in 1986.

He also served as president of Realty Transfer Co., Elizabeth, N.J., from 1965 to 1981; as an instructor at Rutgers University in 1980; and as a political commentator for the New Jersey Network from 1979-1980.

Kean was the keynote speaker for the 1988 Republican National Convention, and served as chairman of the Republican Governors' Association in 1987. In 1986, Newsweek magazine named him one of the five most effective U.S. governors.

Kean and his wife, Deborah Bye Kean, live in Livingston, N.J. They have three children.

#90036p0232 02/05/1990 ~PR Newswire

MIAMI (FEB. 5) PR NEWSWIRE - Atlantis Group, Inc. (AMEX: AGH) today reported revenues of $53.7 million for the fourth quarter of 1989, 10 percent ahead of the $48.9 million reported in the fourth quarter of 1988. Revenues for the year ended Dec. 31, 1989 totaled $221.6 million, a 39 percent increase over the $159.1 million reported for the comparable 1988 period.

Fourth quarter 1989 operating income was $7.1 million, 82 percent ahead of fourth quarter 1988 operating income of $3.9 million and 107 percent ahead of third quarter 1989 operating income of $3.4 million. Year-to-date operating income of $20.2 million was 26 percent ahead of the $16.1 million recorded a year ago.

"The company's fourth quarter operating income of more than $7 million reflects the stabilization of plastic resin prices and a recovery in demand for plastic film products," said Earl W. Powell, chairman and chief executive officer. "The unprecedented free-fall in plastic resin prices, which commenced abruptly in the first quarter of 1989 and which adversely affected our operating results during the first three quarters, appears to have finally run its course," Powell said. "As resin prices stabilized during the fourth quarter, our backlogs and shipments returned to more normal levels, contributing to fourth quarter income from continuing operations of $1.3 million, compared with a loss of $.5 million for the same period in 1988."

Net income for the fourth quarter totaled $1.6 million, or $.24 per share, compared with a net loss of $91,000, or $.03 per share, during 1988.

Powell also said the company is looking forward to improved operating results in 1990. "Despite the normal year-end slowdown in sales, incoming orders for the first quarter of 1990 are off to a strong start, and many observers are forecasting much stronger demand in 1990. While there may be a few more repercussions in the coming months from the resin pricing dislocation, we are anticipating a more normal environment and a much stronger year for our Plastics Group.

"For the year ended 1989, excellent cost control programs enabled the company to maintain operating profitability rates near historic levels and substantially above industry averages," Powell said. "However, these programs were insufficient to offset the lower than planned revenues within the Plastic Films Group, which currently represents approximately two-thirds of total revenues. As a result, the company posted a loss from continuing operations of $953,000 for the year ended Dec. 31, 1989, versus income of $2.4 million in 1988."

Net income for the year ended Dec. 31, 1989 totaled $691,000, or $.08 per share, compared with $4.6, or $.64 per share, during 1988. The company's 1988 operating resutls benefited from nearly $2 million in gains on sales of marketable securities, while no securities sales occurred during 1989 since the company no longer maintains a trading portfolio. In addition, the company incurred significantly higher interest costs during 1989 related to long-term acquisition financing.

Atlantis, headquartered in Miami, is a diversified plastics and furniture manufacturing company company.

CHICAGO (FEB. 5) PR NEWSWIRE - With demand for oats as a human food at an all-time high and prospects for this trend continuing, The Quaker Oats Company (NYSE: OAT) and its Canadian subsidiary, The Quaker Oats Company of Canada Limited, have committed to a major biotech research project on oats involving four research institutions in the United States and Canada.

The cooperative research effort is intended to develop higher yielding, agronomically improved oats and will include Iowa Sate University, University of Minnesota, Cornell University, The U.S. Department of Agriculture's Agricultural Research Service and Agriculture Canada's Plant Research Center in Ottawa. The $5 million multiyear project will be coordinated by a team of scientists at Quaker's Research and Development Laboratory in Barrington, Ill., and in Peterborough, Ontario.

James R. Tindall, senior vice president and general manager of Quaker's North American Foods Group, said, "We're convinced that biotechnology will play a major role in future agricultural developments. The fact that public research funds for oats were not sufficient to maintain a competitive technology base relative to other major crops led to our decision to privately fund this much needed effort. We need to ensure a viable supply of high quality milling oats for our products."

Since oat research has traditionally been conducted by public institutions Quaker concluded that the best approach would be to join forces with key public sector groups. Results will be made available to other public plant breeders not involved in the research effort. "It is important that all public breeders have access to the technology," Tindall said.

The major objective of the research effort will be to develop an RFLP (Restriction Fragment Length Polymorphism) linkage map, which is a genetic roadmap that allows breeders to determine the existence and location of key traits. Benefits would include:

-- Increased precision in the selection of new varieties.

-- Faster rate of improvement in field production traits such as yield, stress tolerance and disease resistance.

-- Superior technology for introducing desirable traits from wild species.

"This program is consistent with Quaker's historical support of public oat research over the past 50 years," Tindall said. "Quaker has been the major funder of oat research leading to new varieties, maximizing milling quality, increasing grain yields and, importantly, maximizing returns to the farmers."

Headquartered in Chicago, Quaker is an international marketer of foods, pet foods and toys. Quaker Oats Canada Limited is headquartered in Peterborough, Ontario.

RICHMOND, VA. (FEB. 5) PR NEWSWIRE - Samuel P. Cardwell, vice chairman of Crestar Financial Corporation (NASDAQ: CRFC), will retire on July 1 after more than 30 years of service, it was announced today.

Cardwell is responsible for Crestar's bank card division, Crestar Mortgage Corporation, bank mergers and acquisitions and government relations. He reports directly to Richard G. Tilghman, chairman and chief executive officer of Crestar. While Cardwell will not be renominated to the board of directors at Crestar's annual meeting in April, he will continue to carry out his responsibilities as vice chairman of Crestar Bank until the date of retirement.

In announcing his retirement, Cardwell, 58, said, "I've been with Crestar and its predecessors for many years, and it has been a thoroughly enjoyable career, but I have a lengthy backlog of things I want to do while I'm still young and healthy."

"Sam Cardwell has been a key player in building the Crestar organization. Most recently, he was instrumental in bringing about our merger with Colonial American Bankshares, an achievement that has significantly increased our retail presence in the Roanoke market," said Tilghman. "His vision and skills will be missed."

Cardwell joined the bank in Lynchburg in 1959. He was named manager of business development the following year, vice president in charge of marketing and personnel in 1965 and head of the commercial division in 1970. In 1972, he became president of the corporation's Lynchburg bank. While he was president, the Lynchburg bank achieved a large share of market growth in both the commercial and retail sectors.

In 1980, Cardwell was elected president of the bank's western region. He successfully managed the bank's mergers with First and Merchants National Bank of Radford in 1981, the Citizens National Bank of New Market and First National Bank of Martinsville and Henry County in 1982, and Bankers Trust Company in Rocky Mount and State Bank of Keysville in 1983.

Cardwell moved to the corporate headquarter in Richmond in 1985 and was elected vice chairman later that year. He oversaw the bank's mergers with NS&T Bank in Washington in 1985, the Bank of Bethesda in Maryland in

1986, the Peoples Bank of Chesapeake in 1987 and Colonial American Bank in Roanoke in 1989.

Cardwell also served as president of the Virginia Bankers Association in 1988-89.

A decision on the reassignment of Cardwell's responsibilities will be announced closer to his retirement date.

Crestar Financial Corporation is an $11.4 billion holding company with $8.5 billion in deposits. Its three banking subsidiaries serve Virginia, Washington and suburban Maryland through 252 offices.

WAYNE, PA (FEB. 5) PR NEWSWIRE - SEI Corp. (NASDAQ: SEIC) today announced results of operations for 1989, and the fourth quarter ending Dec. 31.

Earnings per share in 1989 reached $1.05, compared to $1.04 reported in 1988. Net income for 1989 was $12.1 million vs. $13.2 million realized in the previous year.

Revenues for the year ending Dec. 31, 1989, were $149 million vs. $132 million registered in fiscal 1988. Income before income taxes in 1989 reached $19.1 million compared with $20.2 million recorded in 1988.

Revenues for the quarter ending Dec. 31, 1989, were $42 million vs. $33 million realized in the corresponding quarter in 1988. Earnings per share for the fourth quarter was $.25, compared with $.25 achieved in the fourth quarter of the preceding year.

The shares outstanding used to compute fourth quarter 1989 earnings and calendar year results were 11,154,000 and 11,508,000, respectively, vs. 12,443,000 and 12,633,000, respectively, for the same periods in 1988. The decline in shares outstanding is attributable to SEI's continuing common stock buy-back program.

Growth in revenues for the year came principally from the inclusion of the results of operations of National FSI, acquired in May 1989.

Notable operating profit improvement was experienced in Information Services where the contribution for 1989 was $9 million, compared to $5.7 million recorded in 1988. This segment recorded more than $22 million of new sales events in 1989, the effect of which will expand profit contribution from Information Services as 1990 progresses.

Financial Services continued to generate high margins of 58 percent, the same as that posted in 1988. Balances in financial products posted a $2 billion increase from the start of 1989 and stood at $12 billion at the end of 1989. Average management fees earned on these products, however, continues to decline as the product mix shifts toward lower-fee products.

Evaluation Services recorded a contribution of $8.9 million which reflects a slight decline from the preceding year. The company has begun to restructure the business so that it can broaden relationships with its

clients by offering an expanded set of products and services.

Although Benefit Services (formerly National FSI) added revenues of $10.5 million in 1989, its results of operations and attendant costs had the effect of reducing earnings per share by $.11 in 1989. Its business outlook, however, remains optimistic as it develops into a full-service provider for the defined contribution marketplace.

During 1989, SEI continued to repurchase its common stock, acquiring a total of 1,492,000 shares at an aggregate cost of $26,244,000.

Embarking on 1990, SEI said it continues its efforts to construct a business that meets the needs of its clients by providing them with the tools to invest, account for, and manage investments effectively.

SEI is traded on NASDAQ.

TORRANCE, CA (FEB. 5) PR NEWSWIRE - Sales of the Lexus LS 400 and ES 250 remained strong in January, normally a slow month for luxury car sales.

Lexus sold 2,919 LS 400s and 1,216 ES 250s. Lexus models went on sale Sept. 1, 1989, and as a result there are no comparable 1989 totals. Since introduction, Lexus has sold 20,437 LS 400s and ES 250s.

"Our sales continued to show good strength, especially when you consider January and February are traditionally slow months," noted Dave Illingworth, vice president and general manager of Lexus, the luxury division of Toyota. "The LS 400 started the month very strong and was limited only be availability. And the ES 250 continues to be one of the leaders in the near-luxury market."

The LS 400 continued to outpace both the Mercedes Benz 300 series, the Mercedes Benz S-class, the BMW 5- and 7-series combined, Jaguar and the Infiniti Q45. The ES 250 topped, among others, the Mercedes Benz 190 series, the Infiniti M30, and the BMW 4-door 300 series.

The LS 400 is a 4-door luxury sedan powered by a 250-horsepower, 32-valve, four-cam aluminum V8 engine. The ES 250 is a four-door executive sedan powered by a V6 engine.

#90036p0265 02/05/1990 ~PR Newswire

DALLAS (FEB. 5) PR NEWSWIRE - The LTV Corp. (NYSE: QLTV) today reported fourth quarter net income of $72.3 million on consolidated sales of $1.6 billion. In the fourth quarter of 1988, the company had net income of $95.3 million and sales of $1.7 billion.

The steel group accounted for the major portion of the decline in fourth quarter net income. Lower operating results on commercial aircraft programs also contributed to the decline.

Lower sales for the quarter resulted primarily from reduced sales in military aircraft programs and lower Multiple Launch Rocket System (MLRS) deliveries.

For the year ended Dec. 31, LTV recorded net income of $264.9 million on consolidated sales of $6.4 billion, compared with a net loss of $3.15 billion on consolidated sales of $7.3 billion in the prior year.

The 1988 net loss included $1.35 billion of Chapter 11-related special charges and a one-time, non-cash charge of $2.26 billion for a change in accounting for postemployment insurance benefits. Results for 1989 include

a $30 million special charge to write down costs related to canceling construction of a flexible composites center for the production of advanced aircraft components.

Operating income before special charges declined to $230.3 million in 1989 from $452.2 million in 1988. The decline was caused by two principal factors Q $95 million of charges taken by the aircraft products group in the first three quarters for projected cost increases on fixed-price contracts, and lower results at the company's steel operations.

The decline was partially offset by a $57.8 million increase in interest and other income, including increased interest income from higher average invested balances and rates, and higher dividend income from a minority investment in a former subsidiary.

In November 1989, LTV concluded the bar division's sale to an ESOP company. Exclusion of the bar division's results for 1989, together with the June 1988 sale of the Warren plant, accounted for $71 million of the decline in 1989 operating income, as well as for $872 million of the decline in steel group sales for the year.

LTV's financial results continue to benefit from the deferral of interest, pension and other costs while the company operates under the protection of Chapter 11.

As of Dec. 31, LTV's cash and cash equivalents totaled $1.02 billion, compared with $1.01 billion at year-end 1988. The company had available credit at year-end 1989 of $483 million under revolving bank agreements.

LTV is a diversified manufacturing company involved in steel, aerospace/defense and energy products.

TALLAHASSEE, FL (FEB. 5) PR NEWSWIRE - Coastal Caribbean Oils & Minerals, Ltd. (BSE: CCO-B; CCO-BN), today said it has filed a supplement to its Dec. 18 prospectus to advise shareholders of recent developments in Florida.

The company, which currently is offering 14.5 million shares of common stock to its shareholders, holds petroleum and mineral leases covering approximately 3.7 million acres of submerged and tidal lands in Florida, including a 425-mile-long offshore tract along the Gulf Coast.

A Coastal Caribbean spokesman said that, subsequent to publication of the

company's prospectus, Florida Governor Bob Martinez proposed a state-sponsored bond program to raise $3.2 billion for the acquisition of environmentally sensitive wetlands. Although the Governor's office has not indicated that such acquisitions would include the company's leases, neither has it excluded them as candidates for potential purchase, he said.

According to the spokesman, the Governor's proposal has received widespread media coverage in Florida, appears to have been well-received throughout the state, and the legislature is expected to consider the matter when it convenes this April. For those reasons, and in view of the company's previously reported discussions concerning a possible exchange of acreage with the state, management believes all shareholders should be advised of these recent developments, he said.

The supplement to the prospectus and a covering letter are being mailed today to all shareholders of record as of Jan. 8, the spokesman said.

WASHINGTON (FEB. 5) PR NEWSWIRE - Seven key executive appointments were

announced today in the Newspaper Division of Gannett Co., Inc. (NYSE: GCI).

-- Vincent E. Spezzano has been named chairman of Gannett Rochester (N.Y.) Newspapers. He previously had been president and publisher in Rochester.

-- David J. Mack succeeds Spezzano. He previously had been president and publisher of the Binghamton (N.Y.) Press & Sun-Bulletin and a regional vice president in Gannett East.

-- Bernard M. Griffin succeeds Mack in Binghamton and as a regional vice president. He previously had been president and publisher of the St. Cloud (Minn.) Times and a regional vice president in Gannett Central.

-- Sonja S. Craig succeeds Griffin in St. Cloud. She previously had been president and publisher of the The Wausau (Wis.) Daily Herald.

-- Frederick T. (Fritz) Jacobi succeeds Craig in Wausau. He previously was a regional circulation director on the newspaper division staff.

-- Mary Parks Stier, president and publisher of the Iowa City Press-Citizen, becomes a regional vice president in Gannett Central.

-- Denise H. Bannister, president and publisher of the Huntington (W.Va.) Herald-Dispatch, becomes a regional vice president in Gannett East.

Spezzano, 63, has served as president and publisher in Rochester since 1984. He began his newspaper career in Rochester as a reporter and later was public service director. In his 35 years with Gannett, he also has served as corporate public service director; president and publisher at Capa Publications in Brevard County, Fla.; executive vice president and president of Gannett South regional group, and senior vice president/communications for Gannett.

Spezzano also served as a member of the Gannet board of directors from 1979 - 1980. He continues as chairman of Cape Publications.

In 1979, Spezzano was named chairman of the task force that helped plan the launch of USA Today. He later served as executive vice president and president of USA Today.

Mack, 42, is a graduate of the University of Rochester. In Binghamton, he held several newsroom management positions, including executive editor, before being appointed publisher in 1985. He was named a regional vice president in August of last year.

Griffin, 45, began his newspaper career as a copy boy at the Binghamton newspapers. He advanced through various production positions to become production director in 1977. In 1983, he was appointed production

director at the Wilmington (Del.) News-Journal. He was named publisher in St. Cloud a year later. He assumed the additional responsibilities as a regional vice president in 1987. Griffin was a finalist for Gannett's Manager of the Year in 1988.

Craig, 44, joined Gannett in 1986 as president and publisher in Wausau. She previously had served as general manager of the Billings (Mont.) Gazette. She also had served as personnel director of the Madison (Wis.) Newspapers.

Jacobi, 36, is a Wisconsin native and a graduate of the University of Wisconsin-Madison. He joined Gannett in 1985 as circulation director of the Reno (Nev.) Gazette-Journal. In 1988, he was named a regional circulation director. He previously held several circulation management positions, including director, at the Madison (Wis.) Newspapers.

Stier, 33, joined the Iowa City Press-Citizen in 1982. Two years later, she was named advertising director. She was appointed president and publisher in 1987.

Bannister, 39, joined Gannett at the Gainesville (Ga.) Times in 1983. She was named controller in 1984 and became president and publisher in 1986. She assumed a similar post in Huntington in August 1989.

Gannett is a nationwide news and information company that publishes 82 daily newspapers, including USA Today, 35 non-daily newspapers and USA Weekend, a newspaper magazine. It operates 10 television stations, 16 radio stations, Gannett News Services and the largest outdoor advertising company in North America.

Gannett also has marketing, television news and program production, research satellite information systems and a national group of commercial printing facilities. Gannett has operations in 40 states, the District of Columbia, Guam, the Virgin Islands, Canada, Great Britain, Hong Kong, Singapore and Switzerland.

#90036p0273 02/05/1990 ~PR Newswire

ARLINGTON, VA (FEB. 5) PR NEWSWIRE - USAir today reported that positive results are being shown by the many programs the airline instituted in recent months to improve its on-time performance and reliability.

During January USAir flew 97 percent of its scheduled mileage and operated

80 percent of its approximately 88,000 flight departures on time. Flight arrivals were 74.5 percent on time.

January results compared favorably with December, during which, according to USAir's internal reports, the airline had a completion percentage of 94.5, an on-time departure average of 65.4 percent and on-time arrival percentage of 60.1 percent.

At Charlotte/Douglas International Airport, USAir's largest hub, 80.1 percent of the airline's flights departed on time during January and 80.4 percent arrived on time. More than 97 percent of scheduled flights at Charlotte were completed last month. All three performance standards were substantial improvements over December results. Under current schedules, USAir operates 299 daily flight departures at Charlotte.

Among the major steps taken to improve USAir's schedule reliability are:
-- The Jan. 1 full integration of former USAir and Piedmont flight crews and aircraft, which provides much greater flexibility in scheduling and flight operations. Prior to Jan. 1, 1990, former Piedmont flight crews were allowed to operate only former Piedmont aircraft, and vice versa for former USAir personnel, under terms of union agreements.

-- Flight-by-flight redesign of the airline's systemwide schedule of nearly 3,000 daily departures. New schedules more accurately reflect the actual times needed to load, unload and service aircraft on the ground as well as make adjustments for increased ground taxi and flight times where analysis has shown them to be needed. The daily flying time equivalent of 10 jet aircraft was added to USAir's schedule through these improvements.

-- Redesign of the maintenance spare parts inventory and distribution system to better meet the needs of the much larger post- merger USAir.

-- Adding additional staff at a number of major USAir cities, particularly the primary connecting hubs.

During December, winter weather caused the cancellation of more than 2,900 USAir flights, the approximate equivalent of one complete day of operation for the airlines.

HOUSTON (FEB. 5) PR NEWSWIRE- Prairie Producing Co. announced today the successful completion of an exploratory well at Main Pass Block 49 in state waters of Plaquemines Parish, La.

The Prairie State Lease 13633 No. 1 well was completed in a Miocene sand and on test, flowed from perforations between 10,430 and 10,516 feet at a rate of 13.6 million cubic feet of gas per day and 336 barrels of 57.6 degrees API condensate per day on a 30/64 inch choke. Flowing tubing pressure was 2,849 psi. Absolute open flow was calculated at 155 million cubic feet of gas per day.

Prairie owns an approximate 66 percent working interest in the discovery well and in the surrounding 4,300 acres. Further development will

commence immediately.

Prairie Producing Co. is an indirect, wholly-owned subsidiary of Placer Dome Inc., an international mining company whose principal office is in Vancouver, British Columbia. On Dec. 21, 1989, Placer Dome announced that it had retained Morgan Stanley & Co. Inc. to assist in the sale of Prairie.

Placer Dome's common stock is listed for trading on the New York, Toronto, Montreal, Vancouver and Australian stock exchanges and the Paris Bourse.

CHICAGO (FEB. 5) PR NEWSWIRE - Midway Airlines, Inc. (NYSE: MDW) today reported that its revenue passenger miles (rpms) in January were the highest for any month in the company's history. Midway also reported records in all other January traffic measurements.

Revenue passenger miles (rpms) for January 1990 increased 38.9 percent over January 1989 to 367,584,000 rpms. Available seat miles (asms) increased 33.7 percent to 672,169,000 -- the highest level in the company's history. The company carried 507,723 passengers during the month, an increase of 28.7 percent over January 1989 and a January record for the company. The system load factor for January 1990 was 54.7 percent, also a January record for the company.

"We are pleased that even with our rapid growth in capacity we still achieved record levels in all traffic categories last month," said John P. Tague, vice president of marketing and planning.

The data include the operations of the company's wholly owned commuter subsidiary, the Midway Commuter.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's close-in Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve 60 destinations in the United States, Canada, the U.S. Virgin Islands and the Bahamas.

#90036p0286 02/05/1990 ~PR Newswire

NEW YORK (FEB. 5) PR NEWSWIRE - The General Motors (NYSE: GM) board of directors declared a dividend increase of 17 percent on Class E common stock and split the Class E stock two-for-one by providing a 100 percent stock dividend. The board also voted to continue the dividends currently being paid to holders of GM's $1-2/3 par value and Class H common stocks.

The increase in the Class E dividend from $0.24 to $0.28 per share for the first quarter reflects the substantial growth of non-GM business at GM's Electronic Data Systems (EDS) subsidiary, increased profit margin and the resultant improvement in EDS' 1989 profits, which provide the basis for Class E dividends in 1990. The higher quarterly dividend is consistent with the board's current policy of paying approximately 30 percent of prior year earnings to Class E stockholders as dividends.

Because Class E stock has enjoyed significant appreciation in recent years the board approved the split to make the security more affordable to individual investors. The split coincides with the completion of GM's ten million share (pre-split) Class E repurchase program originally announced in 1987. GM will now commence repurchasing an additional five million Class E shares (pre-split) as approved by the board. The extension of this program will eventually result in the repurchase of 30 million shares (on a post-split basis) of Class E common stock.

In companion actions the Board declared a first quarter dividend of $0.75 per share on GM $1-2/3 par value common stock. This continues the level established in the first quarter of 1989 when the payout was increased by 20 percent and the stock was split two-for-one.

The Class H dividend, which is based on the earnings of the GM Hughes Electronics (GMHE) subsidiary, was maintained at $0.18 per share for the first quarter of 1990, slightly above but in line with the Board's continuing policy of paying about 35 percent of prior year earnings as dividends.

Cash dividends on all three classes of common stock will be payable March 10, 1990 to stockholders of record on Feb. 15, 1990. The stock dividend on Class E common will be payable March 10, 1990 to holders of record on Feb. 16, 1990.

In other action today, GM's Board declared quarterly dividends of $0.28 per share on Series E-I, E-II and E-III preference stock, and $0.36 per share on Series H-I, H-II and H-III preference stock, also payable March 10, 1990 to stockholders of record on Feb. 15, 1990.

They also declared quarterly dividends of $1.25 per share on the $5.00 series preferred stock and $0.9375 per share on the $3.75 preferred stock, payable May 1, 1990 to shareholders of record on April 2, 1990.

COEUR D'ALENE, ID (FEB. 5) PR NEWSWIRE - Dec. 31, 1989, marked the end of the first quarter of fiscal year 1990 for Mountain West Savings Bank, F.S.B., (NASDAQ: MWSB). The company reported net income for the quarter of $568,291, or 33 cents per share.

The bank reported a loss of $1,306,037, or 79 cents per share for the same period last year, primarily because of a one-time loan loss provision.

Deposits increased from $232.0 million on Dec. 31, 1988, to just over $252.2 million on Dec. 31, 1989. The company reported assets of $324.4 million on Dec. 31, 1989, compared with $317.5 million one year earlier.

MELBOURNE, FL (FEB. 5) PR NEWSWIRE - Harris Corporation (NYSE: HRS) has been awarded a $10 million contract for Night Hawk real-time computers for use in simulators to train aircrews and maintenance technicians for the U.S. Navy's newest fighter, the A-12 Advanced Tactical Aircraft.

Harris Computer Systems Division of Ft. Lauderdale, Fla. will furnish Night Hawk 1200 and 3800 multiprocessing computers for use in aircrew system, weapons system and maintenance trainers. The contract was awarded by McDonnell Aircraft Co., a division of McDonnell Douglas Corp. (NYSE:

MD).

The A-12 is being produced by a team composed of McDonnell Douglas and General Dynamics Corp. The A-12 will replace the A-6 Intruder as the Navy's carrier-based, medium attack fighter aircraft.

Martin S. Axelrod, vice president-general manager of Harris Computer Systems Division said, "This is the latest chapter in the Night Hawk success story. Night Hawk is the product of our quality process which included customers in the definition and design phase, and resulted in an unequalled system for real-time computing. Key to this success has been customer input into the design of our Ada programming language, modular-system and real-time operating system.

Harris Computer Systems Division, a world leader in real-time computing, designs, manufactures, markets and supports real-time systems and software for aerospace simulation; command, control, communications and intelligence; and related applications.

Harris Corporation, with worldwide sales of more than $3 billion, is focused on four major businesses: advanced electronic systems, communications, semiconductors and an office-equipment distribution network.

CHICAGO (FEB. 5) PR NEWSWIRE - The board of directors of Boulevard Bancorp, Inc. (NASDAQ/NMS: BLVD) has authorized the company to repurchase up to 110,000 shares of Boulevard common stock during the period of Feb. 1 1990, through Jan. 31, 1991. The company has approximately 6.7 million shares outstanding.

''In view of the current price level of our stock and the Bancorp's solid financial position, we believe that repurchase of our own shares represents an attractive investment opportunity which will benefit the company and our shareholders,'' said Richard T. Schroeder, chairman, president and chief executive officer. The repurchased shares will be used for the company's employee stock compensation plans.

Boulevard Bancorp, Inc. is a $1.7-billion holding company which owns Boulevard Bank in Chicago, First National Bank of Des Plaines, National Security Bank of Chicago and Citizens National Bank of Downers Grove.

#90036p0299 02/05/1990 ~PR Newswire

SEATTLE (FEB. 5) PR NEWSWIRE - The Boeing Co. (NYSE: BA) today took delivery of what is generally considered the world's most powerful and fastest computer, the company announced.

The CRAY Y-MP supercomputer, which is valued at about $20 million, was delivered to Boeing Computer Services data center in Bellevue, Wash. The supercomputer is the first of its type to be delivered to the Pacific Northwest, and is the only CRAY Y-MP system in a five-state region, including Washington, Oregon, Idaho, Utah and Alaska.

The new Boeing supercomputer is about 13,000 times faster than a personal computer (PC). For example, a typical one-hour run on the CRAY Y-MP system would take more than a year and a half for a PC to compute.

Paul Rubbert, head of aerodynamics research at Boeing Commercial Airplane Group, said there were two key factors that led the company to purchase the new supercomputer: capacity and capability. He explained that airplane engineers and designers are performing more computer analyses, resulting in the need for greater computer capacity than had previously existed within the company. Also, engineers are calculating more complex problems that require the increased computer capability of the CRAY Y-MP supercomputer. When operational in mid-March, the supercomputer will be capable of performing more than 650 million calculations per second.

"The new computer will be a key factor in enabling engineers to improve the performance and fuel efficiency of tomorrow's airplanes, while making them more economical to purchase and to maintain," Rubbert said.

The state-of-the-art computer joins a CRAY X-MP supercomputer, purchased by Boeing in 1985. The CRAY X-MP system, also located at the company's Bellevue data center, is capable of 400 million operations per second and will continue to be used into the foreseeable future.

Installation and testing of the CRAY Y-MP supercomputer is expected to take approximately six weeks.

ENCINITAS, CA (FEB. 5) PR NEWSWIRE - SDN Bancorp (OTC "Pink Sheets"), holding company for San Dieguito National Bank, reports net earnings of $935,000 for 1989 compared to $341,000 for the previous year. This results in an increase in earnings per share to $1.68 compared to $.62 in 1988.

SDN Bancorp net earnings before taxes included $445,000 in non- recurring net recoveries from settlements of significant lawsuits. In addition, SDN Bancorp also recognized an extraordinary tax benefit by utilizing all of the net operating loss carryforwards from prior years.

"This was truly an outstanding year," said Paul E. Schedler, president. "The Bank's separate 1989 net earnings were $1,070,000 with a strong 7.7 primary capital ratio."

Total assets were $72.9 million at Dec. 31, 1989, compared to $60 million at Dec. 31, 1988, a 22 percent increase.

Net loans increased 31 percent to $53.7 million at Dec. 31, 1989, compared to $40.9 million at Dec. 31, 1988. Total deposits were $67.4 million compared to $56 million at year end 1988, a 20 percent increase.

San Dieguito National Bank is committed to remain an independent community bank in the North Coastal area of San Diego County. The bank, organized by local businessmen and women, has just started its 10th year of service and is headquartered in Encinitas with an office in La Costa, Calif.

ERIE, PA (FEB. 5) PR NEWSWIRE - Spectrum Control, Inc. (NASDAQ: SPEC, SPECR, SPECW), a worldwide manufacturer of electronic components, today announced the extension of its rights offering to shareholders by ten business days to Feb. 27, 1990, at 5:00 p.m., Erie, Pa., time.

In making the announcement, the board of directors stated that the extension to Feb. 27, 1990, has been authorized due to the time- consuming process within the depository system of delivering the rights certificates to certain brokerage firms, trust departments and pension plans. The additional time now assures that all stockholders will have ample time to exercise their rights by Feb. 27, 1990. The rights are also transferable and sellable.

Those individuals who are not currently shareholders can purchase the rights through the NASDAQ trading system under the symbol SPECR.

#90036p0305 02/05/1990 ~PR Newswire

NEW HAVEN, CT (FEB. 5) PR NEWSWIRE - First Constitution Financial Corporation (NASDAQ: FCON), parent company of First Constitution Bank, reported losses of $2.06 a share in the fourth quarter of 1989 and $2.18 a share for the full calendar year, according to Walter R. Miller Jr., president and chief executive officer. Comparable year-ago earnings were 48 cents in the fourth quarter and $1.73 for the full year.

"Although we expected to be profitable in the fourth quarter, the accelerating deterioration of real estate markets in Connecticut subsequent to the close of 1989 caused us to add $33.5 million to our provision for losses, thus reversing the earnings we had expected to report and bringing loan reserves up significantly to $58 million. In addition, we wrote down the Dec. 31 value of our thrift equity portfolio by $5 million," Miller said.

"Last October we signed a merger agreement with a private investor group, which has been informed of the financial results we are reporting today," he said. "The group indicated that the increased provision for losses and the deterioration of the New England real estate market maybe construed as a material change, providing the right to terminate the agreement. Representatives of the group have indicated continued strong interest in acquiring First Constitution at a reduced price, and negotiations are proceeding." In October, the investor group agreed to acquire all of the common stock of First Constitution at $25 cash per share.

"New England real estate markets have declined markedly, and stricter regulatory overview has resulted. These factors, as well as mounting problems of our own borrowers -- including some that have come to light just within the last month -- have warranted increased loan loss reserves " Miller explained. "Following year-end, we reassessed the unexpected loan issues that arose in January, increased the size of our reserve for potential loan losses, and revised upward our non-accrual loans by $31 million."

For the full calendar year, the provision is $66.1 million, compared with $3.1 million in 1988. The reserve for loan losses at Dec. 31, 1989, was $58 million, up from $3.2 million in 1988. "The ratio of shareholders' equity to total assets at year-end was 9.07 percent," Miller said, "indicating that our company remains comfortably above the minimum capital requirements by regulatory agencies."

Total assets at year-end were $2.4 billion, compared with $2.3 billion last year. Total loans and mortgage-backed securities were $2.1 billion at Dec. 31, compared with $2 billion a year ago. Total deposits of $1.6 billion were up about 7 percent from $1.5 billion in 1988. Core deposits of $1.3 billion were up 16 percent over the prior year. Shareholders' equity at year-end was $216.6 million, off from $245.4 million last year. Book value per share was $19.78.

Non-accrual loans and real estate acquired through foreclosure were $148 million at year-end -- principally in residential and commercial real estate -- compared with $18.6 million for 1988. These loans were primarily in Connecticut and secured by properties within the state," Miller explained. "In addition, approximately $25 million of loans were restructured in January. Loans past due 90 days or more at Dec. 31 were $102.8 million, or 5.3 percent of total loans, while the ratio of non-accrual loans and real estate acquired through foreclosure to total loans, real estate investments and real estate owned was 7.5 percent."

The fourth-quarter loss was $22.6 million, compared with earnings of $5.3 million in 1988. Net interest income before the provision for losses was $12.1 million, compared with last year's $15.4 million. Non-interest income before the write down of the thrift equity portfolio was $2.1 million, up from $1.6 million last year. Non-interest expense of $10.3 million compares with $7.1 million in 1988.

For the full year, the net loss was $23.8 million, compared with earnings of $19 million in 1988. Net interest income before the provision for losses was $55 million, down moderately from $56.1 million a year earlier. Non-interest income was $6.6 million, the same as in the prior year. Non-interest expense was $36.2 million, compared with $28.2 million in 1988.

First Constitution shares are traded on the NASDAQ National Market System, where the trading symbol is FCON. Total shares outstanding at Dec. 31 were 10,950,333.

SAN FRANCISCO (FEB. 5) PR NEWSWIRE - Gump's, the internationally recognized retailer of high quality merchandise including jewelry, gift items, silver, china and art objects, today announced Charles Dishman as its group vice president of retail.

In making the announcement, Kenneth W. Watson, chairman and chief executive officer of Gump's specialty stores, said, "I am confident that Mr. Dishman's vast experience in upscale retailing will enhance Gump's business objectives. We welcome his input and look forward to further promoting Gump's as a primary source for exquisite jewelry and gift items."

Dishman is currently the vice president of the international and trade division of Tiffany and Company in New York. He will begin in the newly created position at Gump's on March 19, 1990.

Prior to his New York assignment with Tiffany, Dishman was vice president and general manager of the company's San Francisco store from 1983-89.

Dishman was vice president of Omega Watch Corp. in charge of advertising, public relations, and merchandising in New York from 1982-83.

Dishman, 54, earned his bachelor of business degree in business administration and law degree from the Austin branch of the University of Texas, his native state. He is a member of Kappa Alpha order and Phi Delta Phi (legal) fraternities.

An avid patron of the arts, he is presently a board member of the San Francisco Ballet and the Seattle Washington Opera.

Gump's, founded in 1861, has a flagship store on Post Street in San Francisco and premier locations in Beverly Hills, Houston and Dallas. Gump's also boasts successful direct marketing and corporate gifts divisions.

#90036p0322 02/05/1990 ~PR Newswire

GRAND RAPIDS, MI (FEB. 5) PR NEWSWIRE - X-Rite, Incorporated (NASDAQ-NMS: XRIT) today announced record sales and earnings for the fourth quarter and fiscal year ended Dec. 31, 1989.

The board of directors also has voted to increase the dividend for a share of X-Rite common stock from 2 cents per quarter to 3 cents per quarter. The dividend is payable May 11 to shareholders of record April 13, 1990.

Net sales for the fourth quarter increased about 29 percent to $6.1 million, compared with sales of $4.7 million for the same period the previous year. Net income for the quarter increased about 28 percent to $1.3 million, compared with net income of $1 million for the same period the previous year. Earnings per share were up 25 percent to 25 cents per share compared with the 20 cents posted the previous year.

The company posted net income of $3.6 million, or 70 cents per share, on sales of $21.2 million for the fiscal year, compared with net income of $3.2 million, or 63 cents per share, on sales of $19.6 million for the prior year.

Ted Thompson, X-Rite president and chief executive officer, said he was pleased with the results, which were in line with company expectations.

"The increase in sales and earnings in the fourth quarter came from higher sales of new products we introduced last year, such as our line of densitometers and sensitometers for the medical field," he said.

Thompson said the corporation will devote more resources to marketing new products this year, and will continue to spend a significant amount on research and development. X-Rite spent about 10 percent of sales last

year on research and development, well above the industry average.

X-Rite manufactures products used in the graphic arts, photographic, medical, packaging and microfilm industries throughout the world. It manufactures densitometers, sensitometers, colorimeters, shrink- packaging equipment, silver recovery equipment and an X-ray marking system. Shares of X-Rite common stock are traded in the NASDAQ National Market System under the symbol XRIT.

STAMFORD, CT (FEB. 5) PR NEWSWIRE - John E. Pepper, president of Procter & Gamble Co. (NYSE: PG) with responsibility for the corporation's international business and Norwich Eaton Pharmaceuticals division, today was elected a member of Xerox Corporation's (NYSE: XRX) board of directors.

Pepper has been with Cincinnati-based Procter & Gamble since 1963, when he started as a staff assistant. He has held such positions as brand manager advertising manager and group vice president. He was named executive vice president in 1981, elected to the board of directors in 1984 and made president of Procter & Gamble's U.S. operations in 1986. He assumed his present position in January.

Pepper, born in Pottsville, Pa., and now a resident of Cincinnati, graduated from Yale University in 1960 with a bachelor's degree in history. He and his wife, Frances Garber, have four children.

LOS ANGELES (FEB. 5) PR NEWSWIRE - Toyota Motor Corp. today released the following statement:

A myth seems to be taking root in certain news media around the country. This myth states that Japanese automakers aren't concerned about safety. We can't speak for the import industry, but we'd like to go on record that Toyota is very concerned about safety. Here are a few examples of how our concern has manifested itself in Toyota and Lexus products over the years.

-- Airbags are standard on the Toyota Celica, the Toyota MR2, the Toyota Supra, and the Lexus LS400 and ES250.

-- The rest of our car models, of course, have passive belts -- either motorized or mechanical. We offered these belts as early as the 1979 model year on the Toyota Corona (long before anyone else had them) and our motorized belt system is used -- under license -- by Nissan, Honda, Mitsubishi, Ford and Jaguar. Motorized belts were made standard on the Cressida in the 1981 model year, and on the Camry in the 1987 model year,

long before the law required them and well in advance of most other automakers.

-- Anti-lock brakes are standard or available on the Toyota Celica, the Toyota MR2, the Toyota Supra, the Toyota Camry, the Toyota Cressida, the Toyota Previa, the Toyota pickup, the Toyota 4Runner, and the Lexus LS400 and ES250.

-- Toyota vans and trucks have had head restraints on all seats since the 1984 model year. Toyota vans and trucks also meet passenger- sedan roof-crush standards. The Toyota van has had front-door side intrusion beams since it was introduced in the United States in the 1984 model year. These are, of course, passenger-car safety standards that many competitive products don't meet.

-- We have had outboard rear-seat three-point seat belts on selected models for several years -- in advance of any federal requirement -- and now have them standard across the board.

-- And finally, over the past decade Toyota has posted an admirable overall performance in the federal government's New Car Assessment Program (NCAP) 35-mph barrier tests.

A comparison of this continuing performance with the records of other automakers will clearly demonstrate that Toyota is very concerned with safety. We will continue to demonstrate innovation and commitment in safety as well as other areas of automotive design and engineering.

NORWALK, CT (FEB. 5) PR NEWSWIRE - Great Northern Nekoosa Corporation (NYSE: GNN) announced today that development of the lightweight coated groundwood paper mill project in Millinocket, Maine, will continue even though its joint venture partner, MD Papier of West Germany, has requested that formal formation of the joint venture be put on a "stand-by" status until the resolution of the current takeover attempt of GNN by Georgia-Pacific.

Great Northern Nekoosa's board of directors had approved the joint venture at its meeting on Jan. 31, 1990. Dr. Walter Lang, chairman of MD Papier GmbH, issued the following statement today:

"In their meeting on Friday, Feb. 2, 1990, the board of directors of MD Papier GmbH discussed in all its details the GNN/MD joint venture

LWC-project. They also took notice of the GNN board of directors' approval of this project. Also, the MD board of directors is of the opinion that the feasibility study, on which the project is based, provides a basis for positive action.

"In view of the fact that the takeover activities of Georgia-Pacific with regard to GNN have not concluded, the MD board of directors, however, is not in a position to give their approval to the joint venture today. Therefore, they decided that MD shall take a 'stand-by' position and shall wait for the result of the takeover activities, hoping in this respect that a positive decision in favor of our joint venture partner GNN will result."

William R. Laidig, GNN chairman, stated, "Our board's action on this project followed a seven-month feasibility study by GNN and MD evaluating the project. It is unfortunate that the Georgia-Pacific takeover attempt has caused MD Papier to take this position at this time. Nevertheless we remain convinced this is a good investment for us and for the State of Maine. We will continue to seek the necessary environmental permits (application filed Oct. 22, 1989) from the State of Maine to enable us to begin construction during 1990."

WHITE PLAINS, N.Y. (FEB. 5) PR NEWSWIRE - NYNEX Information Solutions Group, Inc. today announced their second sale of NYNEX ALLINK(TM) Operations Coordinator, its just released integrated network management solution, to CNCP Telecommunications of Toronto, Ontario. The announcement was made at Communication Networks '90 in Washington.

CNCP Telecommunications, the second-largest provider of long distance telecommunications services in Canada, will use NYNEX ALLINK Operations Coordinator to help manage its sophisticated coast-to-coat network. Through this network, CNCP provides a range of switched and dedicated voice and data services to major Canadian customers, including the Canadian federal and provincial governments and a majority of Canada's financial institutions.

"For CNCP, whose business is providing network services, efficient and effective management of that network is absolutely critical," said George Harvey, president, CNCP Telecommunications. "But managing a vast and complex network, made up of numerous components from a variety of manufacturers, presents a major challenge. We chose NYNEX ALLINK Operations Coordinator because it was designed to meet that challenge."

"We consider it a true badge of honor that a network services provider of CNCP's stature selected NYNEX ALLINK Operations Coordinator to manage their network," said Gad Selig, vice president, NYNEX Information Solutions Group.

At CNCP, NYNEX ALLINK Operations Coordinator will manage T1 and X.25 data lines, multiplexers, PBXs, and a coast-to-coast Integrated Services Digital Network (ISDN).

NYNEX ALLINK Operations Coordinator is a software-based integrated network management system for heterogeneous corporate networks. It uses artificial intelligence to collect, consolidate and correlate information provided by managers already existing on each element of the network -- such as T1 managers, PBX managers and LAN managers. The product is protocol-independent, unique in its ability to interface with virtually any element manager using the manufacturer's own protocols.

CNCP Telecommunications is Canada's only national telecommunications facilities-based carrier with fiber-optic, digital microwave and satellite networks.

CNCP Telecommunications provides a wide range of cost-effective solutions and sophisticated voice, data and message services across Canada, the United States and overseas.

NYNEX Information Solutions Group, a subsidiary of NYNEX Corporation (NYSE: NYN), offers systems and network integration, integrated network management solutions, applications software and related professional services to a number of markets, including financial services and state and local government. NYNEX is currently installing NYNEX ALLINK Operations Coordinator at National Westminster Bank USA in New York. NYNEX Information Solutions Group has over 6,000 employees in 13 countries and more than 30 U.S. cities.

HIGHLAND PARK, MI (FEB. 5) PR NEWSWIRE - Chrysler Corporation (NYSE: C) today reported its best January sales ever. The 178,758 cars and trucks Chrysler sold in January beat the previous record for the month set in 1973, when Chrysler reported 178,095 cars and trucks sold.

Truck sales for January were the highest for any month on record with 105,168 units sold. The previous best month for truck sales was in June 1988, when 101,202 units were sold.

"Our record January sales are the direct result of a great product lineup supported by our Guaranteed Rebate program," said Tom Pappert, Chrysler's vice president-Sales. "The minivans -- Dodge Caravan, Plymouth Voyager and Chrysler Town & Country -- led the way. We sold 63,733 minivans in the month, making January their best month ever.

"We outsold the Chevrolet Division in total trucks in January and we outsold both Ford and Chevy in total trucks in the Jan. 21-31 selling period," Pappert said.

"Our cars did pretty well, too," Pappert said. "January was the best month ever for Plymouth Laser and Eagle Talon and the best January ever for Chrysler LeBaron convertible and Dodge Shadow and Dynasty."

Following are Chrysler's sales results for the third 10-day selling period of January and for the entire month of January:

	1990	1989	Pct. Change	Selling Days '90	Selling Days '89
		Total Cars			
Jan. 21-31	29,954	32,721	-8.5	9	9
Jan. 1-31	73,590	75,403	-6.2	26	25
		Domestic Cars			
Jan. 21-31	27,430	28,616	-4.2		
Jan. 1-31	67,990	66,345	-1.5		
		Total Trucks			
Jan. 21-31	44,995	32,381	+39.0		
Jan. 1-31	105,168	74,424	+35.9		
		Domestic Trucks			
Jan. 21-31	44,343	31,068	+42.7		
Jan. 1-31	103,471	71,203	+39.7		
		Total Vehicles			
Jan. 21-31	74,949	65,102	+15.1		
Jan. 1-31	178,758	149,827	+14.7		

All changes are computed on a daily rate basis.

MIAMI (FEB. 5) PR NEWSWIRE - Eastern Airlines today was given permission by the bankruptcy court to establish a "refund protection program" for travel agents and the flying public guaranteeing full cash payment of potential refund claims during the company's Chapter 11 proceedings.

The program was supported by the unsecured creditors' committee, preferred shareholders' committee and by Bankruptcy Examiner David Shapiro.

In addition to travel agents and individual passengers and shippers, the program would protect corporations, governmental agencies, cruise lines and all other purchasers of Eastern tickets. It would be in effect until the airline emerges from Chapter 11.

Separately, Examiner Shapiro stated today:

1. The notion that liquidation or a sale of the company are the only alternatives is "totally irresponsible";
2. In the Examiner's view, the company is "eminently reorganizable"; and
3. The Examiner will "fight liquidation."

Eastern said that the new "refund protection program" will not change the way in which refund applications are submitted and that they will be processed for payment in the usual timely manner.

Eastern is currently operating some 800 daily flights to 85 U.S. and foreign cities. The company has flown more than 10 million passengers while rebuilding service since a strike by three unions last March.

The airline told the court that its proposal does not cover pre-petition ticket holders. Those claims would be processed under normal Chapter 11 procedures.

TROY, MI (FEB. 5) PR NEWSWIRE - Two publications produced for Chevrolet Motor Division and its retail organization by Sandy Corporation (AMEX: SDY), the publicly traded performance improvement company specializing in

consulting, training and communications, have won top honors in an annual competition conducted by the Southeastern Michigan Chapter of the Society for Technical Communication.

Pro Publication, a monthly, 120,000-circulation magazine written and produced by Sandy personnel for Chevrolet dealers, retail managers, salespeople and service technicians, received the STC award for Distinguished Technical Communication in the periodicals category.

In earning 77 out of a possible 80 points in the judging, Pro was cited for its overall content and its "clear, cohesive message."

Shelley Deneau serves as editor, Mindi Van Meter as art director and Daniel J. Banaitas as producer.

Also earning top recognition for Sandy in STC's line-art-in one-or-two-colors category with an Award of Excellence was the 1990 Chevrolet Passenger Car Product Guide, produced for use by retail sales personnel and generally regarded by them as their "bible" for quick reference on product information and specifications.

Judges cited its "imaginative use of line and tone within very strict parameters."

Jill Roach served as art director of the product guide and Banaitas as producer.

Both publications are produced under overall direction from Chevrolet, utilizing dealer subscription funds derived from the Chevrolet Productivity Network.

NOTE: Nine selling days (S/D) in the Jan. 21-31 period this year and last; 26 selling days for the Jan. 1-31 period this year and 25 selling days last year.

(a) -- Record.

Comment by J.B. Fitzpatrick, vice president in charge of the General Motors Marketing and Product Planning staff:

In the month of January, General Motors reported a total vehicle sales increase of over 5 percent, which included record truck sales of 134,629 units and a 3.2-percent sales increase in passenger cars. Also, dealer inventories at month-end were reduced considerably due to increased sales performance and recent production cutbacks.

For the month, sales ran strong across the majority of General Motors car and truck lines with dealers reporting higher selling rates and experiencing increased floor traffic. Contributing to stronger sales is positive consumer reception to the improved quality levels of our products.

In looking forward to the remainder of the first quarter, we're hopeful that customers will continue to recognize the improved quality of General Motors cars and trucks and that sales will continue on an upward trend. The U.S. economic outlook appears positive as personal income continues to rise, unemployment levels remain low and consumer confidence continues to be strong.

NEW YORK (FEB. 5) PR NEWSWIRE - LIN Broadcasting Corporation (NASDAQ: LINB) announced today that it has accepted a commitment from Citibank N.A. to provide a $600 million interim financing to be used in connection with satisfying LIN's obligations related to consummation of the ongoing tender offer by a subsidiary of McCaw Cellular Communications, Inc. (NASDAQ: MCAWA) for 21.9 million LIN shares. LIN is obligated at completion of the McCaw offer to purchase $425 million in market value of McCaw shares, to be distributed as a dividend to LIN stockholders shortly thereafter. Morgan Guaranty Trust Company of New York and The Toronto-Dominion Bank have indicated to Citibank that they intend to participate with Citibank with co-equal shares in the interim financing.

Citibank's commitment is subject to the negotiation and execution of a

definitive loan agreement, which is expected to be completed prior to the Feb. 27, 1990, current expiration date of the McCaw offer. McCaw recently announced that its loan agreement for the financing of its offer for LIN shares is expected to be in place in the next few weeks. Citibank, Morgan Guaranty and Toronto-Dominion will work together on both this interim financing and a long-term facility that would be used, among other things, to fund LIN's purchase of the Metromedia Company interests in Metro One, the New York City non-wireline cellular telephone system operator.

McCaw's purchase pursuant to its offer for 21.9 million LIN shares at $154.11 per share would result in a 52 percent equity interest by McCaw in LIN. In addition, McCaw will contribute to LIN its 5 percent interest in the Los Angeles non-wireline cellular telephone system operator. Pursuant to a "private market value guarantee" agreement with LIN, McCaw will have certain obligations designed to provide LIN's public stockholders with a private market value for their LIN shares in five years, either by purchasing the balance of LIN's shares or allowing independent directors to sell LIN at that time.

WEST CHESTER, PA. (FEB. 5) PR NEWSWIRE - Roy F. Weston Inc. (NASDAQ: WSTNA) announced today it has signed a Consent Judgment which resolves the U.S. Environmental Protection Agency's (EPA) inquiry into alleged practices by a unit of the company's Lionville, Pa., Analytics Division Laboratory.

The Consent Judgment provides for the payment of $750,000 in full settlement of all allegations. Weston has also agreed that a unit of its Lionville facility would voluntarily withdraw from certain work directly funded by EPA in the area of organic analysis for a minimum period of four months but for no longer than a year. Analytical work performed by this unit for other contracts, and all other units of the Lionville facility as well as other Weston laboratory locations, will not be affected by this Consent Judgment. There have been no contract terminations resulting from this inquiry, nor will there be any administrative proceedings in connection with this matter. All certifications at the Lionville and other laboratories remain intact.

The company has cooperated fully with the investigation and has steadfastly denied the allegations. The company agreed to a civil settlement to avoid further expense, inconvenience and protracted litigation.

Weston first announced the EPA investigation in August 1989 and established a reserve in the third quarter in anticipation of the monetary settlement. There has been no significant impact on its laboratory business in the interim and the company said it believes that none of the provisions of the settlement will have a material adverse effect on the

company's consolidated financial statements.

#90036p0374 02/05/1990 ~PR Newswire

ATLANTA (FEB. 5) PR NEWSWIRE - Chattahoochee Bancorp Inc. reported 1989 net income of $1.46 million, a 45 percent increase from the $1.01 million earned in 1988, according to Rodney Knowles III, chairman.

Earnings per share on a fully diluted basis were 33 cents for the year ended Dec. 31, 1989, up from 22 cents in 1988. Return on average assets was .70 percent, up from .57 percent in 1988. Return on equity was 7.54 percent for 1989, as compared with 5.45 percent in 1988.

Chattahoochee Bancorp is a metro Atlanta-based bank holding company established in December 1988 with The Chattahoochee Bank as its principal subsidiary.

Total assets at Dec. 31, 1989 were $226,382,000, a 13 percent increase from total assets of $200,362,000 at Dec. 31, 1988. Deposits at Dec. 31, 1989 totaled $196,634,000, up 11 percent over total deposits of $176,633,000 at year-end 1988.

At Dec. 31, 1989, the company had outstanding loans of $149,395,000, an increase of 14 percent over total outstanding loans of $131,423,000 at Dec. 31, 1988. The allowance for loan losses totaled $2,003,000 at Dec. 31, 1989, representing 1.34 percent of total loans outstanding.

In 1989, the company continued its long-standing emphasis on credit quality, with lending policies and procedures in place to accommodate the general slowing of economic growth occurring last year, Knowles said.

Chattahoochee Bancorp's non-performing assets at Dec. 31, 1989 totaled $2,762,000, or 1.82 percent of loans and other real estate owned. Non-performing assets for 1988 total $1,580,000, or 1.2 percent of loans and other real estate owned.

Net charge-offs totaled .69 percent of average loans outstanding for the year ended Dec. 31, 1989, compared with .53 percent during the previous year.

Net income for the fourth quarter 1989 was $301,000, a 135 percent increase over net income of $128,000 for the fourth quarter 1988. The 1988 fourth-quarter income included $160,000 of nonrecurring expenses relating to the formation of the company.

Chattahoochee Bancorp ranks among the 30 largest bank holding companies in Georgia. Its Chattahoochee Bank subsidiary operates six locations in Fulton and Cobb counties. A seventh location is planned to open in DeKalb

County in mid-1990.

Additional financial information is available from Terry DeWitt, chief financial officer, Chattahoochee Bancorp Inc., 404-952-7750.

#90036p0376 02/05/1990 ~PR Newswire

MINNEAPOLIS (FEB. 5) PR NEWSWIRE - FSI International Inc. (NASDAQ: FSII), a supplier of capital equipment for the semiconductor industry, today announced that it expects lower sales and a loss for the second quarter of fiscal 1990, ending Feb. 24.

Richard Jackson, FSI president and chief executive officer, stated, "In our first quarter earnings release, we indicated that FSI's order rate had declined. Lower orders, coupled with some customer-requested delays in shipment dates, have contributed to lower than expected sales in the second quarter. At this point, we anticipate sales to be approximately $13 million, versus $15 million in the fiscal 1989 second quarter. Although the semiconductor industry appears to be in a cyclical slowdown, industry analysts expect this to be short-lived, with growth for semiconductor equipment companies ranging from 15 to 20 percent in 1991."

Jackson continued, "In the short-term, obviously lower sales in the 1990 second quarter impacts our profitability. Additionally, we announced in January that we are relocating our California manufacturing operation to Minnesota. Facility closing costs will result in a one-time, after-tax charge of approximately $200,000, or $.05 per share. Further, margins have declined due to cost over-runs on our chemical management and delivery systems; we also have incurred transition costs as we discontinue manufacture of Convac's line of photoresist equipment and begin technology transfer of Texas Instruments' photoresist equipment. Combining these factors, we anticipate a loss for the second quarter." In the 1989 second quarter, FSI reported net income of $748,000, or 21 cents per share.

Concluded Jackson, "We are disappointed that we will not be able to report sales and income gains for the second quarter. However, we are encouraged that FSI's order rate has strengthened recently. Moreover, we are implementing a number of cost-control measures to improve profitability."

FSI International Inc. is a leader in producing automated surface conditioning equipment for processing silicon wafers. The company develops, manufactures, markets and services centrifugal spray processing systems, photoresist processing equipment, gas processing systems, and chemical management and delivery systems for use in the fabrication of advanced semiconductor integrated circuits. FSI's customers include semiconductor manufacturers located throughout North America, Europe, Japan and the Far East.

YORK, PA (FEB. 5) P RNEWSWIRE - Emons Holdings, Inc. (NASDAQ: EMHO) today announced a loss of $118,709, or $.02 per share, for the second quarter ended Dec. 31, 1989, as compared to earnings of $874,379, or $.16 per share, for the second quarter of the prior fiscal year.

The net loss after preferred dividend requirements for the second quarter of fiscal 1990 was $192,911 as compared to net earnings after preferred dividend requirements of $874,246 for the second quarter of fiscal 1989. Revenues were $3.6 million for the fiscal 1990 quarter and $2.6 million for the fiscal 1989 quarter.

For the six-month period ended Dec. 31, 1989, the company reported a loss of $25,309, or less than $.01 per share, as compared to earnings of $1,090,609, or $.20 per share, for the six months ended Dec. 31, 1988. After preferred dividend requirements, the net loss was $102,471 for the six months ended Dec. 31, 1989, as compared to net earnings of $1,050,976 for the prior year's six-month period. Revenues were $6.9 million in the current six-month period as compared to $4.2 million for the six months ended Dec. 31, 1988.

Emons Holdings is a transportation services company, headquartered in York that has three primary business groups: the Transportation Equipment Services Group, which manages, leases, brokers and repairs transportation equipment; the Railroad Group, which operates short line railroads, and the Logistic Services Group, which assists companies with their distribution needs.

LAKE BUENA VISTA, FL (FEB. 5) PR NEWSWIRE - Disney's Grand Floridian Beach Resort has been recognized as one of the top resorts in the United States with the prestigious IVY Award.

Often called "the Oscars of food service," the IVYs are awarded to restaurants and hotels by vote of professionals in the industry -- peers of the winners -- in the competition sponsored by Restaurants & Institutions magazine.

"The IVY Award goes not to a place, but to an individual," said Jane Wallace, publisher of Restaurants & Institutions. "We believe the place functions as it does because of the attitude, character, philosophy,

dedication and initiative of the person behind it."

There were no Florida winners in the 1989 competition, and the Grand Floridian is the only Florida winner in 1990. This is the 19th year for the awards.

Bob Small, executive vice president of resorts for Walt Disney Attractions will be presented the award May 20 at the Drake Hotel in Chicago.

"This has to be one of the greatest honors of my career, and I am very proud to accept it on behalf of the team who made it possible," said Small.

The awards were established in 1970 when food service leaders nominated the first IVY ballot and readers of the magazine voted. Since the first year, the IVY winners from the previous years have been asked to nominate colleagues they believe qualify for the award. The nominations are published on a ballot in Restaurants & Institutions every fall, and the magazine's readers (circulation 143,000) have the opportunity to vote for those they consider the best.

DENVER (FEB. 5) PR NEWSWIRE - The board of directors of Key Production Company Inc. (NASDAQ: KPCI) declared a semi-annual cash dividend of $0.125 per share on the company's common stock. The dividend is payable on April 30, 1990, to shareholders of record on March 30, 1990.

The $.125 per share dividend resumes the level paid in the first half of 1988 and follows a 15 cent per share dividend last fall. The fall dividend had been increased largely as a result of a one-time payment to settle a property ownership dispute. Future dividend levels will be determined based upon Key's performance and industry conditions at that time.

Key Production Company is an independent oil and gas production company. Its common stock is traded on the NASDAQ system under the symbol KPCI.

CHICAGO (FEB. 5) PR NEWSWIRE - First Colonial Bankshares Corp. (NASDAQ: FCOLA), Chicago, announced today that an agreement in principle has been reached to acquire the $147 million asset York Bankshares, Inc. the parent

of York State Bank & Trust Co., Elmhurst, Ill. Under the terms of the merger, which is subject to the execution of a definitive agreement and approval by York shareholders, First Colonial will pay a combination of cash and stock for 100 percent of York. The purchase of York State Bank is the third acquisition announced by the $1.25-billion asset holding company within the past month.

"The acquisition of the profitable, well-managed York State Bank is something we're all excited about," said First Colonial Chairman C. Paul Johnson. "Its location in the dynamic Elmhurst and DuPage County markets is very attractive, and we're looking forward to being a contributing member of the community."

William C. Gooch Jr., president of York State Bank, is pleased that the bank is being acquired by a Chicago-based holding company. "The First Colonial group is very committed to the Chicago area, and its philosophy of maintaining the community orientation of its various banks has contributed a great deal to its success," Gooch said.

York State Bank will be the fourth First Colonial location in DuPage County. First Colonial began its move into the DuPage area with the acquisition in January 1989 of the DuPage County Bank of Glendale Heights, which was renamed First Colonial Bank of DuPage County. That bank opened a temporary facility in October 1989 at Route 59 and Gowdey Road in Naperville, and its two-story headquarters is expected to be completed in the spring of this year. In December 1989, pending regulatory approval, First Colonial acquired American National Bank of DuPage, Downers Grove, which is also located in DuPage County.

Johnson said that First Colonial expects to consummate the York merger during the second quarter 1990.

First Colonial Bankshares currently owns 11 banks with 16 locations throughout Chicago and its surrounding suburbs and is parent company of several non-bank subsidiaries including Mid-States Financial Corp., a commercial leasing firm, and First Colonial Trust Co. First Colonial has recently announced the acquisition of American National Bank of DuPage, Downers Grove, Ill., and Burbank State Bank, Burbank, Ill., pending regulatory approval.

LEONIA, N.J. (FEB. 5) PR NEWSWIRE - Jaguar Cars Inc. today reported its best January ever with 1,523 compared with 1,492 during January 1989, a

2.1 percent increase. Graham W. Whitehead, president of Jaguar, said: "This January's record accomplishment is especially gratifying against the very difficult conditions in the U.S. luxury car market. This performance, added to our Daytona 24-hour endurance race victory yesterday, gets 1990 started off in excellent fashion."

Sedan retail sales for the month of January 1990 were 1,086 units versus 1,136 in the prior year's period. XJ-S sports coupe and convertible retail sales for the month were 437 compared with 356 units in the same period last year.

Jaguar is predicting a sales increase in 1990 to more than 20,000 units. The company sold 18,967 new Jaguars in the USA in 1989.

SAN FRANCISCO (FEB. 5) PR NEWSWIRE - The U.S. Environmental Protection Agency (EPA) today announced an amended complaint against Hawaiian Western Steel Limited Inc. and the James Campbell Estate for hazardous waste violations at a landfill at the intersection of Malokole Road and Hanua Street, in Campbell Industrial Park, Ewa Beach, Hawaii.

Under the terms of today's complaint, the two parties must pay a penalty of $141,000 for existing violations and perform closure and post-closure care at the facility, as required by federal law.

The amended complaint charges the parties with operating a land disposal unit without proper authority and directs that the landfill be closed in accordance with appropriate federal regulations. Hawaiian Western Steel and the Campbell Estate have 30 days to respond to this complaint.

PITTSBURGH (FEB. 5) PR NEWSWIRE - Units of Consolidated Natural Gas Company (NYSE: CNG), Transco Energy Company (NYSE: E), and the Coastal Corporation (NYSE: CGP) jointly announced today that they have asked the Federal Energy Regulatory Commission to approve a series of major proposals to provide new domestic natural gas service to meet the increasing demands of gas markets in the northeastern United States. Consolidated's CNG Transmission Corp. unit has filed for permission to provide an incremental 350 million cubic feet a day of long-term, firm

transportation of gas on behalf of Transco's Transcontinental Gas Pipe Line Corporation (TGPL) and Coastal's ANR Pipeline Company, beginning Nov. 1, 1991.

CNG Transmission proposes to transport about 250 million cubic feet a day from Lebanon, Ohio, which is north of Cincinnati, to Leidy, Pennsylvania, in the north central part of that state, for ultimate delivery by TGPL to its customers in the Northeast.

Further, CNG Transmission seeks approval to transport 100 million cubic feet daily on behalf of ANR and its shippers from Lebanon to Leidy and to the Syracuse, New York area to serve incremental cogeneration markets. The primary term for the proposed services is 15 years. CNG Transmission will construct 105 miles of pipeline and add 92,360 horsepower (HP) of compression at a cost of approximately $200 million.

Concurrently, TGPL and Texas Gas Transmission Corporation, also a Transco subsidiary, have filed for permission to transport approximately 250 million cubic feet a day of domestic gas supplies for 14 customers, who have signed precedent agreements, in the New England, Mid-Atlantic and Southeast market areas.

TGPL will also provide downstream transportation for certain ANR shippers. TGPL will construct 37 miles of pipeline along existing right-of-way and add 29,700 HP of compression, at a cost of $85 million. A Texas Gas companion filing calls for construction of 88 miles of pipeline, also along existing right-of-way, and will cost $112 million. Pending regulatory approvals, construction should begin early next year, with initial deliveries in November 1991.

ANR will construct 120 miles of pipeline and add 2,200 HP of compression, at a cost of $79 million.

This series of transportation arrangements will provide economical and environmentally attractive domestic supplies for Northeast gas markets. Projected firm transportation costs will average 80-90 cents per thousand cubic feet, plus fuel, from either Mid-continent or Gulf Coast supply basins to the city gates.

The Coastal Corporation is a Houston-based diversified energy corporation. Together with its subsidiaries, it has assets of $8 billion and operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, trucking and independent power production.

Transco Energy Company, Houston, is a producer, supplier, and transporter of energy. Transco Gas Company, through its subsidiaries, Transcontinental Gas Pipe Line Corporation and Texas Gas Transmission

Corporation, owns and operates a major interstate pipeline system for the purchase, sale and transportation of natural gas.

Pittsburgh-based Consolidated Natural Gas Company is a producer, transporter and distributor of natural gas. Its primary marketing areas are in Ohio, Pennsylvania, West Virginia, New York and other states in the Northeast. CNG explores for and produces gas and oil throughout the United States and in Canada.

CYPRESS, CA (FEB. 5) PR NEWSWIRE - Mitsubishi Motor Sales of America posted its best retail sales month ever the month of January, reaching total sales of 26,672 units, representing an increase of 205 percent over January 1989.

"Additions to our dealer network, strong sales incentives and a higher level of Mitsubishi product acceptance by consumers, has elevated us to fourth place among Japanese importers, behind Toyota, Nissan and Honda," said Rick Lepley, vice president of sales for Mitsubishi Motor Sales of America. The company installed more than 50 new dealers during the final quarter of 1989, creating stronger dealer enthusiasm and a push toward greater sales.

Passenger car sales for January escalated to 22,945, topping the company's previous record of 13,941 units set in December 1989. New monthly records for Galant and Eclipse sales reached 3,901 units and 6,146 units respectively. Both vehicles have earned numerous 1990 awards, including Galant among Motor Trend's "Top 10 New Car Buy Import in a Sport Sedan," and Eclipse among Automobile magazine's "All Stars."

Mitsubishi light truck sales have surpassed all monthly sales of 1989, with a total of 3,727 units, representing an increase of 57 percent over the same period last year. More availability of the price-leading Mighty Max truck and fewer supply restrictions have contributed to strength in light truck sales, according to Lepley.

Mitsubishi Motor Sales of America Inc. is the exclusive U.S. full-line distributors of cars and light trucks manufactured by Tokyo- based Mitsubishi Motors Corp. and bear the "Mitsubishi" name.

BEAUMONT, TX (JAN. 5) PR NEWSWIRE - A Lafayette, La., geologist and a Bryan, Texas, banker have been elected to the board of directors of Gulf States Utilities Co. (NYSE: GSU).

Frank W. Harrison Jr., a consulting geologist and former president of the American Association of Petroleum Geologists, and Bookman Peters, chairman and chief executive officer of First City Bank of Bryan, were elected during a Feb. 1 meeting of GSU's board of directors.

Dr. E. Linn Draper, GSU chairman and chief executive officer, said two current directors will be retiring in the near future and the two new directors are being added, effective March 1, to help provide the board with continuity.

Draper said the board also granted Dr. Paul W. Murrill's request to retire on March 2 as special advisor to the chairman, a post he has held since 1987 when he stepped down as chairman of the board. Murrill will remain a member of the board.

In another personnel matter, the board elected J. Lee Miller to be vice president of human resources, a position that has been vacant since Nov. 27 when James R. Aldridge was granted early retirement. Miller, a GSU employee since 1982, formerly was general manager of organization development.

PITTSBURGH (FEB. 5) PR NEWSWIRE - Allegheny International, Inc. (AI)

(NYSE: AG) today announced it has received U.S. Bankruptcy Court approval to submit its latest plan of reorganization to creditors and shareholders for a vote.

Acceptance of the plan would pave the way for the Pittsburgh-based consumer products company to emerge from chapter 11 protection during the first half of this calendar year.

AI Chairman, Chief Executive Officer and President Oliver S. Travers called the court's action "a major step in moving the bankruptcy process forward."

AI said that it believes the plan will have broad constituent support. AI said it has received a letter of support from its unsecured creditors' committee. AI believes the plan can be confirmed shortly after voting is completed by March 30, 1990. The plan provides for the retention of all AI's consumer products businesses as a group.

Creditors and shareholders within the next two weeks will be mailed ballots and a description of the plan. Security holders of record as of Feb. 6, 1990, will be eligible to vote on the plan. AI filed for chapter 11 protection in February 1988. It submitted this latest plan of reorganization to the court in December 1989.

PITTSBURGH (FEB. 5) PR NEWSWIRE - The Special Committee of the board of directors of Copperweld Corp. (NYSE: COS) has requested the corporation issue, on behalf of the Special Committee, the following release:

The Special Committee of the board of directors of Copperweld Corp. announced today that they are reviewing the merger proposal made on Jan. 24, 1990, by Imetal, a Paris, France, based holding company which currently owns 65.2 percent of the common stock of Copperweld Corp., under which Copperweld's minority shareholders would receive $15.50 per share in a cash merger with a newly formed, wholly owned U.S. subsidiary of Imetal. Dr. Richard M. Cyert, chairman of the Special Committee, stated that the Special Committee has engaged The First Boston Corp. to advise the Special Committee as to the fairness of the Imetal proposal and to explore other alternatives for maximizing shareholder value. The law firm of Edwards & Angell has been retained as counsel to the Special Committee.

As previously announced, under the Imetal proposal the consummation of the merger would be subject to the approval of the holders of a majority of the minority-owned shares of Copperweld voting on the merger, (i) the

negotiation of a mutually acceptable merger agreement containing customary conditions, including a financing condition, and provision for the cancellation of all outstanding stock options not exercised prior to the merger in consideration of the payment of the difference between the exercise price and the merger price per share, (ii) no material adverse change in any of the principal financial markets of France or the United States, and (iii) the redemption by Copperweld of its 9.92 percent convertible subordinated debentures due Sept. 1, 2008.

Copperweld Corp. common stock is traded on the New York Stock Exchange under the symbol COS.

HARTFORD, CT (FEB. 6) PR NEWSWIRE - Loctite Corporation (NYSE: LOC) announced Monday two important promotions in its senior management ranks.

David Freeman has been promoted to executive vice president and chief operating officer.

Theodore Patlovich has been promoted to vice chairman of the company. Both men were simultaneously appointed to the board of directors. David Freeman joined Loctite U.K. in 1974 as director of finance, moved to Paris as vice president-finance, Europe, and then to the United States as vice president-finance, international operations. He was promoted to president of North American operations in 1985. A graduate and Fellow of the Institute of Chartered Accountants of London, he and his wife, Sylvia, live in Avon, Conn.

Ted Patlovich joined Loctite in 1956 as the first salesman the company hired. He has been general sales manager in the United States, president of the Pacific group, and president of the International group. He and his wife, Joan, lived in Hong Kong, Tokyo, and London on company assignments, and presently live in Farmington, Conn.

Ken Butterworth, chairman and chief executive officer, said that both board and management structures will be greatly strengthened to meet the company's growth prospects, and to adapt to its changing markets.

Loctite Corporation, a worldwide market-driven specialty chemical company, ranks among the leading suppliers of proprietary high- performance adhesives, sealants, coatings, specialized brand-name chemicals, and electroluminescent lamps and lighting systems. Principal markets include industrial, electronics, specialized medical, professional automotive and consumer.

#90036p0416 02/05/1990 ~PR Newswire

CALABASAS, CA (FEB. 5) PR NEWSWIRE - Lockheed Corp. (NYSE: LK) reported today that, as expected, earnings from continuing operations were just slightly above break-even for 1989, compared with earnings of $458 million in 1988.

Daniel M. Tellep, Lockheed chairman and chief executive officer, said that while there were a number of other factors, the reduced earnings in 1989 were due primarily to write-offs of about $500 million, pre-tax, on fixed-price development contracts taken during the year. Included in this amount is a fourth- quarter, pre-tax charge of approximately $300 million for unanticipated costs in development of the Navy's P-7A maritime patrol aircraft. The charge, which Lockheed disclosed in November 1989, relates to design and schedule problems on the development phase of the program. Tellep said he believes that the write-offs taken in 1989 cover all of the loss Lockheed currently expects to incur on its major fixed-price development contracts. However, the P-7A is in the early stages of development and there are a number of contractual and other issues yet to be resolved.

Calling 1989 a year of transition, he said that he is confident that the actions taken during 1989 to improve competitiveness through restructuring and consolidation leave Lockheed well-positioned for 1990.

Earnings from continuing operations were $6 million, or 10 cents per share on sales of $9.9 billion for the year ended Dec. 31, 1989. A small pre-tax loss was offset by tax credits resulting in the near break-even after-tax earnings. Earnings from continuing operations in 1988 were $458 million, or $7.61 per share, on sales of $10.4 billion.

For the fourth quarter of 1989, Lockheed reported a loss from continuing operations of $109 million, or $1.72 per share, on sales of $3.0 billion, compared with earnings from continuing operations of $107 million, or $1.80 per share, on sales of $2.9 billion for the same period in 1988.

Net earnings, which include discontinued operations, were $2 million, or 3 cents per share, in 1989, compared with net earnings of $624 million, or $10.37 per share, in 1988. The 1988 results included a gain of $202 million on the sale of Lockheed's DIALOG Information Services unit.

Separately, the company announced that its board of directors at its regularly scheduled meeting today had affirmed Tellep's rejection of Harold Simmons' requests for board representation and redemption of the

company's shareholder rights plan.

#90036p0418 02/05/1990 ~PR Newswire

MINNEAPOLIS (FEB. 5) PR NEWSWIRE - The NWNL Companies Inc. (NASDAQ: NWNL) today announced excellent financial results for the fourth quarter of 1989 and the entire year. Net income set an all-time company high, and shareholder equity also reached a major milestone of one-half billion dollars.

Net income for 1989 was $53,484,000, or $4.14 per share, compared with $34,627,000, or $3.16 per share, for the company's Stock Department in 1988. Income excluding realized gains and losses increased 18 percent to $5.04 per share for 1989.

For the fourth quarter only, net income reached $14,609,000, or $1.13 per share, more than double the Stock Department's total of $6,946,000, or 64 cents per share, for the final quarter of 1988.

As a result of a demutualization and reorganization of Northwestern National Life Insurance Co. at the beginning of 1989, year-to-year comparisons may not be appropriate. The entire company is now owned by

its shareholders. Numbers for 1988 have not been restated to reflect demutualization. The company's 1988 results, however, have been restated to reflect several required accounting changes adopted in the first quarter of 1989.

Chairman and Chief Executive Officer John E. Pearson said, "We are very pleased with our excellent results for 1989. We consider this to be a real accomplishment considering the competitive environment and our transition to an all-stock company."

President and Chief Operating Officer John G. Turner cited the company's strong core insurance operations as the source of its favorable report. Areas of particular note during the quarter were:

-- Solid earnings from individual life insurance and annuities;
-- Increased profitability from group insurance;
-- Strong earnings from pension operations.

Although asset quality throughout the financial services industry has received national media attention in recent weeks, Pearson emphasized his confidence in the quality of NWNL's investment portfolio.

"Approximately 6 percent of our $6.7 billion total portfolio was invested in below investment grade marketable bonds at year end," he said. "Our total marketable bond portfolio -- both investment grade and below investment grade or 'junk' -- was essentially equal to its book value, which is a good indication of its strength. We feel that the entire bond portfolio has performed well and that it's an important part of our overall investment strategy."

The company had more than $2 billion at year-end invested in commercial mortgage loans. There has also been considerable national publicity about commercial mortgage loan problems. During 1989, total problem loans in NWNL's portfolio decreased by $7 million. The company's definition of problem loans, which is more conservative than the industry's definition, includes all loans that are delinquent, in process of foreclosure, and restructured, as well as real estate that is owned as a result of foreclosure.

As of Dec. 31, 1989, the company has set aside reserves of $31 million for potential principal losses on problem commercial mortgage loans in all categories, down $4 million from the prior year.

Both problem loans and reserves decreased, primarily due to the sale of heavily reserved properties. Said Pearson, "Sales of these problem properties is part of our aggressive program of successfully resolving problem investments."

At year-end, the total principal balance of investments of all categories identified as problems, using the industry's definition, was 2.34 percent of invested assets, compared with 1.50 percent the prior year.

Developments of note in NWNL's business operations during the fourth quarter included:

-- The consolidation of NWNL's personal lines businesses, NWNL General Insurance Co. and Provident General Insurance Co., in which Provident General assumed all insurance policies. This enabled the sale of the corporate charter and licenses of NWNL General, which resulted in an after-tax gain to NWNL of $2.6 million.

-- A $2.4 million loss on the expected exercise of a put option by minority shareholders in Chartwell Reinsurance Corp., NWNL's property/casualty reinsurer.

Total new individual life and annuity premium, including lump sum deposits increased 14 percent to $342 million. Sales of Guaranteed Investment Contracts were $562 million in 1989 compared with $625 million the previous year. Group insurance new premium and equivalents increased slightly to $222 million, including a 52- percent increase in new group life premium. Total sales of life insurance increased 26 percent to $14.5 billion of new face amount.

Insurance in force for the company rose $14 billion to $92 billion at the end of 1989. Assets increased 7 percent to $8.3 billion at year end.

The NWNL Companies Inc. is a Minneapolis-based diversified holding company specializing in insurance and financial services. It has 12.9 million shares of common stock outstanding.

HOUSTON (FEB. 5) PR NEWSWIRE - NL Industries, Inc. (NYSE: NL) announced today that NL has been sued by Georgia Gulf Corporation (NYSE: GGC) in connection with Georgia Gulf's poison pill.

NL stated that the suit seeks a declaratory judgment that Georgia Gulf's poison pill is valid and enforceable and that Georgia Gulf is not required to redeem the preferred share purchase rights issued pursuant to its poison pill.

Today, GG Acquisition Corp., a wholly owned subsidiary of NL, commenced an offer to purchase all shares of Georgia Gulf common stock, including the associated preferred share purchase rights, at a price of $45 net per share in cash. The offer is conditioned upon, among other things, GG Acquisition being satisfied, in its sole discretion, that the rights have been redeemed or invalidated or are otherwise inapplicable to the offer.

NL stated that it has no response to the suit at this time.

NORTH HOLLYWOOD, CA (FEB. 6) PR NEWSWIRE - Audiotronics Corp. (AMEX: ADO) North Hollywood, has announced that it filed for Chapter 11 bankruptcy reorganization on Friday, Feb. 2, 1990.

The company has had a series of problems in recent years related to late product deliveries, parts shortages and new product delays, which have

contributed to severe cash flow difficulties. Audiotronics failed to make an interest payment on its 10-1/4 percent convertible debentures due 2002 which resulted in a Notice of Event of Default from the Indenture Trustee.

Audiotronics has retained the services of Kenneth C. Cleveland & Associates Inc. to assist the company in developing a reorganization plan. Cleveland has had considerable successful experience working with companies under similar circumstances.

The company has agreed to the dropping of the company's stock and debentures from trading on the American Stock Exchange.

#90036p0430 02/05/1990 ~PR Newswire

CHESTERFIELD, MS (FEB. 5) PR NEWSWIRE - Comprehensive Care Corporation (NYSE: CMP) today announced that B. Lee Karns, its chairman since 1972 and chief executive officer until Oct. 31, 1989, had retired, effective Jan. 31, 1990, in accordance with previously announced plans and that Stanley R. Nelson had been appointed chairman of the board of directors in his place. Karns will remain as a board member.

Nelson first joined the company's board of directors in March 1988. He had previously served on the board of company's subsidiary, RehabCare Corporation, since March 1987, and the company's Advisory Board since 1983. Nelson retired as president of the Henry Ford Health Care Corporation in 1988, following 17 years as chief executive officer with that institution. He is a past chairman of the American Hospital Association and was the founding president of the Voluntary Hospitals of America. "We are tremendously pleased with Stan's decision to become chairman of the board," said William James Nicol, company president and chief executive officer. "He has exceptional understanding of the health care industry and is truly one of the most respected men in the business."

Karns first joined the company in April 1972, and is credited with the initial creation of the CareUnit system for the treatment of chemical dependency under contract management programs offered in general hospitals. Under his leadership, the company established itself as the leader in the chemical dependency treatment field and extended its programs so that it was annually treating more than 50,000 people by 1989 and its annual revenues had reached $200,000,000.

"Given the company's present difficulties, it is too easy to lose sight of Lee's tremendous contributions, both to the company and the treatment business itself," said Nicol. "He is a great resource and we are all

pleased that he has agreed to remain active with the board."

NEW YORK (FEB. 5) PR NEWSWIRE - E.E.S. Companies Inc. of Framingham, Mass. announced the official release of POS/OE 4 Mac(TM) at the National Retail Merchants Association Conference. POS/OE 4 Mac is a very powerful, easy to use Point of Sale, Order Entry and Merchant Inventory program written for the Macintosh(R) computers in 4th Dimension(R) version 2.

The POS/OE 4 Mac program was selected by BT Tymnet, formerly McDonnell Douglas Payment Systems, as a feature presentation. "POS/OE 4 Mac is the first Point of Sale program for the Macintosh(R) which offers automated electronic credit card processing and fully supports the BT Tymnet network " said Hank Szretter, president of E.E.S. Companies. By implementing the POS/OE 4 Mac system, merchants can significantly increase productivity and reduce their monthly bank percentage charges.

POS/OE 4 Mac offers fast ticket processing in single or batch mode using Electronic Draft Capture (EDC) or Electronic Transfer Capture (ETC). Credit card merchants can get setup with electronic bank processing on the BT Tymnet network. BT Tymnet is the leader in electronic Point of Sale services and the only national company whose total resources are dedicated to providing integrated systems for electronic transactions.

POS/OE 4 Mac operates in single or multi-user mode and is designed to meet the needs of small to large mail order companies, retail merchants and manufacturers. POS/OE 4 Mac features several modes of order processing, inventory tracking, serial number tracking, multi-level password security and access control, automatic purchase order generation, bar code label generation, data import/export, standard reports, and the option to use Trueform(TM) Adobe(R) custom forms.

Currently, E.E.S. Companies Inc. has POS/OE 4 Mac in test use throughout the United States and in Canada. Paul Meany, a software consultant at Astra Software Inc. recently installed Credit Card DA and Multi-Port Unit at Natural Sound of Framingham. The system proved so efficient and economical, that the store sold their VAX/VMS system and installed a Macintosh(R) network with POS/OE 4 Mac.

POS/OE 4 Mac marks a significant addition to E.E.S. Companies' line of credit card processing products which includes Credit Card DA(TM), Credit Card Tools(TM), and Multi-Port Unit(TM). E.E.S. Companies' product line now provides merchants with a total solution. Credit Card DA(TM), a credit card processing desk accessory for Macintosh(R), has received

worldwide recognition and has been reviewed in MacWeek (Oct. 10), Cards International (Oct. 31) and MacWorld (February 1990).

The Multi-Port Unit manufactured by E.E.S. Companies is available with or without a barcode reader and includes a credit card stripe reader, Internal Hayes(R) compatible 300/1200 baud modem, parallel port, an auxiliary port for cash drawer hookup and three serial ports. The credit card stripe reader on the Multi-Port Unit scans and enters the customer's card number and the built-in modem optimizes card processing performance with POS/OE 4 Mac.

#90036p0437 02/05/1990 ~PR Newswire

MADISON, WI (FEB. 5) PR NEWSWIRE - Madison Gas and Electric Co. (NASDAQ: MDSN) advised the Public Service Commission of Wisconsin (PSCW) today that the company will cut its current electric rate request by $2.6 million or more.

In a letter to the commission, MGE Chairman and CEO Donald J. Helfrecht said that the company will cut its current electric rate request at least in half, which could save customers $2.6 million, and possibly more, in the test year starting June 1 of this year. "It is also our goal to make cuts in excess of the $2.6 million if possible." It is likely that natural gas rates will decrease by more than the $773,000 decrease originally requested.

"As a result of these cuts, the average residential customers using both electricity and natural gas will see no increase and likely a decrease in their monthly bill," Helfrecht said.

"We believe it is imperative that the benefits of these savings be made available to our customers as soon as possible. Consequently, we are identifying them now before hearings are held so our customers can derive an immediate benefit from the savings when the rate order is issued," Helfrecht said.

MGE has just completed the initial stage of an extensive review and analysis of the company's operations. As a result, the company has developed comprehensive short-term and long-term recommendations that will reduce costs and rates and improve earnings levels and other measures of financial strength.

Helfrecht said the PSCW should be commended for developing analysis methods which were very instrumental in assisting MGE staff with its review and recommendations.

"The comprehensive recommendations will permit us to reduce our current rate request in the short term and our overall rates in the long term, while maintaining the high quality service that our customers deserve and expect. Ever-increasing technological and economic changes affecting the utility industry as well as our duty to our customers and shareholders require areas where efficiency improvements can be made," Helfrecht said.

MGE is a public utility engaged in generation and transmission of electric energy and in its distribution over 250 square miles in Madison and surrounding areas. The company also distributes natural gas through 962 square miles in and around Madison.

NEW YORK (FEB. 5) PR NEWSWIRE - Hallmark Cards, Inc. announced today that it intends to begin cash tender offers tomorrow through a wholly owned subsidiary for two series of debt securities of Univision Holdings, Inc. as a part of a general restructuring plan for Univision.

Hallmark said the tender offers would be for all Univision senior subordinated discount notes due 1998 for 45 percent of their principal amount (approximately 55 percent of their accreted amount) and for all Univision 13-3/8 percent subordinated debentures due 1999 for 30 percent of their principal amount.

Univision announced last week that due to insufficient cash flow it did not make its Feb. 1 interest payments of approximately $3 million to its bank lenders and approximately $7 million to holders of its subordinated debentures.

Hallmark said the offers were conditioned on, among other things, 95 percent of each series of debt securities being tendered; consent by all tendered securities to certain amendments to the existing indentures; an amendment of Univision's existing bank credit agreement to restructure the payments schedule, increase the availability of funds and amend the financial covenants; and the amendment of certain arrangements with First Chicago Investment Corp., another equity investor in Univision.

Hallmark said that if the restructuring is consummated it would defer the interest payments due on the debt securities purchased in the tender offers for a period of five years.

The offers will expire at 12:01 a.m. on March 7, 1990, unless extended. Goldman, Sachs & Co. are acting as dealer managers for the offers and Georgeson & Company is the information agent.

Univision has set Feb. 6 as the record date for determining holders of debt securities entitled to consent to the proposed amendments to the indentures.

Univision has approximately $315 million in bank debt, $165 million principal amount of senior subordinated notes and $105 million in subordinated debentures.

Univision Holdings, Inc. is a privately held company, based in New York, which owns and operates a Spanish-language television network in the United States and a group of television stations.

WASHINGTON (FEB. 5) PR NEWSWIRE - Dr. Anthony J. O'Reilly, chairman and chief executive officer, H.J. Heinz Company (NYSE: HNZ), has been named the chairman of the Food Industries International Trade Council for 1990.

The Food Industries International Trade Council was begun as a cooperative effort of member companies of the National Food Processors Association and the Food Processing Machinery and Supplies Association to provide a food industrywide approach to opening market opportunities for the American

food industry in the Soviet Union and Eastern Europe.

Dr. O'Reilly has been CEO of H.J. Heinz for 10 years, during which time the company has increased its food sales to over $6 billion in six continents. Heinz is truly a global company in that 60 percent of its sales are in the United States and 40 percent from operations in other parts of the world.

"The Food Industries International Trade Council has developed an industrywide approach to expanding the opportunities for American food companies in the Soviet Union."

The 1990 program of the FIITC is being co-sponsored by the U.S. Department of Agriculture and the U.S. Department of Commerce and enjoys the support of the State Commission of the Council of Ministers of the U.S.S.R. for Food and Procurement.

Meetings with senior Soviet officials in October and early December have resulted in a 4 point program of cooperation for 1990 between the FIITC and the State Commission of the Council of Ministers of the U.S.S.R. for Food and Procurement and Gosagroprom RSFSR. Support for these initiatives has been pledged from the highest policy levels of both the Soviet and U.S. governments.

#90036p0457 02/05/1990 ~PR Newswire

DALLAS (FEB. 5) PR NEWSWIRE - Valhi Inc. (NYSE: VHI) announced a 20 percent increase in 1989 earnings. Net income for 1989 was a record $103.4 million, or 91 cents per share, on total revenues of $2,381.2 million, compared to the previous record net income of $85.9 million, or $.75 per share, on revenues of $2,296.0 million in 1988.

Led by the continued strong performance of the chemicals segment, operating income increased 8 percent to $408.7 million, compared to $378.9 million in 1988.

Most of Valhi's segments reported record operating income in 1989. The reported decline in operating income of the company's refined sugar operations results primarily from the use of the last-in, first-out ("LIFO") inventory accounting method. Under the first-in, first-out ("FIFO") inventory accounting method, operating income of the refined sugar segment would have reflected substantial year-to-year improvement. Supplemental information comparing refined sugar operating income computed on a LIFO basis and on a FIFO basis is included in the business segment

information.

While consolidated net sales for 1989 increased nominally, when excluding sales attributable to business units sold, the company recorded a four percent increase in net sales. A significant amount of Valhi's net sales in several of its segments are denominated in non-U.S. currencies. The year-to-year fluctuations in value of the U.S. dollar relative to most major European currencies during 1989 decreased sales for the year, in U.S. dollar terms.

Amounts reported as extraordinary items in both years relate principally to the income tax benefits of utilization of net operating loss carryforwards.

Operating income in the fourth quarter of 1989 increased 5 percent to $97.7 million, compared to $93.4 million in 1988, as a 26 percent increase in the chemicals segment was partially offset by declines in the other segments. Net income for the fourth quarter of 1989 declined 72 percent to $8.9 million, or 8 cents per share, on revenues of $591.7 million, compared to net income of $32.0 million, or 28 cents per share, on revenues of $584.5 million in 1988. Increased interest expense and lower general corporate income, as well as percentage increases in income taxes and minority interest, more than offset the increase in operating income for the quarter.

Valhi's 1989 results are subject to final audit. Valhi Inc., headquartered in Dallas, is a diversified company engaged in the chemicals, petroleum services, refined sugar, integrated forest products, fast food, hardware products and, beginning in 1990, the titanium metals industries. Valhi's common stock is traded on the New York and Pacific Stock Exchanges under the symbol "VHI."

DALLAS (FEB. 5) PR NEWSWIRE - American Medical Electronics Inc. ("AME") announced today that it filed suit against Sheldon Thaler and PtA Corp. in the Federal District Court for the Northern District of Texas.

The suit charges that U.S. Patent No. 4,654,574, allegedly owned by Thaler and PtA Corp., is invalid and not infringed. Alternatively, AME charges that should the patent be held valid and enforceable, AME has shop rights and an implied license to practice the patent. AME's suit is the result of a long-standing dispute between the parties. AME has received notice that Thaler and PtA Corp. have filed an infringement action the same patent in the Federal District Court for the District of New Jersey naming

AME and a distributor as defendants.

Following a favorable evaluation of these actions and the receipt of FDA approval for Spinal-Stim(R), AME will evaluate market conditions, including pricing, to determine the most advantageous time to proceed with its proposed public offering announced last October. The offering, which would only be made by means of a prospectus, would consist of 1.5 million shares of AME common stock plus up to one million shares to be sold by non-management shareholders who have registration rights.

American Medical Electronics distributes state-of-the-art medical devices, including Physio-Stim(TM), the AME(R) Bone Growth Stimulator, and Spinal-Stim(R) Systems for healing enhancement of spinal fusions. Product research and clinical testing are conducted in cooperation with some of the nation's leading universities.

SEATTLE (FEB. 5) PR NEWSWIRE - Continental Inc., parent company of Continental Savings Bank and Continental Mortgage Co., today announced the appointment of Richard S. Swanson as its new president. Walter B. Williams Continental's president since 1963, will become chairman. Swanson has served on Continental's board of directors since 1984 and has held the

position of executive vice president and general counsel since 1988.

A Seattle native and graduate of Harvard, Cambridge and Stanford Universities, Swanson was previously in private law practice with the Seattle law firm of Hillis, Clark, Martin & Peterson. He has served as president and a director of the Woodland Park Zoological Society and was named "First Citizen of Seattle" by Mayor Charles Royer in 1986.

Continental, headquartered in Seattle since its establishment in 1921, is one of the largest locally owned mortgage banking firms in the Pacific Northwest. It is a leading originator of home loans through its 14 lending offices in Washington, Oregon and Hawaii and currently services mortgages of more than $1.9 billion.

Continental expanded its branch facilities in 1989 with the opening of new Continental Savings bank branches in Mountlake Terrace and Tacoma, Wash., and with new Continental Mortgage Co. offices in Bellingham and Vancouver, Wash., and in Salem, Ore.

Continental has also been a leader in efforts to meet the housing needs of the total community it serves. In 1989, the company received the "Affordable Housing Award" from the Mortgage Bankers Association of America. This award, given to the outstanding lender in a national field of more than 100 entries, was based on Continental's record during the past six years in developing financing programs for low- and moderate-income housing in Washington state.

Other real estate finance services offered by Continental include escrow services, property management and development, commercial property brokerage and insurance brokerage.

(FEB. 5) UPI - Costa Rica has a new president. Rafael Calderon... the son of a former president... won a narrow victory Sunday to replace Nobel Peace laureate Oscar Arias. Chief election rival Carlos Manuel Castillo conceded. Calderon portrays himself as the champion of the underpriviledged.

Egyptian President Hosni Mubarak is expressing regret over the terrorist killings of eight Israelis on a tour bus near Cairo Sunday. 17 others were injured. But Mubarak said the tragedy must NOT disrupt regional peacemaking efforts. Mubarak promised to try to bring the killers to justice.

In India's Punjab state, gunmen Sunday shot dead three police officers and three passengers on a state-owned bus. Police believe Sikh extremists used a truck and a car to block the road. The police officers were killed when they got out to investigate, and passengers were killed as they fled.

The chant in Moscow Sunday was ''Down with the communists.'' About 200-thousand people marched for an end to election laws that only allow Communists to take office. The demonstrators may get their wish Monday. The Communist Party plans to oust hardliners and may open up the ballot to other parties.

Salvadoran President Alfredo Cristiani was met at Harvard University Sunday by angry demonstrators who accused him of being a ''death squad president.'' Authorities had to escort Cristiani through a crowd of about 75 protesters in Cambridge, Massachusetts, as he visited to see his son play squash.

Anglican Church Archbishop Desmond Tutu at Harvard Sunday maintained that South Africa's blacks have NO intention of imposing black majority rule if apartheid is abolished. Tutu said all South Africans are members of one family. Tutu cited Namibia and Zimbabwe as countries that have made a smooth transition from minority rule.

#90036u0214 02/05/1990 ~United Press International

SALT LAKE CITY (FEB. 5) UPI - The first recipient of an experimental device designed to give a person dying of lung disease time to heal was in critical condition, the doctors said.

The patient, reportedly a 16-year-old girl with less than a 10 percent chance of living with normal treatment, remained in critical condition late Sunday, a spokesman at LDS Hospital said.

Nursing supervisor Richard Smith said the device - which performs the lungs' function of exchanging gases in blood and is called an Intravascular Oxygenator, or IVOX - was inserted in a vein in the unidentified patient's groin and threaded into the vein supplying her heart in a two-hour operation Friday afternoon.

Doctors stressed that the temporary implant is not a replacement for the lungs, but only a device that surgeons hope will give damaged or diseased lungs time to heal.

''Calling it an artificial lung is like saying glasses are an artificial eye,'' said Dr. Terry Clemmer, the hospital's chief of critical care.

The hospital, abiding by a request by the family, declined to identify the

patient, but a source who asked not to be identified said the patient is a 16-year-old girl.

Doctors warned that it will take several months to evaluate the importance or success of the device.

''Think back to the artificial heart (at the University of Utah) and the projections made at that time. Eight years later, we are still trying to find out what the role of that is going to be,'' Clemmer said.

The IVOX implant is designed for people suffering adult respiratory distress syndrome and can take on as much as half of the burden of exchanging oxygen and carbon dioxide, the lungs' most important work.

Once the gas exchange is regulated, other vital body functions can be stabilized and the lungs are able to heal, Smith said.

The IVOX, a 20-inch-long tube of hollow fibers, received federal Food and Drug Administration approval for limited human testing in September. Doctors have FDA approval to leave the implant in a patient up to one week but may take it out it sooner if the patient improves or ask for an extension if removing it might be life-threatening, Clemmer said.

The device pumps oxygen through one soda-straw-sized tube and removes carbon dioxide through another with a tiny electrical pump. The gas exchange occurs through a bundle of polypropylene tubes the width of a human hair, doctors said.

Hospital officials refused to say what illness or injury made this patient eligible for the operation, but said one of the standards for selecting candidates is a chance of survival with traditional treatment that is less than 10 percent.

Initial human experiments with the device will use patients with acute lung disease or damage, such as pneumonia or smoke inhalation, not chronic disorders such as emphysema, said the device's inventor, Dr. J.D. Mortensen.

The implant was developed by CardioPulmonics Inc., a Salt Lake City biomedical technology firm.

On Jan. 11, company officials said the IVOX would be tested in 10 patients at four U.S. medical centers, including Penn State's Hershey Medical Center, the University of Michigan Medical Center in Ann Arbor, and the Los Angeles County-USC Medical Center.

(FEB. 5) UPI - Opposition leader Rafael Calderon is claiming victory in Costa Rica's presidential election. Calderon declared himself the winner Sunday night after partial results showed him with 50 percent of the vote. Rival Manuel Castillo had 48 percent and conceded defeat. Incumbent and Nobel Prize winner Oscar Arias could only serve one four-year term under Costa Rican law.

Israel is calling for tighter security for its citizens in Egypt after a terrorist attack killed eight Israeli tourists near Cairo. Two Arab-speaking men attacked a tour bus Sunday. They riddled the bus with bullets, then boarded and tossed hand grenades. Egyptian officials vow to try their best to catch the killers, and called for peace efforts to continue.

A government study shows local jails in the United States are bursting at their seams. The Bureau of Justice Statistics says the jail population doubled from 1978 to 88. Jails were defined as facilities holding people before trial or sentencing. Jail population in mid-1988 was 101 percent over the total rated capacity. Because of such overcrowding, more than one out of ten jails are under court orders to limit the number of inmates.

Defense Secretary Dick Cheney is expected to mount a strong defense of the administration plan to cut conventional forces in Europe while buying more nuclear weapons. Cheney is to testify in Washington today before the Senate Budget Committee. He is expected to answer questions about a report that the Defense Department has stockpiled 30-BILLION dollars in equipment it doesN'T need.

A survey says consumers are generally confident that the United States will avoid a recession in the next 12 months. The poll showed 60 percent of those responding think the economy will remain steady. But 32 percent expect an economic slowdown. Tax increases are expected by 51 percent of the respondents, while 43 percent expect taxes to remain at current levels.

In Vancouver, Washington, an abandoned newborn infant found in a shopping bag in a hospital parking lot was given the temporary name ''Joseph -P- Lott.'' Authorities say the baby is healthy, and they are trying to find his mother. Many callers to the hospital have expressed support and offered to adopt the baby. Even the woman who found the child says she would like to adopt him.

#90036u0308 02/05/1990 ~United Press International

(FEB. 5) UPI - Even with the help of a superhero, ''The Mailman'' said there was no denying the Detroit Pistons Sunday.

James Edwards scored 21 points and Detroit showed off some playoff-style defense in holding Utah to its fewest points of the season in a 115-83 rout of the Jazz in Auburn Hills, Mich. Detroit won its seventh consecutive game.

''Superman could have been on the court and it would have been the same thing,'' said Utah forward Karl Malone, who was held under 20 points for only the third time this season. ''There is nothing we could have done about it.''

Detroit, playing aggressively despite a Saturday afternoon game in Cleveland, led by as many as 34 points in the third quarter before

starting to filter in the reserves.

''It was over before it started,'' Jazz Coach Jerry Sloan said. ''They did a terrific job and we did not have any life. The Pistons are a terrific defensive team. When things go bad, everything does. It was just one of those days.''

The Los Angeles Lakers, who won back-to-back championships before the Pistons won the title last year, probably reminded Detroit there is still room for improvement. Two weeks ago, the Lakers defeated the Pistons 107-97 on national television.

''I think the Lakers game was a good wakeup call,'' said Vinnie Johnson, who scored 15 points. ''Now we go out and try to concentrate on our game and just play tough.''

''We can definitely still improve offensively,'' said Isiah Thomas, who along with Mark Aguirre scored 16 points. ''We can make a little better use of Edwards. And sometimes we tend to lose Laimbeer a little in the flow of the game. But those are things that will work themselves out.''

Edwards made 7 of 8 first-half shots in netting 18 of his points to help Detroit record its 10th victory in 12 games.

Detroit has not lost since Dennis Rodman replaced Aguirre in the starting lineup following the loss to the Lakers. The switch of Rodman and Aguirre was made to help Detroit's starting team defense and second unit offense.

Malone led Utah, which had won two straight and 11 of its previous 12, with 19 points while Darrell Griffith had 13. Mark Eaton was held scoreless as the Jazz scored their fewest points of the season. The previous low was a 92-86 loss to the Lakers on Nov. 25.

The Pistons, 33-14, have the best record in the Eastern Conference. The Jazz, 31-13, are tied with San Antonio with the third best record in the Western Conference.

-- AROUND THE NBA --

Elsewhere in the NBA, Philadelphia defeated Milwaukee 105-102, Golden State beat Minnesota 105-95, Denver dodged Atlanta 125-113, Boston crushed Sacramento 121-89, Phoenix edged Portland 123-121 and the LA Lakers snuffed New Jersey 121-105.

76ERS 105, BUCKS 102

At Milwaukee, Ron Anderson sank four free throws in the final 11.8 seconds and Johnny Dawkins scored 21 points to lift Philadelphia to its 11

consecutive victory - longest in the NBA this season. Milwaukee, led by Paul Pressey's 21 points, played without leading scorer Ricky Pierce, who was out with a pulled right groin muscle.

WARRIORS 105, TIMBERWOLVES 95

At Minneapolis, rookie Tim Hardaway scored 21 points to lead four Golden State players in double figures. The victory was the Warriors' fourth in a row and 18th in 26 games. Center Randy Breuer scored a career-high 40 points for Minnesota.

NUGGETS 125, HAWKS 113

At Denver, Fat Lever scored eight of his 18 points in the opening 3:45 of the third quarter and Denver used a 19-6 spurt during that stretch to take the lead for good, 84-74. Michael Adams scored 27 points and Walter Davis had 24 for the Nuggets. Dominique Wilkins led Atlanta with 35 points.

CELTICS 121, KINGS 89

At Boston, Kevin McHale scored 16 of his 21 points in the decisive second quarter and Boston capitalized on a 32-6 first-half run. Through 4:09 of the second quarter, Sacramento scored just six points while Boston built a 51-25 lead. The Kings have not won at Boston Garden since 1979.

TRAIL BLAZERS 123, SUNS 121

At Portland, Ore., Clyde Drexler scored 33 points and Jerome Kersey added 28 points and 18 rebounds and the Blazers were able to weather a Phoenix comeback. Portland had led by as many as 18 points in the first half, but the Suns slowly chipped away at the deficit and eventually took the lead early in the fourth quarter. Tom Chambers led the Suns with 34 points and Kevin Johnson added 27, 17 coming in the second half.

LA LAKERS 121, NETS 105

At Inglewood, Calif., Byron Scott and Magic Johnson scored 22 points each to help the Lakers hold a half-game lead over Portland in the Pacific Division.

Johnson also had 13 assists and pulled down eight rebounds. James Worthy and Michael Cooper each added 16 points for the Lakers. Dennis Hopson led the Nets and all scorers with 25 points and Purvis Short came off the bench to score 23 points for New Jersey, losers of nine in a row.

#90036u0310 02/05/1990 ~United Press International

(FEB. 5) UPI - From Patrick Roy, with his second shutout in two nights for Montreal, to rookies Mike Richter, rolling on in New York, and Scott Gordon with 49 saves in Quebec, to the 1-0 goaltenders' duel in Buffalo... the night belonged to the netminders. That doesn't even take into account Bob Mason's highlight-film acrobatics in defeat for Washington or Rejean Lemelin of Boston's 200th career victory.

Roy made 19 saves against Hartford in the Canadiens' 2-0 victory over the Whalers for his third shuout of the season. Saturday night, he'd blanked the Buffalo Sabres 1-0.

''I never think about shutouts,'' said Roy, whose defense helped thwart 26 seconds of a two-man disadvantage in the first period.

''Tonight's shutout was easier than one I got last night because tonight the Whalers took lots of far shots against me. We had great penalty killing units. We killed a five-against-three and then we had to kill off a double minor.''

Team-wide defense has become Montreal's trademark, a style that suits Roy's ''big-save'' but non-textbook style.

''Montreal played great defense in front of Roy, and he was sharp when he had to be,'' Hartford Coach Rick Ley said. ''The name of the game is scoring goals and we didn't get one.''

-- AROUND THE NHL --

In other games, the New York Rangers edged Minnesota 4-3, Edmonton nipped Washington 5-4 in overtime, Boston tipped Quebec 3-2, the New York Islanders blanked Buffalo 1-0, Winnipeg routed Chicago 7-3, and Vancouver beat New Jersey 4-2.

RANGERS 4, NORTH STARS 3

At New York, Richter made 30 saves and Bernie Nicholls scored his first goal at Madison Square Garden as a Ranger and set up rookie Darren Turcotte's tie-breaking score against slumping Minnesota. Richter, whose hot hand has made former No. 1 netminder John Vanbiesbrouck expendable, made 30 saves to run his record to 6-1-3. Richter is 5-0-2 in his last seven decisions and the rookie has started eight of the Rangers' last 10 games.

OILERS 5, CAPITALS 4

At Landover, Md., Jari Kurri scored the winner at 3:13 of overtime and the third-period tying score to lift Edmonton past Washington to offset some spectacular saves by losing goaltender Mason against the Oilers' vaunted

offense.

BRUINS 3, NORDIQUES 2

At Quebec, Boston's Lemelin earned his 200th career victory with only 15 saves but was more impressed by the performance of his rookie counterpart Gordon, who remained winless in three starts despite halting 49 shots. John Carter scored the tie-breaking goal midway through the second period. Boston outshot Quebec 26-4 in the first period and totaled 52 shots overall in the Nordiques' eighth straight loss.

ISLANDERS 1, SABRES 0

At Buffalo, N.Y., Glenn Healy stopped 39 shots to help the Islanders administer the Sabres' second 1-0 loss in as many nights on the heels of the setback against Roy and Montreal. Derek King scored the game's only goal with 4:20 left and Buffalo serving a penalty for having too many men on the ice. Daren Puppa stopped 28 shots for Buffalo. The shutout was the second of the season for Healy and the fifth for the Islanders, including a 3-0 victory over Buffalo by Mark Fitzpatrick Dec. 5 on Long Island.

JETS 7, BLACKHAWKS 3

At Winnipeg, Manitoba, Mo Mantha set a Jets record for defensemen with four assists and Brent Ashton had a goal and three assists against Chicago. Paul Fenton scored two goals in the night's rare scoring extravaganza.

CANUCKS 4, DEVILS 2

At Vancouver, British Columbia, Dave Capuano scored his first NHL goal and assisted on two others to rally the Canucks past New Jersey and snap a seven-game winless streak.

(FEB. 5) UPI - Opposition leader Rafael Calderon is claiming victory in Costa Rica's presidential election. Calderon declared himself the winner Sunday night after partial results showed him with 50 percent of the vote. Rival Manuel Castillo had 48 percent and conceded defeat. Incumbent and Nobel Prize winner Oscar Arias could only serve one four-year term under Costa Rican law.

Israel is calling for tighter security for its citizens in Egypt after a terrorist attack killed eight Israeli tourists near Cairo. Two Arab-speaking men attacked a tour bus Sunday. They riddled the bus with bullets, then boarded and tossed hand grenades. Egyptian officials vow to

try their best to catch the killers, and called for peace efforts to continue.

A government study shows local jails in the United States are bursting at their seams. The Bureau of Justice Statistics says the jail population doubled from 1978 to 88. Jails were defined as facilities holding people before trial or sentencing. Jail population in mid-1988 was 101 percent over the total rated capacity. Because of such overcrowding, more than one out of ten jails are under court orders to limit the number of inmates.

Defense Secretary Dick Cheney is expected to mount a strong defense of the administration plan to cut conventional forces in Europe while buying more nuclear weapons. Cheney is to testify in Washington today before the Senate Budget Committee. He is expected to answer questions about a report that the Defense Department has stockpiled 30-BILLION dollars in equipment it doesN'T need.

A survey says consumers are generally confident that the United States will avoid a recession in the next 12 months. The poll showed 60 percent of those responding think the economy will remain steady. But 32 percent expect an economic slowdown. Tax increases are expected by 51 percent of the respondents, while 43 percent expect taxes to remain at current levels.

In Vancouver, Washington, an abandoned newborn infant found in a shopping bag in a hospital parking lot was given the temporary name ''Joseph -P-Lott.'' Authorities say the baby is healthy, and they are trying to find his mother. Many callers to the hospital have expressed support and offered to adopt the baby. Even the woman who found the child says she would like to adopt him.

#90036u0369 02/05/1990 ~United Press International

MANILA, Philippines (FEB. 5) UPI - The Philippine military raised the reward for the capture of coup leader Gregorio Honasan to more than $225,000 amid threats that a new rebellion may be brewing, and offered bounties Monday on 20 additional suspects in the failed December uprising.

Honasan and some 1,000 mutineers still at large are believed responsible for the coup attempt that almost toppled the four-year government of Corazon Aquino in December.

Police said a 300-man elite police force was being trained in case the threats proved true.

The $227,272 bounty for Honasan, the highest ever offered in the Philippines for the capture of a single fugitive, was a sharp increase over the $47,600 reward offered last month for the arrest of Honasan and five other top mutineers.

One of the five mutineers, police Brig. Gen. Edgardo Abenina, was captured Thursday.

National Police chief Maj. Gen. Ramon Montano said the additional bounty money was raised by businessmen who feared a new coup attempt would ruin the economy still reeling from the impact of the Dec. 1-9 rebellion.

At least 119 people were killed and more than 500 wounded in the December coup bid, the sixth and most serious challenge to Aquino, who was swept to power in a civilian-backed military revolt that ousted late ruler Ferdinand Marcos.

The government announced Monday it was offering bounties on 20 additional suspects allegedly involved in the December coup attempt. Topping the list is army Col. Marcelino Malajacan. A reward of $47,600 was being offered for information leading to his capture.

In her regular radio call-in show Sunday, Aquino urged the mutineers still at large to surrender, saying the constitution guaranteed them protection and due process.

''Step forward and face the consequences of your actions,'' Aquino said. ''You are guaranteed protection and due process by the very constitution.''

Honasan, who allegedly masterminded the December uprising, is one of 15 top coup leaders who had a bounty put on their heads by the Philippine military last month.

Five on the list have been captured with the help of civilian informers who later were given their rewards.

The 41-year old Honasan also led the bloody Aug. 28, 1987, coup against Aquino, but he escaped from a prison ship in April 1988 with 14 of his security guards.

Officials said the elite police force of 300 men will join a 2,000-member military task force called ''Operation Plan Checkmate'' to be activated in the event of a coup attempt. The military also announced the 3,000-strong Manila police force will be equipped with rifles and light machine guns as part of the preparations for any attempted coup.

In her radio call-in show, Aquino scotched moves in Congress to advance scheduled May 1992 elections by six months, a move proposed by senators who cited the popular clamor following the uprising.

''If it is stability we are asking for, the answer lies not in a rescheduled national election but in our concerted and accelerated efforts to achieve economic prosperity,'' Aquino said. ''This is what our people are asking for. Elections can wait.''

Also Sunday, the military said at least 29 people had been killed in weeklong fighting between separatist Moslem rebels and government troops in the southern Philippines.

Brig. Gen. Gumercindo Yap, army battalion commander, said troops had flushed out 500 Moslem guerrillas who attacked eight villages in North Cotabato, 500 miles south of Manila.

More than 100,000 people have been killed in the 20-year Moslem rebellion in the mainly Roman Catholic country.

(FEB. 5) UPI - Around the world... around the clock... the latest news from U-P-I.

The leadership of the Soviet Communist Party opened a plenum today to consider abolishing its monopoly on power after 70 years. There have been rumors the two-day Central Committee meeting will be a housecleaning session in which hard-line communists are swept out of power. Protesters yesterday called for dialogue between the party and democratic opposition.

Supporters of opposition candidate Rafael Calderon partied in the streets of Costa Rica last night to celebrate Calderon's election victory. Calderon won a narrow victory over the ruling party candidate for the chance to replace Nobel Peace laureate Oscar Arias as Costa Rica's president. By law, Arias was NOT eligible to run for re-election.

There are still obstacles that must be removed before Nelson Mandela accepts a release from a South African prison. That's according to the wife of the black nationalist leader, Winnie Mandela. The couple met yesterday... and Winnie Mandela says her husband is drafting a response to South Africa's new racial reform program.

Later this morning, President Bush will try to make good on his claim that he's a leader concerned with the world's environment. Bush will speak before a U-N-sponsored group studying global climate change and he'll announce that he's hosting a pair of conferences later this year on the subject.

Defense Secretary Cheney goes before the Senate Budget Committee today to testify on the defense portions of the White House's proposed 1991 federal budget. Cheney will also face questioning about a report that says the Pentagon is stockpiling 30-BILLION-dollars worth of items it doesN'T need.

-30- 1888

#90036u0403 02/05/1990 ~United Press International

(FEB. 5) UPI - Jury selection is to begin today in the San Francisco racketeering trial of U-S District Judge Robert Aguilar. He is the first federal judge to be indicted for racketeering... and he faces more than 50 years in prison if convicted. Aguilar is accused of trying to influence other judges in exchange for favors from felons.

New York police are looking for three teen-agers in the subway slaying of a young man last night. Witnesses say the victim was about to step onto a subway platform when the youths approached him, said something, and then one of them opened fire. The shooting took place in front of a manned subway booth.

Six people... including five children from Texas... died yesterday when a vehicle they were riding in overturned and caught fire on a Missouri highway. Authorities say the driver and another adult managed to escape from the overturned vehicle and were treatewd for minor injuries.

A government report shows the number of inmates in local jails in the United States by mid-1988 was more than twice the number held in those jails a decade earlier. The Bureau of Justice Statistics says there were more than 343-thousand people in local jails at the end of June last year. That figure was 101 percent over the jails' total rated capacity.

A jury will be sworn in and opening statements delivered this morning in Anchorage, Alaska, in the criminal trial of former Exxon skipper Joseph Hazelwood. Hazelwood faces more than seven years in prison for his role in last march's Exxon oil spill. Officials say a plea bargain for Hazelwood was discussed, but dropped.

#90036u0404 02/05/1990 ~United Press International

(FEB. 5) UPI - A stubborn weekend storm passed out of New England early

Monday, leaving more than a foot of snow in some areas and causing choppy seas that sunk a tugboat, while temperatures fell in the South and clearing skies warmed the Midwest.

A high-pressure system powered its way into New England overnight, cooling temperatures but pushing out the storm that dumped more than 12 inches of snow in parts of the region over the weekend, the National Weather Service said.

The mercury dipped to 10 degrees below zero in Maine, buried by more than a foot of snow in some areas. Boston, which received more than 5 inches of snow Sunday, added a light dusting Monday as temperatures fell to the mid teens.

Light snow also fell on New Hampshire, which was socked by 7 to 10 inches of weekend snow, while Vermont reported light snow and temperatures in the single digits, the weather service said.

The Coast Guard said 10- to 12-foot seas from the storm washed over the stern of a tugboat, sinking the vessel off the coast of Massachusetts Sunday night. The tug's lone crewman jumped into a disabled tug he was trying to help.

The 40-foot tug Heidi out of Gloucester was trying to assist the 64-foot Jenny Maitland, which was reported disabled and adrift about 4 miles east of Nahant, Mass., Coast Guard Lt. Brian Kelly said.

''As the tug was approaching the Jenny Maitland it took several big waves over the stern, the engine compartment flooded, and the Heidi sank in 780 feet of water,'' Kelly said.

In the South, cloudy skies began clearing early Monday and temperatures dipped as a low-pressure system pushed into the region. Scattered rain was reported over the southern Florida coast.

Early morning lows included 39 in Knoxville, Tenn., 42 in Atlanta, 55 in Charleston, S.C., 57 in Jacksonville, Fla., and 72 in Miami.

A cold front moved through the mid-Atlantic states early Monday, leaving clearing skies and dropping temperatures as high pressure pushed into the area, the weather service said. The high pressure, which was centered over Tennessee, moved east-northeast and headed for the Atlantic Seaboard.

Temperatures in the Middle Atlantic region were in the 20s and 30s.

After a Midwest weather system dumped up to 6 inches of snow in Southern Illinois over the weekend, skies cleared Monday in Wisconsin and Illinois. Temperatures held in the 20s through Wisconsin, warming to the lower 30s

in Illinois, forecasters said.

South to Missouri, skies were partly cloudy with temperatures in the upper 20s to mid 30s. Michigan reported clear skies in the north and patches of clouds in the south, with temperatures generally in the 20s.

In the West, the Los Angeles basin was recovering from a weekend cold front that generated a 40-mile-wide band of rainshowers. The storm dropped enough rain to carry a man to his death in a swollen channel early Sunday and blanketed low-lying mountains with snow.

The front dropped one-third to one-half inch of rain, and snow was reported as low as 2,000 feet in some areas, forecasters said.

A strong Pacific cold front also moved through central California, dropping a heavy blanket of snow on the Sierra Nevada mountains and rain at the lower elevations. The precipitation tapered off rapidly by midday Sunday.

But another Pacific weather system threatened to bring more cloudiness to northern California Monday, with rain expected over much of the region into Tuesday.

#90036u0407 02/05/1990 ~United Press International

SEOUL, South Korea (FEB. 5) UPI - A court Monday convicted a dissident Catholic priest and a student for making unauthorized trips to communist North Korea and gave them lengthy prison sentences.

A three-judge panel convicted student Im Su-kyong and the Rev. Moon Kyu-hyun on charges of entering North Korea without authorization and meeting with, receiving instructions from and providing military benefits to North Koreans, all forbidden by the National Security Law.

The judges sentenced Im to 10 years in prison and Moon to eight years. They were the fourth and fifth dissidents to be sentenced to long prison terms for visiting North Korea without government approval.

Presiding judge Hwang Sang-hyon, in handing down the verdict, said it was obvious that Im, 22, and Moon, 42, went to North Korea on orders from North Koreans.

''The acts of the defendants helped North Korean communists to stage propaganda favorable to their cause for a communist takeover of the South ... and hurt the international prestige of the people and government of the Republic of (South) Korea,'' the judge said.

Im slipped out of Seoul last June, traveled to the North Korean capital of Pyongyang and attended the 13th World Youth Festival held July 1-8 as the envoy of the National Council of University Student Representatives, a hard-line dissident group based in Seoul.

While in the North, she met ranking North Korean officials, said South Korea was a U.S. colony and accused the Seoul government of opposing a reunified Korea.

Moon escorted Im in North Korea. They crossed back into South Korea Aug. 15 through the truce village of Panmunjom, 35 miles north of Seoul, and were immediately arrested.

The judge said Im was guilty of providing military benefits to North Korea because she gave detailed information about the National Council to which she belonged and about student activities in the South.

''A war these days is not a purely military war but a total war which involves all areas inluding political, economic, social and cultural fields,'' Hwang said. ''From this standpoint, defendant Im must be held guilty of providing military benefits to North Korea. The defendant presented information helpful to North Korea in mapping its strategy against the South.''

The judge added that ''a romantic view appraising the offenses of the defendants as purely out of passions for national reunification can never be justified.''

#90036u0470 02/05/1990 ~United Press International

MIAMI (FEB. 5) UPI - Eastern Airlines and the Transport Workers Union have signed a back-to-work agreement that would put 215 senior flight attendants back in the air by April 1.

The accord is the first between Eastern and any of its unions since the carrier was crippled by a strike in March.

Terms of the agreement were described in a letter sent to flight attendants Friday. In exchange for Eastern's rehiring 215 senior flight attendants, the union agreed to drop a lawsuit challenging the jobs of 215 recruits who were in training when the flight attendants ended their strike Nov. 23.

With Eastern's creditors and preferred shareholders currently considering recommendations to sell or liquidate the airline, however, the impact of the agreement is unclear.

''Both sides had to compromise but this is something we could live with,'' Mary Jane Barry, president of Local 553 of the Transport Workers Union, said of the pact.

The union and Eastern still must agree on a full wage and benefit contract. The last contract expired in 1988.

Asked whether the agreement indicated any change in the hostility between Eastern and its unions, Barry said the contract talks ''are the real test of whether we can get anywhere.''

In the letter to flight attendants, Eastern Vice President J. Michael Jones wrote, ''We are delighted to have reached a settlement that protects the jobs of those who assisted in the rebuilding of Eastern.''

Despite the plans to bring back 215 attendants, Eastern has been cutting back in recent months, not growing. Last week a bankruptcy judge released $50 million from asset sales, enough money for Eastern to operate through February.

The back-to-work agreement could be used to buttress Eastern's argument that it ought to be allowed to continue to operate, since it has shown an ability to negotiate successfully with one of its three unions.

The agreement provides that all of Eastern's future hiring of flight attendants will come from a system seniority list, and all flight attendants will continue to be represented by the TWU.

It provides that Eastern will turn over to the TWU $340,000 in dues it had collected from working flight attendants since the strike began.

The agreement also provides that the union will drop $215,000 worth of claims against Eastern stemming from a dispute in the middle 1980s over how much its representatives should be paid while on union business.

The net effect of the agreement is that Eastern will turn over about $125,000 to the union this week and will continue to collect and pass along union dues from all working flight attendants.

The flight attendants and pilots honored a strike by machinists against Eastern March 4. The pilots and flight attendants ended their strike in November but Eastern has not rehired any of them, saying no jobs are available.

Of the company's 3,600 working flight attendants, half have been hired since the strike. The other half are pre-strike employees who crossed the picket line.

Frank Ortis, president of the Miami local of the striking machinists, said the agreement is insignificant.

''The company blackmailed the flight attendants,'' Ortis said. ''There are still 3,000 of them out of work and it looks like they are pretty well broke. I don't have any animosity toward them. I just think their backs were against the wall.''

#90036u0587 02/05/1990 ~United Press International

(FEB. 5) UPI - Gorbachev talks about the need for a purge in the Soviet Communist Party.

White extremists are blamed for three attacks in South Africa.

Costa Rica has a new president.

This and other top news today... from U-P-I.

This week will see whether the peaceful, democratic revolutions that swept Eastern Europe in 1989 will extend into the Soviet Union in 1990.

The full leadership of the Communist Party of the Soviet Union opened a meeting today to consider abolishing its monopoly on political power.

The Central Committee meeting is viewed as the most vital of President Gorbachev's five years in power. The committee will discuss a draft program for doing away with Article Six of the Soviet constitution, which ensures the Communist Party's monopoly on power.

If the measure passes, it will reduce the stature of the Communist Party... which has had a stranglehold on power in the Soviet Union since the 1917 revolution... and make it contend for political power in a multiparty system.

In remarks made to a delegation of coal miners, Gorbachev said the Central Committee and the Politburo are in need of ''renewal''... which is a Russian euphemism for ''purge.''

The Soviet news agency Tass says Gorbachev expected ''a heated debate'' at the Central Committee plenum... but predicted he will receive support.

A change may be in the offing whether Soviet leadership likes it or NOT. An estimated 200-thousand people marched through Moscow yesterday in one of the largest rallies in Moscow since the 1917 Bolshevik revolution.

Speakers called for the government to open round-table talks with the

Social Democratic Association. S-D-A is an umbrella organization of 12 large, informal Moscow political reform groups born when Gorbachev called for people to get involved in politics.

The crowd had representatives across the Soviet political spectrum... ranging from the flags of popular fronts from almost all of the 15 Soviet republics to several portraits of the last czar. Nicholas the Second was executed in 1918 with immediate members of the Russian royal family.

-30- 2299

#90036u0590 02/05/1990 ~United Press International

(FEB. 5) UPI - Costa Rica's opposition candidate, Rafael Calderon, won a narrow victory in a festive presidential election.

But the party may be over soon... because Calderon faces the challenging task of replacing Nobel Peace laureate Oscar Arias .

Thousands of Calderon supporters jammed downtown San Jose last night... cheering and waving blue-and-red Social Christian Unity Party flags as their 40-year-old candidate declared victory.

A Supreme Election Tribunal official says the partial results, based on a count of more than 20 percent of the vote... were sufficient to give Calderon the win. The results show Calderon edging Castillo by 50 percent to 48 percent, with five other candidates polling tiny percentages.

Calderon's chief rival, 61-year-old Carlos Manuel Castillo of the ruling National Liberation Party... acknowledged his loss.

Calderon takes office May 9th, replacing Arias, the most popular political figure in Costa Rica. Arias won the 1987 Nobel Peace Prize for brokering a peace accord of the five Central American nations. A president is limited to a single four-year term in Costa Rica... so Arias could NOT seek re-election.

(FEB. 5) UPI - President Bush woN'T deliver dire warnings today about the problem of a global warming trend when he addresses a United Nations sponsored group studying climate change issues.

The environmental issue has been the subject of sharp debate within the Bush administration. And Bush agreed with White House chief of staff John Sununu that today's speech needed a moderate tone because the facts do NOT warrant rushing to a judgment.

Sununu says the changes merely reflect the administration's policies.

The president still hopes to project U-S leadership on the environment when he speaks to the Inter-governmental Panel on Climate Change. Bush will announce his plans to host a pair of conferences later this year on the scientific and economic implications of global climate change.

Bush often says he's committed to such issues, but environmentalists are expected to be critical of today's speech... with more charges that the president's actions have NOT lived up to his words.

#90036u0594 02/05/1990 ~United Press International

(FEB. 5) UPI - A new poll says that Americans have faith in the economy.

The poll says nearly 60 percent of those responding believe a recession is unlikely in the coming year. 32 percent think a recession is ''likely''.

The survey goes on to say that 14 percent expect economic conditions to improve during 1990... 20 percent predict some deterioration... and 64 percent believe the economy would NOT change very much.

Despite President Bush's declarations to the contrary... 51 percent of respondents expect tax increases... while 43 percent expect taxes to remain at current levels.

67 percent oppose reducing Social Security taxes... and an overwhelming 72 percent supported a measure to allow depostiors to earn tax-free interest on savings accounts.

#90036u0595 02/05/1990 ~United Press International

(FEB. 5) UPI - Some of the weight of Mexico's huge foreign debt has been lifted from the country.

The Mexican government and representatives of private foreign banks signed a landmark debt accord yesterday in Mexico City.

The agreement will reduce Mexico's 48 BILLION 500-Million dollar medium-term commercial foreign debt by seven-BILLION dollars. That'll save the country one-point-six-BILLION dollars a year in interest payments.

Mexican President Carlos Salinas de Gortari calls the accord ''satisfactory.''

The agreement was assembled under a plan by U-S Treasury Secretary

Nicholas Brady. It calls for reducing Mexico's debt 35 percent... lowering its interest rates to a fixed rate of six and a quarter percent... and giving the country new loans equivalent to 25 percent of outstanding credit.

Salinas had stated in his December 1988 inaugural speech that the interests of Mexicans came before those of foreign creditors. He stopped just short of refusing to pay his nation's debt.

-30- 1165

#90036u0599 02/05/1990 ~United Press International

(FEB. 5) UPI - The United States and Cuba set aside their tensions long enough yesterday for the two nations to work together in helping a stranded Cypriot freighter off the Cuban coast.

The U-S Coast Guard says it received a distress call from the Cypriot merchant ship Lake Michigan... saying it was on fire and dead in the water.

Coast Guard officials say they used informal communications links to advise Cuba that they were sending a ship to assist the Cypriot vessel.

Cuba gave its O-K, as well as permission to send rescue aircraft. Cuban authorities also said they would send a ship.

The fire was out by the time the rescue vessels arrived... and the Cuban ship helped the freighter back to port.

Last week, a Cuban official accused the Coast Guard of- quote- ''an act of North American piracy and terrorism'' when it opened fire on a Cuban-chartered freighter in the Gulf of Mexico.

The Cuban ship had refused to allow a search for illegal drugs.

#90036u0627 02/05/1990 ~United Press International

TOKYO (FEB. 5) UPI - With crucial elections two weeks away, Prime Minister Toshiki Kaifu's ruling conservative party is gaining momentum toward retaining its 35-year uninterrupted rule, a newspaper survey showed Monday.

At stake in the Feb. 18 election are 512 seats in the lawmaking House of Representatives, or lower house of parliament, controlled by the pro-American Liberal Democratic Party since 1955.

The election will be the first major political test for Kaifu, who took office in August 1989 after his two predecessors stepped down over bribery and sex scandals in less than three months.

Political analysts say Kaifu will face pressure from within the party to step down if his party fails to win a simple majority of 257 seats in the election.

The LDP currently has an overwhelming majority of 295 seats in the lower chamber, but it lost its majority in the upper house for the first time since its founding in July 1989. Japan's first sales tax introduced in April was attributable to the ruling party's election setback, the analysts said.

The national daily Yomiuri Shimbun said Monday, however, that a survey it conducted showed about 220 Liberal Democratic Party candidates were leading in their constituencies while about 80 others were on the win-loss border line.

The newspaper said the Japan Socialist Party, Kaifu's main political opposition, is likely to win about 120 seats, compared with 83 seats it held when the lower house of the chamber was dissolved Jan. 24.

Opposition parties have vowed to make the sales tax a major issue in the lower house election again.

In launching her campaign Sunday, Socialist Party chairwoman Takako Doi declared the party will again introduce a bill to scrap the sales tax in the Diet or parliament, after the election.

Four non-communist opposition parties forced a bill to abolish the levy in the upper house last month. It was overruled by the LDP in the lower house.

Despite a hard race predicted for the Liberal Democrats, political analysts said the ruling party will be able to cling to power, but may need the help of conservative independents.

Kaifu's power base within the LDP is weak because he belongs to a small intra-party faction and his fragile leadership rests on the support from other major factions.

A field of 953 candidates, including a record 66 women, kicked off campaigns in the nation's 130 constituencies Saturday.

#90036u0707 02/05/1990 ~United Press International

(FEB. 5) UPI - Diplomats in the Soviet Union say heads may roll at the Communist Party plenum that opened today. President Gorbachev says a purge of the party is needed and he expects some stiff resistance, but feels he'll win support. Gorbachev told a group of coal miners that the Central

Committee and the Politburo are in need of renewal- or what he called- ''the infusion of fresh forces.''

It appears right-wing extremists in South Africa are carrying out retaliatory attacks for the government's racial reform measures. Police say suspected white extremists fired shots at the British Embassy in Pretoria and assaulted a photographer for taking pictures of armed groups of whites. Also, six whites are charged with murder in an attack on a group of blacks in which one man was kicked to death.

An Israeli diplomat in Egypt says Israel will NOT be diverted from the road to peace by yesterday's attack on a group of Israeli tourists. A caller to an international news agency in Cairo claimed responsibility for the attack which left nine Israelis dead and 15 others wounded. An Egyptian television report says President Mubarak phoned Israel to say the attack should NOT disrupt Mideast peace efforts.

Reports of Pentagon waste are expected to come up during questioning today when Defense Secretary Cheney goes before the Senate Budget Committee. A New York newspaper report claims the Pentagon has stockpiled at least 30-BILLION dollars in spare parts, uniforms and other equipment NOT needed. It says the military still has orders for more supplies which its own auditors say should be canceled.

#90036u0727 02/05/1990 ~United Press International

(FEB. 5) UPI - Stock prices on the Tokyo Stock Exchange closed mixed Monday in slow trading.

The key Nikkei Average of 225 selected issues, which climbed 443.73 points Friday, slipped 18.74 points to 37,631.41.

The broader-based Tokyo Stock Exchange Index of all listed stocks, however gained 0.71 points to 2,763.11.

An estimated 400 million shares changed hands, compared with 587 million shares Friday.

Elsewhere in Asia, stocks closed higher in light trading on the Hong Kong Stock Exchange.

The Hang Seng Index gained 20.12 points to 2756.6.

Stocks closed sharply higher in active trading on the Singapore Stock Exchange.

The Straits Times Industrial Index rose 27.10 points to 1576.23 while the

narrower All Singapore Index rose 4.72 points to 442.85.

Volume amounted to 242 million shares.

In Australia, stocks closed slightly higher in light trading on the Sydney Sharemarket as investors stepped to the sidelines to await clearer direction on interest rates.

The All Ordinaries index added 1.8 points to 1667.5 in volume of around 71.6 million shares.

#90036u0729 02/05/1990 ~United Press International

AUSTIN, TEXAS (FEB. 5) UPI - University of Texas President William Cunningham says the university is investigating allegations members of the Longhorns football team placed bets on college and pro sports games with a teammate over the past two years.

Cunningham said Sunday that any players found to have placed bets on college games would be in violation of NCAA rules and would be declared ineligible.

''We will carefully review the allegations,'' Cunningham said. ''Any student-athlete found to be in violation of any NCAA rule will be declared inelibible. The University will report any findings of its investigation to the NCAA.''

Several players told the Austin American-Statesman as many as 20 players placed bets with the teammate in the past two years. The story was published in Sunday's editions.

One source told the newspaper that the player taking bets left the team in November, citing personal reasons, after his name surfaced in an Austin police gambling investigation. No charges were ever filed against the player.

Athletic Director DeLoss Dodds said he has on previous occasions been told of possible gambling activity by players, and when asked if that information came from Austin vice squad officers, he said, ''I can't answer that.''

Dodds said he met with football coach David McWilliams and Butch Worley, assistant athletic director in charge of compliance, following the publication of the allegations. Dodds said he had also alerted the NCAA that players were being questioned about gambling activities.

Dodds said he is confident none of his coaching staff was aware of the

possible gambling.

''Any violation is a serious thing,'' Dodds said. ''(But) I wouldn't say this is a serious violation.

''We investigate all reported violations. We turn any violations in to the NCAA and if there is a violation it would be involving individual eligibility and not a problem relating to the school. Whenever we have an alleged violation, we have Butch Worley investigate. He will start that immediately.''

The school would not be subject to NCAA sanctions unless it can be shown that a member of the athletic department knew of, or participated in, the gambling activities.

Several Longhorn players said the betting never involved UT games, but that during the past two years, 10 to 20 Longhorn players placed bets ranging from $2 to $100 with the teammate. All of the players said the gambling ended when the player left school.

''Betting on sporting events is wrong,'' Dodds said. ''It really had not been talked about until recently. It's kind of swept the country. Not many kids know about it, that it's illegal.''

#90036u0772 02/05/1990 ~United Press International

BOSTON (FEB. 5) UPI - If Pat Metheny hadn't fallen in love with the guitar when he was a kid growing up outside Kansas City, chances are he might be teaching math today.

While Metheny writes instrumental compositions rich with dancing rhythms and catchy melodies, he finds the creative process itself to be a math-like challenge.

''Generally, I try to solve musical problems. It is an unromantic way to put it, even though I try to satisfy the listener that lives within me,'' Metheny says. ''If I have two notes, that generally suggests what the third note should be. I spend a lot of time trying to find the appropriate third note.

''It is very difficult for me to write. I love it, but I can't say it is fun. It is painful - the feeling that you have something on the tip of your tongue but you can't quite say it. To have that feeling for 8 to 10 hours a day for two or three weeks in a row is tough.''

Metheny, 35, who is based in nearby Cambridge, reflected on his career and his writing during a recent brief break in a global tour that took his band, Pat Metheny Group, across the United States and Europe and is now headed to South America and Japan.

Last year's ''Letter From Home'' was his 14th recording in the past 13 years. That highly productive - and high quality - output has earned him a slew of Grammy nominations and two awards in the jazz fusion category.

Metheny recently recorded with Brazilian guitarist Tortinho Horta and also

appears on ''Reunion,'' the stunning new recording by former boss Gary Burton, with whom he will tour for three weeks this spring for the first time in 14 years.

A trio album, ''Parallel Realities,'' with drummer Jack DeJohnette and pianist Herbie Hancock will be released in April and followed with a two-month summer tour with DeJohnette, Hancock and bassist Dave Holland.

Metheny co-produced the DeJohnette session and wrote four of the tunes. ''Jack's idea was to cover a lot of musical ground - straight-ahead, free stuff, melodic stuff and a lot of Synclavier work. It was such a blast,'' Metheny says.

''I don't think it is an earth-shattering record. There are no new concepts, but it is real solid. With lots of listening, you hear a lot of things on there you don't hear the first time.

''Jack and I prepared the music together, knowing Herbie could just come in and play. It almost doesn't matter what he plays in terms of notes. His sound and touch and feel are at such a high level, there are so many things going on there.''

Metheny is uncomfortable with the ''fusion'' label that dogs his highly improvised music.

''I hate the term,'' he says. ''I always have. It is such a strange word. To imply that there is more merging together of musicians and styles than ever before in the past is incorrect to me. In the whole history of jazz, there is a clear and strong tradition of people using whatever sources they could when playing. This is a critical element in jazz.

''Jazz guys were always the first to adapt to new things: the drum set, the saxophone, the synthesizer. What we are doing, particularly with my band, is just an extension of that tradition.''

Metheny splits his playing between acoustic and electric guitars and a synthesizer-enhanced guitar that is linked to a Synclavier digital music system.

The electronic enhancements open up a lot of possibilities, but Metheny says it takes a lot of work to iron out developmental bugs in the equipment.

''These things have a very limited dynamic range in their out-of-the box stage. You have to work harder to make them sound good. You are putting two or three levels of things between what you are playing and what the audience is hearing, which means the conception has to be twice as strong to make the trip. It takes a lot of work to make that sound right,''

Metheny says.

''The danger in fusion - which we cross a lot - is combining a lot of written material with improvisation. People can pick out the difference between when music is written and when it is brainy and clever because it is improvised.

''It is tricky to get the right balance. Slick writing is boring in the same way big band music can be boring if it is played by rote.''

Metheny's distinctive-sounding band, which usually plays nonstop concerts exceeding two hours, includes longtime collaborator Lyle Mays on keyboards bassist Steve Rodby, vocalist Pedro Aznar, percussionist Armando Marcal and drummer Paul Wertico.

Mays has been in the band from the beginning, a collaborator in playing as well as composing.

''We function more as editors for each other than anything else,'' Metheny says. ''Just to be able to bounce ideas off somebody is valuable. Other times, we have almost written phrase-by-phrase together.''

Metheny splits his free time between Cambridge and a home in Brazil.

''I went there for the first time in 1980, and the moment I got off the plane I felt really at home. It is a place I can really get a lot done.''

#90036u0798 02/05/1990 ~United Press International
(FEB. 5) UPI - TV HIGHLIGHTS:

TUESDAY, FEBRUARY 6

6:30 p.m.
PBS, ''Nightly Business Report.''

7:00 p.m.
(Note: In some regions, news is broadcast at 6 or 6:30 p.m. Check with local affiliates for details.)
ABC, ''ABC's World News Tonight with Peter Jennings.''
CBS, ''CBS Evening News with Dan Rather.''
NBC, ''NBC Nightly News with Tom Brokaw.''

8 p.m.
ABC, ''Who's the Boss?'' - When Samantha learns that her overprotective dad is chaperoning her class on a winter break vacation, she worries that his presence will be an intrusion; but when one of her

friends gets into hot water, Samantha instinctively reacts the same way Tony would about her.
CBS, ''CBS Mini-Series: 'Family of Spies''' - Powers Boothe and Lesley Ann Warren star in this drama which recounts the true story of John Walker Jr.'s life as a master spy, the devastating espionage ring he created and the family he destroyed in the process. Three-hour conclusion.
NBC, ''Matlock.''
PBS, ''Nova: 'Disguises of War''' - A historical look at the range of techniques used in the art of deception in war, from simple camouflage to the radar-evading technology of the Stealth bomber.

8:30 p.m.
ABC, ''The Wonder Years'' - Kevin's brilliant idea of asking Winnie to go out on a consolation date with Paul, who's suffering from a broken heart, gives rise to a terrible romantic predicament.

9 p.m.
ABC, ''Roseanne'' - Roseanne's new job - sweeping the floors in a beauty parlor - reduces her self-esteem to an all-time low, but in spite of her resolve to quit, she keeps going back for more.
NBC, ''In the Heat of the Night.''
PBS, ''This Old House.''

9:30 p.m.
ABC, ''Elvis: 'Money Honey''' - In the Depression year of 1938, sheriff's deputies arrive at a ramshackle house in Tuledo, Miss., to take Vernon Presley to jail for forging a check. His 3-year-old son Elvis never forgets the incident. Premiere.

10 p.m.
ABC, ''thirtysomething'' - As Ellyn becomes entangled in an affair with Jeffrey, she unsuccessfully tries to hide from her friends the fact that she's been with a married man.
NBC, ''Midnight Caller.''
PBS, ''Frontline: 'Miss U.S.S.R.''' - Cameras go behind the scenes at the Soviet Union's first beauty pageant.

10:30 p.m.
ABC, ''ABC News Nightline.''
CBS, ''The Pat Sajak Show.''
NBC, ''The Tonight Show Starring Johnny Carson.''

12:30 a.m.
NBC, ''Late Night With David Letterman.''
CBS, ''Stingray'' - Stingray portrays an archaelogy professor to get into a construction site that is rumored to be the ancient and sacred burial grounds of the Meskwahki Indian Tribe.

1:00 a.m.
PBS, ''Dancemaker: Judith Jamison'' - A profile of the life and career of the dancer and choreographer.

1:30 a.m.
CBS, ''Nightwatch.''
NBC, ''Later with Bob Costas.''
PBS, ''Today's Japan.''

#90036u0805 02/05/1990 ~United Press International
WASHINGTON (FEB. 5) UPI - Sen. John Warner, R-Va., formally announced Monday he will seek a third term, leaving Democrats scrambling to find a candidate to run against him in the November elections.

At a news conference, Warner stressed his seniority will provide ''ever more experience and an even stronger voice for Virginia in the councils where vital issues affecting the future of the Commonwealth, our nation and our world are debated and decisions made.''

Warner said his priorities for the 1990s include the care of elderly Americans, tougher environmental laws, solutions to highway transportation problems; equal opportunity and recognition for women and a strong national defense.''

Warner, who will be 63 on Feb. 18, won re-election six years ago with 70 percent of the vote and his decision to run again was expected.

Virginia Democrats, spurned by big-name potential candidates like former Gov. Gerald Baliles, will meet Saturday to discuss their problem. The outcome could be that Warner will run unopposed.

#90036u0852 02/05/1990 ~United Press International

HOUSTON (FEB. 5) UPI - Domestic drilling continued to slide in 1990, while activity in the Gulf of Mexico increased slightly in the past week, latest activity reports showed.

A total of 931 rotary rigs were working in the United States last week, compared with 937 the week before and 780 the same week a year ago, Baker Hughes Inc. reported Sunday.

Meanwhile, drilling activity in the Gulf of Mexico ended a four-week skid, posting a slight increase last week with three more rigs in service, Offshore Data Services reported.

The offshore utilization rate rose 0.4 percent to 68.4 percent with 150 of 215 rigs contracted.

Worldwide utilization also increased, primarily due to the Gulf of Mexico improvement, ODS said. Four more rigs were contracted to work in global waters, resulting in 534 of the 670 units available, or 79.7 percent, in use. The figure was up 0.6 percent over last week.

Utilization in Europe and the Mediterranean was unchanged from the previous week, ODS said.

Last week, there were 327 rotary rigs working in Texas, compared with 320 the week before and 227 the same week a year ago.

Louisiana reported 143 working rigs, compared with 139 the week before and

131 the same week a year ago, while Oklahoma reported 120, compared with 121 the week before and 128 the same week a year ago.

New Mexico reported 38 working rigs last week, compared with 43 the week before and 24 in the same week a year ago.

There were 205 rotary rigs working in Canada last week, the same as the week before, compared with 163 that week a year ago.

#90036u0862 02/05/1990 ~United Press International

MOSCOW (FEB. 5) UPI - President Mikhail Gorbachev, saying a purge was needed and predicting a stormy battle, opened a crucial Communist Party plenum Monday expected to center on abolition of the party's seven-decade monopoly on power.

Twelve speakers, including the mercurial Boris Yeltsin, took the floor after Gorbachev's opening address. Yeltsin told a mass rally in Moscow Sunday he would call for the party Central Commitee to suspend its activity, and for excising Article 6 of the Constitution on the party's sole right to rule.

In remarks made to a delegation of coal miners and made public Monday as the plenum of the Central Committee opened, Gorbachev hinted that a congress of the party might be moved up from October to carry out the ''renewal'' - a euphemism for a purge.

''The Central Committee and the Politburo are in need of renewal, of the infusion of fresh forces,'' he told the miners, the official Tass agency reported. ''A congress is necessary also from this point of view.''

The plenum of the approximately 250 full members of the Central Committee has the power to advance the congress and also to fire members of the Politburo. Political heads are expected to roll, diplomats said.

Gorbachev predicted, in Tass's words, ''a heated debate.'' Then quoting the Soviet leader directly, Tass said Gorbachev expected to prevail. ''I believe we shall be given support, although some critical remarks will be made,'' he said.

Reports of a housecleaning of hard-liners at the two-day Central Committee plenum swirled after speakers at a huge pro-democracy demonstration Sunday called for a suspension of the central activity and a round-table dialogue between the democratic opposition and the party.

The Central Committee meeting, which the official Tass news agency said opened at 10 a.m., is viewed as the most vital of President Mikhail

Gorbachev's five years in power. In many ways, the crowd was banging on an open door.

A draft democratic program expected to be discussed at the meeting calls for doing away with Article 6 of the Soviet constitution - which ensures the Communist Party's monopoly on power - and making the party contend for political power in a multiparty system.

''The Communist Party is in the way of democratization. The Communist Party, like the Berlin Wall, stands in the way of democracy,'' Igor Chubal a radical communist, said Sunday to the crowd estimated at 200,000 by Tass and maverick populist legislator Boris Yeltsin. Observers said it was one of the largest rallies in Moscow since the 1917 Bolshevik revolution.

Chubal, a candidate for the Moscow Soviet in the March local elections, likened the strength of the crowd to those who propelled the communists into power when they seized the Winter Palace in the 1917 October Revolution.

In a warning that Tass admitted was terrifying, Chubal said the crowd's strength was sufficient to march on the dreaded Lubyanka KGB headquarters up the street if they were so inclined.

''The number of those present today is sufficient to storm the Winter Palace and the Lubyanka,'' Chubal said within sight of the sandstone KGB bastion. ''If peaceful revolution fails, we shall have to make a different one.''

On the eve of the momentous plenary meeting, Muscovites carried placards demanding that party stalwart Yegor Ligachev be fired from the ruling Politburo.

''Gorbachev, yes. Ligachev, no,'' one sign read.

Beginning from a snow-covered field near Gorky Park, the demonstrators, many carrying royalist and anarchist flags, wound through the center of Moscow, walking through eight-lane traffic underpasses cleared by fur-hatted, blue-uniformed police on a 3-mile route to Red Square.

The crowd, with the militia in front, was funneled down Gorky Street, the 150-foot-wide shopping avenue leading toward the Kremlin. In front was a small red police car with blue stripes clearing the way with a loudspeaker politely asking, ''Comrades, make room.''

Lines of young militiamen from the Ministry of Interior linked arms and locked their black-gloved hands, funneling the crowd as through a sluice so they ended up in front of the Moskva Hotel opposite the Kremlin.

There, from a tribunal, the most vocal pro-perestroika reformers spoke, their calls resounding through the square from loudspeakers.

In the crowd, representing the spectrum of political opinion, bobbed the flags of popular fronts from almost all the Soviet Union's 15 republics, the blue-white standard of the Moscow Popular Front and several portraits of the last czar, Nicholas II.

Economist Gavril Popov and historian Yuri Afanasyev, two household names of radical perestroika, called for the government to open round-table talks with the Social Democratic Association. The SDA is the umbrella organization of 12 large, informal Moscow political reform groups born in 1987 when Gorbachev called for people to get involved in politics.

Yeltsin demanded that the Central Committee of some 250 top communists be suspended and that a commission function in its place.

Yeltsin, fired as Moscow party chief and bounced from the ruling Politburo in the fall of 1987 for telling Gorbachev that perestroika was going too slowly, said he would ask that he be allowed to speak at the Central Committee meeting.

He demanded the committee take the first step to scuttle Article 6 of the Soviet constitution.

''There must be no monopoly of power,'' he said. Many in the crowd roared, ''Down with the communists.''

''The party shall be given its last chance. If ... the committee says no to Article 6, then it may retain the trust of some people,'' Yeltsin said. ''Many Eastern European countries have left us behind and

By JAN A. ZVERINA, UPI

DETROIT (FEB. 5) UPI - Those with fond memories of the first Pontiac Grand Prix back in 1962, or the powerful SJ models of the early 1970s, have been crying in their hi-test gas lately.

These are the same folks who mourned the passing of the Grand Prix's V8 engine, rear-drive and a good chunk of its size during the 1980s.

But it's now the '90s, and how times have changed.

Now in its 28th year, the Grand Prix has been given two more doors to make it a sedan and do battle with an armada of mid-sized Japanese and American

models that just weren't around 20 years ago.

The Grand Prix sedan is to be offered in two versions for 1990. Both retain the smooth lines of the front-drive coupe, last redone for 1988.

A sporty STE (''Special Touring Edition'') version, to debut this spring, is a fully equipped, European-flavored sports sedan priced at $18,539.

A 140-horsepower 3.1 liter V6 coupled to a 5-speed manual gearbox is standard on the new STE, while an optional turbocharged version of that engine that delivers 205 hp will be offered with a 4-speed automatic transaxle.

The LE version, however, is expected to be the big seller. Pontiac expects it eventually will account for the bulk of all Grand Prix sales.

While the standard drivetrain in the LE is a 2.3 liter, 160 hp 16-valve, four-cylinder engine known as GM's Quad Four and mated with a 3-speed automatic, most buyers are expected to choose the 3.1 liter V6 and 4-speed automatic for $200 more.

With an EPA fuel estimate of 19 city-30 mpg highway, this combination is 3 mpg less efficient than the base drivetrain in city driving, but goes 1 mpg further on the highway.

A Grand Prix LE sedan evaluated cost $18,516 as tested, counting a $455 destination fee.

Nearly $3,500 worth of extras were added to its $14,564 base price that already includes air conditioning, AM-FM stereo, power steering and 4-wheel power disc brakes as standard.

The $2,487 ''option package No. 4'' mingles popular items like cruise control, tilt steering column and power windows with less common options, like a remote key entry and ''power sport mirrors.''

Another $400 was charged for an upgraded stereo and tape cassette player that has a set of controls on the steering wheel as well as the dashboard. Not just another high-tech gimmick, it truly enhances driver safety and minimizes distraction from the road.

The LE's interior has generous room for four adults, five in a pinch. There is a pass-through to the trunk via a center armrest in the rear.

Automatic three-point seat belts meet the letter of law on safety restraints, although this design can be easily ignored by those still foolish enough not to buckle up.

Drivers are treated to a mixed bag of ergonomics. But on balance, the LE's controls get high marks.

On the plus side of this equation are welcome touches like a steering wheel with a slightly thicker rim at the 10 and 2 o'clock positions and illuminated window and door controls to aid nighttime driving.

Drawbacks include overly complicated wiper controls on the right of the instrument panel and the numerous tiny stereo controls on the dash - another reason for the optional steering wheel buttons.

The LE sedan has a nicely balanced blend of ride, handling and power, although GM has so far been unable to engineer the cheap sounding drone out of its V6 engine during acceleration.

Some drivers may also find the LE's power steering a bit stiff at low speeds. Sorely needed is a variable assist system that provides a light feel at low speeds and more effort during highway driving.

Still, the Grand Prix sedan is the best execution yet of GM's line of mid-sized sedans, that also includes the Oldsmobile Cutlass Supreme and Chevrolet Lumina. Buick's version is to debut later this year.

Those looking for such a car should also compare the LE with Ford's Taurus Honda's Accord, and other sedans in its class.

But more importantly, the Grand Prix LE is the kind of car GM needs to regain lost market share. After all, the mid-sized sedan market has always been its high volume, bread-and-butter market - a market lost in large part to the Taurus and Accord.

(For each car written about in his weekly Roadtalk column, UPI Auto Writer Jan Zverina test drives the vehicle for one week, driving it between 250 and 500 miles on both city and rural roads.)

#90036u0919 02/05/1990 ~United Press International

By JACK LESAR, UPI

(FEB. 5) UPI - A new Macintosh virus discovered late last year in Belgium has reached epidemic proportions in the United States, affecting thousands of computers.

The new virus, dubbed WDEF, is spread exclusively through floppy disks and infects the invisible Desktop files used by the Finder - the heart of the Macintosh system environment.

The WDEF infection crashes Mac IIci's and portables and, on other machines can cause icons to disappear, make error messages flash on the screen and crash individual applications.

But while it often looks like a disaster, it is easily cured, and rarely causes damage.

''All you have to do is press the option and (Apple) command keys and hold them down until the complete desktop appears on the screen,'' said John Norstad, a systems analyst at Northwestern University in Evanston, Ill. ''This rebuilds the desktop and eradicates the virus.

''MDEF is one of the most virulent Mac viruses I've ever seen. It's popping up everywhere,'' said Norstad.

The virus is spread by floppy disks, and is particularly troublesome at colleges and businesses where Macs are shared by many users.

''Every major university has reported problems,'' said Norstad. ''Fortunately, like all the other Macintosh viruses discovered so far, it's benign.''

While a few instance of damage have been reported, they are rare. Norstad said the MDEV virus was created by vandals to frustrate Mac users - not damage computers.

''But it's a real problem. It denies users the use of their computer. It's costly in terms of of time,'' he said. ''People don't know what's happening. Sometimes they end up taking the machines in for repair.''

''Then, it's so virulent that sometimes, almost as soon as they get everything up and running again, they end up with another infection,'' he said.

A common symptom of virus is underlining and condensation of type faces in windows displaying the contents of disk in the name or date mode.

All commercial Macintosh anti-virus programs have been updated to detect and eradicate the MDEF viruses. Free Macintosh virus-protection software - like Norstad's Disinfectant - also have been updated to protect against the new virus.

Norstad's updated Disinfectant program - version 1.5 - is available free from the major on-line information services, including CompuServe, GEnie, and America Online. It can be downloaded - as a condensed Stuffit file - in less than 20 minutes at 1200 baud.

Disinfectant 1.5 recognizes the Scores, nVIR, INIT 29, ANTI, MacMag, and

WDEF viruses, as well as all known variations and clones of those viruses. It both detects the viruses and repairs infected files,

The program offers two options: scan, which simply checks for viruses and reports if it detects them; and disinfect, which scans for viruses, then automatically eradicates them, repairing infected files.

In its ''disinfect'' mode, the program should be run under Finder instead of MultiFinder, to avoid possible problems with busy files.

Disinfectant is simple to use. Just designate the drive you want checked, then click on the ''scan'' or ''disinfect'' button. Disinfectant zips through the files, and prints a report in the text area of the program's dialog box, advising the user of any infections found and actions taken.

When disinfecting, you should start your machine from a floppy disk and run Disinfectant from the floppy.

Norstad suggests making a special ''virus tools'' floppy for that purpose, containing Disinfectant and copies of your System and Finder files. A new disk should be used, and it should be locked after the programs are copied onto it to prevent it from becoming infected.

Norstad recommends that Disinfectant be used in conjunction with Vaccine, a control-panel (INIT/cdev) document that protects your system from viruses.

''Disinfectant is a treatment. You use it after you have an infection. But it's far better to prevent infection in the first place. And Vaccine is the single most important virus-fighting tool you can use,'' he said.

Like Disinfectant, Vaccine is available free on major on-line information services.

Written by Don Brown of CE Software of West Des Moines, Iowa, Vaccine provides partial protection against worms and viruses - partial in that it is not known what future computer vandals may do to elude it.

When Vaccine is installed, it displays a warning whenever a significant resource file is being modified. The Vaccine warning appears in a dialog box equipped with two buttons: ''Granted'' and ''Denied.'' If the want the file modified, click ''Granted.'' If not, click ''Denied.''

Disinfectant should be used before installing Vaccine. Once your computer is checked by Disinfectant, drag Vaccine into your System file. Then access the control panel from the Apple menu and click on the hypodermic-needle icon. Click the ''turn on protection'' and ''show icon'' boxes and reboot. After that, your system is protected until you disable

Vaccine.

LINCOLN, NE (FEB. 5) UPI - Sen. J. James Exon, D-Neb., Monday announced his bid for a third term, saying the 1990s are crucial years as the nation prepares for the 21st century.

Exon said Americans live in ''the beacon of democracy in a world where the light is shining brighter than ever.'' He said he is proud of the key role he has played in the ''peace through strength'' effort, which has brought down communist domination in Europe.

''The possibilities for reduced terrorism, reduced military expenditures and a lasting peace are better than ever,'' he said. ''However,

experienced heads and proven leaders are fundamental to future success.''

Exon scheduled eight stops around Nebraska Monday to announce his re-election bid. Exon was elected to the Senate in 1978 and re-elected in 1984. No Democrat has announced plans to challenge Exon in the primary election. Former Rep. Hal Daub of Omaha said he intends to run for the Senate as a Republican.

#90036u0984 02/05/1990 ~United Press International

(FEB. 5) UPI - The winds of change in East Europe may be blowing into the Soviet Union. Soviet President Gorbachev today opened a plenum expected to center on ending the Communist Party's monopoly on power. Gorbachev also said that the party is in need of a renewal... a euphemism for a purge.

But peaceful changes in the Soviet republic of Azerbaijan have been put on hold. Armenian nationalists broke off their talks with Moslem Azerbaijanis... charging the Moslems violated a truce by evicting Christian Armenians from two villages. The truce to halt ethnic fighting lasted just one day.

Suspected white extremists UNhappy with South Africa's new racial reforms are blamed for violence aimed at blacks, the British Embassy and others. Six white men are charged in a weekend attack in which a black man was kicked to death. Right-wingers are also suspected of firing shots at the British Embassy in Pretoria and beating a white photographer.

Egyptian officials say they'll conduct a massive manhunt for the two attackers who ambushed an Israeli tour bus yesterday. Egypt has declared a national security alert because of the incident and says its authorities will join forces with Israeli investigators in the search. At least nine Israelis were killed and 17 wounded in the attack.

The problem of a global warming trend is getting the attention of President Bush. But today when Bush addresses a group studying the problem he woN'T issue any dire warnings. The president's speech was toned down to reflect his policy of reaching a consensus on the issue, and then deciding a course of action.

#90036u0993 02/05/1990 ~United Press International

MILWAUKEE (FEB. 5) UPI - A 20-year-old mother suspected of placing her 7-week-old son in a plastic bag and dumping him in a garbage cart was in custody Monday, police said.

The woman allegedly left the boy in the cart Sunday night after a fight

with the child's father, police said. The baby was taken to a hospital but appeared to be uninjured, authorities said.

The baby had been placed in a plastic garbage bag with holes poked in it.

Police said the child's mother called a friend of the child's father Sunday, saying that if the father ever wanted to see the child again, he should look in the garbage.

The friend then called police, who found the child.

The mother was being held in the city jail. Police said they would seek charges of attempted murder against the woman.

#90036u1000 02/05/1990 ~United Press International

CHICAGO (FEB. 5) UPI - Gains in household income continued to lag behind increases in the price of homes in 1989 with two-income families making up a higher percentage of the total, the Chicago Title and Trust Co. said Monday.

The same pattern has occurred each year since 1976, according to the nationwide survey of home buying trends in major metropolitan areas.

Although 1989 was a relatively benign year for housing inflation in the United States, the widening differences in income and price were compounded.

Since 1976 median home prices have risen at a compounded annual rate of 8.8 percent from $43,340 in 1976 to $129,800 last year. At the same time, median household income rose at a compounded annual rate of 8.3 percent from $20,840 to $58,700.

''While this may not seem like much, over time a discrepancy of this size adds up,'' said John Pfister, vice president and manager of market research for the title insurer. ''During this time period, the difference between income gains and home price increases grew a total of 6.5 percent. The economic impact of this is that those buying houses today have noticeably fewer discretionary dollars to spend on things other than housing than their counterparts did 13 years ago.''

The incomes of home buyers in the 1980s might have lagged home prices even further were it not for the growing number of two-income families in the home-buying population, Pfister said. The study showed working couples have been the major factor influencing affordability in this decade.

Among couples buying homes in 1989, two-income families comprised 86.8

percent of first-time buyers while two-income families made up 79.3 percent of repeat buyers. That compares with 53.1 percent for all buyers in 1976 and 64 percent for first-timers.

''Based on data corroborated by other sources, we've found the percentage of two-income families is significantly higher among those buying homes than among the population as a whole,'' Pfister said.

The study showed the average monthly mortgage payment for buyers rose from $1,008 in 1988 to $1,054 in 1989, but the average payment as a percentage of household income declined a full percentage point to 31.8 percent last year. The average monthly mortgage rate in 1976 was $329.

Chicago Title, a leading insurer of property titles, said the 1989 survey was conducted through 1,500 telephone interviews in 18 U.S. housing markets.

In the Midwest, the markets surveyed included Chicago, Cleveland, Detroit and Minnesota. In the Northeast, the markets surveyed included Boston, New York, Philadelphia and Washington, D.C. In the South, the markets surveyed included Dallas-Fort Worth, Memphis, and Orlando, Fla. In the West, Seattle-Tacoma, the markets surveyed included Phoenix, Denver, San Francisco, Los Angeles and Orange County, Calif.

BY STEVE GERSTEL

WASHINGTON (FEB. 5) UPI - Senior congressional aides, often branded the real powers on Capitol Hill, give high marks to most Senate and House leaders but not all of them.

For the fifth year in a row, the public relations firm of Fleishman Hillard Inc. surveyed veteran aides in 292 congressional offices, and for the third year Speaker Thomas Foley ranks at the top.

The survey polled 236 House and 56 Senate offices and 157 Democratic and 129 Republican aides.

Asked to name the most respected member of the House, the aides, from both sides of the Capitol and both parties, named Foley, who ascended to speaker after Jim Wright was driven out of office.

Foley's respect goes accross the board: 59.2 percent overall; 55.4 percent in the Senate; 60.2 percent in the House; 69.4 percent among Democrats and 48.1 percent among Republicans.

The veteran Washington representative was such an overwhelming winner that ''don't know/refused'' finished second with 6.8 percent, ahead of any House member.

Surprisingly, the senior aides listed little-known Rep. William Natcher, D-Ky., as the House member they respect most next to Foley, although he finishes far behind with 5.5 percent with almost all his backing from the House and more from Republicans than Democrats.

Rep. Robert Michel, R-Ill., is next, with 4.5 percent although disdained by every Democratic aide, and other members of the leadership. Rep. Richard Gephardt, D-Mo., the Democratic leader, Rep. William Gray, D-Pa., the Democratic whip, and Rep. Newt Gingrich, R-Ga., the Republican whip, barely rated a mention.

The senior aides rated Democratic leader George Mitchell as the senator they most respect for the second year in a row, but not by the wide margin enjoyed by Foley. He rated a 39.4 percent.

Mitchell was followed by Senate Republican leader Robert Dole of Kansas, 13.7 percent; assistant Senate Republican leader Alan Simpson, R-Wyo., 8.2 percent, after which the aides rated three major committee chairmen, Sen. Sam Nunn, D-Ga., Armed Services, Sen. Lloyd Bentsen, D-Texas, Finance, and Sen. Robert Byrd, D-W.Va., Appropriations.

Conspicious by his absence was Assistant Senate Democratic leader Alan Cranston, D-Calif., who is under preliminary investigation by the Senate ethics committee on allegations involving the failed Lincoln thrift.

But the senior aides, when asked to rate the legislative effectiveness of the leaders, gave Cranston the poorest marks, a majority, 52 percent, saying he did a fair to poor job. Only 9 percent rated Cranston as excellent-very good, and 27 percent rated him good. The rest, 12 percent, said they did not know.

Foley also led the effectiveness sweepstakes with 71 percent of the aides rating him either excellent or very good. Only 4 percent considered his work poor.

Ranking behind Foley in the excellent-very good category were Mitchell, 66

percent, Dole, 58 percent, Michel, 41 percent, Gephardt, 40 percent, Simpson, 36 percent and Gingrich, 32 pecent. Although the others had relatively few fair-poor ratings, Gingrich totalled 31 percent.

#90036u1049 02/05/1990 ~United Press International

BRUSSELS, Belgium (FEB. 5) UPI - Employment in the European Community between 1986 and 1989 increased by 5.5 million jobs, the highest rate of growth in 30 years, with women accounting for 80 percent of the increase, officials said Monday.

But the growth rate for employment was expected to slow down this year to about 1 percent, the officials said.

And they noted that many of the recently created jobs were part-time, low-paying service positions.

Employment increased by more than 1.25 percent each year since 1986, resulting in a net increase of 5.5 million jobs over the three-year period which officials said was the best performance in the past three decades.

The unemployment rate during the period declined from 10.8 percent in 1986 to 9.0 percent in 1989, according to figures released by Eurostat, the statistical arm of the 12-nation European Community.

The great majority of the new jobs were held by women but more than half those jobs were part time and most of those in the services sector.

''The strong increase in female part-time employment gives a hint that more low-paid jobs are being created,'' Eurostat said.

Despite an increase in the number of new jobs held by women, the female unemployment rate increased slightly from 1984 to 1988, from 12.9 percent to 13.4 percent, double the jobless rate for men.

Unemployment among young people remained a problem in the EC, although it declined from 24.1 percent in 1984 to 20.2 percent in 1988.

Eurostat made special mention of the uncertain nature of future employment patterns in West Germany, due to recent political developments in East Germany and other countries of Central and Eastern Europe, where 3.5 million ethnic Germans live.

Potential immigration ''could become a new source of dynamism in Germany and for the Community as a whole, provided there are appropriate responses'' in occupational training and in promoting greater investment, Eurostat said.

#90036u1078 02/05/1990 ~United Press International

CHICAGO (FEB. 5) UPI - Farm machinery production in the United States and Canada increased in 1989 for the third consecutive year and is expected to be higher again this year, a business publication reported Monday.

Chicago-based Stark's Off-Highway Ledger said the 22 percent increase last year was the highest level of annual output since 1984, and predicted a major rebound this year.

Sales of high horsepower farm tractors and self-propelled combines last year were 34 percent higher than in 1988, rising from 29,715 units in 1988 to 39,895 units last year.

However, vehicle assembly outstripped annual sales, indicating that manufacturers continued to rebuild dealer inventories for the second year in a row.

Stark's said Deere & Co. expanded its position as the leading manufacturer of tractors and combines. Although the company's share of unit assembly slipped to 50.5 percent in 1989 from 52.5 percent the previous year, vehicle volume was up 17 percent.

J.I. Case Co., a unit of Tenneco Inc., ranked second at 32 percent for a gain of 1.5 percentage points over 1988. Ford New Holland Inc., a unit of Ford Motor Co., was third at 8 percent, unchanged from the previous year.

White-New Idea Farm Equipment Co. had 6 percent of the industrywide unit output, Deutz-Allis Corp. was in fifth place and Caterpillar Inc. was sixth.

Farm tractor production was up 17 percent to 39,115 vehicles while combine production was up 39 percent to 12,515 units as manufacturers increased their output in the wake of a major market upturn during the last quarter of 1989.

Stark's Off-Highway Ledger is a business newsletter covering vehicle production, inventories and sales of trucks, farm machinery and construction machinery.

#90036u1089 02/05/1990 ~United Press International

WASHINGTON (FEB. 5) UPI - Worker productivity slowed in the last three months of 1989 to finish the year with the smallest gain in the nation's hourly output of goods and services since 1982, the government said Monday.

In its report on productivity and costs, the Labor Department said inflation danger signs loomed, while worker output decreased by 0.2 percent and the number of hours worked fell by 0.4 percent - the first decline since the second quarter of 1986.

The productivity of workers, excluding those on farms, increased by 0.2 percent in the fourth quarter, compared to 2.4 percent in the third quarter. For the year, productivity edged up by 0.9 percent, compared to an increase of 2 percent in 1988 - the smallest gain in seven years.

A key indicator of inflation, the implicit price deflator for non-farm businesses, rose 3.9 percent in October, November and December compared to 2.7 percent in the previous quarter, the Labor Department said.

Hourly pay rose 6.9 percent in the fourth quarter, or 2.8 percent when accounting for inflation, about the same as in the period covering July, August and September.

For the year, the inflation gauge increased 3.9 percent, compared to 2.7 percent in 1988. Hourly pay for the year rose 5.5 percent in the non-farm sector, an increase of only 0.6 percent after inflation.

When including farm prices, the price deflator finished 1989 up 3.9 percent, compared to an increase of 2.9 percent in 1988 - the largest increase since 1982, the Labor Department said.

Productivity of manufacturing workers in the fourth quarter ''increased a good deal more rapidly,'' surging to 3.2 percent and adjusted for such seasonal factors as the weather, the government said.

Their hourly pay of factory workers also increased in the fourth quarter of 1989, by 7.2 percent or 3.1 percent when accounting for consumer prices.

But output fell, by 1.3 percent, as did the number of hours worked, by 4.4 percent - the first quarterly decline in manufacturing output since a 0.2 percent drop in the second quarter of 1986.

#90036u1141 02/05/1990 ~United Press International

(FEB. 5) UPI - Opposition candidate Rafael Calderon is the new president of Costa Rica. The 40-year-old Calderon succeeded in his third run for the presidency under the Social Christian Unity Party. He lost to Nobel Peace Prize winner Oscar Arias in 1986 and was also defeated in 1982 elections. Calderon is the son of a president who ruled Costa Rica from 1940 to 44.

Police in South Africa say six white men face charges of murder, attempted

murder and assault for an attack on an undetermined number of blacks in the western Transvaal province. One man apparently was kicked to death. The attack came 24 hours after President de Klerk ordered radical reform measures... which included lifting a 30-year ban on the rebel African National Congress.

Egypt has declared a national security alert in its hunt for two gunmen who ambushed an Israeli tour bus... killing at least nine people and wounding 17 others. The previously unknown Group for Oppressed Prisoners claimed responsibility for yesterday's attack near the Suez Canal. Israeli authorities have joined the investigation.

Philadelphia police digging in a city park found NO new artifacts where a human skull, a horned goat's head and other allegedly occult-related items were discovered on Saturday. Police say the occult items are used in the rituals of the Santaria religion in the Caribbean and Haiti.

BRUSSELS, Brussels (FEB. 5) UPI - A directive assuring access by private companies to the public telecommunications system has been agreed on Monday by the European Community's council of ministers.

The so-called Open Network Provision, to be considered by the European Parliament, was expected to receive final council approval in April and take effect in the summer.

The directive was designed to make sure that access to public telecommunications systems is harmonized throughout the 12-nation Community. Security and protection of data are also incorporated in the measure.

European communications services are currently stifled ''by divergent conditions of use or discriminatory tariff principles,'' the council said in a statement.

Harmonization will be achieved through standards drawn up by the European Telecommunications Standards Institute, it said.

''These standards will in principle be of a voluntary nature,'' but service providers who comply will be able to offer their services throughout the EC, the council said. The EC Executive Commission can make the standards mandatory if the voluntary standards do not work.

Priority areas for harmonization include leased lines, packet-switched public data services, telex services, mobile services and voice telephone services.

#90036u1231 02/05/1990 ~United Press International
BY VERNON SCOTT

HOLLYWOOD (FEB. 5) UPI - Even in the heat of the Oscar race the heavyweight contenders are fading at the box office as Hollywood prepares to loose its 1990 slate of new films.

Fewer movies may be released this year, but prayers are being sent up that they will be better than last year's crop, both at the turnstiles and in quality and content.

Will there be an equivalent to ''Batman,'' another $250 million runaway hit in 1990?

More than likely.

And it most probably will be Warren Beatty's ''Dick Tracy,'' based on the old comic strip, filmed in vivid primary colors with Beatty in the title role of the square-jawed cop.

Barely recognizable in heavy makeup will be a supporting cast of oddball villains played by the likes of Dustin Hoffman, James Caan, and Al Pacino.

Not due for release until May or June, ''Dick Tracy'' promises to be a major blockbuster.

While film buffs await the late spring and summer biggies, there are a flock of new films scheduled for February and the March-April thaw.

February, March and April generally are considered the slack box-office season. All the more reason for some studios to rush to release pictures that might not compete well with the youth-oriented films of summer.

Among the early releases this season is ''Stanley & Iris,'' featuring a pair of superstar Oscar-winners, Robert DeNiro and Jane Fonda, in a romance between an illiterate laborer and a lonely widow.

Counted as the most anticipated pre-spring film is ''The Two Jakes'' starring Jack Nicholson reprising his role as Jake Gittes, the hard-edged private eye from ''Chinatown.''

''The Fourth War'' is John Frankenheimer's story of an American colonel and his Russian counterpart fighting a private war on the West German-Czechoslovakian border that threatens to ignite a major international incident.

Bette Midler stars in the title role of ''Stella,'' a tear-jerking remake of the 1937 Barbara Stanwyck drama ''Stella Dallas'' - from Disney's

Touchstone.

Also coming from Touchstone is Richard Gere's new romantic drama ''Pretty Woman,'' co-starring Julia Roberts as a lady of easy virtue who mesmerizes the rich, powerful businessman played by Gere.

''Hard to Kill'' offers the latest chop-sockie thriller with Steven Seagal as the indomitable hero and his real-life wife Kelly Le Brock as the damsel in distress.

Gene Hackman returns to comedy - a long time after his ''Superman'' appearances - to star in ''Loose Cannons'' as half of a mismatched cop team with Dan Aykroyd.

Also looking for laughs will be Sally Kellerman and Dave Thomas as Natasha and Boris Badinov in ''Boris & Natasha,'' based on characters from the old Jay Ward ''Rocky and Bullwinkle'' cartoons.

Director Bob Rafelson brings us ''Mountains of the Moon,'' a spellbinding account of the 19th century expedition of Richard Burton and John Hanning Speketo discover the source of the Nile.

Dennis Hopper as a '60s radical and Kiefer Sutherland as an FBI agent star in ''Flashback.''

''The Hunt for Red October,'' a pre-glasnost thriller of the Soviet and United States navies on a deadly search and destroy mission that could lead to nuclear war, based on Tom Clancy's novel and starring Sean Connery.

The young crowd will welcome the Easter-week school break release of ''Side Out,'' about a Malibu Beach volleyball tournament starring C. Thomas Howell.

Another offering for vacationing youngsters is ''Teenage Mutant Ninja Turtles,'' a live-action comedy with Judith Hoag and Elias Koteas.

In March, filmgoers will be seeing last year's Cannes Film Festival entry, ''Time of the Gypsies,'' which won a best directors award for Emir Kusturico. It deals with a youth choosing between a poor life or riches with a gypsy gang.

Dana Carvey from ''Saturday Night Live'' and Robert Loggia star in ''Opportunity Knocks,'' a comedy about a two-bit con man who hits it rich as an educated snob among Chicago's elite.

''Coupe de Ville'' finds brothers Patrick Dempsey, Arye Gross and Daniel Stern attempting to deliver a 1954 Cadillac for their mother's 50th birthday, with Alan Arkin as their father.

Horror specialist William (The Exorcist) Friedkin directs ''The Guardian '' a dark thriller exploring the nightmare of all new parents, with Dwier Brown, Carey Lowell and Jenny Seagrove in the leads.

''Tales from the Darkside: The Movie,'' provides more horror based on stories by Stephen King and Arthur Conan Doyle.

Robby Benson wrote, produced, directed and starred in ''Modern Love,'' a romantic comedy of two young adults reconciling their dreams with marriage co-starring Benson's real-life wife Karla DeVito.

''Chains of Gold'' is the title of an action thiller set in the seamy world of children involved in drug dealing in Miami. John Travolta stars as an heroic social worker.

''Torrents of Spring'' posits the question: Can a man love two women simultaneously? Answer: Yes, if he is Timothy Hutton and the women are Valeria Golino and Nastassia Kinski in this period romance set in 19th century Europe.

#90036u1234 02/05/1990 ~United Press International

JOLIET, IL (FEB. 5) UPI - A man with a reported history of mental problems held off police for hours and then killed three members of his family and wounded his wife before committing suicide early Monday, authorities said.

The gunman, whose identity was not released, held police at bay starting at 2:50 a.m., Will County Sheriff's Department Lt. Steve Rathbun said. Police entered the house at 6:20 a.m. and found the bodies of three men and a woman.

''It appears to be a triple homicide-suicide at least at this point,'' Rathbun said. ''We have no idea what touched it off other than it was some type of domestic dispute.''

Rathbun said it was believed at least one or two of the dead were the gunman's children.

''The gunman shot himself'' after hours of negotiations with police, Rathbun said. ''We were out there for several hours. We had him on the phone for an extended period of time.''

Rathbun said a neighbor called police to report a domestic disturbance at the Phelan Acres subdivision about 15 miles south of Joliet. Twenty-five sheriff's officers were sent to the scene.

Rathbun said a family member told police the gunman had a history of mental problems but that was not immediately confirmed.

The gunman's wife was taken to a hospital with undisclosed injuries. It was not immediately known if all the victims had been shot.

#90036u1252 02/05/1990 ~United Press International

CAPE TOWN, SOUTH AFRICA (FEB. 5) UPI - The leader of South Africa's right-wing Conservative Party demanded President Frederik de Klerk's resignation Monday for his racial reform program and warned he had ''awakened the tiger in the Afrikaner.''

The call by Conservative Party leader Andries Treurnict came after several weekend attacks by suspected white extremists in the wake of the reform policies de Klerk announced Friday. In one of the attacks, unidentified right-wing extremists fired shots at the British Embassy in Pretoria Sunday, according to an embassy spokesman.

Senior government officials told foreign correspondents Monday that despite de Klerk's reform measures, the government had no intention of abolishing the ruling National Party's pillars of apartheid, including segregated education and racially exclusive suburbs.

In his address at the opening of Parliament Friday, de Klerk lifted a 30-year ban on the African National Congress, suspended judicial executions and partially lifted a 43-month-old state of emergency in a bid to create a climate conducive to power-sharing negotiations with the country's 28 million black majority. He also announced that jailed black nationalist leader Nelson Mandela would be released soon.

At the same time, however, de Klerk affirmed the National Party's long-standing commitment to ''group rights,'' a euphemism for protecting white privilege.

Treurnict, speaking during a traditional no-confidence debate on de Klerk's measures, called for the 53-year-old president to resign for overstepping his mandate and misleading the white electorate in last September's parliamentary elections.

Referring to extremist demands for an exclusively white homeland, the former Dutch Reformed Church minister said, ''Self determination of our own nation is for us something deadly serious. The nationalism that we accept will not be smothered by political decisions.

''You have pushed the heat of this up several degrees since Friday. You

have now awakened the tiger in the Afrikaner,'' Treurnict declared, dismissing heckling from ruling party members.

Foreign Affairs Minister Roelof ''Pik'' Botha apologized to the British government Monday for what he called a ''cowardly attack'' on the British Embassy in Pretoria Sunday afternoon.

Unidentified right-wing extremists fired three shots at the embassy, shattering windows but causing no injuries, embassy spokesman John Sawers said.

Several gunmen then climbed over the wall and raised on the embassy flagpole a flag of the former Transvaal Republic that one extremist group, the Afrikaner Resistance Movement (AWB), wants to recreate as a white homeland.

No group claimed responsibility for the attack, which was apparently in retaliation for British praise of de Klerk's reform efforts. British officials sought and received additional police protection after the incident.

On Saturday, attackers sprayed graffiti on the embassy gates that translated to ''the struggle begins - order of the Boer people.''

In another incident, police Monday said six white men would be charged with murder, attempted murder and assault for an attack Saturday on an undetermined number of blacks in the western Transvaal province town of Klerksdorp in which one black was kicked to death.

Police said the whites entered the black township of Jouberton, picked up the blacks that they said worked for them, then took them to a police station where they unsuccessfully tried to have them charged with minor crimes.

The white men then drove the blacks to a road near Jouberton where the assault occurred. Police said they could find no overt political motive for the crime.

In the central Orange Free State province, a local white newspaper photographer was assaulted by extremists on Saturday and suffered a concussion and other injuries, state-run radio reported Monday.

The incident occurred in the conservative farming town of Brandfort as suspected extremists armed with horsewhips, pick handles and rubber clubs were seen roaming the area on foot and aboard vehicles.

#90036u1264 02/05/1990 ~United Press International

BRUSSELS, Belgium (FEB. 5) UPI - The European Community wants to conclude by midyear trade and economic cooperation agreements with all Central and East European countries to prepare for their possible association with the EC at a later stage, officials said Monday.

EC foreign ministers at a one-day meeting assessed the rapid changes in what once was the East Bloc, but now is a group of countries calling desperately on the West to help reform their bankrupt economies.

In the past 18 months, the EC concluded trade and economic cooperation agreements with Poland, Hungary and the Soviet Union.

A statement issued by the council of ministers said the aim was to complete, during the first half of 1990, talks on similar agreements with East Germany, Bulgaria, Czechoslovakia and Romania.

The council ''noted with interest'' executive Commission suggestions on ''the possibility of association agreements, which should provide a flexible and constructive framework, allowing solutions appropriate to the circumstances of each country and which would succeed the present cooperation agreements.''

Officials said the contents of such second-generation agreements still have to be defined and the Commission will shortly submit further ideas on the matter to the council.

The ministers said the EC was ready to East Germany, Czechoslovakia, Bulgaria, Romania and Yugoslavia the economic assistance program 24 Western countries launched last year for Poland and Hungary.

''This coordinated assistance should be provided on the basis of commitments from the countries concerned to political and economic reform '' the council statement said.

''In addition the program of assistance should be adapted to each country's own situation, specific requirements and absorption capacity,'' it said.

The EC ideas will be summitted to the next meeting of the Group of 24 in Brussels Feb. 16, officials said.

The Soviet Union is not included in that new approach because of its vast economic potential and its position as a world power. The EC will have to devise an appropriate relationship with the Soviet Union as well, officials said, but at present priority goes to the countries which have appealed for Western help.

The conditions to benefit from the Western assistance program include respect for human rights and the rule of law, the establishment of a multiparty system and the holding of free and fair elections, economic liberalization in view of introducing market-oriented systems.

East European countries wanting to qualify for the assistance should clearly commit themselves to such reforms, officials said.

Second-generation association agreements could only be concluded when they have taken concrete steps to put them into effect, they said.

In a separate statement, the ministers stressed the importance of the Conference on Economic Cooperation in Europe to be held in Bonn from March 19 through April 11 as a follow-up to the 1975 Helsinki Conference on Security and Cooperation in Europe.

The 35-nation CSCE includes all European countries, except Albania, plus the United States and Canada.

Reforms in Central and Eastern Europe ''are giving a new impetus to economic cooperation and opening up new and encouraging prospects,'' the ministers said.

#90036u1272 02/05/1990 ~United Press International

KANSAS CITY, MO (FEB. 5) UPI - A 5-year-old girl suffered frostbite after being locked in a school bus for more than 30 hours over the weekend and charges could be filed against the driver, authorities said Monday.

''The possibility exists that he could be charged for endangering the welfare of a child,'' said Kansas City police spokesman Bob Jones.

Angela Terrell was to be moved Monday to a less-intensive ward of The Children's Mercy Hospital for treatment of frostbite to her legs, toes and hands, spokeswoman Julie Bartels said.

Authorities said the kindergarten student fell asleep on the bus and the driver, who was substituting on the route Friday, locked up the bus at the end of the route without checking it first.

The driver was fired for violating company policies.

Angela's mother, Colette Terrell, arrived home from work after 11 p.m. Friday and filed a missing persons report Saturday, Jones said.

Police searched the girl's school Saturday night and later went to the bus lot. She was found about 1:30 a.m. Sunday, sitting on the front seat of

the Mayflower Contract Services Inc. bus.

The overnight low Saturday was 19 degrees.

Jones said the girl's mother suspected that a relative picked her up at school, which caused a delay in the search.

Her mother said Angela spent much of the time on the bus crying and sleeping.

William Threatt Jr., executive director of transportation for the Kansas City School District, said the district will push the idea of having drivers fill out a written checklist before locking up buses at the end of a route.

''We had a case like this not too long ago where a child was left on a bus a few months ago, so that's occurred before,'' Jones said.

#90036u1283 02/05/1990 ~United Press International

WEST BERLIN (FEB. 5) UPI - The East German parliament voted in favor Monday of enlarging Prime Minister Hans Modrow's Cabinet to form a broad coalition government aimed at leading the country to March 18 general elections.

Nine new ministers, all from opposition parties and movements, were sworn in by acting head of state Manfred Gerlach shortly after legislators voted overwhelmingly in favor of their appointments.

In an address to Parliament shortly before the vote, Modrow spoke of an ailing economy crippled by the daily migration of about 2,000 East Germans to the West.

Modrow also reiterated a call for the reunification of East and West Germany, acknowledged Western opposition to his proposal for German neutrality as a step toward unity and suggested both states could start by reducing military presence on their soil.

Because of its rejection of the reunification concept, the United Left opposition group declined to participate in the new Cabinet, which Modrow dubbed ''a government of national responsibility.''

Eight other pro-democracy parties represented at a ''round table'' forum between government and opposition groups each sent a minister without portfolio to the new government, which is still led by Modrow, a reform-minded Communist.

One other minister, also from an opposition group, was appointed to represent the government at round table talks, a task he will share with another Cabinet minister already on Modrow's government.

The nine new ministers will join the existing government coalition among the Communist Party and its traditional allies, the Liberal Democratic Party, the National Democratic Party and the Farmers Party.

The move followed an appeal by Modrow to join his troubled government and save it from total collapse until the elections.

The government has come under growing attack for resisting pressure for radical change in the country that had been run along Stalinist lines for 40 years until the old Communist leadership was swept from power last fall.

The pro-democracy protests considerably weakened the authority of the Communists who have agreed to give up its dominant position and recognized theywould probably become an opposition party after the spring elections.

Last week, Modrow called for German reunification but said both Germanys should first leave their respective military alliances.

Following Western rejection of the neutrality concept, Modrow said in talks with West German Chancellor Helmut Kohl Sunday that the issue remained open to discussion, a statement he reiterated in his address to parliament Monday.

''Why not start for example with a bilateral reduction of military presence on the territory of today's two German states?,'' he said.

''I know that I am in agreement with many Germans when I stress that the fewer military, the fewer weapons here in central Europe, the more peaceful life will be,'' Modrow said.

He added that such steps may only be agreed to and realized after reunification. ''In this respect we should have some patience,'' he said.

TOKYO (FEB. 5) UPI - Honda Motor Co. said Monday it was studying the possibility of marketing Chrysler Corp.'s multi-purpose vehicles in Japan.

''Negotiations have been under way with the Chrysler dealer but it is still too early to disclose details,'' said a spokesman for Tokyo-based Honda.

Chrysler launched a joint sales venture with Osawa Shokai Co., a member of Japan's giant distribution network operator Seibu-Saisson Group in October 1988.

''As part of an ongoing investigation, Chrysler Japan Sales Ltd. is involved in very preliminary conversations with Honda, but there are no additional details,'' said Chrysler spokesman John McCandless from the automaker's U.S. headquarters in Highland Park, Mich.

But a Honda spokesman in Detroit said Honda was approached by one of Chrysler's subsidiaries in Japan about the possibility of selling Jeeps through one if its three sales networks.

''We are investigating the possibility, and a decision could be made within the next few months,'' Honda spokesman Jeff Leestma said.

Those three networks include Honda's family car Primo channel, its executive class Verno channel, and Clio, which markets sporty models.

Sales of Chrysler cars in Japan totaled only 970 units in 1989, accounting for 0.5 percent of the imported car market.

Nihon Keizai Shimbun, a daily economic newspaper, said Honda may be planning to sell 5,000 to 6,000 units of Chrysler's four wheel-drive

multi-purpose vehicles a year.

It also said negotiations between Chrysler and its Japanese affiliate Mitsubishi Motors Corp. to promote sales of Chrysler cars in Japan have been deadlocked, and that Honda may be looking at a joint sales arrangement with Chrysler as a means of easing trade friction between the United States and Japan.

#90036u1301 02/05/1990 ~United Press International

WASHINGTON (FEB. 5) UPI - The nation's veterans service organizations recommended to Congress Monday an alternative ''price of peace'' 1991 budget for the Department of Veterans Affairs that is $1.5 billion more than President Bush requested.

''If there's money cut out of defense, some of that should go to pay for the care of people who provided the national defense of this country,'' said Paul Breuer, associate legislative director of the Disabled American Veterans.

This is the fourth year that the four service groups - the DAV; the American Veterans of World War II, Korea and Vietnam; Paralyzed Veterans of America; and Veterans of Foreign Wars - have presented to Congress an independent assessment of veterans' needs.

The organizations, which claim to represent a total of 3.5 million veterans, titled this budget, ''The Price of Peace.'' The subtitle reads, ''The nation's obligation: correcting budget priorities for veterans.''

The groups recommended a budget of slightly more than $32 billion compared to the $30.5 billion the Bush administration requested in its fiscal 1991 budget that was sent to Congress a week ago.

Congress appropriated $29.2 billion for the Department of Veterans Affairs for this year.

The largest single increase recommended by the veterans' organizations is in the area of medical care, where they suggested spending $13.8 billion compared to the administration's proposal of $12.5 billion.

''There are more aged (World War II) veterans requiring care now,'' said Joseph Travers, associate executive director for medical and research affairs at the Paralyzed Veterans of America.

''And we're going to have more veterans, with the troops coming home from Europe. That will impact the system,'' Travers said.

Breuer cited a hypothetical case of a U.S. soldier who had a leg blown off during the Dec. 20 invasion of Panama. Though hailed as hero by the president, that soldier will return home to find a veterans' system in chaos, he said.

''When he files his (compensation) claim, it will take six months to get a decision'' from the Department of Veterans Affairs, he said. ''In the meantime he is without a job.

''If he tries to telephone to find out what's going on, there's a good chance he will be one of the 1 million people who can't get through'' to the department because of busy phone lines and understaffing, Breuer said.

''Maybe he climbed telephone poles for a living before, and a friend suggests that he file for rehabilitation. He files the paperwork, and it's 100 days before he can even talk to anyone'' at the department about it, he said.

''Now his leg begins to atrophy and his artificial leg doesn't fit so well anymore. He needs a new leg. Well, it will take him six months or longer to get one,'' Breuer said.

Representatives of these organizations said they believe Veterans Affairs Secretary Ed Derwinski is trying to improve the backlogged system, but that his chief argument to them is that they always want more than he can provide.

''These are congressionally mandated services; we don't want more,'' Breuer said.

#90036u1314 02/05/1990 ~United Press International

PHILADELPHIA (FEB. 5) UPI - International Paper Co. announced Monday it will close its Philadelphia plant in April, idling about 100 people.

Company executives said the plant will cease production April 6 because it is not profitable for the corporation.

''We had hoped to find a way to keep the plant open and our employees working,'' said Benny Smith, general manager of the northern container division. ''However, after the review it was clear that closing the Philadelphia plant was unavoidable due to the continued unprofitable nature of the operation.''

The plant produced corrugated containers used in a wide variety of manufacturing processes in the Philadelphia metropolitan area.

Other International Paper plants in the Northeast can supply containers for area manufacturers, Smith said.

The company planned to provide severance and job placement services for its affected employees, he said.

The corporation, based in Aldan, Pa., acquired the plant in 1958.

#90036u1344 02/05/1990 ~United Press International

JERUSALEM (FEB. 5) UPI - The bus attack on Israeli vacationers in Egypt prompted the rightist Likud Party Monday to postpone a meeting that had threatened to pit Prime Minister Yitzhak Shamir against his hardline rivals in a showdown on peace policy.

Israeli leaders, meanwhile, vowed to continue fighting terrorism and condemned Sunday's attack as an attempt to disrupt the Middle East peace process and Israeli-Egyptian relations.

In a telephone conversation Sunday evening with Egyptian President Hosni Mubarak, Shamir said violence must be stopped before peace can achieved.

''We hope Egypt will do everything to catch the murderers, to put them on trial, and to punish them severely,'' Shamir said. ''We must not allow crazy terrorists to torpedo the peace process.''

Groups claiming to represent the Islamic Jihad in Amman, Jordan, and the previously unknown ''The Oppressed Egyptians'' in Egypt each claimed responsibility for the attack. The claimant on behalf of Islamic Jihad said the group wanted ''to hit the peace process in the region.''

At Shamir's suggestion, the Likud Party Secretariat decided to postpone a meeting of its Central Committee scheduled for Wednesday. Minister of Trade and Industry Ariel Sharon, chairman of the committee, agreed with Shamir that the meeting should not be held before the dead from the bus attack are buried. No new date was set.

The attack on the tour bus by two masked gunmen came amid intense political maneuvering by Shamir and Sharon, his party rival.

Sharon and his allies, Housing Minister David Levy and Economics Minister Yitzhak Moda'i, had sought to make the Central Committee meeting a forum on Shamir's approach to the Middle East peace process. The ministers charge Shamir's policies endanger the existence of Israel and will lead to the establishment of Palestinian state.

Hoping to avoid a confrontation that could split his party, Shamir wanted

to hold a vote of confidence for his policies at the meeting.

In contrast to the 1985 Ras Burka shootings in which seven Israelis were killed by an Egyptian border policemen who went bersek, Israeli leaders approved of the Egyptian handling of Sunday's attack and care for the wounded. After the Ras Burka shooting, Israel charged that several Israeli vacationers died because they were not given proper medical care.

The latest attack, however, brought out the sharp divisions between Israeli leaders who see Egypt as a partner in the peace process and hardliners who see Egypt as a surrogate for the Palestine Liberation Organization.

''There is no doubt that those who carried it out surely planned it ahead in order to injure Israelis and to hurt Israeli-Egyptian relations, and to hurt the chances for peace in the region,'' Defense Minister Yitzhak Rabin said.

Deputy Foreign Minister Binyamin Netanyahu called the incident ''an attack on co-existence between Israelis and Egyptians'' and suggested it showed a shift in tactics.

''They've tried to hit us inside our borders. Perhaps not having been successful, they've chosen Israeli targets outside Israel. We've dealt with that in the past. We'll deal with that in the future,'' Netanyahu said.

But Sharon said that, although the peace with Egypt was important to maintain, it had no major role to play in the peace process.

''(Egypt) herself is creating an atmosphere of hostility and hatred against Israel,'' he said. ''The Egyptians do not have a key role in the peace process.''

Prominent Palestinian lawyer Fayez Abu Rahme condemned the bus attack.

''I also denounce any killing civilians, Arabs or Jews,'' the Gaza attorney said. ''We are looking toward peace and we want peace based on right and justice.''

(FEB. 5) UPI - Diplomats predict heads will roll at the gathering of about 250 full members of the Soviet Communist Party's Central Committee in Moscow. Maverick Soviet politican Boris Yeltsin addressed the plenum today after President Gorbachev called for a purge of party ranks. The pivotal battle at the session is expected to center on ending the

Communists' seven-decade one-party domination of the Soviet government.

Opposition political parties in East German today joined the Communists and their allies in forming a new broad coalition government to lead the country until general elections are held March 18th. Members of Parliament approved eight new ministers without portfolio. The eight and a ninth opposition minister will join the existing coalition of the Communists and the Liberal Democrats, National Democrats and Farmers Party.

A nation-wide search is under way in Egypt for the two gunmen who ambushed a tour bus carrying Israeli tourists near Cairo yesterday. Diplomatic sources say at least 10 people were killed and 17 wounded in the machine gun and grenade attack. A group claiming to represent Moslems in the Israeli occupied territories took responsibility for the attack in a statement delivered to an international news agency in Amman, Jordan.

#90036u1367 02/05/1990 ~United Press International

WASHINGTON (FEB. 5) UPI - With an assist from Miss America Debbye Turner, Secretary of Commerce Robert Mosbacher symbolically completed the first 1990 Census form Monday, kicking off a $55 million campaign to encourage participation in the once-a-decade national headcount.

Turner, wearing the small silver tiara of her office, described herself as ''a symbol hoping to motivate Americans'' to fill out the decennial questionnaire when it arrives in late March. She offered the support of the 50 state contestants as ''census ambassadors'' to raise public awareness.

As cameras flashed and clicked, Mosbacher bent to fill out the form and it was handed to a beaming Barbara Bryant, director of the Commerce Department's Bureau of the Census, head of the $2.5 billion project.

The department used the photo opportunity to unveil an intense 54-day campaign that will feature radio and television public service announcements in nearly a dozen languages and dialects aimed at making the 1990 census - the bicentennial national headcount - the most complete ever.

''The Bush administration is fully committed to making this the fullest and fairest count in all history,'' Mosbacher said. ''We're aware of the undercount problem, and we aim to eliminate it.''

In the past, the bureau has been sharply criticized - and brought to court - for failing to count large numbers of minorities and other hard-to-reach people.

An accurate as possible count is critical because both federal congressional districts as well as state legislative districts are determined by the census count. More than 20 states are likely to gain or lose members of Congress as a result of the April 1 census.

To minimize the undercount problem, bureau officials described one of the most ambitious community outreach programs in the 200 years of census history, ranging from the slick television public service announcements to the use of gang members and Chinese fortune cookies containing the census message.

At the heart of the messages are two themes - it is important to be counted and that it is safe to be counted.

Billions of dollars of federal and state grants - for hospitals, education housing and other programs - are allocated on the basis of the population counts determined by the census.

In addition, planners in both the private and public sectors use the information to determine where to build everthing from new schools and parks to factories and shopping centers.

''We are taking the necessary steps to reach minorities, the homeless, and people who for one reason or another are difficult to count,'' Mosbacher said.

He said the bureau expects to count some 250 million people. Questionnaire packages - there are both a short form and, for some, a longer form - will go to 106 million housing units.

Mosbacher said the bureau expects 70 million of the 106 million mailed forms to be returned within two weeks of Census Day, April 1. Those that do not return their forms by mail will be contacted by a census taker.

Ruth Wooden, president of the Advertising Council, which sponsored the

public service announcement campaign, said the council expects to receive $55 million in donated broadcast time and print space in the two months between now and Census Day.

''It is the largest and most comprehensive public service campaign the Ad Council has ever had,'' she said.

She noted, for example, that there would be a ''highly targeted approach'' for different groups in a community. An umbrella campaign, for example, will stress such issues as how the census aids a community while ads in the Hispanic and black communities will emphasize confidentiality and those in the Asian communities will stress that citizenship is not a requirement to be counted.

#90036u1373 02/05/1990 ~United Press International

(FEB. 5) UPI - Lebanese security sources say rival Christian factions are battling for a sixth day in the Christian half of Beirut and areas north of the capital. Lebanese radio stations say attempts are being made to negotiate a truce to halt the fighting that has killed at least 212 people and wounded at least 800 others. Attempts to bring about a cease-fire during the weekend collapsed.

Police in Marks, Mississippi, are holding two men in the execution-style slayings of a family that has the small community outraged. Two suspects are charged with murder in the killings of a farmer, his wife and their two children. Authorities say the killings apparently took place when the family interrupted a burglary at their home Friday night.

In Greece, a left-wing terrorist group says it stole a pair of World War Two bazookas during a raid this weekend on a museum in central Athens. The November 17 group says the bazookas could be used to launch rockets stolen from the military. The group... which in 15 years has claimed the killings of 14 people... did NOT say what might be targets for the weapons.

MOSCOW (FEB. 5) UPI - A unit at one of the biggest hydroelectric stations in the Transcaucasus region exploded in northern Azerbaijan, the official Tass news agency said Monday.

The explosion collapsed the roof of the station at Mingechaur, 270 miles northwest of the Azerbaijani capital of Baku, and a fire broke out, Tass said.

Tass said there were no injuries but did not say what caused the blast or when it happened.

The explosion forced other units at the station to shut down and further aggravated energy shortages in Azerbaijan, Tass said.

Ethnic violence between Moslem Azerbaijanis and Christian Armenians in the republic of Azerbaijan led Soviet troops to storm Baku last month. Soviet forces still occupy the Azerbaijani capital.

Tass said the crippled Mingechaur Hydroelectric Station is ''one of the largest in the Transcaucasus.''

Mingechaur has a population of 78,000 people.

Tass gave no other details.

#90036u1449 02/05/1990 ~United Press International

NASHVILLE, TN (FEB. 6) UPI - Taking last summer off was one of those good-bad deals for the Sweethearts of the Rodeo.

Janis Gill and sister Kristine Arnold didn't have any dates during that time so Arnold could have her baby. And, they didn't have a single out then as well for radio.

But they spent the extra time polishing up their new album, ''Buffalo Zone.''

''It's been a year and a half since our last album,'' Gill said. ''That's a long time but we've always been careful about how much product we put out. We feel like sometimes, especially country artists, put out too many albums.

''We would rather people be wanting and looking for our next album rather than having too many albums out there, one after another every six months. We've always taken about a year in between projects.''

''Buffalo Zone'' promises some new emphasis for the Sweethearts, whose previous hits include ''Chains of Gold,'' ''Midnight Girl/Sunset Town,'' ''Since I Found You,'' ''One Time, One Night,'' ''I Feel Fine'' and ''Blue To The Bone.''

''I co-produced and wrote six of the songs on the album. Kristine and I both really took a long time in pre-prodocution. We spent most of the summer working on it. We would take a lot of time working up the songs, putting a lot of thought into how we would like to have the songs recorded '' Gill said.

''So we had the luxury of being home for the summer and not on the road. That really helped with the preparations of the album.''

She said being off during the summer set the Sweethearts back financially since they missed the lucrative fair dates.

''And we didn't get to see our fans and keep ourselves fresh in their minds,'' she said. ''We didn't really have any new product or any new

singles to go out and promote so I guess it had a good point and a bad point.''

The Sweethearts' new album is their third for CBS and Gill said the fans will not notice a radical departure in their style.

''Actually it sounds like a new approach on paper but I've always been real involved in the production of our albums,'' Gill said. ''I feel like this is the first time I've been given credit for it. (CBS producer) Steve Buckingham is a wonderful guy to work with. He has always made it easy for us to be involved in production side. That's always been my favorite part in the studio. So it was a natural progression for me to get credit as a producer and become more involved.''

Gill said her sister operates more as a lead singer in ''Buffalo Zone.''

''That is just the direction the songs went this time. I wrote all those songs for her with her vocal in mind. She's a large inspiration on my songwriting. I would sit there and try to write a melody and a thought for her to sing. So it was only natural when I turned all these songs over to her she just grabbed them and put her heart into them.''

One of the songs on ''Buffalo Zone,'' is ''Don't Wake Me Up,'' a rock oriented tune written by the award-winning team of Don Schlitz and Paul Overstreet.

''I've put more effort into this album than the other two combined,'' she said.

Gill said she and her sister were anxious to get back in front of an audience and played a few dates in the fall.

''We had packed attendance at all of our shows. It really made us feel good because we had been away all summer,'' Gill said.

#90036u1486 02/05/1990 ~United Press International

BEIJING (FEB. 5) UPI - Retiring Cambodian resistance leader Prince Norodom Sihanouk announced Monday he will return to Cambodia permanently in late February, setting up residence in an area controlled by opposition forces.

''As a patriotic Cambodian, it is my duty to return to my beloved country to live among my people and attend permanently to their well-being,'' Sihanouk said in a statement distributed to the foreign press in Beijing.

The announcement came just two weeks after Sihanouk announced he was resigning as leader of the tripartite Cambodian resistance coalition and

would no longer participate in any international conferences aimed at resolving Cambodia's stalemated guerrilla war.

Sihanouk said that, after brief private visits to Thailand and Singapore, this month he will establish permanent residence in Cambodia beginning in the last week of February.

''At this point in time, the A.N.S. (Sihanoukist National Army) is in control and administrating several liberated zones in the Cambodian interior,'' he said.

Roland Eng, a spokesman for Sihanouk in Bangkok, said the prince was scheduled to arrive in Thailand Wednesday, but he declined to give any details of what he called a ''private visit.''

In November, Sihanouk broadcast a message to the population of Thmar Puok, a district capital about 12 miles from the Thai border, captured by the two non-Communist resistance forces.

''I hope that since we now have a liberated zone, which includes Thmar Puok, I might visit you in the not too distant future,'' Sihanouk said in the broadcast.

Eng, who returned this week from a visit to Thmar Puok, said the area, with a population of about 50,000 people, was peaceful and completely under the control of the resistance.

Since he escaped Phnom Penh just ahead of Vietnamese invasion forces in 1978, Sihanouk has visited only remote areas of Cambodia immediately adjacent to the Thai border.

Since the withdrawal of Vietnamese troops from Cambodia in September, the three-party resistance coalition has made military gains in northwest Cambodia against the forces of the Phnom Penh government.

The stepped-up rebel military action appears to be an effort to establish resistance control over as wide an area as possible in anticipation of a possible diplomatic solution to the decade-old Cambodia problem.

Two rounds of Cambodian peace talks last year failed to produce agreement among the three resistance factions, the Phnom Penh government and other nations seeking an end to the fighting.

But an Australian proposal for an interim United Nations administration of the war-torn nation leading up to free elections has received tentative support from several factions and opened the possibility of new peace talks in Jakarta later this year.

-30- 3025
#90036u1495 02/05/1990 ~United Press International
DALLAS (FEB. 5) UPI - DSC Communications Corp. Monday reported fourth quarter earnings of $11.6 million, or 27 cents a share, compared to earnings of $116,000 in the same period of last year.

For the year, the telecommunications company earned $33.3 million, or 79 cents a share, compared to $12.6 million, or 30 cents a share in 1988.

Last year's results included losses and estimated costs of discontinuing a transmultiplexer business which in the fourth quarter amounted to $7.5 million and $8.5 million for the year.

The company reported record revenues both in the fourth quarter and for the year. In the fourth quarter, they were up 33 percent to $129.3 million from $97.3 million last year. For the year, revenues were $429.7 million, up 27 percent from $339.7 million in 1988.

The company said it enjoyed significantly higher deliveries of both switching and cross-connect products.

''Strong revenue and earnings performance during the recent quarter and full year reflects acceptance of our product strategy by an expanding customer base,'' said Chairman James Dowald.

-30- 1276
#90036u1532 02/05/1990 ~United Press International
GENEVA, Switzerland (FEB. 5) UPI - The United States Monday proposed a 10-year phasing out of the Multifiber Agreement which regulates access to western industrial markets for cheaper Third World textiles and clothing.

The proposal was presented to the textiles and clothing group at the current Uruguay Round trade liberalization talks which are scheduled to be concluded by December.

Washington suggested that starting Jan. 1, 1992, and ending Dec. 31, 2001, the sector be gradually returned to rules of the General Agreement on Tariffs and Trade.

A long period is required, the U.S. proposal said, ''to ensure and orderly and equitable adjustment.''

The proposal was based on a mathematical formula under which there would be annual reductions in quota allocations for exporting countries with parallel increases in a non-selective ''global basket'' open for free competition.

The U.S. said the global basket would increase on the basis of a growth factor to be determined by multilateral negotiation.

Quota allocations for the producing countries would shrink by 10 percent each year with that amount also going into the open basket, it said.

Washington said it was all the same imposing an essential condition that textile and clothing exports from non-market economies, such as China, be subject to the same disciplines as those from market economies.

-30- 1568

#90036u1540 02/05/1990 ~United Press International

WASHINGTON (FEB. 5) UPI - President Bush telephoned Israeli Prime Minister Yitzak Shamir Monday to offer his condolences over the ''horrendous attack'' on Israeli tourists by two masked men in Egypt, a White House spokesman said.

''This horrible act of terrorism should be condemned by civilized people everywhere,'' said press secretary Marlin Fitzwater.

Fitzwater said, ''This terrible incident is an obvious attempt by the enemies of peace to thwart efforts at reconciliation and dialogue.''

Two groups claimed responsibility for Sunday's bus attack on a highway 37 miles east of Cairo.

The masked gunmen sprayed the vehicle with bullets. Police said one gunman then boarded the vehicle and lobbed hand grenades inside. The bus was carrying 31 Israeli tourists, a Swede and an Egyptian security guard, Cairo Radio reported. The nationality of the driver was not immediately known.

''President Bush called Prime Minister Shamir of Israel to offer his condolences on the death of Israeli tourists this weekend,'' Fitzwater said. ''We understand that the death toll from the horrendous attack has reached 12 - 10 Israelis and two Egyptians. We emphasize this may not be a final figure.

''Although a previously unknown Egyptian group has claimed responsibility, we understand that Egyptian authorities have raised questions about the credibility of this claim,'' he said.

''Whoever is responsible,'' Fitzwater said, ''the Egyptians are working hard to apprehend them as soon as possible.''

Fitzwater said that incident ''points out the need for all people to

rededicate themselves to the pursuit of peace and not allow the perpetrators of such outrages to triumph.''

There had been reports that Secretary of State James Baker might try to meet with Israeli and Egyptian representatives this week while abroad following his journey to Moscow to meet with Soviet Foreign Minister Eduard Shevardnadze, but Fitzwater said ''there is nothing scheduled at this point.''

Responding to questions he said he did not know whether the incident would interfere with a possible meeting, but did not think so. ''It's impossible to say,'' he added.

#90036u1566 02/05/1990 ~United Press International

KATMANDU, NEPAL (FEB. 5) UPI - The Nepalese government, apparently cracking down on dissent prompted by opposition calls for pro-democracy demonstrations and strikes, has arrested 117 people during the past two days, opposition leaders said Monday.

Among those arrested were sympathizers of the banned Nepali Congress Party which has called for the pro-democracy protests to begin Feb. 18, and several members of the seven-party left front that is supporting the Congress Party, a party spokesman said.

In addition, the arrests taking place in about 15 of the nation's 75 administrative districts have included some members of the ruling village councils, who have expressed support for the opposition, the spokesman said.

The Nepali Congress Party, during a three-day conference last month, decided to start a movement of public rallies and nationwide strikes Feb. 18 aimed primarily at lifting the kingdom's 29-year-old ban on political parties.

The party had claimed several of its delegates were arrested prior to the conference, which on its opening day attracted a rally by about 700 people in Katmandu.

Sunday, the editor of the newspaper Deshantar, a Katmandu weekly linked to the Nepalese Congress Party, said local authorities seized thousands of copies of the paper and ordered him to stop distributing the publication.

King Birendra responded to the party's demands by telling supporters gathered during last month's opposition meeting that the kingdom's partyless system of village councils guaranteed democracy for all citizens and would not be replaced.

Officially-sponsored mass meetings continue to be held throughout the kingdom to denounce both the opposition movement and the several Indian parliamentarians who criticized Birendra while attending the Nepali Congress Party convention.

''The (117) arrests are pre-movement arrests,'' Yog Prasad Upadhaya, the party's assistant general secretary, said Monday at a news briefing.

Upadhaya also said the opposition campaign would not be affected by either the success or failure of government talks to be held new week in New Delhi aimed at ending India's 11-month-old sanctions against bilateral trade and transit with Nepal.

King Mahendra, father of the present King Birendra, dismissed the kingdom's first popularly elected government in December 1960 after an 18-month experiment with British-style rule and he later banned political parties.

-30- 2649

#90036u1570 02/05/1990 ~United Press International

LONDON (FEB. 5) UPI - Stock prices closed slightly lower in light trading Monday on the London International stock exchange.

The Financial Times 100-stock index, which gained 9.3 points Friday, slipped 6.7 points to 2,348.4. The narrower top 30 industrial average eased 5.4 points to 1,861.0.

Volume amounted to around a light 375 million shares, compared with the 490 million traded Friday.

On the economic front, the Central Statistical Office reported Britain's new consumer credit extended by finance houses, building societies, other specialist credit grantors and retailers fell to $5.93 billion in December from a revised $6.03 billion in November.

The drop was the first since the beginning of 1988, the government agency said.

In a separate report, the CSO said retail sales volume rose a revised 1.9 percent in December from November and was up 1.9 percent from December 1988.

Analysts said the two reports had little impact on the market.

Market watchers said many large institutional investors seemed wary of venturing into the market ahead of this week's U.S. treasury refunding

auctions which will likely shape the near-term performance of the world bond markets.

The first round of the U.S. Treasury refunding begins Tuesday and ends Thursday.

On the trading floor, the properties sector gained some ground after P&O announced plans to launch a $10.40 a share cash bid for Laing Properties.

Laing Properties surged $1.50 a share to $10.53 on the news while while P&O fell 23 cents to $9.70.

Elsewhere, higher gold prices lifted Lonrho 12 cents to $4.70.

Euro Disney bucked the overall market's downward trend, climbing $1.32 to $16.88 on European investment support.

Ferranti added 2 cents to 61 cents a share after the company announced plans to abandon its $300 million rights issue intended to raise fresh capital.

Rosehaugh plunged $1.52 to $5.92 following what analysts described as a surprise $211 million cash call. Priest Marians 56 cents to $3.56 in sympathy.

Among the day's other highlights, Kwik Fit eased 8 cents to $1.76,

Tate and Lyle added 6 cents to $5.08 and Brent Walker gained 13 cents to $5.84.

Elsewhere in Europe, prices on the Frankfurt Stock Exchange closed broadly higher in active trading.

The German Stock Index, which surged 52.58 points on Friday, gained 28.76 points to a new record high of 1,939.43.

-30- 2612

#90036u1585 02/05/1990 ~United Press International

(FEB. 5) UPI - Soviet President Gorbachev is predicting anything but smooth sailing as a crucial Communist Party plenum opened today in Moscow. The Soviet news agency Tass says the Kremlin leader expects ''heated debate'' as Soviet lawmakers begin considering a proposal to abolish the Communist Party's monopoly on power.

Egyptian police say they arrested three suspects today at Cairo International Airport in the ambush of an Israeli tour bus yesterday. The Israeli Embassy says an Israeli tourist wounded in the terrorist attack

died overnight in a Cairo hospital... and another Israeli died early today on a plane returning to Israel. The deaths bring to at least 10 the number killed in the ambush.

A jury will be sworn in today in Anchorage, Alaska, to hear the trial of former Exxon Valdez skipper Joseph Hazelwood. The 43-year-old fired captain is charged in the nation's worst oil spill. Defense attorneys say they have NOT decided whether Hazelwood will testify in his own defense.

Closing arguments begin today in the assault and conspiracy trial of reputed mob boss John Gotti in New York state Supreme Court in Manhattan. Defense lawyers rested their case Friday after a labor leader admitted his shooting may have been sparked by union squabbling. Gotti is believed to be the most powerful Mafia leader in the nation.

The world's most populous nation is getting even more crowded. China says it's population at the end of 1989 was one-pointBILLION, an increase of nearly 16-Million people. The Beijing government has tried to limit families to one child each, but the program has only been partially successful.

#90036u1590 02/05/1990 ~United Press International

CAIRO, EGYPT (FEB. 5) UPI - Police arrested three men carrying forged Saudi passports at Cairo International Airport Monday in a massive manhunt by Egyptian and Israeli investigators for two gunmen who killed nine people and wounded 17 on an Israeli tour bus.

Two groups claimed responsibility for Sunday's bus attack on a highway 37 miles east of Cairo. The Islamic Jihad made the latest claim in a written statement sent to an international news agency in Amman, Jordan.

''Our struggle with the Jews will continue until victory and with the help of God to smash all those who dream about a peaceful solution'' in the Middle East, said the statement by the Islamic Jihad, which said an offshoot of its organization carried out the attack.

In 1989, the Islamic Jihad issued three communiques in Amman claiming responsibility for attacks against Israeli targets in the Israeli-occupied territories, including a July attack on an Israeli bus.

Sunday, a previously unknown group calling itself the Group for Oppressed Prisoners claimed responsibility for the attack.

In Washington, a White House spokesman said President Bush telephoned Israeli Prime Minister Yitzhak Shamir Monday to offer his condolences over the ''horrendous attack.''

In New York, U.N. spokeswoman Nadia Younes said Secretary-General Javier Perez de Cuellar ''strongly condemns such act of violence.'' She quoted him as saying it comes ''at a time when a major effort is being made to promote the peace process through dialogue and understanding.''

In Paris, Arab League Ambassador Hamadi Essid called the attack ''a criminal act that nothing can justify.'' But he added ''this action is part of the cycle of violence that the Israeli government refuses to end and which has already claimed a thousand victims in the occupied territories.''

A wounded Israeli died overnight in a Cairo hospital, bringing the Israeli death toll to nine, said Isaac Barmoshe, a spokesman for the Israeli Embassy in Cairo. Barmoshe revised the death toll after earlier saying 10 people had died. Seventeen others were wounded.

Egypt declared a "national security alert to catch the killers," said a police spokesman in Cairo. Roadblocks in Cairo were lifted at dawn Monday but were still in place near the town of Ismailiya, where the ambush occurred, witnesses said.

An Interior Ministry spokesman in Cairo said, ''Three suspects have been detained at the Cairo airport in connection with the attack. They were carrying forged Saudi Arabian passports.''

He also said police ''found the car used by the gunmen, abandoned north of Cairo. We found used cartridge shells of the same caliber as the bullets used in the attack.''

State-run Cairo Radio quoted Egypt's ambassador in Israel as denying Egyptians were behind the attack. Egyptian police sources said the gunmen spoke with a non-Egyptian accent.

The assault left in doubt the prospect of a meeting scheduled for Geneva next week between the foreign ministers of Egypt, the United States and Israel, to discuss ongoing U.S. efforts to promote Israeli-Palestinian dialogue.

Egyptian Foreign Ministry sources said they had not received any report that the meeting, scheduled to take place after Secretary of State James Baker meets in Moscow with his Soviet counterpart, Eduard Shevardnadze, was off.

Egyptian Foreign Minister Esmat Abdel-Meguid on Monday strongly condemned the attack but expressed hope the Israeli side would not use it as a pretext to postpone the scheduled peace meeting.

President Hosni Mubarak on Sunday telephoned Shamir to express his sorrow. He told state-run Egyptian television he hoped the attack would not block but rather become ''an incentive'' for Mideast peace efforts.

Shamir, speaking in Jerusalem, declined to say if the incident would hinder Mideast peace initiatives, saying the attack was intended to ''kill a large number of Jews.''

The masked gunmen sprayed the vehicle with bullets. Police said one gunman then boarded the vehicle and lobbed hand grenades inside. The bus was carrying 31 Israeli tourists, a Swede and an Egyptian security guard, Cairo Radio reported. The nationality of the driver was not immediately known.

Witnesses said the men then fled in a white Peugeot car.

The interior ministry said the assailants apparently followed the tour bus from the Israeli-Egyptian border town of Rafah. The tourists were on an eight-day excursion.

#90036u1596 02/05/1990 ~United Press International

WASHINGTON (FEB. 5) UPI - A fifth former HUD official took the Fifth Amendment against self-incrimination Monday at a House panel investigating fraud and abuse at the housing agency during the Reagan administration.

Also, Rep. Thomas Lantos, D-Calif, chairman of the House Government Operations subcommittee probing Department of Housing and Urban Development mismanagement, postponed Monday's scheduled appearance of Thomas Demery, former HUD assistant secretary, due to the attorney general's decision last Thursday to seek the appointment of a special prosecutor.

However, Lantos said a special prosecutor would not stop the committee from further investigation and said Tuesday's hearing will involve recent alleged abuse at the Passaic, N.J., Public Housing Authority.

James H. Hamernick, former director of HUD's Office of Insured Multifamily Housing Development, refused to answer any questions. He had been subpoenaed to testify.

Lantos' first and only question to Hamernick focused on his relationship with Lance Wilson, executive assistant to former HUD Secretary Samuel Pierce. Wilson eventually left HUD for the investment firm of PaineWebber.

''Our review of Mr. Lance Wilson's expense forms at PaineWebber indicate that he spent over $2,000 on meals and entertainment for you while you

were still at HUD. My question for you, of course, is not what the menu was ... but rather I'd like to ask what specific projects did you and Mr. Wilson discuss during these meals?'' Lantos said, noting Wilson apparently spent more than $1,000 for meals and limousine service for Hamernick during one week in February 1987.

''Mr. Chairman,'' Hamernick said, ''on advice of counsel, I'm asserting my Fifth Amendment right not to incriminate myself. Therefore, I decline to answer the question.''

Lantos, said he wanted Hamernick's testimony because Wilson had taken the Fifth Amendment during a previous House hearing.

Besides Hamernick and Wilson, the other former HUD officials who have refused to testify are Pierce, his executive assistant Deborah Gore Dean and Hunter Cushing, who was deputy assistant secretary for the Office of Multifamily Housing.

Lantos said he wanted to first consult with the independent counsel - who has not yet been appointed - before questioning Demery.

Lantos said questions for Demery ''would relate principally'' to the perview of the special prosecutor's investigation - specifically, allegations of criminal wrongdoing by Pierce and others relating to the administration of the moderate rehabilitation housing program.

Despite postponing Demery's testimony, Lantos said no conflict will exist if there are parallel probes in Congress and with a special prosecutor, citing the Watergate and Iran-Contra cases.

Tuesday's hearing will deal with alleged misuse of federal funds for personal use by Passaic, N.J., Public Housing Authority's executive director, Paul Margugelio, whom HUD Secretary Jack Kemp suspended last week.

According to committee counsel Stuart Weisberg, Margugelio held four different jobs with the housing authority - two full-time positions (executive director and modernization director) and two part-time positions (contracting officer and purchasing agent). All four jobs allegedly netted him a $245,000 salary in 1989.

Ninety percent of public housing authorities' funds come from HUD.

Weisberg said Margugelio would have had to work 17 hours and 20 minutes a day to handle all four jobs.

(FEB. 5) UPI - A domestic dispute has left four people dead and one injured near Joliet, Illinois. Authorities say a gunman who killed three members of his family and wounded his wife held police at bay for several hours before committing suicide. NONE of the victims were immediately identified by police.

Atlanta doctors are watching the progress of a nine-day-old Savannah, Georgia, boy who received a heart transplant during the weekend. Corey Wilson is the youngest person ever to receive a heart transplant in Georgia. The infant is listed in critical but stable condition at Henrietta Egleston Children's Hospital.

Milwaukee police are considering attempted murder charges against the mother of a seven-week-old boy found in a garbage cart. Police say the woman apparently left her infant son in the cart last night after a fight with the child's father. The baby was taken to a hospital, but appears to be unharmed.

Authorities in Muskegon, Michigan, say a 13-year-old boy has admitted molesting 64 children at a church nursery during a three-year period. A juvenile judge says the youth revealed details of the molestations last fall during therapy ordered by a court after he was convicted of sexual misconduct.

WASHINGTON (FEB. 5) UPI - Missouri's ''parents as teachers'' program became a potential national model Monday as the Senate approved a proposal by Sen. Christopher Bond, R-Mo., to include such preschool education plans in an adult literacy bill.

Bond's proposal was approved on a voice vote as an amendment to the proposed National Literacy Act, introduced by Sen. Paul Simon, D-Ill., and expected to be approved by the Senate in a vote scheduled for Tuesday.

Simon's bill is aimed at streamlining local, state and federal efforts to end adult illiteracy by setting up a special White House coordinating council and establishing a national literacy center.

''It makes sense to arrest the life cycle of illiteracy in its early stage '' Bond told his colleagues as he proposed adopting Missouri's early education plan as a federal model.

The Missouri parents as teachers program is operated by school districts throughout the state and offers educational aids, counseling and other services to help the parents of preschoolers ready their children for

school.

Using federal funds as seed money, the concept was initiated in 1981 during Bond's tenure as Missouri governor and has since served as a model for similar programs in several states.

''I have found that the parents who come together to share experiences ... are really the leaders in this battle,'' Bond told the Senate.

Under Bond's amendment, states with programs similar to the Missouri model would be eligible for funds under the Families for Literacy Act. The federal plan would also add screening of preschoolers for learning disabilities or health or developmental problems.

The federal cost, estimated by Bond's staff at $15,000 per school district would be largely phased out over five years.

Sen. Nancy Kassebaum, R-Kans., a proponent of the literacy legislation, said the early education emphasis would ''strengthen'' the bill.

According to Simon's staff, an estimated 23 million to 27 million American adults are functionally illterate - lacking the necessary reading and writing skills to handle such tasks as balancing a checkbook, taking a driver's examination or filling out an employment application.

Of the unemployed, an estimated 75 percent are functionally illterate and the greatest proportion of marginally or functionally illiterate adults, 44 percent of blacks and 65 percent of Hispanics, is among minorities.

''Illiteracy is a great weight that keeps this country and millions of her citizens from being all they can be,'' Simon said earlier. ''We must fling off that weight.''

#90036u1610 02/05/1990 ~United Press International

WASHINGTON (FEB. 5) UPI - Labor Secretary Elizabeth Dole proposed Monday cutting workplace exposure to the cancer-causing metal cadmium up to 99 percent, a long-awaited move aimed at protecting the health of more than 500,000 U.S. workers.

''Cadmium exposure poses a serious threat of cancer and kidney damage which can be significantly reduced by lowering workplace exposures,'' Dole said in announcing the proposed new exposure limits for cadmium in air.

Cadmium, a poisonous metal that also comes in powder form, is primarily used to protect steel from corroding and as a component of electrodes in alkaline batteries and soldering material. It is also used in yellow and

red pigments, and can serve to stabilize plastics.

The latest government effort to tighten cadmium exposure rules dates back to 1986 and has encountered numerous bureacratic obstacles along the way.

Lorrie McHugh, a spokeswoman from the AFL-CIO, said, ''We are happy they finally moved on issuing the proposal. We feel it is about time.''

Several labor unions had taken the goverment to court over the delays in instituting new cadmium exposure levels, claiming the lack of action ''jeopardized worker safety and health,'' McHugh said.

Under rules proposed Monday by the Occupational Safety and Health Administration, permissible levels of cadmium in the air will be cut anywhere from 95 percent to 99 percent over currently allowed levels, Dole said.

Assistant Labor Secretary Gerard Scannell estimated that about half of the 500,00 Americans who work with cadmium are currently exposed to levels below the proposed limit.

''But the remaining exposed workers need the protection which the rule can provide,'' Scannell said.

The proposed rules set forth two possible options to be discussed at public hearings set for June 5 in Washington and July 17 in Denver.

One option would allow an eight-hour, time-weighted average exposure of no more than 5 micrograms of cadmium per cubic meter of air, and the other, which would require greater use of respirators in certain industries, would set the limit at 1 microgram of cadmium per cubic meter of air.

The current exposure limit is 100 micrograms of cadmium fumes per cubic meter of air and 200 micrograms of cadmium dust per cubic meter of air.

Reducing cadmium exposures in every workplace to 1 microgram per cubic meter of air would prevent 14 cancer deaths and 13 to 189 cases of kidney failure cases each year, Labor Department officials estimated. The 5 microgram limit would avert 4 cancer deaths and 41 cases of kidney failure per year, they added.

Costs of implementing the 1 microgram standard, such as additional respirators and engineering controls, would be about $160 million annually while the 5 microgram standard would cost about $57 million per year, the Labor Department said.

JAKARTA, INDONESIA (FEB. 5) UPI - Indonesia will normalize relations with China this year, Indonesian Foreign Minister Ali Alatas said in a statement transmitted Monday by the official news agency Antara.

''We have passed the technical stage, except that of finance, which is due to be solved shortly,'' Alatas was quoted as saying Monday at a parliamentary hearing.

It was the first public mention by either side of a date for resuming formal diplomatic relations between the two countries, which have been discussing the idea since February 1989.

The countries severed diplomatic ties in 1967 after Indonesia blamed China for backing a failed coup that led to the downfall of President Sukarno. China has steadfastly denied the accusation.

Indonesia's President Suharto expressed an intention to end the freeze last year during the funeral of Japan's Emperor Hirohito.

The financial talks revolve around unpaid loans Indonesia owes China and an accounting of interest due.

While a normalization date has not been set, Alatas said it would be appropriate to say it would take place this year, Antara reported.

#90036u1669 02/05/1990 ~United Press International
WASHINGTON (FEB. 5) UPI - Candidates who ran in eight special House elections last year spent $10.9 million, with the most expensive race being the bitter Florida contest won by Republican Ileana Ros-Lehtinen, federal figures showed Monday.

A report released by the Federal Election Commission showed that a total of 41 candidates ran in primaries, but that $8.9 million of the overall spending came from the 16 candidates who were finalists. The Democratic

and Republican parties spent an additional $592,303 on behalf of those candidates.

The greatest spending came in the Florida race in which Ros-Lehtinen defeated Democrat Gerald Richman in the race to replace Democratic Rep. Claude Pepper, who died. The contest was marred by a series of bitter, racially tinged charges and counter-charges and was the only race in which Republicans grabbed a seat that had been held by a Democrat. In two of the other special races, Democrats captured seats that had been Republican while the remainder were won by the party that had held them.

In only two of the eight races, the loser raised and spent more money than the winner.

In the Florida contest, Ros-Lehtinen spent $987,090, while Richman spent $822,138 - both considerably more than the median figure of $551,852.

Despite the eight special elections and some party switches by members, the political breakdown in the House is currently very close to the 260-175 Democratic edge produced by the 1988 elections.

Currently, there are 257 Democrats and 175 Republicans, with three vacancies, two of which were seats held by Democrats.

Here is a breakdown of spending by finalists in the special 1989 contests:

Indiana 4th District; March 28
Democrat Jill Long, the winner, raised $326,025 and spent $313,724.
Republican Dan Heath, who lost, raised $393,716 and spent $378,441.

Alabama 3rd District; April 4
Democrat Glen Browder, who won, raised $594,284 and spent $577,556.
Republican John Rice, who lost, raised $427,899 and spent $419,605.

Wyoming At Large Seat; April 26
Republican Craig Thomas, who won, raised $564,142 and spent $526,148.
Democrat John Vinich, who lost, raised $485,494 and spent $479,705.

Florida 18th District; Aug. 29
Republican Ros-Lehtinen, who won, raised $1,001,618 and spent $987,090.
Democrat Richman, who lost, raised $822,864 and spent $822,138.

California 15th District; Sept. 12
Democrat Gary Condit, who won, raised $610,864 and spent $598,677.
Republican Clare Berryhill, who lost, raised $301,861 and spent $298,706.

Texas 12th District; Sept. 12

Democrat Preston Geren, who won, raised $936,886 and spent $921,183.
Republican Bob Lanier, who lost, raised $632,067 and spent $600,613.

Mississippi 5th District; Oct. 17
Democrat Gene Taylor, who won, raised $336,860 and spent $334,205.
Republican Tom Anderson, who lost, raised $755,707 and spent $743,179.

Texas 18th District; Dec. 9
Democrat Craig Washington, who won, raised $621,761 and spent $619,120.
Anthony Hall, also a Democrat, lost. He raised $353,179 and spent $316,336.

#90036u1687 02/05/1990 ~United Press International

WASHINGTON (FEB. 5) UPI - The Bush administration, which was quick to hail the emergence of political pluralism in Eastern Europe, reacted with few words and a vow of non-interference Monday to signs of similar change in the Soviet Union.

As talk of historic reform dominated a momentous meeting of the Communist Party leadership in Moscow, the administration seemed intent to do nothing that could make things more difficult for Soviet President Mikhail Gorbachev.

In the face of Gorbachev-engineered changes that could signal the end of a 70-year-old Communist Party political monopoly, White House press secretary Marlin Fitzwater refused to speculate on or judge the events in Moscow.

''The United States, as I guess you know, has always favored political pluralism and movement toward private-market economies,'' he said, ''but we will not offer any comment on the course of this plenum meeting or on the move toward a multiparty system.''

President Bush has done nothing in the last several weeks to hide his intensified hope that Gorbachev, whose own political and economic reforms gave way to a wave of freedom in Eastern Europe, survives recent challenges from ethic violence, dissident nationalists and conservative critics in the Kremlin.

However, the watch-and-wait attitude the administration displayed Monday toward the start of the Communist Party plenum and Sunday's mass pro-democracy demonstration in Moscow appeared driven by sensitivity to Gorbachev's political crisis.

When asked to explain his reticence to comment on the same kind of changes the United States encouraged and welcomed in other Eastern bloc countries,

Fitzwater said he wanted to avoid any statement ''that might be disruptive'' to the meeting in Moscow, which could determine Gorbachev's political future.

#90036u1712 02/05/1990 ~United Press International

WASHINGTON (FEB. 5) UPI - In a finding that could undermine President Bush's plan to cut capital gains taxes, a House committee report said Monday that during the 1980s, the rich paid lower taxes on more income, while the poor felt a sharper tax bite.

The report, based on Congressional Budget Office and other agency studies, is to be released Tuesday by the House Ways and Means Committee at a hearing where Treasury Secretary Nicholas Brady and White House budget director Richard Darman are scheduled to testify.

The report shows the effective tax rate for the poorest 20 percent of American families rose 16.1 percent during the 1980s while real income rose 3.2 percent.

During the same period, it says, the effective tax rate for the richest 20 percent of families dropped by 5.5 percent while their real income rose 31.7 percent.

That statistic and others in the report could add fuel to Democratic claims that wealthier Americans, who would benefit most from a capital gains tax cut, do not need or deserve another tax break.

Last year, in a bitter partisan battle that stalled vital budget-related legislation for months, Senate Democrats defeated Bush's plan to lower the tax rate on capital gains, which had passed both the tax-writing Ways and Means Committee and the full House.

The fight likely will resume this year, since Bush has renewed his proposal for lowering the levy on profits from the sale of assets such as stocks, bonds and real estate, a move the administration says would spur investment and create jobs.

Some Democrats opposed to capital gains cuts have proposed tax breaks they say would benefit more middle income families instead, such as a reduction in the Social Security payroll tax.

The new Ways and Means report found that the poorest 20 percent of families made only 86 percent of the official poverty level in 1980 and are projected to make even less this year - just 84 percent of a higher 1990 poverty level.

That amounts to an income loss during the 1980s of about 3 percent for the poorest Americans.

At the same time, however, the richest 20 percent of families had incomes 8.6 times the poverty level in 1980 and are expected to have incomes more than 11 times the poverty level this year - a nearly 32 percent increase.

For those Americans in the top 5 percent of earners, the report says their income rose from more than 15 times the poverty level in 1980 to an estimated 22.5 times the poverty level in 1990 - a 46.1 percent increase.

''The story of the '80s is that the rich did well and that the poor lost ground,'' said one Ways and Means Committee staff member, who asked not to be identified. ''The numbers show that the rich were getting substantially richer and the poor were getting a little bit poorer.''

#90036u1749 02/05/1990 ~United Press International

GENEVA (FEB. 5) UPI - Soviet Jews emigrating to Western countries instead of going directly to Israel declined to just 164 in January because of new U.S. visa regulations, the Intergovernmental Committee for Migration (ICM) said Monday.

Last year, a record 60,489 Soviet Jews - an average of about 5,041 per month - traveled to an ICM reception center in Vienna to be processed for settlement in the West, mostly in the United States

An additional 5,000 or so monthly flew straight to Israel via Budapest or Bucharest.

The United States as of Oct. 1 introduced a new regulation requiring Soviet Jews to first obtain visas from the U.S. Embassy in Moscow, ICM officials said.

''The small number of 164 in January were those who already had visas before then but were unable to leave before now,'' one official said. ''We now expect only very few monthly arrivals in Vienna as people obtaining visas in Moscow can go straight to the United States.''

Large numbers of Soviet Jews continue to go straight to Israel, mostly via Budapest and Bucharest but also directly from Moscow to Tel Aviv, the official said.

Financed by the United States and other Western nations, the ICM was established after World War II to assist displaced persons in Europe.

It began helping emigrating Soviet Jews in 1971 when there were 12,680

arrivals in Vienna.

Annual totals rose steadily to reach 51,330 in 1979 but then fell off sharply because of Kremlin restrictions on Jewish departures, falling to just 943 in 1986.

Then the new Soviet leader Mikhail Gorbachev reversed policy, and arrivals at the Vienna center jumped to 8,011 in 1987, 20,082 in 1988 and the record 60,489 in 1989.

#90036u1805 02/05/1990 ~United Press International

WASHINGTON (FEB. 5) UPI - China, the world's largest wheat importer, bought 299,150 metric tons of U.S. wheat at subsidized prices in its first purchase of U.S. wheat in a month, the Agriculture Department reported.

The wheat was worth $41.8 million, based on Chicago prices. Four exporters were given subsidies worth $10.28 a ton, or 28 cents a bushel, for making the deal. There are 36.7 bushels in a metric ton of 2,204.6 pounds.

Counting the latest deal, China has purchased 5.7 million tons of U.S.-grown wheat during the 1989-1990 marketing year. It bought 8.09 million tons - more than half of its total imports - from U.S. sources during 1988-1989.

China was the single largest market for U.S. export wheat during 1988-1989 and holds that position again this year.

The latest purchase effectively depleted a U.S. offer, made two months ago of the opportunity to buy 1 million tons of wheat through the Export Enhancement Program, the major U.S. export subsidy program.

Under the EEP, the government gives bonuses to exporters who lower their prices in order to make a sale to a targeted country.

China is one of the major wheat-producing countries of the world but demand has outpaced the nation's efforts to grow more wheat at home.

U.S. analysts have forecast China will import 15 million tons of wheat this marketing year.

The latest sale called for delivery in April and May of 100,000 tons of northern-dark northern spring wheat, 115,000 tons of soft red winter wheat and 84,150 tons of hard red spring wheat.

#90036u1813 02/05/1990 ~United Press International

LONDON (FEB. 5) UPI - Hundreds of electricians at Ford Motor Company in Britain went on strike Monday in a bitter union split that has forced the company to lay off 10,000 workers in Belgium.

Officials said 1,600 workers with the Electrical Electronic Telecommunication and Plumbing Union broke with the majority of Ford's 31,800 other workers and decided to reject the company's two-year contract.

Ford workers voted Jan. 23 to accept the company's pay offer, which proposed a 10.2 percent increase during the first year, and an 8 percent increase or the inflation rate plus 2.5 percent, whichever is higher, in the second year.

But EETPU members, in a separate mail ballot, voted to strike, saying the offer is not enough to compensate for new skills tests and working practices demanded by the U.S. multinational.

Ford said the strikes have been called at three of its facilities at Halewood, 210 miles northwest of London, since after the vote was taken.

The work stoppage at Halewood has forced slowdowns in productions at plants in Southampton, 75 miles southwest of London, and in Belgium where 10,000 workers have been laid off.

Since last week, 3,000 workers have been released from one of two Ford plants in Genk, Belgium, a Ford spokesman said.

Another 7,000 workers at the second Genk plant, which builds Sierra cars, were laid off Monday due to ''the cumulative effect of a number of short losses of production (in Britain),'' Ford spokesman Martin Watkins said. He said those workers were expected to be called back to work Tuesday.

The Amalgamated Engineering Union at Ford declined to call for a new ballot during a meeting Monday or to endorse the work stoppages.

Ford said it was sticking by its contract offer. It said it had received formal notification from the unions of their intention to sign the agreement and did not intend to reopen negotiations.

''Our position remains as it was, that we have a majority of our employees in favor of accepting the contract offer,'' Watkins said.

#90036u1817 02/05/1990 ~United Press International

(FEB. 5) UPI - The Soviet Union is joining other Eastern European nations in considering drastic changes in its political system. Mikhail Gorbachev today opened a meeting of the Communist Party leadership in Moscow by saying he's ready to accept a multi-party system in the Soviet Union. The Soviet president then presented his plan to make the party more democratic... a move that would have the Communist Party giving up its constitutional monopoly of power.

The leader of South Africa's right-wing Conservative Party is demanding President Frederik de Klerk's resignation. The pro-segregation official says de Klerk has- quote- ''awakened the tiger in the Afrikaner'' by reforming the nation's racial system. Senior government officials say the apartheid system will NOT be abolished, despite de Klerk's reforms.

East Germany's Cabinet expanded today, forming a broad coalition government. Nine new ministers... all from opposition parties and movements... were sworn in after the nation's parliament voted its approval. Prime Minister Hans Modrow had urged opposition leaders to join his troubled government to save it from total collapse before general elections are held next month.

President Bush took a middle-of-the-road approach on global warming while addressing an international environmental conference today in Washington. Bush told the meeting that- in his words- ''many questions remain to be answered'' before the potential crisis can be addressed. The speech is being viewed by some as a test of Bush's claim to be a champion of the environment.

#90036u1825 02/05/1990 ~United Press International

CHICAGO (FEB. 5) UPI - Grain and soybean futures were mixed but mostly lower in relatively quiet trading Monday on the Chicago Board of Trade.

Soybeans were supported much of the day by strong processor demand coupled with light country movement but turned lower during the final minutes. Beans also were pressured by rain in the soybean region of Argentina and very light trading on European markets.

The weakness in soybean oil and meal also weighed on soybean prices.

Nearby wheat was higher on news that China had bought 300,000 tons of export bonus wheat and Egypt was in the market for 250,000 tons. Deferred wheat was lower on light buying interest and improving crop prospects.

Corn was lower across the board in lackluster trading.

At the close, corn was off 1/4 to 1 1/4, soybeans unchanged to off 2, wheat up 4 1/2 to down 2 and oats off 1/2 to 1.

#90036u1826 02/05/1990 ~United Press International

WASHINGTON (FEB. 5) UPI - The city administrator Monday characterized as ''whirlwind'' the 2 1/2 weeks she has been in charge of running the government since Mayor Marion Barry's arrest on cocaine charges.

But Carol Thompson, at an informal meeting with journalists, said the city was functioning well despite the mayor's absense.

''It's business as usual in the way the government is functioning,'' said Thompson, adding that she expects no changes in personnel or the cabinet.

''I think the government's moving along. We've not had any internal problems, we've talked to the (city) council, we've been to (Capitol Hill) and everyone is cooperative,'' she said.

Barry handed the reins of government to Thompson a day after his Jan. 18 arrest for cocaine possession during an FBI-police sting at the Vista International Hotel in downtown Washington.

Thompson holds all the mayor's powers but those of signing or vetoing legislation or approving contracts with the federal government. Documents requiring Barry's signature are being sent to him at the Hanley-Hazelden Center in West Palm Beach, Fla., where he is undergoing treatment for substance abuse.

Thompson will remain in control until at least Feb. 18, and Barry could ask her to continue to run the city beyond then. Thompson said Barry has telephoned her and said he is in almost daily contact with the city.

''The mayor sounds very good,'' Thompson said. ''I'm pleased to hear him very much concerned about the city and about himself.''

Thompson declined to say whether Barry plans to seek a fourth term as mayor. She did say the government is bracing for an expected increase in subpoenas in the coming weeks in the ongoing federal probe of Barry.

According to an FBI affidavit, Barry, 53, was videotaped buying and smoking crack cocaine inside the hotel, where he was lured by a former D.C. employee and friend.

After his arrest, Barry allegedly tested positive for cocaine. If convicted of the cocaine possession charge, Barry could face a year in prison and a $100,000 fine.

(FEB. 5) UPI - Defense Secretary Cheney testifies before a Senate Budget Committee today on President Bush's proposed military spending plan for fiscal 1991. In an interview yesterday, Cheney defended the plan, which calls for cuts in conventional forces in Europe, closing several U-S military bases and increased spending on strategic arms systems. Cheney insists that a buildup in strategic weapons is necessary despite the decreased Soviet threat in Europe.

The Soviet news agency Tass reports an explosion in a unit at one of the

biggest hydroelectric stations in the Transcaucasus region of northern Azerbaijan. Tass says the blast collapsed the roof caused a fire at the station, about 270 miles northwest of the Azerbaijani capital of Baku. The news agency says there were NO injuries, but the explosion forced other units at the power station to shut down, aggravating energy shortages in Azerbaijan.

A team of Detroit doctors is using blood-sucking leeches to try to save a man's fingers that were reattached to his hands after an industrial accident. Surgeons at Harper Hospital applied the leech-therapy to help improve circulation in the fingers of 19-year-old Robbie John. John underwent a 20-hour operation last Tuesday to reattach his fingers after they were cut off in a press machine.

#90036u1886 02/05/1990 ~United Press International
BY VERNON SCOTT

HOLLYWOOD (FEB. 5) UPI - After some five decades of bitter bandying, ''What Makes Sammy Run?'' remains one of the best novels written about Hollywood and now stands a good chance of becoming a movie.

Authored by Budd Schulberg, ''Sammy'' tells the story of a devious studio mail room clerk who lies, cheats and steals his way to the top, a despot who became a caricature for many of Hollywood's moguls in the 1940s and 50s.

The name Sammy Glick became a term for describing any human vulture who knifes people in the back without a trace of conscience.

Such heavyweight bosses as Louis B. Mayer, Harry Cohn, Jack Warner, Sam Goldwyn and Joseph Schenck were outraged when the novel was published in 1941. They detected their own ploys and character traits in slimy Sammy.

Schulberg's portrait was so close to the knuckle that he became a pariah who couldn't find work in Hollywood for years.

Even his father, the powerful B.P. Schulberg, head of Paramount Pictures and later an enormously successful independent producer, failed to spare him the wrath of the reigning moguls.

Only 26 when he wrote the best-selling novel, Schulberg went on to win an

Oscar for his screenplay of ''On The Waterfront'' in 1954. But he remained a black sheep until recently.

Schulberg, now 75, is delighted that ''What Makes Sammy Run?'' is being re-printed this year to celebrate its golden anniversary. Moreover, he has written a screenplay from the book, which Warner Bros. has optioned for a film.

''At the time the book was first published, there was no chance it would become a movie because of the violent reactions of men like Mayer,'' Schulberg said recently.

''They wanted to run me out of town. Mayer ran this industry like it was his own country. I thought of Hollywood as old Venice and he was the head doge.

''It was unthinkable any of them would produce the movie and thereby expose themselves. In later years the book remained unofficially banned. We produced a TV version and made it a musical on Broadway.

''In recent years I became a bit picky about how it would be made as a movie. I was waiting for someone to make the right offer.

''Now times have changed. New people have come in and they don't identify themselves with Sammy, even though there may be more Sammy Glicks around than in my father's day.

''If the picture is made at Warner Bros., I will be one of the producers.

''What shocks me is how young people in and out of the movies perceive Sammy. When I wrote him he was a terrible human being, scorned by everyone. By today's standards he's become a role model for success.

''What is the world coming to? I read an interview with Donald Trump who was accused of being an extreme egotist. Trump said, 'I take that as a compliment.'

''If you asked Sammy Glick, he would take it as an insult even today. It's an indication of the change our social mores.

''I didn't realize until after the book came out that it wasn't so much about Hollywood as a character who exists in every business and society. Without knowing it, I wrote about a universal character, not just a little Hollywood hustler.

''I had the luck to isolate this kind of person and put him down on paper. I heard from people all over the country in every walk of life who said they knew Sammy.

''When I first wrote about Sammy in a short story I called him Manny, but my father suggested I change the name to Sammy so people wouldn't think I was writing about Manny Cohen, who helped push him out of Paramount.''

Schulberg's publishers thought it would be a good idea to print a new edition of the old best-seller, which sold some 50,000 copies when it first appeared and more than a million in paperback.

''The first printing was only 2,000 copies,'' Schulberg recalled. ''I got a $500 advance. It sold out before it was officially in the stores. It eventually went into six or seven printings.

''For this edition, I wrote an afterward that traces Sammy's history,'' Schulberg said. ''I've been happy with the reviews after all these years and it's already gone into its second printing.

''One reviewer said there have only been five memorable characters in literature - Don Juan, Don Quixote, Scrooge, Babbitt and Sammy Glick.

''That's very high praise and gives me hope that Sammy will be done justice in the movie version. The big challenge will be finding the right actor to play the part.''

#90036u1890 02/05/1990 ~United Press International

PEBBLE BEACH, CA (FEB. 5) UPI - It's not supposed to be this way. Nobody is supposed to master the windswept, nightmarish courses of the Monterey Peninsula.

But that is just what Mark O'Meara has done over the last 11 years. He has won a California Amateur title and carded the three of his five PGA Tour victories on courses that have humbled the best.

''I've won here before and I always play well here,'' said O'Meara, who became the first player since Tom Watson in the late 1970s top win back-to-back titles at the $1.07 million Pebble Beach National Pro-Am.

''I look forward to playing on these courses because they are so challenging. You have to be patient and be able to make a number of different golf shots to win here,'' he said.

Just what kind of advantage is it to have O'Meara's brand of confidence when facing the Pebble Beach, Cypress Point and Spyglass Hills courses? Consider that Arnold Palmer, Lee Trevino and Gary Player could not manage a single victory on the courses during their careers.

O'Meara's victory also answered any question that might have been lingering about his ability to play the courses in less than ideal conditions. His three previous victories came in good weather.

On Saturday, 40 mph winds made the oceanfront holes at Cypress Point nearly unplayable. Scores skyrocked. But O'Meara came home with a 3-under-par 69.

''I played a steady, solid round and it put me in the middle of it,'' he said.

On Sunday, the field faded. Payne Stewart, playing in front of O'Meara, was in second place but bogeyed four of the last eight holes.

''I try not to pay too much attention to the leader board,'' O'Meara said. ''I just try to hit the best shots I can.''

On Pebble Beach's majestic 18th, with the ocean pounding on one side of the fairway, O'Meara decided to gamble and drive the ball, rather than play it safe.

''I felt 'Hey, you're a good player, just hit driver,'' he said. ''I can't be copping out here.''' O'Meara said. ''I hit a good tee shot, got it on the green in three and two-putted for my par.''

O'Meara now heads to the Hawaiian Open, which begins Thursday. He will then skip the Los Angeles Open and head to the PGA Tour's southern stops.

#90036u1930 02/05/1990 ~United Press International

NEW YORK (FEB. 5) UPI - Foreign acquisitions of European companies hit record levels last year as U.S., Japanese and European firms snapped up 2,175 targets worth around $50.1 billion, a consulting company said Monday.

Noting an apparent acceleration in what it termed a ''corporate consolidation'' process, the European Deal Review published by Translink, a company consulting on cross-border business deals, said the value of acquisitions in the second half of 1989 doubled that of the first half.

It predicted the European acquisitions binge would expand in the 1990s.

U.S. interests led in acquisitions of European companies, picking up 185 for a value of $15.27 billion, trailed by the French (168 deals for $10.69 billion), West Germans (129 deals for $7.35 billion), Italians (52 deals for $1.86 billion) and Japanese (55 deals for $1.64 billion).

Activity in the first half of 1989 was dominated by the French, who spent

$4.53 billion on acquisitions in the period. But they were overshadowed by heavy U.S. investment of $15.26 billion in the second half.

West Germans, traditionally less active, overtook British investors to take third place for the year. ''During November and again in December, German companies were the most active acquirers in Europe,'' the newsletter said.

Britain was the focus of European acquisitions, both in terms of number and total value of deals. In the United Kingdom in 1989 some 238 companies worth about $23 billion went under foreign control, compared with 216 companies worth $6.3 billion in West Germany, the runner up.

France came next at 191 deals worth $5.93 billion, followed by Italy at 104 deals for a value of $4.56 billion.

The newsletter said Germany, ''notoriously inhospitable to foreign acquirers, appears to have changed its stripes'' and today is ''an integral force in the corporate consolidation of Europe.'' But dealmaking is tough in France and the value of French acquisitions elsewhere in Europe was more than twice the value of company purchases in France by other Europeans.

The newsletter said acquisitions were heaviest in the food industry, with $7.77 billion spent in 101 deals. Following were the automotive and aircraft sector, insurance, banking and financial services, electronics and computers, paper, printing and advertising, and chemicals and plastics.

#90036u1959 02/05/1990 ~United Press International
(FEB. 5) UPI - TODAY'S PEOPLE:

RICH EUROPEAN WOMEN: Queen Elizabeth II still tops the list of the richest woman in Europe, which now includes a 5-year-old girl. A British magazine says the queen's $8.79 billion personal fortune also makes her the fourth richest person on Earth. Queen Beatrix of The Netherlands is the second-wealthiest woman in Europe with $4.6 billion, followed by West German businesswoman Johanna Quandt ($3.4 billion) and Grete Schickendanz ($1.99 billion), the owner of West Germany's largest mail order firm. No. 7 in Europe is Athina Onassiss-Roussel, 5, the daughter of Christina Onassiss and French pharamaceutical heir Theirry Roussel, who will receive her $830 million fortune on her 18th birthday in January 2003. Fourteenth place on the magazine's list had been held by Elena Ceausescu ($250 million), who was executed with her husband, dictator Nicolae Ceausescu, in Romania's uprising.

ROSA'S BIRTHDAY: Civil rights pioneer Rosa Parks was honored Sunday night

with a 77th birthday gala at the Kennedy Center in Washington that featured Coretta Scott King, Cicely Tyson, Lou Rawls, Dionne Warwick, Dick Gregory and NBC weatherman Willard Scott. ''It is so nice to have someone like you, Rosa, the lady who made it all happen, who started it out and turned it around,'' Rawls said. ''We keep trying to get ahead and advance, but we have to remember where we come from.'' Parks' refusal to surrender her bus seat to a white man in Montgomery, Ala., in 1955 is considered to be one of the origin points of the modern civil rights movement.

REAGAN'S BIRTHDAY EARLY: The girls at an Orlando, Fla., shelter for runaways sang an early ''Happy Birthday'' to Ronald Reagan Sunday. The former president, who turns 79 on Tuesday, was honored with a humanitarian award from the House of Hope and he and his wife, Nancy, also were given two T-shirts from the home. In return, the Reagans donated a set of books about the White House and handed over a check for an undisclosed amount. They have been supporters of the home since its inception in 1985. In 1988 Reagan made a three-minute video extolling the facility, which offers teenage girls counseling and a high school education.

MONEY FOR HOMELESS: New York Mayor David Dinkins played straight man for Robin Williams Sunday as Williams presented a donation from the Comic Relief charity for the homeless. ''This is from Leona Helmsley's legal fund,'' Williams said as he signed over the $227,000 check. A little later he changed his story, saying, ''This is tortilla money from Manuel Noriega.''

GLIMPSES: A dog partly owned by Bill Cosby won best in show Sunday among the 2,000 dogs at the 80th annual Golden Gate Kennel Club dog show in San Francisco. The 1 1/2-year-old, 16-pound brown female lakeland terrier is named Ch. Black Watch Gotta Lotta Moxie (the ''Ch.'' stands for champion) and is owned by Cosby and four other people ... Miss America Debbye Turner was in Washington Monday to help get the 1990 census rolling. She joined Secretary of Commerce Robert Mosbacher to kick off a $55 million campaign to encourage Americans to participate in the once-a-decade head count ... Martha Raye has some big fans at the Tri-County Council Vietnam Era Veterans organization in Albany, N.Y. Four members of the veterans' group are campaigning to have Raye presented a Medal of Freedom.

#90036u1964 02/05/1990 ~United Press International

DALLAS (FEB. 5) UPI - Higher costs for materials and services in the steel group caused LTV Corp.'s fourth-quarter earnings to fall to $72.3 million from $95.3 million in the same period of last year, the aerospace-defense-steel company reported Monday.

LTV, which has been operating in Chapter 11 bankruptcy since July 1986, also blamed lower operating results on commercial aircraft programs for

the decline. Per share earnings, though required to be reported under accounting rules, are irrelevant since the company is in bankruptcy proceedings.

Fourth-quarter revenues also declined to $1.6 billion from $1.7 billion in the sam period of last year. The company cited reduced sales in military aircraft programs and other defense deliveries for the lower sales.

For the year, LTV earned $264.9 million on revenues of $6.4 billion, compared with a loss of $3.15 billion on revenues of $7.3 billion in 1988. Last year's loss included $1.35 billion of Chapter 11-related charges and a one-time, non-cash charge of $2.26 billion to account for postemployment insurance benefits.

In 1988, there was also a $30 million special charge to write down costs related to cenceling construction of a center for production of advanced aircraft components.

Operating income before special charges declined to $230.3 million in 1989 from $452.2 million in 1988. That resulted from a $95 million charge by the aircraft products group in the first three quarters for projected cost increase on fixed-price contracts, and lower resutls from steel operations.

The decline was partially offset by a $57.8 million increase in interest and other income.

In the fourth quarter, LTV concluded the sale of its steel bar division in Canton, Ohio, to its 4,700 employees. Exclusion of the bar division's results and other sales accounted for $71 million of the decline in the operating income in 1989.

Total steel sales declined $872 million in 1989.

As of Dec. 31, LTV's cash and cash equivalents rose to $1.02 billion from $1.01 billion at the end of 1988.

WASHINGTON (FEB. 5) UPI - Yields for 13-week T-bills jumped at Monday's weekly auction but the yield on the 26-week bill edged down slightly.

The Treasury Department auctioned $7.65 billion worth of 13-week bills at an average discount of 7.83 percent, an increase over 7.77 percent at last week's auction. It was the highest rate since Sept. 5, when the auction yielded a rate of 7.88 percent.

The government also sold $7.6 billion worth of 26-week bills at an average discount of 7.72 percent, down slightly from 7.73 percent last week. That was the lowest rate since Jan. 22, when the rate stood at 7.58 percent.

The discount rate understates the actual yield to investors. The investment, or coupon-equivalent, rate was 8.1 percent on the 13-week bills at an average price of $9,802.10 per $10,000 face value. The investment rate on the 26-week bill was 8.15 percent at an average price of $9,609.70 per $10,000 face value.

#90036u2000 02/05/1990 ~United Press International

(FEB. 5) UPI - DIGEST:

Auto Racing

Porsche will return to Formula One racing in 1991 with Britain's Arrows team. The German automaker signed a three-year contract to supply Arrows with an engine, which is currently under development.

Baseball

President Bush, a former first baseman at Yale, received all 100 copies of a Topps baseball card portraying himself in his college uniform. Arthur Shorin, chairman of Topps, said the card was made because Bush said his grandson wanted to become a baseball player because ''politicians don't get their pictures on bubble-gum cards.'' ... A collector hopes to sell a rare proof sheet of five 80-year-old baseball cards for $2 million. The strip contains the celebrated 1910 Honus Wagner card and four other players from the era.

Boxing

The WBA middleweight title bout between champion Mike McCallum and Michael Watson was pushed back until April 14, the fourth time the date has been changed. ... WBC straw weight champion Choi Jum Hwan of South Korea will defend his title against Japan's Hideyuki Ohashi in Tokyo Wednesday.

Football

Eagles Coach Buddy Ryan was fined $3,500 for sending too many players on the field in a punt formation in the final seconds of the Nov. 19 game against the Vikings, the Delaware County Times reports.

Golf

Planters LifeSavers Co. will drop its three-year sponsorship of the LPGA's annual tournament in High Point, N.C., after this year. The move is part of a cost-cutting program by RJR Nabisco's new owners, Kohlberg, Kravis and Roberts, who took over the food and tobacco conglomerate last year.

Horse Racing

Jockey Ron Hansen, the top rider this season at Golden Gate Fields in California, was banned from the track following an investigation into the ''conduct of racing'' at Golden Gate. Some Nevada casinos, reportedly upset by a couple of longshot winners at the neighboring Bay Meadows track began refusing to handle bets or severely limting them on Bay Meadows races.

Hockey

A back injury may sideline Penguins star Mario Lemieux for several games, preventing him from reaching the NHL record for scoring in consecutive games. Lemieux, who needs to score a goal or an assist in nine games to tie Wayne Gretzky's mark of 51, has had increasing back pain over the last two months. ... Ex-Detroit Red Wing Bob Probert was released from prison in Rochester, Minn., after serving three months for smuggling cocaine. He

was arrested by customs agents on the Detroit side of the border March 1, 1989. The NHL expelled him three days after his arrest. ... Montreal goaltender Patrick Roy was named the NHL's Performer of the Week after recording three victories. ... Representatives from the Quebec Nordiques visit Stockholm this week to discuss Mats Sundin, their 1989 first-round draft choice. Sundin, 19, has one year and an option year left on his contract with the Swedish club Djurgarden.

Olympics

The East German Communist Party, renamed the Party of Democratic Socialism over the weekend, says it endorses the bid for a unified Berlin Olympics in 2000 or 2004.

Skiing

Mateja Svet of Yugoslavia defeated Anita Wachter of Austria in a World Cup giant slalom in Veysonnaz, Switzerland. Diann Roffe of the United States finished third, the best European performance by an American this season.

Tennis

Paolo Cane defeated Mats Wilander 6-4, 3-6, 4-6, 7-5, 7-5 in their decisive Davis Cup match, leading Italy to a first-round upset of four-time champion Sweden in Cagliari, Italy.

#90036u2002 02/05/1990 ~United Press International

WASHINGTON (FEB. 5) UPI - Defense Secretary Dick Cheney and the nation's senior military officer defended the $307 billion Pentagon budget Monday, saying it takes into account the changing world but contains necessary precautions.

Cheney told the Senate Budget Committee that he will advise the Senate and House Armed Services Committees of the results of studies about strategic weapons and aircraft programs that are consuming a large portion of the budget.

Cheney and Gen. Colin Powell, chairman of the Joint Chiefs of Staff, broke little new ground from an appearance last week just after President Bush announced he will seek a negotiated level of 195,000 U.S. troops in Central Europe, with 225,000 in Europe overall.

Cheney said he regarded the level as a ''floor'' below which the United States should not go in the immediate future. He said that ''for the foreseeable future'' there will be a need for NATO and a U.S. presence in Europe.

Cheney - asked about a Budget Committee report that among the $103 billion in parts and materiel in Pentagon warhouses is $33.6 billion it does not need immediately and may never need - detailed a variety of reforms he said should lead to a reduction in the amount of so-called ''inapplicable inventory.'' The report said the level was up from $14.6 billion in fiscal 1983 to $33.6 billion at the end of fiscal 1988.

The report noted the Army once wanted to add 100 sizes to the 58 offered for the long-sleeved dress shirt for female soldiers. Eventually it added 68 sizes, despite warnings many of the shirts would never be worn. Some $3 million in shirts are now in storage, and the Army - which spent $3.5 million over several years measuring different women to determine how many sizes to buy - now wants a new version. ''All that,'' said Cheney, ''will be changed.''

The report said in one extreme case the Navy had a 13,157-year supply of a machine tool needed to make circuits for the F-14 plane. The study, a compilation of previous General Accounting Office reports, also said there are $1.8 billion in items now in the pipeline to be bought which are in the ''inapplicable inventory'' category.

Cheney, asked by Chairman James Sasser, D-Tenn., what ''initiatives'' were under way to solve the problem, said the Pentagon was making ''a very serious effort'' to eliminate unnecessary stockpiling of rarely used items. He cited management reforms announced earlier in the year and a greater reliance on commercial specifications.

Some of it, Cheney said, has to do with ''how the system works. The system is fouled up. If you're a good supply sergeant, in many cases if you want to make certain you've got the spare parts you need when you need them, and if the system is not very efficient, if there's a long lead time from when you order something and when you actually get it, what you're going to do is order enough so you can rathole whatever extra you need.''

Cheney cautioned against sudden cuts that could cause chaos in the uniformed military and said that while Eastern Europe and Moscow are changing, the U.S. response should be gradual and calculated. He noted that Moscow is modernizing its strategic nuclear forces and the Soviet Union remains the only nation capable of destroying the United States.

''We have to guard against making unwise and unjustified changes in our own security arrangements that are based solely on stated intenations of a regime that may or may not be around'' later, said Cheney, who also said that simply bringing large numbers of U.S. forces back from Europe would not save money.

Powell added, ''We know that the world is changing and we welcome the

opportunity to restructure and reshape our forces for the new role we se before us.''

''We're not a bunch of Colonel Blimps who have our heads in the sand,'' said Powell. ''We want to enter this brave new world in a prudent, cautious way.''

Powell also asked that changes in the size of the U.S. military be carefully managed, saying, ''Don't push us off the cliff in 1991, or we will be back to the days of the hollow Army.''

Sasser questioned the act of simultaneously trying to buy the B-2 stealth bomber, develop a one-warhead truck-mounted Midgetman missile, put the 10-warhead MX on railroad cars, buy the C-17 transport plane and develop an advanced fighter and advanced attack jet. At the same time, he noted, the current generation of many weapons is being terminated.

''Why don't we wait and see what kind of world we're going to be living in in a very short period of time rather than going ahead and committing ourselves to these sorts of programs?'' Sasser asked.

Cheney said every program Sasser cited is being studied for revamping, and he promised to alert key committees when the Pentagon decides to propose changes, particularly if changes can be made before the final 1991 Pentagon budget is drafted.

#90036u2009 02/05/1990 ~United Press International

WASHINGTON (FEB. 5) UPI - Prices for new one-family houses fell slightly in the last quarter of 1989 and rose 2.7 percent during the year compared with prices for similar houses sold in 1988, the Commerce Department reported Monday.

Last year, only the West registered a significant increase in prices for new one-family houses comparable to those sold in 1988, the department's Census Bureau said.

Private analysts noted that during 1989 nationwide house sales as well as new construction remained at a low ebb due to higher mortgage interest rates.

According to the Census Bureau, the average price of houses sold in 1989 rose 8 percent to $149,300 from 1988, indicating that houses were larger and had more amenities than those sold in the previous year.

The bureau said that for the fourth quarter of 1989, the price index for new one-family houses was 119.2, 1.3 percent below the third quarter's

120.8, and 2.4 percent higher than the same quarter of 1988. The index, which includes the value of the lot, is designed to measure changes in the sales price of houses with features essentially unchanged over time.

The Census' price index for 1989 was 120, with a base of 100 in 1982, up 2.7 percent from 116.9 in 1988.

The new one-family house index rose in 1989 less than the Labor Department's Consumer Price Index, which advanced 4.8 percent over 1988.

Starting in 1980, new one-family prices have lagged substantially behind inflation: while the CPI increased 70.8 percent, new one-family house prices only rose 50.9 percent.

Census economist Joseph Gilvary noted that about one-third of all houses sold are in areas that have fallen on hard economic times since 1982, such as the oil patch and the Rocky Mountain states, accounting for part of the price lag.

The 1989 average price increase reflects a trend towards building more expensive houses, Gilvary said.

John Tuccillo, chief economist for the National Association of Realtors, also noted that new homes sold tend to be larger and more expensive than a few years ago, and that ''trade up activity'' is increasing.

Nationwide, the 1989 price of new single-family houses with amenities comparable to those sold in previous years was $100,700, while the average price was $149,300.

According to the Census data, in 1989 the only region to register a significant increase in the price index was the West, with a 6.6 gain to $108,500, after a 1.4 percent fall in 1988. the Census said. The average Western price jumped 13.4 percent to $176,500.

Last year, the price index for Northeast new one-family houses increased 3.4 percent from 1988, to $167,900, while the average price rose 4.9 percent to $188,000. In the Midwest, the index advanced 2.3 percent to $107,000 and the average price grew 4.9 percent to $129,700.

In the South, the index increased 1.6 percent in 1989 to $86,500, after a 0.7 percent fall in 1988, while the average price rose 6.8 percent to $122,600.

#90036u2019 02/05/1990 ~United Press International

AUSTIN, Texas (FEB. 5) UPI - Texas Instruments Inc. has joined

Microelectronics and Computer Technology Corp. as associate member which will give the giant semiconductor company access and royalty-free rights to MCC's EXTRACT technology, the research consortium said Monday.

MCC, owned by 19 U.S. companies, was founded in 1982 as a corporate venture to conduct research in microelectroncis and computer technology, especially in computer aided design, high temperature superconductivity, software and semiconductors.

The EXTRACT technology is designed to reduce the programming need for data conversion and data sharing. The technology helps companies to extract data and generate reports from their extensive data bases about their business which currently takes weeks or months.

''One EXTRACT participant estimates that its comapny spends approximately 20 man-years each year writing data conversion programs,'' MCC said. ''It is estimated that, with EXTRACT, the time could be reduced to only two man-years.''

James Martin, vice president of TI's Information Technology Group, said participating in EXTRACT will offer his company an excellent opportunity to help develop an important software package that will make future projects more cost-effective.

EXTRACT is part of MCC's Advanced Computing Technology (ACT) research effort. The ACT program was ''unbundled'' last August allowing companies to participate in specific projects.

Robert White, program dirctor for ACT, said since the unbundling several companies who had not previously been involved with ACT have joined EXTRACT.

''With EXTRACT, you only have to specify the details of accessing a database system once, then you never do it again,'' said Kay Hammer, the program's project manager.

(FEB. 5) UPI - Soviet President Gorbachev says he's ready to see his ruling Communist Party compete with other parties, giving up its legal and political advantages. Gorbachev presented his plan while opening a crucial meeting of the Central Committee today in Moscow. The Soviet leader also asked that the Congress of the Communist Party be moved up about four months from October, a step that would allow him to elect a new Central Committee and pack it with his supporters.

President Bush is taking a cautious approach on the possible crisis caused

by global climate change. Bush is urging the international community to study the problem more before investing in costly solutions. The president did acknowledge man-made pollution is ''changing the atmosphere in unexpected and unprecedented ways'' while speaking today before a U-N-sponsored study group in Washington.

Visiting African National Congress leaders left Sweden today, vowing to continue the armed struggle to topple South Africa's government. The A-N-C leaders say President Frederik de Klerk's new racial reform package does NOT go far enough toward dismantling apartheid. Senior A-N-C leaders gathered in Stockholm during the weekend to discuss the reforms that include lifting a 30-year ban on their movement and releasing jailed black nationalist leader Nelson Mandela.

Authorities in Kansas City, Missouri, say charges could be filed against a school bus driver after a five-year-old girl was accidentally locked in the bus for more than 30 hours during the weekend. Police say the kindergarten student fell asleep on the bus and the driver locked up the bus at the end of the route Friday without checking it first. Police found Angela Terrell sitting on the front seat early Sunday after her mother filed a missing persons report. She suffered frostbite to her legs, toes and hands.

By JOAN HANAUER

NEW YORK (FEB. 5) UPI - The Bradys are back, relentlessly pert and peppy.

Nothing disturbs their chirpy cheer - Wally's out of a job again, Peter has broken off his engagement, Bobby is paralyzed after a racing car accident - but, hey! let's not get down about this.

There are more Bradys than ever, what with spouses and kids, as ''The Brady Bunch'' returns - not to ABC, its original network, but to

struggling CBS - in a new series called ''The Bradys.'' The shows debuts as a movie Friday, Feb. 9, 8-10 p.m. Eastern time, then goes into its regular time slot on Friday, Feb. 16, 8-9 p.m.

It's syrupy enough to pour on pancakes.

''The Brady Bunch,'' for those who missed the first half of the 1970s for one reason or another, ran from 1969 to 1974, chronicling the extended family created when Carol, a widow with three daughters, married Mike, who had three motherless sons.

They also had a maid called Alice and a shaggy dog named Tiger.

Tiger, alas, is no more - but the rest of the gang's all here.

Florence Henderson and Robert Reed are back as Carol and Mike. She looks beautiful and, in most shots, almost untouched by time. Mike's hair is gray but he's well-preserved. Ann B. Davis is back as Alice.

As for the kids, who now are all grown:

Barry Williams is back as Greg, now an obstetrician and married.

Christopher Knight returns as Peter, who in the first episode breaks up with business-minded Valerie. Carol isn't surprised - she says Valerie never let Peter finish a sentence.

Eve Plumb reprises Jan, who is married to Phillip. They keep plopping into bed in an effort to catch her at the high point of her fertility cycle - which is about as sexy as things get in Brady territory.

Mike Lookinland returns as Bobby, who in the two-hour movie gets injured while racing in the Nashville 500 and returns home paralyzed from the waist down. Not unsurprisingly in Bradyland, there is a good chance the condition is reversible.

Susan Olsen also is back as Cindy, a fledgling disc jockey who has her own show called ''Cindy at Sunrise.''

Leah Ayres replaces Maureen McCormick at Marcia, who is married to Wally. They have two kids and the whole clan comes to live with Mike and Carol when Wally looses yet another job. Even Cliff Huxtable wouldn't welcome them back - but Carol and Mike are pleased as punch.

Don't worry about Wally - when he tries to borrow on his life insurance the company is so impressed they offer him a job as a salesman.

Why bring back ''The Bradys?'' The answer is not to be found in the series

stars but in the Nielsens. When CBS ran a ''Bradys'' Christmas reunion movie on Dec. 18, 1988, it became the top-rated TV movie of the year with an impressive 25.1 rating and a 39 share.

Talk about returns, Roddy McDowall is being reunited with Lassie after 47 years.

McDowall, who starred with Elizabeth Taylor in the original 1942 ''Lassie Come Home'' movie, guest stars on ''The New Lassie'' syndicated series, airing this week (check local listings).

''I play a writer who comes to town and whose life is changed by his experience with the boy and the dog,'' McDowall said in an interview.''

Even after all these years he remembers the original Lassie fondly - this is the seventh generation descendant of the original dog, who was really a laddie named Pal.

''I was around the dog a great deal,'' McDowall said. ''The film took a couple of months and naturally I got to know the dog real well. He was an extraordinary animal and I loved him.''

The film itself was not that memorable to McDowall - he was 13 at the time and a veteran filmmaker, having performed in about 25 films in England and making his American debut in the 1941 Academy Award winning ''How Green Was My Valley.''

''I became established at that particular moment when there were no other prominent child actors so I did 'My Friend Flicka,' 'Lassie Come Home' and a lot of other films for about four or five years.''

McDowall has found fame not only as an actor but as a photographer, something he has been doing professionally for the last 30 years.

''I wanted to find out if I could do something else, actually,'' he said. ''I never made a conscious decision to be an actor. In the process of finding out, I also found out I wanted to remain in acting and happily I've been able to do both.''

He currently is playing host for TNT's International Film Festival and has two film projects.

''One is a film called 'Nemesis,' which is an adventure somewhat in the horror genre,'' he said, ''and the other is called 'Dive,' a comedy.''

WARSAW, POLAND (FEB. 5) UPI - The Polish Roman Catholic Church Monday took its first practical step toward resolving a dispute with Jewish groups over the presence of Carmelite nuns at Auschwitz, the former Nazi death camp.

Cardinal Franciszek Macharski of Krakow announced establishment of a foundation to collect funds for an international prayer center at a site near the former death camp but less objectionable to Jewish groups than the nuns' current headquarters.

The goal of the foundation is to collect money and other material goods to build the center, the official news agency PAP said. A program council will be appointed to work out an agenda of activities for the foundation.

The center was promised by Macharski in an agreement with Jewish groups in Geneva in 1987, under which the nuns were to be moved by February 1989. Jewish organizations consider Auschwitz a special place of remembrance and object to prayers being said there by other religious groups.

The 14 nuns are living in a church used by the Nazis during the war to store Cyclon-B gas used to kill victims before their bodies were burned in the crematoriums. The church sits adjacent to the Auschwitz wall.

Last spring, a radical Jewish teacher from New York and six of his students scaled the convent wall in a protest over the Polish church's failure to keep its agreement to move the nuns. They were chased away, but Polish workers and the head of the Polish church, Cardinal Jozef Glemp, criticized the incident and insisted the nuns had a right to stay.

Glemp's comments inflamed American Jewish groups amd forced Glemp to cancel a planned visit to the United States. The Vatican eventually stepped in, offering financial aid to build the international prayer center, and Glemp declared that the nuns would be moved after all.

#90036u2093 02/05/1990 ~United Press International
WASHINGTON (FEB. 5) UPI - Secretary of State James Baker, in a trip that comes at a critical time in Soviet internal politics, headed to Moscow via Prague Monday for talks on arms control, Afghanistan, and the future of the East-West relationship.

Baker's schedule remained a partial mystery - a gap on Feb. 10-11 that may be left open for a ministerial conference somewhere in Europe between him and the foreign ministers of Egypt and Israel.

As he headed east, the remaining differences between Israel and the Palestinians - represented in the early negotations by Egypt - had not been narrowed sufficiently for him to convene the conference on the Middle East.

Baker's first stop was Shannon, Ireland, where he arranged to meet with French Foreign Roland Dumas on the issue of German reunification.

Baker held a 2 1/2-hour session Friday with West German Foreign Minister Hans-Dietrich Genscher in which they agreed that Germany, however it emerges, should remain in the NATO alliance, but there was no intention ''to extend the NATO area ''towards the East.

That appeared to be aimed at easing anxiety in the Soviet Union and Eastern Europe about a unified Germany becoming a resurgent power that could complicate the already complex and emotional business of the unravelling of the Warsaw Pact and the Soviet bloc.

Baker goes to Prague, Czechoslovokia, where he will meet Assembly President Vaclav Havlek late Tuesday and address students at Charles University Wednesday. U.S. officials have held open the possibility that Baker will announce a new U.S. financial aid program for the Czechoslovok government.

Late Wednesday, Baker is scheduled to arrive in Moscow, where Soviet President Mikhail Gorbachev announced Monday the Communist Party is ready to give up its constitutional monopoly of power and eventually allow for the creation of opposition political parties.

How the infusion of what Gorbachev described as ''the democratic process'' into the Soviet hierarchy will affect the superpower relationship, particularly the increased pace of negotiations on arms control, is one of the things that Baker will explore. He delayed his trip by two days to take into account the momentous changes in the Kremlin.

Baker said last week that he thought the United States and the Soviet Union could be ready to sign new agreements cutting conventional forces in

Eastern and Western Europe, as well as a 50 percent cut in strategic arms.

Baker and Soviet Foreign Minister Eduard Shevardnadze are also expected to talk about Afghanistan. Baker signaled last week, in testimony before Congress, that the United States would be willing to accept a coalition government in Afghanistan that includes the Soviet-installed President Najibullah, as long as it brings peace to the country.

Baker will help make history in Moscow, with a scheduled appearance on Saturday before the committee on International Relations of the Supreme Soviet, the equivalent of the U.S. Senate Foreign Relations Committee.

He will become the first American official to testify before the Supreme Soviet, although Soviet officials have testified before American congressional committees in the past.

Next week, Baker is to represent the United States at the unprecedented session between Warsaw Pact and NATO countries in Ottawa, discussing an American ''Open Skies'' proposal that would permit military surveillance flights over each others' territory.

The Soviets have responded favorably to the idea, but some of the U.S. NATO partners, notably Turkey, have raised objections about the idea of having Soviet aircraft photographing their most secret military installations.

#90036u2124 02/05/1990 ~United Press International
LOD, ISRAEL (FEB. 5) UPI - Three frantic Israelis, awaiting word on relatives caught in an attack on a tourist bus in Egypt, could stand it no more.

Upset, they rushed onto the tarmac at Ben-Gurion Airport toward a Hercules military transport moments after it landed Monday and began unloading the survivors.

''Mother, mother,'' one young hysterical woman screamed before police blocked her path. Two men raced past her, skirting other police and soldiers before they also were stopped short of the plane, but not before

one knocked down a soldier and forced nearly a dozen security guards to wrestle him to the ground.

Dozens of Israelis waited anxiously in the airport's glass-enclosed domestic terminal within sight of the transport. They were able to see the Hercules C-130, but not their family. Many did not know how badly their relatives were wounded or whether they were alive.

The frustration erupted into shouting and a fistfight broke out when security forces stopped them from going to the plane. In the melee, a glass window was smashed shortly before the incident on the tarmac.

Nine Israelis were killed and 16 Israelis and one Egyptian were wounded in the gun and grenade assault on an Egyptian tour bus transporting Israeli vacationers Sunday, 37 miles east of Cairo.

Israel sent the military transport to bring home the dead and wounded. The Hercules C-130 brought back the body of one of the victims and the wounded at midmorning. A second transport returned later in the day with the bodies of eight victims.

When the morning transport touched down, ambulances drove up quickly to the transport's tail end and medics loaded the wounded on stretchers. At least one simple wooden coffin was placed in a military vehicle.

Noam Lahav, one of the survivors who returned on the plane, told Army Radio how he attacked the assailants before he was shot.

''I saw the terrorist standing several meters from me with another man by him,'' said Lahav, who was hospitalized in fair condition at Hadassah Hospital in Jerusalem. ''One shot and the other was unarmed. ... I attacked them and hit the fat one in the face and was able to hit the armed one.

''He partially got away from me, then shot at me and I fell,'' Lahav said. ''When I was laying on my face I heard him shooting into the bus many rounds. There were also explosions and screams of both the injured and all sorts of people who stood on the side.''

Deputy Foreign Minister Binyamin Netanyahu and Health Minister Ya'acov Tsur led the government's delegation meeting the transport plane.

''To see middle-age women with shattered bodies, old men with riddled faces, people who just boarded a bus and encountered this barbarism, I think brings home to all of us what a tragedy we are witnessing,'' Netanyahu told reporters.

''It is a sad moment for Israel. I think it is a sad moment for all decent

people anywhere.''

Limor Burkai, whose mother Orna was among the wounded, was upset that the Foreign Ministry had not informed her of her mother's condition.

''Finally, at about 8 a.m. this morning, we called and insisted that they tell us something. We want an official notice whether she is alive or dead or what,'' Burkai said. ''And finally they said, Yes she is alive. ... If you come to the airport you can see.''

Frustated by the lack of information almost an hour after the plane's arrival, Burkai said, ''They put us here behind these lovely windows where we can't see anything and they won't tell us nothing until just now.''

Dorit Mayovitch anxiously waited for news of her uncle and aunt, Shmuel and Hanna Horovitz who decided last week to travel to Egypt. Visibly shaking and tearful, Mayovitch said officials had given her clues her uncle was dead.

Asked how the attack colored her views on efforts for peace in the Middle East, Mayovitch said, ''I don't know what to say. I am very leftist in my political opinions but now I don't know what to say.''

#90036u2161 02/05/1990 ~United Press International

BUCHAREST, ROMANIA (FEB. 5) UPI - At Victor Babes Hospital, rows of cribs hold small, shriveled babies slowly dying of AIDS.

Manea Gabriel, 11 months old, could scarcely breathe. Her frightened eyes scanned the room as she failed to find the strength to raise a tiny hand.

The cries of Mihai Van, 7 months old, were reduced to a mere rattle by the deadly disease.

The ward was filled with 68 other babies who had been born to die.

Dr. Jacques LeBas, president of Medicins du Monde, an international organization that provides humanitarian aid to needy countries, said Monday that AIDS-infected children constitute the most serious health problem facing Romania today.

Investigations during the past few days have revealed a startlingly high proportion of babies with AIDS, LeBas said. Of 1,025 babies tested 367 were carrying the disease, and 60 percent of those had symptoms of fully developed AIDS.

Urgent help is needed from the European Community, ''otherwise more babies will die in this most awful way,'' he said.

''We need everything - medical equipment, specialists, money and information,'' LeBas said. ''This morning I saw a pediatrician using the same syringe several times. When I asked why, she replied that it was the only one she had.''

AIDS is commonly transmitted by contaminated needles.

LeBas blamed the policies of Romania's former dictatorship of Nicolae Ceausescu for causing the highest infant death rate in Europe, 83 deaths for every 1,000 births.

Ceausescu wanted to increase the country's population from 23 million to

30 million by the year 2000. He outlawed sex education, birth control and abortion.

His economic policies, which kept the country impoverished, contributed to the problem in infant deaths.

Poor nutrition and lack of adequate prenatal care endangered the health of many pregnant women and their fetuses. When the children were born, often at low weights, they became part of a system where medical attention and food were inadequate.

Ceausescu also denied that AIDS had crossed Romania's borders and claimed the country had no prostitutes, who are prolific transmitters of the disease. Condoms, which are effective in preventing transmission of AIDS, were not available.

Health Minister Dan Enachescu said in an interview that a group of ministry experts would immediately address the problems caused by the former regime.

Dr. Ludvic Paun, professor at the Victor Babes Hospital's infections and tropical diseases clinic, said the media must be used to educate people about AIDS.

Unlike most other countries, the disease is more common in rural areas than in cities.

''This is a country of 23 million people, and most have a television,'' Enachescu said. ''The only way people in remote villages can learn about AIDS is by watching their TVs.''

#90036u2195 02/05/1990 ~United Press International

VANCOUVER, British Columbia (FEB. 5) UPI - Cominco Ltd. Monday reported fourth quarter earnings of $33.2 million, or 41 cents a share, down 65 percent from $95.2 million, or $1.18 a share, in the same quarter of 1988.

Revenue in the quarter dropped to $336.6 million from $429.6 million in the 1988 fourth quarter.

For the year, Cominco reported earnings of $182.4 million, or $2.24 a share, compared with $205.7 million, or $2.48 a share, in 1988. Revenues for 1989 were $1.35 billion down from $1.41 billion in 1988.

Cominco said its fourth quarter results suffered from reduced earnings at the Highland Valley Copper mine, a weakening zinc price and lower production at the Sullivan mine. Both mines are located in British Columbia.

The company said full production at its Red Dog mine, producing lead, zinc and silver, in Alaska is expected in the latter half of the first quarter of 1990.

On Jan. 31, Cominco began the shutdown of its Sullivan zinc mine in Kimberley, B.C. which will cut 700 jobs. The company cited increasing losses from declining metal prices, high production costs and low productivity.

Cominco is a mining, metallurgical and chemical company with operations in Canada and interests in the United States, Japan, Australia, India and Spain.

JERUSALEM (FEB. 5) UPI - A Palestinian man and his pregnant wife were axed to death Monday by seven masked men, but doctors managed to save the unborn child, Palestinian and police sources said.

The couple, who were accused by other Palestinians of collaborating with Israeli authorities and drug dealing, were among four Palestinians who died in the occupied territories.

The seven masked men, dressed in khaki uniforms, axed to death Jamil Razak Mahmoud Rabiye and his 35-year-old wife, Intisar, who was seven months pregnant, in their Gaza Strip home, a police spokesman said. The spokesman said Rabiye was ''a well-known drug offender.''

Intisar Rabiye was attacked first and, when her husband ran into their house, ''the masked men shouted to him from outside the house, 'You have not reformed, and your sentence is death,''' the police spokesman said. They burst into the house and killed him.

Doctors were able to successfully deliver the premature baby, the spokesman said.

Since the start of the 25-month-old Palestinian uprising, about 175 Arabs have been killed by other Arabs who accused them of collaboration or immoral behavior, including drug use and adultery. More than 630 Palestinians have been killed by Israeli soldiers or civilians.

Also Monday, the body of Rafik Mohammed Shawahni, 35, was found two days after masked men took him from his West Bank home, Palestinian sources said. The sources said Shawahni, accused of collaborating with Israeli authorities, had been repeatedly stabbed.

A 15-year-old West Bank Palestinian also died Monday when he fell through a shaft in an unfinished building during a chase by soldiers, Palestinian sources said. The soldiers were chasing Ayman Mahmoud Jibran after a stone-throwing incident in the town of El Bireh, the sources said.

In the Gaza Strip, a Palestinian journalist also reported that Israeli soldiers beat him while he was filming the Israeli forces beating an Arab child. Taher Shriteh, who works for several international news organizations including the CBS network, said soldiers used their hands and rifle-butts and hit him in the chest, face and abdomen for about six minutes.

''I shouted when they beat me, 'I'm a journalist.' Then I showed them my press card,'' Shriteh said. ''The officer saw it and told them to continue beating.''

An army spokesman said the military was investigating Monday's reported beatings.

Israeli soldiers also shot and wounded at least three Palestinians during clashes in the Gaza Strip, the sources said.

#90036u2285 02/05/1990 ~United Press International
WASHINGTON (FEB. 5) UPI - The Treasury Department said Monday it will no longer offer $50 and $75 Series EE savings bonds, darlings of the ''little guy,'' through its popular payroll savings plan starting Oct. 1.

The new minimum denomination available to savers enrolled in the plan will be $100 bonds, which sell for $50. But the $50 and $75 bonds, which cost $25 and $37.50, will still be available at bank windows.

''This step is one of several initiatives that will assure the long-term strength of the savings bond program by reducing the administrative costs '' said Richard Gregg, commissioner of the public debt.

Patriotism aside, the decision is bound to anger some of the 6 1/2 million Americans participating in the plan, which allows people to buy bonds through installments from their paychecks.

''I don't think that's a good idea myself,'' said Phil Charles, a photographer from Arlington, Va., who buys a $50 bond through the plan every other week. ''The savings bond program is supposed to be for the little guy ... but they're pushing them out.''

But Peter Hollenbach, a spokesman for the Treasury Department, said the money small savers set aside to accumulate the $50 and $75 bonds will be automatically applied to the purchase of $100 bonds.

''If you're talking about getting a $50 bond every week, you'll be getting it every two weeks,'' Hollenbach said. ''If you're taking it every month, you'll get it every other month instead.''

In February 1988, he noted, the government stopped taking new applications for the small denomination bonds through the payroll savings plan without hurting sales, which have been on the increase.

U.S. Savings Bonds, which offer a rate based on the yield on 5-year Treasury notes, are guaranteed to earn interest for 30 years, paying the face value in at least 12 years. The current 6-month rate is 6.98 percent.

#90036u2296 02/05/1990 ~United Press International
NEW YORK (FEB. 5) UPI - Stocks closed higher Monday in light trading, led by the blue chips which got a late boost from some bargain hunting and computerized program buying.

The Dow Jones industrial average, which rose 16.44 Friday, gained 19.82 to close at 2622.52.

Among broader market gauges, the New York Stock Exchange composite index added 0.60 to 183.35 and Standard & Poor's 500-stock index rose 0.93 to 331.85. The price of an average share gained 11 cents.

Advances led declines 833-647 among the 1,968 issues crossing the NYSE tape. Big Board volume was 130,950,000 shares, compared with 164,417,820

shares traded Friday.

The market drifted at slightly higher levels much of the day, with many investors choosing to sit out the session before the Treasury's quarterly refunding this week. But the blue chips gained 15 points in the last hour, boosted by bargain hunting and computerized program buying, used to profit on price spreads between stocks and stock-index futures.

''The blue chips led the way, helped by programs,'' said Michael Metz, market analyst at Oppenheimer and Co. ''But it was a low-volume, low-conviction day. Everyone's waiting for some signal from the external world, like the refunding, that it's time to get more aggressive.''

The Treasury's quarterly refunding, held to raise part of the cash the Treasury estimates it will need in the current quarter, will be held this week. Ten billion dollars in 3-year notes are to be sold Tuesday, $10 billion in 10-year notes Wednesday and the most important leg, the sale of $10 billion in 30-year bonds, is scheduled for Thursday.

Financial markets will be watching the bond auction to see the level of Japanese participation. Japanese investors usually take about 40 percent of the new issues, but the recent surge in interest rates in Japan has prompted fears that investors there will not find U.S. issues, which normally carry a much higher yield, as attractive as they have in the past.

Treasury notes and bonds were down as much as 1/4 point Monday, pressured by such fears. Weak demand in the auction would force long-term interest rates higher.

''I think people are overestimating the need for Japanese (participation in the refunding),'' said Metz. ''If they take 20 percent, people will be surprised how well it will be absorbed,'' he contended.

''There's an enormous amount of money out there looking for something to do, and given the proper inspiration, it will do something. People are looking for a signal to buy,'' he said.

On the trading floor, Amax was the most active NYSE issue, up 3/4 to 23 3/4.

Genentech followed, down 1 3/4 to 28 1/8 after surging Friday on its agreement to sell a controlling stake to Roche Holding Ltd. Pan Am was third, up 3/4 to 3 3/4 amid speculation that the airline may merge with NWA, which owns Northwest Airlines and was taken private last year.

Among the other blue chips, IBM surged 2 1/2 to 99 5/8 as it traded ex-dividend, AT&T was up 5/8 to 40, Westinghouse rose 1 3/8 to 72 7/8, Minnesota Mining gained 1 5/8 to 79 3/4 and Goodyear jumped 1 3/8 to 37

7/8.

Other drug stocks built on Friday's gains sparked by the Genentech deal. Upjohn rose 1 to 36 7/8, Pfizer gained 1/2 to 69 1/4 and American Cyanamid jumped 1 3/8 to 49 3/8.

Technology issues showed gains, led by IBM. Digital Equipment rose 1 1/4 to 77 5/8, Compaq Computer gained 1 to 79 and Motorola added 1 1/8 to 56 7/8.

Takeover-related buying boosted hotel and casino as well as airline issues. Holiday surged 3 1/4 to 63 1/2 after saying it has received verbal assurances for up to $1.07 billion in financing for its subsidiary, Promus Cos., which it will spin off before Bass PLC completes its purchase of the Holiday Inn motel chain. Hilton Hotels jumped 2 1/4 to 63 1/4 and Golden Nugget climbed 1 3/4 to 24 1/4. UAL surged 5 1/4 to 135 3/4 amid continued speculation about a new buyout bid from United Airlines' employees.

On the earnings front, General Re advanced 3 1/8 to 84 5/8 after reporting profits at the high end of analysts' forecasts and other insurers followed such as American International Group; up 2 5/8 to 99 3/4 and Chubb; up 2 1/2 to 94 1/4.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 174,115,440 shares, compared with 195,076,260 shares traded in the previous session.

Prices rose in moderately active trading on the American Stock Exchange.

The Amex Market Value index added 1.14 to close at 354.70. Advances led declines 313-271 among the 816 issues traded. The price of an average share climbed 4 cents. Composite volume totaled 15,356,000 shares, compared with 15,425,105 shares traded Friday.

Hillhaven led the Amex issues, down 1/4 at 1 1/2.

The National Association of Securities Dealers composite index rose 2.52 to 424.73.

#90036u2316 02/05/1990 ~United Press International

(FEB. 5) UPI - It appears there's light at the end of the tunnel for pro-democratic Soviets. The official Tass news agency says President Gorbachev today told Communist Party leaders in Moscow that the party's political monopoly could be eliminated to allow competition- quote- ''within the framework of the democratic process.''

The Press Trust of India reports four-thousand Moslem Pakistanis came spilling over the border into India today... prompting Indian police to shoot and wound 10 people. The Pakistanis are protesting in sympathy with fellow Moslems in India's mostly Moslem Kashmir state. Separatists want to merge with Pakistan.

Despite objections within his administration, President Bush today took the conservative route toward the potential crisis of global climate change. Speaking before the Intergovernmental Panel on Climate Change, Bush said nations should wait for more scientific data before devising costly solutions.

President Bush telephoned Israeli Prime Minister Yitzhak Shamir today to express his condolences over yesterday's attack on Israeli tourists in Egypt. Nine people died. Spokesman Marlin Fitzwater says Bush called the attack ''horrendous'' and said it was an attempt to halt the peace process.

The deadline is nearing for Ronald Reagan to turn over excerpts from his presidential diaries to defense lawyers for former national security adviser John Poindexter. The Justice Department is trying to convince a Washington federal judge to delay the deadline in hopes Poindexter will agree NOT to demand the excerpts.

#90036u2340 02/05/1990 ~United Press International

CAIRO, EGYPT (FEB. 5) UPI - Two groups claimed responsibility for an attack on a bus near Cairo that killed nine Israeli tourists and wounded 17 other people, and Egypt said Monday it hoped the attack would not hinder the ongoing Middle East peace process.

The Islamic Jihad, in a written statement sent to an international news agency in Amman, Jordan, made the latest claim to the brutal attack, which occurred Sunday on a highway 37 miles east of Cairo.

''Our struggle with the Jews will continue until victory and with the help of God to smash all those who dream about a peaceful solution'' in the Middle East, said the statement by the Islamic Jihad, which said an offshoot of its organization carried out the attack.

In 1989, the Islamic Jihad issued three communiques in Amman claiming responsibility for attacks against Israeli targets in the Israeli-occupied territories, including a July attack on an Israeli bus.

Sunday, a previously unknown group calling itself the Group for Oppressed Prisoners claimed responsibility for the attack.

In Cairo, an Interior Ministry spokesman said police had arrested a

Palestinian man from Rafah, the Israeli-Egyptian border town from where the Egyptian tour bus set off Sunday on its ill-fated journey, in connection with the attack. The spokesman gave no further details.

He said three men detained earlier on suspicion of holding forged Saudi Arabian passports were later released after the Saudi Embassy in Cairo confirmed that their documents were genuine.

Egyptian Foreign Minister Esmat Abdel-Meguid condemned the ''criminal act '' but advised Israel not to allow the incident to obstruct the peace process.

The incident, however, apparently led to the postponement of a meeting that had been tentatively scheduled for next week in Geneva between the foreign ministers of the United States, Egypt and Israel to promote an Israeli-Palestinian dialogue, Egyptian and Israeli sources said.

Egyptian President Hosni Mubarak said he hoped the attack would not hinder the peace process, ''but should rather be an incentive for both sides to continue their endeavors to reach a comprehensive peace.''

In Jerusalem, reports indicated that Israel would probably move to put the proposed Geneva meeting on ice for the time-being.

Israeli Deputy Foreign Minister Binyamin Netanyahu said that any discussion of the long-awaited meeting of U.S., Israeli and Egyptian foreign ministers would be premature. Netanyahu also denied that a meeting had been scheduled for next week in Geneva.

In the wake of the assault, a vote of confidence scheduled for Wednesday on Israeli Prime Minister Yitzhak Shamir was postponed by Israel's right-wing Likud party.

Shamir, speaking in Jerusalem, declined to say if the incident would hinder Mideast peace initiatives, saying the attack was intended to ''kill a large number of Jews.''

In Washington, a White House spokesman said President Bush telephoned Shamir Monday to offer his condolences over the ''horrendous attack.''

''This horrible act of terrorism should be condemned by civilized people everywhere,'' said press secretary Marlin Fitzwater.

The PLO also denounced the attack on grounds that the organization opposes all forms of terrorism, said Sayid Kamel, the PLO's accredited ambassador to Egypt.

A wounded Israeli died overnight in a Cairo hospital, bringing the Israeli

death toll in the attack to nine, said Isaac Barmoshe, a spokesman for the Israeli Embassy in Cairo. Sixteen other Israelis and one Egyptian were wounded.

Egypt declared a ''national security alert to catch the killers,'' said a police spokesman in Cairo.

An Interior Ministry spokesman said police ''found the car used by the gunmen, abandoned north of Cairo. We found used cartridge shells of the same caliber as the bullets used in the attack.''

State-run Cairo Radio quoted Egypt's ambassador in Israel as denying Egyptians were behind the attack. Egyptian police sources said the gunmen spoke with a non-Egyptian accent.

The masked gunmen sprayed the vehicle with bullets. Police said one gunman then boarded the vehicle and lobbed hand grenades inside. The bus was carrying 31 Israeli tourists, a Swede and an Egyptian security guard, Cairo Radio reported.

#90036u2351 02/05/1990 ~United Press International
(FEB. 5) - The oil market plunged Monday, reacting with alarm to the apparent ready availability of crude and forecasts of warmer weather.

Dealers were wondering whether prices were moving into a long-awaited downturn, or if the market plunge only reflected a temporary correction.

Home heating oil for March delivery plummeted 2.31 cents on the New York Mercantile Exchange to finish the day at 55.95 cents a gallon, while unleaded gasoline dropped 1.82 cents to 62.40 cents a gallon.

There were similar declines on the New York Harbor cash market.

On the European cash market, Britain's widely-traded North Sea Brent crude plunged $1.10 to $19.75 a barrel.

The benchmark West Texas Intermediate crude nosedived 63 cents to $22.39 a barrel on the Merc. WTI lost 60 cents on the U.S. Gulf Coast cash market, where it was bid at $22.40 a barrel.

''There's too much OPEC crude around to sustain these higher prices,'' said Robert Baker, senior energy analyst with Prudential-Bache Securities Inc. in New York.

''The market did what it should have done for the last week. I'm not surprised to see it come off,'' said Michael McDermott, vice president of Paine Webber Inc. in New York.

''The major question now is - is this a correction, or a topping out and a major change in trend and direction? I think it's still only a correction. There are too many uncertainties about the availability of crude, '' the analyst said.

''I don't know why it didn't happen earlier. Everything was set for a decline,'' said John Lichtblau, president of the Petroleum Industry Research Foundation.

The falling product prices didn't provide a sufficient margin for refiners to make money on crude priced at $23 a barrel. ''You couldn't refine products and make money. It's still true at $22.39 a barrel,'' Lichtblau said.

The 55.95 cents-a-gallon price of heating oil translates into $23.50 a barrel, leaving a refiner only a little over a $1 a barrel for both costs and profit.

Lichtblau noted that warmer weather is forecast until Feb. 15, which means lower demand and prices for heating oil.

McDermott said that although total gasoline stocks are still below last year as a result of December-freeze damage to U.S. Gulf Coast refineries, stocks of unleaded gasoline, which now accounts for 90 percent of U.S. useage, are about 13 million barrels larger than this time last year.

''So, the gasoline supply situation is really not as tight as it has looked,'' McDermott said.

Baker said the Monday market also could be seen as a correction to ''an overly emotional'' reaction Friday to unconfirmed reports of curtailed gasoline exports from Venezuela because of refinery problems. Unleaded gasoline rose 1.52 cents a gallon on the Merc Friday.

Late Friday after the Merc closing, a spokesman for the state-owned Petroleos de Venezuela said exports were running at normal levels and no difficulties were anticipated in meeting international demand.

The spokesman said a small fire had broken out Wednesday in one of the plants at the Cardon refinery, but was brought under control in a matter of hours. No injuries were reported.

On the European spot market, the United Arab Emirates' Dubai light - the key OPEC crude from the Middle East exported mainly to the Far East - dropped 30 cents to $16.95 a barrel.

#90036u2366 02/05/1990 ~United Press International

NEW YORK (FEB. 5) UPI - The dollar declined against the West German mark and other main international currencies in foreign exchange trading Monday after Soviet President Mikhail Gorbachev told his fellow Communist Party leaders to face the prospect of a multiparty political system.

Coming after rumors last week that Gorbachev would resign as Communist Party secretary general during the critical party plenum just opened, his speech comforted financial markets anxious about his political longevity and the pace of market economy reforms in Eastern Europe.

The speech ''signaled to the market that he was still on top and in control,'' said Earl Johnson, currency analyst and vice president for foreign exchange with the Harris Trust & Savings Bank in Chicago. That refueled the mark's rise on hopes of expanded investment in Eastern Europe.

''After (Gorbachev's) statement came out people sold dollars against marks

and that threw the dollar down - but the mark was the key point,'' said trader Anthony Isola of Creditanstalt Bankverein.

Late in the New York trading session the dollar was quoted at 1.6593 German marks, well off from 1.6825 Friday. Against the Japanese currency the dollar was trading at 144.65 yen, also off from 145.50 yen.

Gorbachev's speech increased pressure on the yen versus the mark in trades of those two currencies. Politics aside, investors can get a higher interest rate on bonds priced in marks than they can on yen-priced bonds.

''People are finding no reason to buy yen,'' Isola said. But the dollar, often an intermediary currency, suffers with the yen.

Potential trouble for the dollar is seen in the Treasury refunding this week, in which $30 billion in bonds and notes will be auctioned. There is concern that Japanese investors may not be such good customers as in the past, which could send bond prices - and the dollar - even lower.

''This is terrible,'' said Robert Brusca, chief economist for Nikko Securities Inc. in New York. ''The dollar is sinking. That's no attraction for capital gains - that's an attraction for capital losses.''

He said he was ''wary'' about the auction's prospects, citing reports that some major Japanese institutions, leery of investing in bonds denominated in a falling currency, might shift funds into European bonds.

In New York the British pound rose to $1.70 from $1.6835.

Other dollar rates: 1.4725 Swiss marks, off from 1.4895; 5.6395 French francs, off from 5.7135; and 1,231.75 Italian lire, off from 1,250.25.

In Europe the dollar closed lower. It finished in Frankfurt at 1.6755 German marks, off Friday's close of 1.6870, and also fell in Zurich to 1.4840 Swiss francs against 1.4995.

In Paris the dollar closed at 5.6970 French francs, down from 5.7130. In Brussels it was at 35.015 Belgian francs, off from 35.24, and in Milan it was quoted at 1,246.25 Italian lire against 1,249.80.

In London the pound closed higher at $1.6955 against $1.6815.

Republic National Bank in New York closed cash gold at $422.25 an ounce, up from $418.25. The New York Commodity Exchange settled gold at $422.40 an ounce, up from $418.20. In Zurich gold rose to $423.50 an ounce, up more than $5 from $418 Friday. In London gold moved up to $423.25 an ounce compared with $417.75 late last week.

Republic closed cash silver at $5.34 an ounce, up from $5.325. Comex spot silver rose to $5.329 an ounce from $5.307. Zurich silver rose to $5.40 an ounce from $5.30, while London silver rose to $5.37 from $5.29.

#90036u2453 02/05/1990 ~United Press International

DETROIT (FEB. 6) UPI - A spokesman for General Motors of Canada disputed a report Monday that the carmaker intends to close its Scarborough, Ontario, assembly plant by 1994 or 1995 as it consolidates van production in the United States.

Ward's Automotive Reports, in its latest weekly issue, quoted a ranking GM executive in the United States as saying it was likely the Scarborough plant would be ''phased out of the GM plant assembly lineup in the 1994-95 timeframe.''

However, GM Canada spokesman Barry Koontz said Monday GM is still considering a new product to replace the full-sized Chevrolet and GMC vans to be moved from the plant in the summer of next year.

''We are still struggling to see if we can place a product into that plant '' Koontz said, adding that company managers, plant workers and the Canadian Auto Workers union are to meet Tuesday to discuss future product plans.

Koontz said a study to give the Scarborough plant and its 2,500 workers a new product beyond next year is still in process - although Ward's said it is virtually certain the facility will be closed permanently.

Production is to be shifted to GM's Flint, Mich., plant in 1991 for the 1992-model year as announced by the giant carmaker last fall. Van output at GM's Lordstown, Ohio, plant will also be transferred to Flint at that time, idling another 2,500 workers at the Ohio facility indefinitely.

Dee Allen, a spokesman with GM's Chevrolet-Pontiac-Canada Group, acknowledged GM would have to decide soon on a new product if it is to keep Scarborough operating.

''There is still time left,'' agreed Koontz, although he too said it ''is getting close to a time when we will have to make a decision.''

The 1.1 million square-foot Scarborough plant, built in 1952 to make parts for GM's Frigidaire division, began building vans in 1974.

Workers at the plant were idled during two weeks in January to reduce stockpiles of unsold vans. They are scheduled to be idled agin the week of April 2 to trim inventories, Koontz said.

#90036u2496 02/05/1990 ~United Press International

MORGANTOWN, WV (FEB. 5) UPI - Major Harris, the star quarterback at West Virginia, will leave college to enter the NFL draft, United Press International learned Monday.

The two players, both asking to remain anonymous, said Harris told them he plans to sign with a Los Angeles sports agent next week and make himself eligible for Aprils's NFL draft.

Mike Jacobs, WVU's offensive coordinator, confirmed Monday he is preparing the offense for a new quarterback.

''I think Coach (Don) Nehlen's indicated that (the team is preparing without Harris),'' Jacobs said. ''I'm not going to say anything differently. I think Don indicated that last week.''

Harris, who finished third in balloting for the Heisman Trophy, missed a scheduled meeting with Nehlen last week, but Sports Information Director Shelly Poe said Harris remains in classes.

Harris, a red-shirt junior, is eligible for the NFL draft if he so chooses but could play in college another year. He has not signed up for off-season conditioning.

The players' revelations follow reports last week that Harris would make the announcment this week.

Poe said Harris has not contacted the college regarding his plans. She has been hoping the quarterback would make his decision public this week, but now said she isn't sure.

Jacobs said that ''unbeknownst to Major Harris'' and some WVU fans, the offense is considered ''wide open'' in college ranks and hasn't changed much from the times of Oliver Luck and Jeff Hostetler, two quarterbacks who played in the NFL after playing for Nehlen.

He said the coaches will ''investigate'' other opportunities, but the

basic offense will remain the same.

The coaches are working under the assumption that backup quarterback Greg Jones, a senior transfer from Miami, will take over.

''If Greg Jones ends up being our quarterback, we'll certainly be able to adjust to some of the things he's strongest with,'' the coach said.

Jones, known as a drop-back pocket passer, played fleeting roles in five WVU games this year and completed 9 of 21 passes for 153 yards.

With Jones, Jacobs does not expect to run the quarterback as frequently, though the number of passes a game won't increase dramatically. Harris led the team in rushing last season with 936 yards.

Harris complained during the season he was not allowed to throw enough.

''I don't anticipate West Virginia going to throw the football 40-50 times a game,'' Jacobs said.

The coach said he's ''excited'' about the prospect of changing quarterbacks.

''In the coaching profession where you have graduation, that's where you have excitement in new faces,'' he said.

#90036u2509 02/05/1990 ~United Press International

NEW YORK (FEB. 5) UPI - Drexel Burnham Lambert Inc. reported an estimated 1989 loss of $40 million Monday, citing expenses related to an insider trading investigation at the firm and costs of discontinued operations.

A spokesman also refused to comment on reports that federal prosecutors have offered a plea bargain deal to former Drexel junk bond head Michael Milken, in another development in the criminal case that has plagued the Wall Street investment house.

Milken has pleaded innocent to racketeering, fraud and other charges in a 98-count federal indictment accusing him of insider trading.

The Wall Street Journal, citing sources, reported Monday that Milken, who was indicted last March, has been offered an opportunity to plead guilty to six felony counts to avoid a new and expanded indictment.

The Journal said each of the felony counts carries a possible prison sentence of five years, and that prosecutors said they would reccommed the sentences be served concurrently.

Prosecutors made the offer to Milken last week after almost two weeks of discussions with his attorneys, the Journal said.

Drexel, a privately held company not required to disclose earnings, on Sunday reported a 1989 operating profit, based on preliminary unaudited figures, of $67 million.

Overall, Drexel said it lost roughly $40 million after taxes on revenues of $4.1 billion in 1989.

Drexel lost roughly $160 million in 1988, when it agreed to plead guilty to six violations of federal securities law and pay $650 million in penalties.

Drexel had been a major player in the junk bond market, which took a turn for the worse after the collapse of a proposed employee-management buyout of UAL Inc. last fall.

#90036u2524 02/05/1990 ~United Press International

MOSCOW (FEB. 5) UPI - Mikhail Gorbachev said Monday the Communist Party is ready to give up its constitutional monopoly of power and eventually allow for the creation of opposition political parties.

Gorbachev, opening a momentous meeting of the Communist Party leadership, presented his plan to make the party more democratic to about 300 full and partial, or ''candidate,'' members of the Central Committee.

The statement represented the first admission that the Soviet Union would at some stage become a multiparty state for the first time since Vladimir Lenin banned all parties except his Communist Party more than 70 years ago.

The official Soviet news agency Tass quoted Gorbachev as saying that unlike the past when the Communist Party's monopoly was mandated by the Soviet constitution's Article 6, the party ''intends to struggle for the status of the ruling party.''

''But it will do that strictly within the framework of the democratic process, giving up any legal or political advantages, offering its program and defending it in discussions and cooperating with other social and political forces,'' Gorbachev said. ''This process can result at some stages in polticial parties.''

But he warned that if the party does not renew itself, it could die in the new politics of powerful nationalist fronts and emerging political groupings.

''The party will be able to fulfill its mission of being the political vanguard if it drastically restructures itself, masters the art of political work in present-day conditions and succeeds in cooperating with all the forces committed to perestroika,'' the Soviet leader said.

''Any delay threatens a lag and the loss of the initative which would, in turn, inevitably affect the party itself and the future of its revolutionary undertakings,'' he said.

''The main thing that now worries communists and all citizens of the country is the fate of perestroika, the fate of the country and the role of the Soviet Communist Party at the current and probably most crucial stage of revolutionary transformation,'' he said.

Indicating he is being hard pressed to make the political reform produce results in the economy, Gorbachev asked that another Central Committee plenum be held in three weeks to draft the democratic charter for the party, which appears fated to have to share powerlike its sister part ies in Eastern Europe.

''We had hoped to surmount the peak of the crisis 1989, but recent events have shown that there has been no change for the better,'' he said.

The Soviet leader also asked that the Congress of the Communist Party held earlier than scheduled, in June or July rather than October, a step that would allow him to elect a new Central Committee and pack it with his supporters of reform. He also proposed that the size of the committee be cut to a more manageable size of about 200 members.

Gorbachev has used previous Central Committee meetings, which are held every four to six months, to rid the ruling Politburo and the Central Committee of hard-line opponents to reform, but he has not been able to fill the vacated Central Committee spots with reformers because only a full Communist Party Congress can elect an entirely new Central Committee or fill vacancies.

The plenum of the approximately 250 full members of the Central Committee has the power to advance the congress and also to fire members of the Politburo. Political heads are expected to roll, diplomats said.

Tass quoted Gorbachev as saying he expected to prevail. ''I believe we shall be given support, although some critical remarks will be made,'' he said.

Gorbachev streesed ''the need to renew the party, to rid it of everything that tied it to the authoritarian bureaucratic system'' - a euphemism for a rigidly controlled central economy of no free markets, empty stores and

all their attendant ills.

''The party needs to get rid of the ideolgical dogmatism ingrained during past decades, of outdated stereotypes in domestic policy and outmoded views on the world revolutionary process and world development as a whole '' he said.

Twelve speakers, including the mercurial Boris Yeltsin, took the floor after Gorbachev's opening address. On Sunday Yeltsin told a mass rally in Moscow that he would urge the party Central Commitee to suspend its activity, and for excising Article 6 of the Constitution on the party's sole right to rule.

With his apparent blessing of a multiparty system and his pledge last month to give the country's 15 republics a new legal mechanism for secession, Gorbachev has carved two pillars of perestroika that could change the face of the Soviet Union.

#90036u2526 02/05/1990 ~United Press International

LOS ANGELES (FEB. 6) UPI - Aerospace giant Lockheed Corp., facing a possible proxy fight from Texas investor Harold Simmons, said Monday it has rejected Simmons' requests for six of the 15 seats on Lockheed's board.

The company also reported a fourth-quarter loss of $109 million, off from earnings of $104 million, or $1.75 a share, in the same period of 1988, on revenues of $3 billion, up from $2.9 billion for the 1988 quarter.

Lockheed said its directors had affirmed the decision by Chairman Daniel Tellep to turn down the request by Simmons, who disclosed last week that he has boosted his stake to 18.9 percent of the company's common outstanding stock from 17.9 percent.

Lockheed also said its board had affirmed Tellep's rejection of Lockheed's request that it redeem the shareholder rights of its anti-takeover measure which would be triggered if Simmons' holding reached 20 percent.

Monday's announcement from Lockheed came after Simmons-controlled NL Industries said the Securities and Exchange Commission is conducting an investigation into NL Industries. The company said it believes the probe is focused primarily on the adequacy of disclosures in security ownership filings NL Industries has made on purchases of Georgia Gulf and Lockheed.

''We are cooperating fully with the commission's staff and we believe no laws or rules have been violated,'' Simmons said.

Analyst Lawrence Harris of Bateman Eichler, Hill Richards said the SEC

investigation will probably delay Simmons from making any further moves on Lockheed.

''I think the investigation puts some stumbling blocks in Simmons' way,'' Harris said.

Analysts have said that they doubt that Simmons wants to take over Lockheed, but merely recover his $530 million investment, acquired at an average price of $44 a share.

''Simmons just wants to make money,'' said George Podrasky of Duff & Phelps. ''I don't think the market has accepted him as a bonafide future operator of Lockheed.''

The stock fell 75 cents Monday to $37.125 a share on the New York Stock Exchange.

-30- 2283

#90036u2602 02/05/1990 ~United Press International

(FEB. 5) UPI - Mikhail Gorbachev accepts a multi-party system for the Soviet Union... Ronald Reagan is being forced to testify in an Iran-Contra trial... Senior government officials in South Africa say apartheid won't be abolished... And another former HUD official takes the fifth... Details, next, from U-P-I.

Political observers predicted dramatic events would occur at the two-day Communist Party plenum that started today in Moscow, and so far the meeting has lived up to expectations.

Soviet President Gorbachev opened the session by declaring the Soviet Union is ready for a multi-party system and communists were prepared to compete- quote- ''within the framework of the democratic process.''

The announcement reverses Gorbachev's prior stance that opposition parties would detract from his system of reforms, and also lays the groundwork for overturning Article Six of the Soviet Constitution- which mandates a communist political monopoly.

Another step Gorbachev took today was to request that the Communist Party Congress be held in June or July.

While Gorbachev can use meetings such as today's to get rid of hardline Central Committee members he sees as obstacles to perestroika, he can only fill vacant roles in the hierarchy through a party congress.

In Washington, the White House refused to speculate on the events at the Kremlin. Presidential spokesman Marlin Fitzwater explained the

watch-and-wait attitude as stemming from the Bush administration's desire NOT to say anything- quote- ''that might be disruptive'' to the Moscow meeting.

-30- 1750

#90036u2679 02/05/1990 ~United Press International

(FEB. 5) UPI - In Washington, U-S District Judge Harold Greene stood his ground today and let stand a ruling ordering former President Reagan to turn over excerpts of his executive diaries before the end of the day.

Under the terms of today's decision, Reagan also must testify on videotape at the Iran-Contra trial of his former national security adviser, John Poindexter. The trial begins on February 20th.

Last Friday, the Justice Department filed a motion with Greene to delay the deadline for Reagan submitting the excerpts. But Judge Greene dismissed the motion, saying it- quote- ''has NO substantial basis'' and ''ignores or glosses over'' important legal principles.

The federal judge also gave Reagan until the end of the week to raise a claim of ''executive privilege,'' citing a unanimous decision by the Supreme Court against its use by former President Nixon in 1974.

Poindexter is the eighth and final Reagan administration figure to face charges in connection with funneling money to the Contra rebels despite a congressional embargo against such financing.

In each of the previous court cases, Reagan has been able to avoid having to testify.

Greene's decision stems from having privately read through Reagan's diaries and his belief that some 30 passages contain information relevant to Poindexter's defense.

#90036u2727 02/05/1990 ~United Press International

(FEB. 5) UPI - The leader of South Africa's right-wing Conservative Party renewed his call for President Frederik de Klerk's resignation today... saying de Klerk has NO mandate from the white electorate for his racial reform program.

Conservative leader Andries Truernict... who was heckled by members of de Klerk's party... warned that de Klerk has ''awakened the tiger in the Afrikaner.''

The call for de Klerk's resignation follows weekend attacks by white

extremists in South Africa. In one of the attacks... unidentified extremists backing an all-white homeland fired shots at the British Embassy... apparently in retaliation for Britain's praise of de Klerk's reform efforts.

Police say six white men will be charged with murder for an attack Saturday on a group of blacks in which one black was kicked to death.

Senior government officials tell foreign correspondents that despite de Klerk's reform measures... the government has NO plans to abolish the pillars of apartheid... segregated education and racially exclusive suburbs.

Jury selection is under way in the San Francisco trial of a federal judge accused of using his judicial post to aid felons by influencing two other judges, lying to the F-B-I and disclosing wiretap information.

U-S District Judge Robert Aguilar is the first federal judge to be tried on racketeering charges. If convicted on all eight counts, he could spend up to 55 years behind bars and faces a two-Million-dollar fine.

In the case's first bit of legal jockeying this morning, U-S District Judge Louis Bechtle of Philadelphia ruled against the defense by refusing to exclude as evidence two recorded conversations between Aguilar's co-defendants.

Aguilar had hoped to exclude taped conversations between Rudy Tham and Abe Chapman as improperly obtained, and then topple the legal foundation of F-B-I bugs on his telephones.

#90036u2751 02/05/1990 ~United Press International

BURBANK, Calif. (FEB. 5) UPI - American investors started trading shares Monday of Euro Disneyland, the Disney theme park due to open in 1992 near Paris, with the stock posting a big advance in heavy trading on the Paris exchange.

The stock, which was issued three months ago by Walt Disney Co. to finance the project, closed Monday up $2.125 at about $18.625 on the Paris exchange.

The Euro Disney project, which has an estimated cost of $2.5 billion, has been sited on a 5,000 acre tract. Disney recently announced plans to open a MGM-Disney movie studio, similar to its theme park by the same name in Orlando, Fla., in 1996.

Securities and Exchange Commission rules prevented the stock from being

sold for a 90-day period in the United States. That period expired Monday.

The stock sold at an initial public offering at five European exchanges at $11.50 a share.

Walt Disney holds a 49 percent stake in the Euro Disneyland stock, or 83.3 million shares of the issue. Officers with Disney had no comment on the stock price.

Dennis Hardaker, director International Assets Advisory Corp. in Irvine, Calif., said interest by American investors in the stock has been heavy.

#90036u2755 02/05/1990 ~United Press International

(FEB. 5) UPI - Another former Housing and Urban Development official took the Fifth Amendment today as he appeared before a House panel investigating fraud and abuse at HUD during the Reagan administration.

Subcommittee Chairman Thomas Lantos asked James Hamernick... the former director of HUD's Office of Insured Multi-family Housing Development... only one question. He asked Hamernick why another former HUD official who'd left the agency for the private sector spent two-thousand dollars on meals and entertainment for Hamernick.

Hamernick invoked the Constitution's Fifth Amendment protection against self-incrimination and said he wasN'T going to answer any questions. The other former HUD official in question is Lance Wilson... who was an executive assistant to former HUD Secretary Samuel Pierce. Wilson has taken the fifth himself. So has Pierce. A total of five former HUD officials have now taken the fifth top avoid testifying.

Also today... Lantos postponed the scheduled appearance of Thomas Demery... a former HUD assistant secretary... because of the attorney general's decision last week to seek the appointment of a special prosecutor.

Lantos says the House will continue its own parallel investigation of alleged HUD abuses.

-30- 1428

#90036u2771 02/05/1990 ~United Press International

(FEB. 5) UPI - The House Ways and Means Committee will deliver a report tomorrow that could level a serious blow to President Bush's plan to cut capital gains taxes.

The report by the Congressional Budget Office will offer evidence that

during the 1980's... the rich paid lower taxes on more income... while the poor felt a sharper tax bite.

The report shows the effective tax rate for the poorest 20 percent of American families rose 16-point-one percent during the 1980's... while real income rose three-point-two percent.

During the same period... the report says the effective tax rate for the richest 20 percent of families dropped by five-point-five percent... while their real income rose 31-point-seven percent.

The report will add fuel to Democratic claims that lowering the levy on profits from the sale of assets such as stocks, bonds and real estate... would only help the rich... who doN'T need help. Some Democrats are suggesting cutting Social Security taxes instead.

#90036u2955 02/05/1990 ~United Press International

(FEB. 5) UPI - A Washington federal judge has given former President Reagan until the end of the day to turn over excerpts of his presidential diaries to his former national security adviser, John Poindexter. Reagan was also ordered to testify by videotape in Poindexter's upcoming Iran-Contra criminal trial.

In Yugoslavia, ethnic Albanians turned out by the tens of thousands today to pay a silent tribute to 27 demonstrators killed in clashes with riot police in the country's southeastern Kosovo province. Military jets flew low over the city of Pristina in a show of power aimed at intimidating the crowd.

Authorities in Joliet, Illinois, say a hostage-standoff ended in a triple homicide-suicide today. Police say James Breen, who was reported to have a history of mental problems, killed his two sons and a young woman and wounded his wife before killing himself.

A 16-year-old girl remains in critical condition at a Salt Lake City

hospital... three days after becoming the first recipient of an experimental man-made lung substitute. The Intravascular Oxygenator device supplies blood with oxygen and removes carbon dioxide.

Nebraska state legislators have voted to outlaw use of the terms ''Outstate Nebraska,'' ''Greater Nebraska,'' and ''Lesser Nebraska'' to describe areas of the state outside Omaha and Lincoln. State officials caught using the terms are subject to a 50-dollar fine.

A Malaysian judge today ruled an American citizen arrested for possessing one-pound of marijuana must wait to learn his fate just like any other prisoner accused of drug trafficking. Kerry Wiley's lawyer tried to speed the trial's pace due to Wiley's severe depression. Wiley could be sentenced to death.

Washington, D-C, Administrator Carol Thompson... who's running the nation's capital while Mayor Marion Barry is in a Florida substance abuse clinic... says the city is running just fine and she's in daily contact with the mayor.

A survey by Harpers and Queen magazine ranks the queens of England and the Netherlands as the two richest women in Europe. The five-year-old daughter of the late Greek shipping heiress Christina Onassis comes in number seven on the list.

Saying his state would be remiss if it didN'T plan ahead, Florida Governor Bob Martinez today appointed a so-called Free Cuba commission. The 13-member panel will prepare the Citrus State for the upheaval that would occur should Cuban leader Fidel Castro step down from power.

Baseball memorabilia collector Barry Halper is trying to unload a rare proof sheet of five 80-year-old baseball cards. But experts say Halper is in left field in terms of price. Halper has placed a two-Million-dollar price tag on the set.

#90036u3222 02/05/1990 ~United Press International

(FEB. 5) UPI - White House spokesman Marlin Fitzwater says the United States has always favored political pluralism and the movement toward private-market economies.But he says the Bush administration plans to remain firmly silent about the watershed Communist Party plenary session going on in Moscow that could open the way for opposition political parties. Fitzwater says President Bush does NOT want to issue comments that might be ''disruptive.''

A federal judge is ordering former President Ronald Reagan to turn over excerpts of his diary before the end of the day... and he says Reagan must

testify on videotape in the trial of former national security adviser John Poindexter. The Justice Department argued for a delay of today's deadline. The judge gave Reagan a deadline of Friday to raise a so-called ''executive privilege'' claim.

Defense Secretary Cheney and chairman of the Joint Chiefs of Staff, General Colin Powell, went before Capitol Hill lawmakers today and justified the Pentagon's 307-BILLION-dollar budget. In response to a Budget Committee report outlining Pentagon waste, Cheney said new management systems have been introduced to save money. But he warned against saving money at the expense of reducing America's military security.

Dairy industry leaders today defended the purity of milk saying detractors of their product's safety canNOT substantiate their accusations. Officials representing every step from cow to consumer appeared at a Washington news conference. They said virtually every truckload of milk is tested at some point in the system.

Washington, D-C, homeless activist Mitch Snyder... who founded a shelter on Capitol Hill... is praising a ruling by a federal judge that begging is a constitutional right that can NOT be prohibited. Snyder says bans against begging are unenforcable anyway. In his words- ''When people are desperate... they will beg.''

-30- 2089

#90036u3528 02/05/1990 ~United Press International

(FEB. 5) UPI - Thousands of Beirut residents have fled their homes for underground shelters and mountain caves. They're escaping the warfare between rival Christian forces. Security sources report at least 212 deaths in the six days of fighting. Christian officials say hospitals in east Beirut are in need of vital supplies. In both east and west Beirut electricity is off and drinking water is rare. The Red Cross is calling for a cease-fire to evacuate the wounded.

There are differing reports about what took place today along the Pakistan-India border. The Press Trust of India reports thousands of Pakistani supporters of the Moslem separatists movement in Kashmir crossed into India and set crops on fire. The report says troops fired on the crowd... wounding at least 10 people. Pakistan denies the protesters crossed the border. The Pakistan government says Indian security forces fired into Pakistan... killing one and wounding 12.

The American Cancer Society reports an expected drop in lung cancer deaths among men for the first time since the organization started keeping statistics in 1953. The Society says the drop is a result of the drop in cigarette smoking among young men that has finally caught up. The

mortality rate for men over 65 continues to increase. The lung cancer death rate for women is NOT expected to drop.

Labor Secretary Elizabeth Dole says the department is preparing new limits on the amount of cadmium that can be present in the air at workplaces. Cutting permitted levels of the cancer-causing metal by 99 percent could cut 14 cancer deaths a year and would cost 160-Million dollars. Cutting the level just 95 percent... another option being considered... would save an estimated four lives a year- but would cost only 57-Million dollars.

#90036u3756 02/05/1990 ~United Press International

(FEB. 5) UPI - The Islamic Jihad has claimed responsibility for yesterday's attack on a bus near Cairo that killed nine Israeli tourists and wounded 17 others. A previously unknown group calling itself the Group for Oppressed Prisoners also claims it was behind the massacre. Meanwhile, Egyptian police have arrested a Palestinian in connection with the attack. His detention follows the release of three men who had been taken into custody earlier today.

Ronald Reagan's attorney is seeking to void a subpeona for the former president's personal diaries which contain details of the Iran-Contra scandal. Attorney Theodore Olson filed a motion this afternoon claiming executive privilege to delay a federal judge's order that Reagan turn over the diaries today. But the motion did NOT include a move to bar Reagan from testifying on videotape at the Iran-Contra trial of John Poindexter.

The head of the Social Security administration warned a Senate Committee today against ''major surgery'' on the social security system. And, although many panel members praised New York Senator Daniel Moynihan's proposal to slash social security taxes, it appears as if they'll heed Gwendolyn King's advice. None of Moynihan's fellow Democrats approved the radical measure.

Secretary of State Baker has left for Europe and the Soviet Union for precedent-setting testimony before the Soviet equivalent of the Senate Foreign Relations Committee. Baker first stops in Shannon, Ireland, to discuss German re-unification with the French foreign minister. Then he goes to Czechoslovakia for talks with Czech President Havel and to give a speech at a Czech University.

-30- 1834

#90036u3783 02/05/1990 ~United Press International

(FEB. 5) UPI - Some analysts say today's Labor Department report on productivity and costs may set the stage for steeper inflation ahead. The government report says that, in the last quarter of 1989, worker output

decreased and the number of hours worked fell... while hourly pay jumped by nearly seven percent. One economist points out business will try to offset the pay hikes by raising prices.

East Germany has a new government cabinet today. Nine new opposition members were sworn in as ministers of a coalition government to serve until the March elections. Communist Prime Minister Modrow ... who has accepted the idea of German re-unification... says he realizes that Western governments don't like his proposal for a neutral Germany. Today he suggested that both sides at least cut their military forces.

A Memphis woman today filed a 10-Million-dollar lawsuit to clear her name. The 52-year-old woman claims the Reverend Ralph Abernathy implied in his book on Martin Luther King Junior that she slept with the civil rights leader the night before his death. The woman says- quote- ''This is absolutely NOT true.'' Abernathy's wife dismisses the suit, saying the woman's name was NOT even mentioned in the book titled ''And The Walls Came Tumbling Down.''

Andrew Young is starting his bid tonight to become the first black governor of Georgia. Although Young has served as mayor of Atlanta, U-S Ambassador to the United Nations and U-S congressman, he is considered an underdog. The race includes Democratic Lieutenant Governor Zell Miller... Republican state Representative Johnny Isakson... and a host of other candidates.

-30- 1815

#90036u3956 02/05/1990 ~United Press International

(FEB. 5) UPI - The latest news from across the nation and around the world... details and developments from the wires of United Press International.

Soviet President Gorbachev told the Communist Party's Central Committee today that the country is undergoing what he calls ''revolutionary transformation'' and the party needs to change fast to survive.

Gorbachev said the party has to be ready to give up its constitutional monopoly on power and eventually allow for the creation of opposition political parties.

Gorbachev also asked to move up a party Congress that will allow him to replace hard-liners with reformers. The congress will take place this summer, four months earlier than scheduled.

He warned that if the party does NOT ''renew'' itself... it could die in the new politics of powerful nationalist fronts and emerging political groupings.

Gorbachev called for another Central Committee plenum in three weeks to draft the democratic charter for the party. He urged quick action... saying he had hoped to surmount the peak of the crisis 1989... but that ''recent events'' have shown that there has been NO change for the better.

Secretary of State James Baker has embarked on a foreign trip that will see him become the first American to testify before the committee on International Relations of the Supreme Soviet. That's the equivalent of the U-S Senate Foreign Relations Committee.

Before he ventures into the rapidly changing political scene of the Soviet Union... he has several stops including Shannon, Ireland, where he'll meet the foreign minister of France to discuss German re-unification.

Baker goes to Czechoslovokia to meet President Havel and address students at a Czech University. U-S officials hold open the possibility that Baker will announce a new U-S financial aid program for Czechoslovakia.

In Moscow... Baker meets with Soviet Foreign Minister Shevardnadze to talk arms control... Afghanistan... and the future of East-West relations.

Baker's schedule remains a partial mystery. A gap from February 10th to the 11th may be left open for a conference somewhere in Europe between Baker and the foreign ministers of Egypt and Israel.

-30- 2386

#90036u3974 02/05/1990 ~United Press International

(FEB. 5) UPI - A claim of executive privilege threw a wrench into a federal judge's order today that Ronald Reagan surrender parts of his diaries concerning the Iran-Contra scandal.

U-S District Judge Harold Greene also ordered Reagan to testify on videotape at the Iran-Contra trial of John Poindexter. The former national security adviser faces five felony charges at his Iran-Contra trial scheduled to begin February 20th.

At issue is Poindexter's role in the complex scandal involving secret weapons sales to Iran, efforts to win freedom for American hostages in Lebanon and financing of covert operations to aid the Nicaraguan Contra rebels.

In filing the motion invoking executive privilege, Reagan's lawyer, Theodore Olson, asked Greene to throw out the subpoena for Reagan's diaries on constitutional grounds. The diaries were to have been surrendered today, but Olson's appeal delayed the order.

The judge made NO immediate ruling on Reagan's claim of executive privilege.

Reagan's lawyer did NOT address the order for Reagan's videotaped testimony. That issue may be appealed until Friday.

New York Senator Daniel Moynihan today defended his plan to cut Social Security taxes by 55-BILLION dollars over the next two years.

During a Senate hearing, several Finance Committee members... including Chairman Lloyd Bentsen of Texas... thanked Moynihan for forcing a debate on the issue... but none of the lawmakers backed his bill.

Republicans attacked it as a ''twin toxic menace'' that would bankrupt the retirement fund by 1998.

The Bush administration and Congress have used the growing Social Security trust fund surplus... nearly 65-BILLION-dollars this year and an estimated 80-BILLION in fiscal 1991... to mask the size of the federal deficit.

Some lawmakers have called that practice ''thievery'' and ''embezzlement'' and have filed legislation to stop the practice.

Comptroller General Charles Bowsher testified against continued use of the surplus to mask the deficit because- in his words- ''it has encouraged the avoidance of the hard choices'' needed to get a balanced budget. He says he hopes Moynihan's bill will ''provide the catalyst to compel such action.''

-30- 2404

#90036u4004 02/05/1990 ~United Press International

(FEB. 5) UPI - The Egyptian government is advising Israel NOT to abandon the peace process because of yesterday's attack on Israeli tourists by unknown gunmen in Egypt.

But sources in Israel say the government has indefinitely shelved a meeting that was scheduled for next week in Geneva between the foreign ministers of the United States, Egypt and Israel to promote an Israeli-Palestinian dialogue.

Two groups, including the Islamic Jihad, have claimed responsibility for the attack that killed nine Israelis. The Islamic ''Holy War'' group said it attacked the bus- quote- ''to smash all those who dream about a peaceful solution'' to the Israeli-Palestinian issue.

The P-L-O is condemning the attack.

Egyptian officials have arrested a Palestinian man in connection with the attack. They also released three men who they thought were carrying forged Saudi Arabian passports when the documents turned out to be genuine.

Thousands of Beirut residents have fled their war-torn city for the safety of underground shelters and mountain caves after six days of fighting between rival Christian forces. The battling has left at least 212 dead and more than 800 wounded.

Christian officials say hospitals in east Beirut need blood, medicine, drinking water and fuel to operate electric generators. There is NO electricity and very little drinking water in both east and west Beirut.

A policeman who fled the Christian enclave said that, while trying to leave the area, he was repeatedly terrified by gunmen who warned him to avoid many mined roads. He said many streets were blocked with huge piles of rubble, remains of wrecked cars and broken trees.

The Red Cross has called on rival troops of strongman General Michel Aoun and militia leader Samir Geagea to stop shooting to allow the organization to evacuate the wounded and supply medications to hospitals in east Beirut.

Aoun and Geagea have been vying for the control of the leadership of the Christian enclave.

#90036u4011 02/05/1990 ~United Press International

(FEB. 5) UPI - Defense Secretary Dick Cheney told the Senate Budget Committee today that the defense department was ready for some cuts. But he warned against dropping military defenses in case the Soviet Union's reform administration falls.

Cheney said the Soviet Union was the only country capable of destroying the United States and- in his words- ''We have to guard against making unwise and unjustified changes in our own security arrangements that are based solely on stated intentions of a regime that may or may NOT be around.''

Joint Chiefs of Staff Chairman Colin Powell told the panel he wanted to- quote- ''enter this brave new world in a prudent, cautious way.''

Cheney defended the Bush administration's proposed 307-BILLION-dollar Pentagon budget against charges that BILLIONS of dollars are being thrown away by stockpiling unusable spare parts.

Cheney says those charges are being investigated.

In Alaska today, opening statements were given in the trial of the skipper of the Exxon Valdez.

Prosecutor Brent Cole portrayed Captain Joseph Hazelwood as a drunken skipper whose alcohol-impaired judgment led to reckless decisions that caused his tanker to run aground and spill nearly 11-Million gallons of oil.

Cole said Hazelwood spent an afternoon and evening drinking vodka and beer in at least two bars before the March 24th wreck.

Cole said Hazelwood manifested poor judgment by putting his vessel on automatic pilot during a detour around icebergs and then leaving the tanker in the hands of an unqualified third mate speeding through treacherous waters.

Defense lawyer Dick Madson called it a ''maritime accident'' and said Captain Hazelwood was NOT responsible for the accident.

Madson said Hazelwood was buying flowers to wire his wife when he was supposedly in a bar the afternoon before he sailed his loaded tanker out of the oil port of Valdez into Prince William Sound.

The Huntington, New York, skipper is standing trial on three misdemeanors and one felony count. He could face seven years and three months in jail and a 61-thousand-dollar fine if convicted on all counts.

#90036u4108 02/05/1990 ~United Press International

(FEB. 5) UPI - Secretary of State Baker is off to Europe, where his agenda includes meeting with his French counterpart to discuss the issue of German reunification. Baker also will meet with Czech President Havel before traveling to Moscow.

Environmentalists say the cautious course outlined by President Bush to combat global warming fails to address the immediacy of the problem. Speaking before an international panel in Washington, Bush said more scientific data is needed before the international community can devise a coherent policy.

In a report to be released tomorrow, the House Ways and Means Committee has concluded that during the 1980's, America's wealthy paid lower taxes on more income. The finding could detract from President Bush's intention of cutting capital gains taxes.

Palestinian and Israeli police sources say seven masked men axed a Palestinian man and his pregnant wife to death. Doctors managed to save

the unborn child. The couple was accused of collaborating with Israeli authorities.

East Germany's Parliament increased its size by nine members today. The new ministers- all from opposition parties and movements- will help lead the country through its March 18th general elections.

-30- 1397

#90036u4220 02/05/1990 ~United Press International
(FEB. 5) UPI - Police chiefs from around the country today urged President Bush to support a bill before the U-S Senate to ban 14 assault weapons and impose tough penalities if they're used by drug traffickers. The Senate is scheduled to vote on the bill Wednesday. Members of the

International Association of Police Chiefs meeting in San Jose, California say Bush's support can make a difference.

Chinese hardline Communist Premier Li Peng says that, despite recent criticism of the United States, China will continue its open-door policy. Li told a delegation of former U-S lawmakers in Beijing that the Chinese government attaches great importance to friendship between the Chinese and American people. China has criticized the United States for limited economic sanctions.

During an impromptu rally one day after his narrow victory, Costa Rica's president-elect vowed to fight drug trafficking. President-elect Rafael Calderon gave NO details of what measures he planned to take to combat illegal drug activities in Costa Rica. Calderon also says his government will have good relations with the United States because he is a friend of President Bush.

Civil rights activist Jesse Jackson emerged from a meeting with British Prime Minister Thatcher saying he failed to convince her to support economic sanctions against South Africa. Jackson said he and Thatcher ''agreed to disagree'' on the value of sanctions to speed South Africa toward reform. Thatcher says recent reform measures vindicate her opposition to economic sanctions.

#90036u4229 02/05/1990 ~United Press International

(FEB. 5) UPI - The E-P-A today harshly criticized Exxon Corporation for failing to answer questions about last month's oil spill in New Jersey. The pipeline ruptured on New Year's Day. About 500-thousand gallons of fuel spilled into the Arthur Kill... a narrow river that separates Staten Island, New York, from New Jersey. The E-P-A issued new guidelines to make sure a leak never occurs again and said Exxon must answer the questions and abide by the new rules before the pipeline can be re-opened.

Automakers report sales of U-S made cars and trucks last month rose six-point-two percent from a year ago. However, industry analysts point out that January's strong showing was fueled by costly incentives that are sure to depress first-quarter profits substantially. The analysts say the improvement in sales will NOT continue into the coming months.

The Senate votes on a National Literacy Act tomorrow. By voice vote today... Senators voted to add an amendment by Missouri Senator Christopher Bond that puts Missouri's ''Parents as Teachers'' program on a national scale. If approved... the program will allow school districts around the country to offer federally funded educational aid and counseling to parents to teach their children.

A Clinton, Connecticut, police sergeant who filed a federal lawsuit because he claimed a deputy police chief dragged him across a room by his ear has agreed to an undisclosed settlement. Sergeant Armando Casucci charged that Deputy Police Chief Charles Hynes had ''physically attacked'' him last March after he failed to respond to a morning greeting. The deputy police chief admitted seizing Casucci's ear... but said it was just ''horseplay.''

#90037b0014 02/06/1990 ~Business Wire

RESTON, VA (FEB. 6) BUSINESS WIRE - US Sprint Tuesday announced a strategic move into the local area network (LAN) connectivity marketplace by offering a family of products, called LAN Reach(sm), that will extend the reach of LANs.

The first LAN Reach product will provide nationwide connectivity for LANs via the SprintNet data network. LAN Reach can link widely separated LANs and connect LANs to host computers or stand-alone PCs to form a single, enterprise-wide network. Once connected, users can share information beyond the local level.

US Sprint's strategy is to develop an array of LAN connectivity products based on several different technologies and standards. Under the LAN Reach umbrella, LAN connectivity will be offered on Switched 56 service and point-to-point private line service later this year.

LAN Reach provides a very cost-effective way of moving information for customers with three or more geographically dispersed LANs. Pricing is traffic insensitive: users pay a one-time installation charge and then a fixed monthly rate for service, depending on the speed of the service.

Currently, in addition to providing X.25 connectivity, LAN Reach also supports the X.400 protocol. Dissimilar LANs, each having an X.400 interface, can interconnect via LAN Reach and the SprintNet data network.

These LANs also can use the X.400 interface to interconnect with users of the SprintMail electronic messaging service and, via SprintMail, to hundreds of thousands of users on other domestic and international electronic messaging systems. The company is also exploring support of other protocols, such as IEEE 802.6.

US Sprint is working with LAN bridge, router and gateway vendors to develop products for LAN connectivity. It has recently signed an agreement with Eicon Technology Inc. to resell Eicon's X.25/LAN gateway and bridge products, and has under development an integrated network management system to provide information on the management of the SprintNet - Eicon gateway interconnection. US Sprint expects to announce other agreements during 1990.

US Sprint provides domestic and international long-distance voice, data and videoconferencing services and products and is a leading worldwide resource for information networking systems and services. US Sprint and its parent company, United Telecommunications Inc. are based in Kansas City, Mo.

#90037b0017 02/06/1990 ~Business Wire

SANTA CLARA, CA (FEB. 6) BUSINESS WIRE - Hitachi Data Systems (HDS) Tuesday disclosed plans for two new storage products to provide customers flexible growth paths.

Both products are designed to meet customers' growing demand for data storage capacity. HDS plans to ship a new family of Direct Access Storage Devices (DASD), the 7390 Family and a new high-capacity cartridge tape subsystem, the 7490 Family. Initial shipments of the 7390 and 7490 will begin by the end of 1990.

The new 7390 Disk Storage Subsystem will feature 9.5-inch disk platters in sealed Head Disk Assemblies (HDAs) with single actuators for higher levels of data availability and maximum device performance.

Each HDA, together with its supporting electronics, is contained within a single field replaceable unit called a Head Disk Assembly Unit, or HDU.

This design approach, proven in the current generation 7380 family, leads to higher levels of reliability and maintainability. The 7390 will be capable of storing from 3.75 gigabytes to 60 gigabytes of data per string.

"The 7390 family extends the superior technology of our current generation 7380 DASD family. We have more than 8,000 7380s already installed using this base technology and we expect to continue our industry leadership in reliability and performance," said James Balassone, HDS executive vice president of marketing. All new models of the 7390 Disk Storage Subsystems will be supported by the 7980 Control Unit in four path mode at first customer shipment.

The 7490 will provide increased serviceability and improved floor space utilization. The 7490 Family consists of a control unit which can contain up to two controllers per cabinet and drive units which will contain four transports per cabinet. The 7490 offers the improvements in electronic packaging and reliability introduced in the VLSI version of the 7480. The 7490 will also include rear service access for improved serviceability and reduced repair time.

Data compression, introduced by HDS in 1987, has been extended to offer compatibility with recent developments in industry-standard data compression formats. Called Data Compression II, this feature will add increased data interchange capability to the performance and capacity improvements already offered by HDS' data compression. Data Compression II will be standard on all models of the 7490. Additionally, Data Compression II will be available as an upgrade to existing 7480 models.

RESTON, VA (FEB. 6) BUSINESS WIRE - US Sprint Communications Co. and Eicon Technology Inc. Tuesday announced an agreement under which US Sprint will market a turnkey LAN-to-WAN connectivity solution which combines Eicon's LAN products with US Sprint's worldwide data communications network, SprintNet(sm).

The two companies also have agreed to develop an integrated network management system to provide information on the management of the SprintNet - Eicon interconnection.

Under terms of the agreement, US Sprint will resell Eicon Technology's LAN gateway and bridge products, effectively providing its customers with direct local area network (LAN) access to the SprintNet data network.

Eicon Technology Corp. provides advanced data communications solutions for

micro-to-mainframe and LAN-to-LAN connectivity. With headquarters in Montreal, Canada, the company offers worldwide sales and service support. For further information, contact Cynthia Yacowar; 2196 - 32nd Ave. (Lachine), Montreal, Quebec, Canada H8T 3H7. Telephone, 514/631-2592.

#90037b0027 02/06/1990 ~Business Wire

SANTA CLARA, CA (FEB. 6) BUSINESS WIRE - Calera Recognition Systems Tuesday announced it has signed an OEM agreement with Digital Equipment Corp. to license the Calera Recognition Server 9000 (RS 9000), a scannerless recognition engine for processing captured image files in a networked environment.

The server is to be incorporated into the DEC image family of integrated electronic image processing products as announced by Digital in December.

''Calera is pleased to be a chosen OCR supplier by Digital and to be supporting the VAX platform,'' said Steve Hayden, president and chief executive officer of Calera Recognition Systems. ''This agreement is important because it demonstrates Digital's commitment to a comprehensive full text and image electronic filing system.''

The agreement with Digital follows a long line of other similar agreements with companies such as Wang, REI, Eastman Kodak Co. and Mentor Graphics. In each case Calera has contributed its recognition technology to the respective company's imaging systems product line.

Similar to Calera's Compound Document Processor (CDP 9000), the RS 9000 provides the fastest recognition -- up to 250 characters per second -- and operates in the background within a networked environment. It is designed for high-volume or time-sensitive applications.

Founded in 1982 as The Palantir Corp., Calera Recognition Systems is the leading manufacturer of document recognition systems and scanners for use in the office environment. From the beginning the company has focused its attention on developing the highest performance document recognition

technology for uses ranging from desktop to large systems applications.

Today, Calera manufactures products for many leading platforms including IBM PC and PC-compatibles, PS/2 with MCA, Sun workstations, Apple Macintosh and VAX and is compatible with all leading scanners and software applications.

#90037b0029 02/06/1990 ~Business Wire

RESTON, VA (FEB. 6) BUSINESS WIRE - US Sprint Communications Co. Tuesday announced that it will market protocol conversion products made by Packet/PC Inc. of Framingham, Mass.

These products enable IBM PCs and compatibles to communicate more effectively with IBM hosts via the SprintNet data network. The Packet/PC products increase the range of IBM Services offered by US Sprint by supporting asynchronous communications with IBM hosts.

US Sprint's protocol conversion products serve users that require data communications between PCs at geographically distributed locations and IBM hosts connected to the SprintNet(sm) data network. Applications include order entry, retail store inventory tracking, financial transactions and many others.

For example, a major fast food retailer recently selected US Sprint's DataCall Plus service (traffic insensitive pricing) and Packet/PC products for cost-effective protocol conversion support for 700 of its remote users communicating with its IBM host.

US Sprint provides long-distance domestic and international voice, data and videoconferencing services and products and is a leading worldwide resource for information networking systems and services. US Sprint and its parent company, United Telecommunications, are based in Kansas City, Mo.

US Sprint - Packet/PC Technical Backgrounder

The Packet/PC protocol conversion products include hardware and software that enhance PCs so that they may communicate with IBM 3270 mainframes and with IBM AS/400, IBM System/36 and IBM System/38 computers. The products are Packet/Main, Packet/74 and Packet/3270 for IBM 3270 applications, and Packet/94 and Packet/5250 for IBM AS/400, IBM Systems/36, System/38 and IBM 5250 applications.

For the host-to-network connection, the products support IBM communications protocols for multiple simultaneous users at transmission speeds of up to 56 kbps. End users may access the network from their PCs at speeds ranging from 1200 bps to 9600 bps.

PORTLAND, OR (FEB. 6) BUSINESS WIRE - Pope & Talbot Tuesday announced it expects record 1990 lumber production that will exceed 1989 production by five to ten percent.

The announcement was in response to questions concerning log supplies for sawmills in the Pacific Northwest, and recent curtailments by other producers of softwood lumber in the region.

One-half of the company's current 645 million board feet of lumber capacity is represented by two recently expanded and modernized sawmills in British Columbia. Most of the timber for these mills is guaranteed by long-term cutting contracts with the provincial government.

Two other mills, representing 22 percent of total lumber capacity, are in the Black Hills of South Dakota, Wyoming, where timber supplies are adequate for current operations.

Pope & Talbot's fifth mill is a recently expanded facility at Port Gamble, Wash. This high-speed dimension mill purchases most of its logs from log exporters in the Puget Sound area. Port Gamble is designed to convert lower-grade logs from the export log mix. Higher prices for these logs can be a problem, but availability of log supply is not.

Last summer the company sold its only other mill in the Northwest. Part of the logic for selling its Oakridge, Ore., mill was concern about long-term availability of timber to run the facility.

The expansions in British Columbia and Washington mean that Pope & Talbot expects record lumber production in 1990 despite sale of the Oakridge mill. Furthermore, this year's record lumber production will be achieved with 15 percent fewer people than at the beginning of last year. Finally, wood products represent only 38 percent of total company sales.

Peter T. Pope, chairman and chief executive officer, stated, "This year's increased lumber production and mill productivity are examples of tangible returns from capital investments made in this division." He concluded, "We

are optimistic about the outlook for our Wood Products Division, even as log availability continues to be a problem in the Pacific Northwest."

Pope & Talbot Inc. is a publicly held, Portland-based pulp, paper and wood products company traded on the New York Stock Exchange. Pope & Talbot was founded in 1849 and has operations throughout the United States and in Canada.
